PREFACE

This volume contains six āhnikas and ends with the second adhyāya of Pāṇini's Aṣṭādhyāyī. The size was cut down on account of unforescen circumstances. Till now nearly 1500 pages have been printed. The remaining manuscript matter may come to another 2000 pages. I wish it too finds the light of day.

I am grateful to the Sahitya Akademi for financial assistance in the publication of this volume. My heartfelt thanks are due to the Government of India, Kāñci Kamakoti Mutt, Kumbaconam, Annamalai University and University of Travancore for their encouragement. May Mother Śivakāmasındarī & Lord Naṭarāja enable the remaining volumes to be published.

Thiruvaiyaru, 15—11—1962. P. S. SUBRAHMANYA SASTRI.

LECTURES ON PATAÑJALI'S MAHĀBHĀSYA

Volume VI

Ahnika — Twentythree

(Second adhyāya, second pāda, second āhnika)

अनेकमन्यपदार्थे (2, 2, 24)

There are seven topics here: 1-3. The need for the words pada, anya and anēka in the sūtra (4). The appropriateness or otherwise of using a word denoting individuality after a bahuvrīhi as in Citraguḥ Dēvadattaḥ; (5) The need for the parigaṇana of Bahuvrīhiḥ samānādhikaraṇānām etc.; 6-7. The nature of the samāsa in kimsabrahmacārī and arddhatrtīyā.

T

पदश्रहणं किमर्थम्? Why is pada read?

इह अनेकमन्यार्थे इति इयत्युच्यमाने वाक्यार्थेऽपि बहुन्नीहिः स्थात् - यथा में माता तथा में पिता, सुस्नातं भो इति
If anēkam anyārthē alone is here read, the sentence yathā mē mātā tathā mē pitā too which suggests the meaning susnātam

may compound into bahuvrīhi.

Note:—The sentence $yath\bar{a}...pit\bar{a}$ suggests the needlessness of a bath on account of his high pedigree in answer to the injunction $sn\bar{a}hi$.

पद्महणे पुनः क्रियमाणे न दोषो भवति But if pada is read, there will be no difficulty.

11

अथ अन्यग्रह्णं किमर्थम्? Why is then anya read?

अनेकं पदार्थे इति इयत्युच्यमाने स्वपदार्थेऽपि बहुत्रीहिः स्यात् - राजपुरुषः, तक्षपुरुष इति । If, $an\bar{e}kam \ pad\bar{a}rth\bar{e}$ alone is read, the compound expressing the meaning of the component parts like $r\bar{a}japuruṣah$ and takṣapuruṣah may be considered $bahuvr\bar{\imath}ki$.

नैतद्स्ति प्रयोजनम् । तत्पुरुषः स्वपदार्थे वाधको भविष्यति ।
This is not the benefit. Tatpurusa which expresses the meaning of component parts may veto it.

भवेदेकसंज्ञाधिकारे सिद्धम् । परङ्कार्थस्वे न सिध्यति । आरम्भसामर्थ्याच तत्पुरुषः, परङ्कार्थस्वाच बहुवीहिः प्राप्तोति ।

It is secured on adhering to the doctrine that there is only one sampää before the satra $Kad\bar{a}r\bar{a}h$...; but it will not do if $Pr\bar{a}k\ kad\bar{a}r\bar{a}t\ param\ k\bar{a}ryam$ is acceded to. It may be taken as tatpurusa on the strength of its being at the commencement and $bahuvr\bar{b}h$, since it, being para, may operate.

पर्ह्मार्थत्वे च न दोषः । शेष इति वर्तते । अशेषत्वान्न भविष्यति
There is no harm even if parankāryatva is acceded to. There is anuvitti for śēṣa. Rājapuruṣa, being away from the range of śēṣa, cannot be taken as bahuvrīhi.

शेपवचने उक्तम्

It was said with reference to the reading of sesa.

किमुक्तम्? What was said?

तत्र शेषवचनाहोषः सङ्ख्यासमानाधिकरणनञ्समासेषु बहुन्नीहिप्रतिषेध इति
The reading of śēṣa will lead to bahuvrīhi-pratiṣēdha with reference to saṅkhyāsamāsa, samānādhikaraṇasamāsa and nañsamāsa.¹

अधैकसंज्ञाधिकारे नार्थोऽन्ययहणेन ?

Is not, then, anya needed in ēkasanijāādhikārapakṣa?

एकसंज्ञाधिकारे च कर्तव्यम् । अक्रियमाणे ह्यन्यमहणे यथैव तत्पुरुषः स्वपदार्थे बहुत्रीहि वाधते, एवमन्यपदार्थेऽपि वाधते ।

It should be read even in ēkasamjūādhikārapakṣa. If anya is not read, tatpuruṣa will veto bahuvrīhi even with reference to anyapadārtha, as it does with reference to svapadārtha.

^{1.} Cf. Vol. V. pp, 16-17.

III

अथ अनेकग्रहणं किमर्थम्? Why is, then, anēka read?

अन्यपदार्थे इति इयत्युच्यमाने, एकस्यापि पदस्य बहुर्वाहिः स्यात् - सर्पिषोऽपि स्यात्, मधुनोऽपि स्थात्, गोमूत्रस्यापि स्यात्

If anyapadārthē alone is read, one word also may be taken as bahuvrīhi like api (which means a drop) in the expressions sarpiṣōspi syāt, madhunōspi syāt and gōmūtrasyāpi syāt.

Note: $-K\bar{a}iya\underline{t}a$ says, that $sy\bar{a}t$, in the opinion of some, means drop and it will be taken as $bahuvr\bar{\imath}hi$.

नैतद्क्ति प्रयोजनम् - सुप् सुपा इति वर्तते This is not the benefit. There is anuvṛtti for sup supā.

इदं तर्हि प्रयोजनं, बहूनामि समासो यथा स्यात् - सुसूक्ष्मजटकेशेन सुनताजिनवाससा ।

This, then, is the benefit that even more than two words as in su- $s\bar{u}k$ sma-jata- $k\bar{e}$ s $\bar{e}na$, and su-nata-ajina- $v\bar{a}sas\bar{a}$ can become $sam\bar{a}sa$.

उत्तरार्थं च अनेकग्रहणं कर्तव्यं 'चार्थं द्वन्द्वः', अनेकमिति । इहापि यथा स्यात् प्रक्षन्यग्रोधघवखदिरपलाज्ञाः इति

The word anēkam has to be read also to reach by anuvṛti the sūtra Cārthē dvandvaḥ which follows, to allow samāsa in plakṣa-nyagrōdha-dhava-khadira-palāśūḥ.

एतद्वि नास्ति प्रयोजनम् । आचार्यप्रवृत्तिर्ज्ञापयित बह्नामपि समासो भवतीति, यद्यम् उत्तरपदे द्विगुं शास्ति ।

This, too, is not the benefit. The procedure of $Ac\bar{a}rya$ ($S\bar{u}trak\bar{a}ra$) suggests that more than two words form $sam\bar{a}sa$, since he enjoins dvigu when it is followed by another word.

Note: $-K\bar{a}iyaļa$ reads: -Dvigugrahaṇam Taddhitārtha ... (2, 1, 51) ityanēna vihitasya samāsusya upalakṣaṇam.

तत्युरुपोऽपि तर्हि बहुनां शामोति

If so, more than two words may form tatpurusa too.

नेप दोषः, ग्रह्णेन तत्पुरुष उच्यते ; तेन व्हृनां न भविष्यति

This difficulty cannot arise, since *tatpuruṣa* is enjoined with specific reference to the former member and the latter member. Hence there is no chance for more than two words to form *tatpuruṣa*,

अत उत्तरं पठित Hence he (Vārttikakāra) reads the answer.

अनेकवचनमुपसर्जनार्थम्

Reading of anekam is for the sake of upasarjanatva.

अनेकग्रहणं क्रियते उपसर्जनार्थम्, प्रथमानिर्दिष्टं समास उपसर्जनम् इत्युप-सर्जनसंज्ञा यथा स्यात् - चित्रगुः शवलगुः इति ।

The word $an\bar{e}kam$ is read for the sake of upasarjanatva, so that $g\bar{o}$ in citraguli, and śabalagali may take upsarjanasamij $n\bar{a}$ by $Pratham\bar{a}nirdistam$ sam $\bar{a}sa$ upasarianam (1, 2, 43).

न वैकविभक्तित्वात्

No, it is secured from their taking the same case-suffix after them.

न वैतद्पि प्रयोजनमस्ति This, too, is not the benefit.

ं किं कारणम् ? Why?

एकविभक्तिस्वात् । एकविभक्तिचापूर्वनिपाते इत्युपसर्जनसंज्ञा भविष्यति -चित्रगुः शवलगुः इति — चित्रा यस्य गावः चित्रगुः तिष्ठति ; चित्रा यस्य गावः चित्रगुं पश्य ¹ ; चित्रा यस्य गावः चित्रगुणा कृतम् ; चित्रा यस्य गावः चित्रगवे देहि ; चित्रा यस्य गावः चित्रगोरानय ; चित्रा यस्य गावः चित्रगोः स्वम् ; चित्रा यस्य गावः चित्रगौ निष्ठहि ; चित्रा यस्य गावः हे चित्रगो इति ॥

On account of their being ēkavibhaktika. Upasarjana-saṃjūā of gō in citraguḥ and śabalaguḥ is secured by the sūtra Ekavibhakti cāpūrvanipūtē (1, 2, 44). Ekavibhaktitva is seen in the vigrahavākya here:-citraguḥ (citrā gāvaḥ yasya) tiṣṭhati; citragum, (citrā gāvaḥ yasya) puśya; citraguṇā (citrā gāvaḥ yasya) kṛtam; citragavē (citrā gāvaḥ yasya) dēhi; citragōḥ (citrā gāvaḥ yasya) svam; citragāu (citrā gāvaḥ yasya) nidhēhi; Hē citragō (citrā gāvaḥ yasya).

^{1.} Pašyčtí is another reading.

यदि तर्हि ¹ यतः कुनिश्चिरेव किञ्चित्पदमध्याहृत्य एकविमक्तियोगः कियते, एतदप्येकिविमक्तियुक्तं भवति, इहापि प्राप्तोति - राजकुमारी, तक्षकुमारी - राज्ञो या कुमारी राजकुमारी तिष्ठति; राज्ञो या कुमारी राजकुमारी पश्य; राज्ञो या कुमारी राजकुमार्या कृतं; राज्ञो या कुमारी राजकुमार्यो देहि; राज्ञो या कुमारी राजकुमार्या आनय; राज्ञो या कुमारी राजकुमार्या स्वं; राज्ञो या कुमारी राजकुमार्या निधेहि; राज्ञो या कुमारी हे राजकुमारि इति ।

If some word is brought in from somewhere and ēkavibhaktiyōga is secured, the following too will be ēkavibhaktiyukta and
hence upasarjanatva will appear in kumārī also of rājakumārī
and takṣakumārī. Ēkavibhaktitva is seen here:— Rājakumārī
(rājñō yā kumārī) tiṣṭhati; Rājakumārīm (rājñō yā kumārī)
paśya; Rājakumāryā (rājñō yā kumārī) kṛtam; Rājakumāryāi
(rājñō yō kumārī) dēhi; Rājakumāryāḥ (rōjñō yā kumārī)
ānaya: Rājakumāryāḥ (rōjñō yā kumārī) svam; Rōjakumāryām
(rājñō yā kumārī) nidhēhi; Hē Rājakumāri (rājñō yā kumārī).

एकविभक्तियुक्तमेव यत्रित्यम् । न चैति त्रित्यमेकविभक्तियुक्तमेव, राज्ञः कुमारीं पद्य राजकुमारीं पद्य इत्यपि भवति ।

The ēkavibhaktiyuktutva which is nitya is alone taken into account. The ēkavibhaktiyuktatva mentioned above is not nitya, since both the forms Rājūaḥ kumārīm paśya and Rājukumārīm paśya may be read.

किं वक्तन्यमेतत्? Is this to be so explained?

न हि No, it need not

कथमनुच्यमानं गंस्यते ?

How is to be understood without its being so explained?

एकग्रहणसामर्थ्यात् । यदि हि यदेकविभक्तियुक्तं चानेकविभक्तियुक्तं च तल स्याद्, एकग्रहणमनर्थकं स्यात् । विभक्तियुक्तमपूर्वनिपाते इत्येव वृयात् । By the strength of the reading of $\bar{\epsilon}ka$. If both $\bar{\epsilon}kavibhaktiyuktatva$ and an $\bar{\epsilon}kavibhaktiyuktatva$, can be had, no purpose will be served by reading $\bar{\epsilon}ka$ and he would have read the $s\bar{\iota}ttra$ Vibhaktiyuktam ap $\bar{\iota}ttra$ vibhaktiyuktam ap $\bar{\iota}ttra$

1. Yatah is not found in some editions.

IV

पदार्थाभिधानेऽनुष्रयोगानुपपत्तिरभिहितत्वात्

Inappropriateness of reading after bahuwīhi compound a word in apposition, since its meaning has already been denoted by it.

पदार्थाभिधानेऽनुपयोगस्यानुपपत्तिः चित्रगुर्देवदत्त इति

If bahuvrīhi is anyapadānthapradhāna, it is in appropriate to use a word in apposition after it, as Dēvadattaḥ in Citragur Dēvadattaḥ.

किं कारणम ! Why?

अभिहित्तत्वात् । चित्रगुश्रव्देनाभिहितः सोऽर्थ इति कृत्वा अनुप्रयोगो न प्राप्नोति

Since its meaning has already been denoted. Taking that its meaning is denoted by the word citraguli, the word Dēvadattaļi has no place after it.

न वानभिहितत्वात् । सामान्यभिधाने हि विशेषानभिधानम्

No, on account of its meaning not being denoted. For the individuality is not denoted, though the species is denoted.

न चेष दोषः This difficulty does not arise.

किं करणम्? Why?

अगमिहिनस्यात् । चित्रगुशब्देनानानिहिनः सोऽर्थ इति कृत्या अनुषयोगो मुपिर्धान

Since it is not denoted. Taking that it, meaning is not denoted by the word catraga, the word Diradattah is used after it.

્યામનમિ∂િલ્, યાં≄ણનોમેયોનો - પદાનિષ્યાનેડનું ઘોઘાનુંવવિધીમેલિને∻ રમાંદ્રતિ

How can it be said that the meaning is not denoted, one equations that has been read of ideal of diding an aparal planes, into all starts. Its

सामान्यामिधाने हि विशेषानिभधानम् - सामान्ये हि अभिधीयमाने विशेषोऽ-निभहितो भवति । तत्रावश्यं विशेषार्थिना विशेषोऽनुप्रयोक्तव्यः, चित्रगुः कः ? देवदत्त इति ।

On account of the individuality not being denoted at the mention of the species. For, even though the species, is denoted, the individuality is not denoted. Hence the word denoting the individuality has to be used by one who wants it to be denoted. He puts the question, "Who is Citrajuh?" and answers "Dēvadattah."

भवेत् सिद्धं यदा सामान्ये वृत्तिः । यदा तु खळ विशेषे वृत्तिः, तदा न सिध्यति - चित्रा गावो देवदत्तस्येति चित्रगुर्देवदत्त इति ।

It is true if $pad\bar{a}rth\bar{a}bhidh\bar{a}na$ is with reference to the species. If, on the other hand, it is with reference to individuality as in $citr\bar{a}$ $g\bar{a}v\bar{o}$ $D\bar{e}vadattasya$ iti citragur $D\bar{e}vadattah$ – it is not achieved.

तदापि सिद्धम् It is achieved even then.

कथम् ? How?

नेदमुभयं युगपद् भवति वावयं समासश्च । यदा वावयं, न तदा समासः ; यदा समासः, न तदा वावयम् यदा समासः, तदा सामान्ये वृत्तिः ; तत्र अवङ्यं विशेषार्थिना विशेषोऽनुप्रयोक्तत्र्यः चिल्लगुः कः ? देवदत्त इति ।

Both - sentence and $sam\bar{a}sa$ - cannot be formed at the same time. When it is $v\bar{a}kya$, it is not $sam\bar{a}sa$; when it is $sam\bar{a}sa$, it is not $v\bar{a}kya$; when it is $sam\bar{a}sa$, vrtti is with reference to species. In that case individuality has to be denoted by one who wants it by putting the question "Who is Citraguli?" and answering it " $D\bar{e}vadattali$."

सामान्यस्येव तर्ह्धनुप्रयोगो न प्रामोति - चित्रगुः कः? चित्रगु तत्, चित्रगु किश्चित्, चित्रगु सर्वम् इति ।

If so, species can have no chance of being the predicate, as in Citragu tat, Citragu kiñcit, Citragu sarvam which serve as answers to the question Citraguly kali?

Note:—The $p\bar{u}rvapak$ sin here thinks that no pronoun, definite or indefinite, can be used in apposition with a bahu- $vr\bar{i}hi$ compound after it.

सामान्यमि यथा विशेषस्तद्वत् । तत्र चित्रगु इत्युक्ते सन्देहः स्यात् सर्वं वा अविश्वं वा इति । तत्रावश्यं सन्देहिनवृत्त्यर्थं विशेषार्थिना विशेषोऽनुपयोक्तन्यः, चित्रगु तद् इति

If species too has the differentiating capacity like the individuality, it will be used as a predicate. At the mention of Citragu, it is not clear whether the species is referred to or individuality. At this there is absolute need for the individuality to be used as predicate by one who wants it, as citragu tat.

Note:—Mention of citragu tat (that is citragu) by pointing to it by one serves as the answer to the question of another citragu sarvam asarvam $v\bar{a}$?

अथवा विभवत्यर्थोऽभिधीयते । एतचात्र युक्तं यद्विभवत्यर्थोऽभिधीयते, तत्र हि सर्वपश्चात्पदं वर्तते अस्य इति ।

Or the meaning of the case-suffix (like sambandha) is denoted by $sam\bar{a}sa$. It is but proper that the meaning of case-suffix is denoted. For, the word asya is used after all the words forming the compound.

विभक्त्यर्थाभिधानेऽद्रव्यस्य लिङ्गसङ्ख्योपचारानुपपत्तिः

If vibhaktyartha is denoted, there is inappropriateness of the $vyavah\bar{a}ra$ of linga and $sankhy\bar{a}$ to it on account of its (the sambandha) being adravya.

विभवत्यर्थाभिधाने अद्रव्यस्य लिङ्गसङ्ख्याभ्यामुपचारोऽनुपपनः - बहुयवं, बहुयवा, बहुयवः बहुयवो बहुयवाः इति

If the meaning of vibhakti is denoted by the samāsa, the vyavahāra of linga and sankhyā to it is not appropriate, since it is not a dravya as in bahuyavam (neuter), bahuyavā (feminine) bahuyavah (masculine singular), bahuyavāu (masculine dual) and bahuyavāḥ (masculine plural).

अपर आह - विभक्त्यर्थाभिधाने द्रव्यस्य लिङ्गसङ्ख्योपचारानुपपत्तिः। विभक्त्यर्थाभिधाने द्रव्यस्य ये लिङ्गसङ्ख्ये ताभ्यां विभक्त्यर्थस्योपचारोऽनुपपन्नः -बहुयवं, बहुयवा, बहुयवः, बहुयवो, बहुयवाः इति । कथं ह्यन्यस्य लिङ्गसङ्ख्याभ्याः मन्यस्योपचारः स्यात् ?

Another interprets Vibhaktyarthābhidhānē dravyasya linga-sankhyōpacārānupapattiḥ thus:—It is inappropriate to associate with vibhaktyartha, linga and sankhyā which are connected with dravya, if the meaning of vibhakti is taken to be conveyed by the samāsa.

Note:— Vibhaktyarthābhidhānē dravyasya is capable of being split in two ways, one having adravyasya and the other dravyasya as the following word.

.सिद्धं तु यथा गुणवचनेषु

It is appropriate as in the words denoting qualities. ·

सिद्धमतेत् It is appropriate.

कथम्? How?

यथा गुणवचनेषु As in the words denoting qualities.

कथं गुणवचनेषु ?

How is it found in words denoting qualities?

ं गुणवचनेषूक्तम्

It has been said with reference to words denoting qualities.

गुणवचनानां हि शब्दानामाश्रयतो लिङ्गवचनानि भवन्ति इति । तद्यथा, शुक्कं वस्तं, शुक्का शाटी, शुक्कः कम्बलः, शुक्को कम्बलो, शुक्काः कम्बला इति । यदसौ द्रव्यं श्रितो भवति गुणः, तस्य यिष्ठङ्गं वचनं च तद् गुणस्यापि भवति । एविमहापि यदसौ द्रव्यं श्रितो भवति विभक्त्यर्थः, तस्य यिष्ठङ्गं वचनं च तत् समासस्यापि भविष्यति ।

² किमुक्तम्? What has been said?

^{1.} Cf. Vol. IV p. 118 & p. 176.

^{2.} This is not found in some editions.

That linga and vacana after the words denoting qualities agree with those of the gunivācakas, viz. śuklam vastram śuklā śaṭā, śuklah kambalah, śuklāu kambalāu, śuklāh kambalāh. The gunarācaka takes the linga and the vacana of the gunivācaka. So also the linga and the vacana of the dravya with which vibhaktyartha is associated are used after the samāsa.

यदि तर्हि विभक्त्यर्थोऽभिधीयते, कृत्स्नः पदार्थः कथमभिहितो भवति सद्रव्यः सिलिङ्गः ससङ्ख्यश्च ?

If, then, the meaning of *vibhakti* is denoted, how is it possible for the meaning of the whole word consisting of *dravya*, *linga* and *vacana* to be denoted by it?

अर्थमहणसामर्थ्यात् । इह अनेकमन्यपदे इति इयता सिद्धम् । कथ पुनः पदे नाम वृत्तिः स्यात् ? पदं नाम शब्दः, शब्दो ह्येषः । शब्दे ह्यसम्भवादर्थे कार्ये विज्ञास्यते । सोऽयम् एवं सिद्धे सित यदर्थमहणं करोति तस्यतत्वयोजनं, कृत्सः पदार्थो यथाभिषीयते सद्भ्यः सिल्हें ससङ्ख्यश्चेति ।

On account of the $s\bar{a}marthya$ of the reading of artha in the $s\bar{u}tra$. It is sufficient if the $s\bar{u}tra$ is read $An\bar{e}kam$ $unyapad\bar{e}$. How can $sam\bar{a}savrtti$ take place in pada? Puda means $s\bar{a}bda$ and $s\bar{a}bda$ refers to $sam\bar{a}sa$. Since $k\bar{a}rya$ is not possible in $s\bar{a}bda$, it has to take place in its artha. Since $Ac\bar{a}rya$ reads the word artha in the $s\bar{u}tra$ even though the purpose can otherwise be achieved, it suggests that $sam\bar{a}sa$ conveys vibhaktyartha associated with the dravya, the linga and the vacana.

यदि तर्हि कृत्स्नः पदार्थोऽभिधीयते, लैङ्गाः साङ्घ्याश्च विधयो न सिध्यन्ति lf the whole meaning is conveyed, the rules enjoining linga and sankhyā will serve no purpose.

Note:— $N\bar{a}g\bar{e}\hat{s}abha!ta$ says that this is the view of $\bar{e}kad\bar{e}\hat{s}ins$, since $pr\bar{a}tipadika$ has everywhere the meaning of the five.

डक्तं वा It has been answered.

किमुक्तम्! How has it been answered?

लेक्नेषु तावदुक्तं, सिद्धं तु स्त्रियाः पातिपदिकविशेषणात् स्वार्थे टाबाद्य इति With reference to the lingas it has been read by the Vārttika-kāra (under 4, 1, 3) that the suffixes ṭāp etc. are used to suggest strītva after prātipadikas tho' the latter denote strītva.

साङ्ख्येष्वप्युक्तम्

It has been answered with reference to number also.

किमक्तम् ! How has it been answered?

ेकर्मादीनामनुक्ता एकत्वादय इति कृत्वा साङ्ख्या भविष्यन्ति

Number-denoting suffixes are used under the assumption that the number associated with karman etc. was not expressed.

प्रथमा तर्हि न प्राप्तोति

Nominative case-suffix will not, then, have a chance to be added to the stem, (since $sankhy\bar{a}$ is denoted by $san\bar{a}sa$.)

समयाद्भविष्यति

It is used after the stem on the accepted principle that neither the stem nor the pratyaya should be used alone.

यदि सामयिकी न नियोगतः, अन्याः कस्मान्न भवन्ति ?

If it is so on samaya and not on injunction, why are not other case-suffixes used-after the stem?

कर्मादीनामभावात्

On account of karmatva etc. being absent there.

पष्ठी तर्हि प्राप्तोति Sixth case-suffix will, then, be added.

शेपलक्षणा पर्धा, अशेपत्वाच भविष्यति

Sixth case suffix is enjoined by the $s\bar{u}tra$ $Sasth\bar{t}$ $s\bar{e}s\bar{e}$ (2, 3, 50). There is no $s\bar{e}satva$ here.

एवमपि व्यतिकरः प्राप्तोति - एकस्मिन्नपि द्विवचनबहुवचने प्राप्तुतः, द्वयोरप्येक-वचनबहुवचने, बहुप्वपि एकवचनद्विवचने

Even then there is chance for one suffix to be used in place of another: Where oneness is to be denoted, dual and plural suffixes also may appear in turn. Where twoness is to be

denoted, singular and plural suffixes also may appear. Where plurality is to be denoted, singular and dual suffixes also may appear (since there is samaya only with reference to the use of the nominative).

अर्थतो व्यवस्था भविष्यति

Their use will be determined through meaning.

अथ वा सङ्ख्या नामेयं परप्रधाना । सङ्ख्येयमनया विशेष्यम् । यदि चात्र प्रथमा न स्यात्, सङ्ख्येयमविशेषितं स्यात्

Or $sa\dot{n}khy\hat{a}$ is that which is subordinate to another. Dravya, the meaning of the stem, is to be qualified by it. If $pratham\bar{a}$ suffix is not used, $sa\dot{n}khy\bar{e}ya$ will be left unqualified.

अथ वा वक्ष्यत्येतद् वचनग्रहणस्य प्रयोजनम् - उक्तेष्वप्येकत्वादिषु प्रथमा यथा स्यात्

Or he is going to say that the benefit of reading the word vacana in the sūtra Prātipudikārthalingaparimānavacanamātrē prathamā (2, 3, 46) is Uktēṣvāpi ēkatvādiṣu prathamā yathā syāt.

एवम्पि पृष्ठी प्रामोति Even then there is chance for sasthi.

किं कारणम्? Why?

न्यभिचरत्येव ह्ययं समासो लिङ्गसङ्ख्ये, पष्ट्यर्थ पुनर्न न्यभिचरति

This samāsz may convey different lingas and different vacanas, but ever conveys sambandha, the meaning of saṣṭhī.

अभिहितः सोऽर्थोऽन्तर्भृतः प्रातिपदिकार्थः सम्पन्नः । तत्र प्रातिपदिकार्थे प्रथमेति प्रथमा भविष्यति

That meaning is denoted and it becomes included in the meaning of the $pr\bar{a}tipadika$. Hence nominative suffixes set in on the strength of $Pr\bar{a}tipadik\bar{a}rth\bar{\epsilon}$ prathamā.

न तर्हि इदानीमिदं भवति - चित्रगोर्देवदत्तस्य

In that case there is no possibility here for the expression Citragor Devaduttasya.

भवति वाह्यमर्थमपेक्य पष्ठी

Sixth case suffix is used to signify its relation to an external object.

V

परिगणनं कर्तव्यम् It is necessary to take an inventory.

बहुत्रीहिः समानाधिकरणानाम्

Bahuvrīhi is among those which are in apposition.

समानाधिकरणानां बहुत्रीहिर्वक्तव्यः

There is need to enjoin that bahuvrīhi appears only among those which are in apposition.

किं प्रयोजनम्? Why?

व्यधिकरणानां मा भूदृ इति - पञ्चिभिर्भुक्तमस्य

To prevent it among those which are not in apposition, as in $Pa\tilde{n}cabhir\ bhuktam\ asya.$

अन्ययानां च Of avyayas too.

अञ्ययानां च बहुत्रीहिर्वक्तत्र्यः - उच्चेर्भुखनस्य इति उच्चेर्भुखः, नीचेर्भुखः । It is necessary to enjoin that avyayas also can be components in bahuvrīhi, as in uccāirmukhah (uccāih mukham asya) and nīcāirmukhah.

सप्तम्युपमानपूर्वपदस्योत्तरपदलोपश्र

Uttarapadalopa in saptamī-pūrvapada-bahuvrīhi and upamāna-pūrvapada-bahuvrīhi.

सप्तमीपूर्वस्य उपमानपूर्वस्य च बहुत्रीहिर्वक्तत्र्यः, उत्तरपदस्य च लोपो वक्तत्र्यः । कण्ठेस्थः कालोऽस्य कण्ठेकालः, उष्ट्रमुखमिव मुखमस्य उष्ट्रमुखः, खरमुखः

It must be read that a bahuvrīhi can have the former member a noun in the seventh case or upamāna-vācaka with the latter member dropping itself. Viz. Kaṇṭhēkālaḥ (kaṇṭhēsthaḥ kālaḥ asya); uṣṭramukhaḥ (uṣṭramukham iva mukham asya), kharamukhaḥ.

समुदायविकारपष्ट्याश्र

Bahuvrīhi with a word which follows samudāya-vācakapada or vikāravācakapada of a word ending in the sixth case preceding it and the elision of the word following the first.

समुदायविकारपप्ट्याश्च बहुबीहिर्वक्तव्यः । उत्तरपदस्य च लोगे वक्तव्यः । केशसमाहारश्चृडा अस्य केशचूडः । सुवर्णस्य विकारोऽलङ्कारो यस्य सुवर्णालङ्कारः । There is need to enjoin that there is bahuvrīhi of a word ending in samudāya or vikāra and preceded by a word in relation of the sixth case with another where the latter word elides. Viz. Kēśacūdaḥ (kēśasamāhāraḥ cūdā asya); suvarnā-lankāraḥ (suvarnasya vikārō alankārō yasya).

प्रादिभ्यो धातुजस्य वा

Bahuvrīhi of verbal nouns preceded by pra etc. with their optional elision.

प्रादिभ्यो धातुजस्य बहुन्नीहिर्वक्तव्यः । उत्तरपदस्य च वा लोपो वक्तव्यः -प्रपतितपर्णः प्रपर्णः, प्रपतितपलाज्ञः प्रपलाज्ञः ।

It must be enjoined that there is bahuvrīhi between verbal nouns preceded by pra etc. (and the word that is samartha) where the verbal noun man be optionally dropped vizprapatitaparnah, praparnah; prapatitapalāsah, prapalāsah.

नजोऽस्त्यर्थानां च

Bahuvrīhi also of the verbal nouns which mean to exist and which are preceded by $na\tilde{n}$.

नजोऽस्त्यर्थानां बहुवीहिर्वक्तव्यः । उत्तरपदस्य च वा लोपो वक्तव्यः - अविद्यमानः पुत्रोऽअस्य, ; अविद्यमानपुत्रः अपुत्रः ; अविद्यमानभार्यः अभार्यः It must be enjoined that there is bahuvrīhi between verbal nouns meaning to exist and preceded by nañ (and the word that is samartha) where the verbal noun is optionally dropped viz. Avidyamānaputraḥ, aputraḥ (avidyamānaḥ putraḥ asya); avidyamānabhāryaḥ, abhāryaḥ.

तत्ति बहु वक्तव्यम् If so, much has to be said.

न वानभिधानादसमानाधिकरणेषु समाससंज्ञाभावः

There is no need for parigaṇana; the absence of $sam\bar{a}sasainj\bar{n}\bar{a}$ in places which are not $sam\bar{a}n\bar{a}dhikaraṇas$ on account of the absence of anyapadartha.

न वा वक्तज्यम् There is no need to make the pariganana.

असमानाधिकरणानां बहुब्रीहि: कस्मान्न भवति - पञ्चिभिर्भक्तमस्य इति?
On what authority will there be no bahuvrīhi between words which are not in apposition, as in pa ācabhir bhuhtam usya?

अनिभधानात्

On account of the absence of anyapadārthābhidhāna.

तचावरयम् अनिभधानमाश्रयितव्यम् । कियमाणेऽपि परिगणनं यताभिधानं न भवति तत्र न बहुवीहिः - यथा पश्च भुक्तवन्तो अस्य इति

It is necessary to take recourse to anabhidhāna. There will be no bahuvrīhi if there is anabhidhāna, even though it comes within parigaṇana, as in pañca bhuktavantaḥ asya.

अथैतिसान् सित अनिभधाने यदि वृत्तिपरिगणनं क्रियेत, तिई वर्तिपरिगणन-मिप कर्तव्यम्

If the pariganana of vrttyāśrayapadas is made where there is anabhidhāna, there is need for the pariganana of samāsārthas too.

Note:— $K\bar{a}iyața$ reads:- Vartanam vartah $sam\bar{a}sah$; $savidyat\bar{e}$ yasmin $arth\bar{e}$ sa $vart\bar{e}$.

तत् कथं कर्तेव्यम् ? How is to be done?

अर्थनियमे मत्वर्थग्रहणम्

Need to include matvartha among the categorical list of arthas.

अर्थनियमे मत्वर्थमहणं कर्तव्यम्, मत्वर्थे यः स बहुवीहिरिति वक्तव्यम्; इह मा भूत्, कष्टं श्रितमनेन इति

It is necessary to include matvartha among the categorical list of arthas thus:-matvarthē yaḥ sa bahuvrīhiḥ, so that it may not take place here in kaṣṭam śritam anēna.

तथा चोत्तरस्य वचनार्थः

Then only is the reading of the following sūtra fruitful.

एवं च कृत्वा उत्तरस्य योगस्य वचनार्थ उपपन्नो भवति .
Only then the reading of the sūtra that follows bears appropriate fruit.

केचिचावदाहुः - यद्वृत्तिसूत्रे इति सङ्ख्ययाव्ययासन्नाद्राधिकसङ्ख्याः सङ्ख्येये इति

Some take that uttarasya refers to the next samāsavidhāyakasūtra (i.e.) Sankhyāvyayāsannādūrādhikasankhyāh sankhyēyē. अपर आहुः, 'यद्वार्त्तिके इति '

Others take it to refer to the following varttika."

कर्मवचनेनाप्रथमायाः

Bahuvrīhi of a word not having the meaning of the first case (i.e. past participle) with the noun serving as the object is to be enjoined.

कर्मवचनेन अप्रथमाया बहुव्रीहिवैक्तन्यः । ऊढो रथो येन ऊढरथोऽन्ड्रान् । उपहृतः पश् रुद्राय उपहृतपश् रुद्रः ; उद्भृत ओदनः स्थाल्याः - उद्भृतौदना स्थाली । It must be enjoined that a word not having the meaning of the first case with the noun serving as the object forms bahuvrīhi. Viz. ūḍharathaḥ (ūḍhō rathō yēna) anaḍvān; Upahṛtapaśuḥ (upahṛtaḥ paśuḥ rudrāya) Rudraḥ; Uddhṛtāudanā (uddhṛtaḥ ōdanaḥ sthālyāḥ) sthālī.

Note:-1. Ratha is karmavācaka and ūdha is karmabodhaka.

यदि कर्मवचननेत्युच्यते, अथ कर्तृवचनेन कथम् - प्राप्तमुदकं प्रामं प्राप्तोदको 'मामः, आगता अतिथयो प्रामम् आगतातिथिर्यामः ?

If it is said that karmabödhaka and kurmavacana compound into bahuvrīhi, what sanctions the compound of kartṛbödhaka and kortṛvacana, as in prāptödakaḥ (prāptam udakam grāmam) grāmaḥ and āgatātithiḥ (āgatāḥ atithayō grāmam) grāmaḥ?

कर्तृवचनेनापि With kartrvacana too.

फर्त्वचनेनापि इति वक्तन्यम्

It must be enjoined that kartrbodhaka compounds with kartr-rūcaka too.

अवधमाया इति किमधेम् ? Why is aprothamāyāli read?

वष्टे देवे गतः

To prevent samāsa between vṛṣtē and dēvē which precede gataḥ (i.e.) when samāsārtha is that of the nominative case.

अथ अवभाषाः इत्युष्यवाने इत कमान्त भवति - वृष्टे देवे गर्न पदय इति ! Why is there no samāsa between vrsfē and dēcē in vrsfē dēcē g itam jašya on the strength of aprathamāyāh?

17

बहिरङ्गात्राप्रथमा Aprathamā here is bahiranga.

Note:—The question arises on seeing the second case in gatam. Since the $sam\bar{a}s\bar{a}rtha$ -pratham \bar{a} is antaranga, it vetoes $dvit\bar{i}y\bar{a}$ after gata which is bahiranga.

सुबधिकारे अस्तिक्षीरादिवचनम्

Reading of astiksīra etc. in sub-adhikāra.

सुविधिकारे अस्तिक्षीरादीनामुपसङ्ख्यानं कर्तव्यम् - अस्तिक्षीरा ब्राह्मणी There is need for upasankhyāna of expressions like asti-kṣīra in sub-adhikāra. Viz. astikṣīrā brāhmaṇī.

तत्तर्हि वक्तन्यम् It must, then, be enjoined.

Note:—This arises on the assumption that asti is a finite verb.

न वाच्ययत्वात् No, since it is avyaya.

न वा कर्तव्यम् It need not be enjoined.

किं कारणम्? Why?

अन्ययत्वात् । अन्ययमेषोऽस्तिशन्दः, नैषोऽस्तेर्हर्

Since it is avyaya. This asti is avyaya and not the third person singular, present, of as.

कथमव्ययत्वम् ? How is it avyaya?

उपसर्गविभक्तिस्वरपितरूपकाश्च निपातसंज्ञा भवन्तीति निपातसंज्ञा, निपातोऽ-व्ययमित्यव्ययसंज्ञा ।

It, being a $nip\bar{a}ta$, gets avyaya-sa $\dot{m}j\tilde{n}\bar{a}$ on the strength of $Nip\bar{a}t\bar{o}$ svyayam and it gets $nip\bar{a}ta$ sa $\dot{m}j\tilde{n}\bar{a}$ since it is $ti\dot{n}$ anta-pratir \bar{u} paka, on the strength of the statement upasarga-vibhaklisvara-pratir \bar{u} pak \bar{a} \$ ca.

VΤ

अथ किंसब्रह्मचारी इति कोऽयं समासः?

What samāsa is, then, the word kimsabrahmacārī in the sentence kimsabrahmacārī tvam?

बहुत्रीहिरित्याह "Bahuvrīhi" say he.

कोऽस्य विम्रहः ? What is its vigraha?

के सन्नस्चारिणः अस्य इति Kē sabrahmacāriņaḥ asya.

यद्येवं कठ इति प्रतिवचनं नोपपद्यते

If so, the answer kathali to that question does not suit well.

Note:— $K\bar{a}iya\dot{t}a$ says that singular in $ka\dot{t}ha\dot{h}$ does not agree with the plural in $k\bar{e}$.

एवं तर्हि एवं विश्रहः करिष्यते - केषां सन्नह्मचारी किंसन्नह्मचारीति

If so, the vigraha of kinisabrahmacārī will be worded thus:—
kēṣām sabrahmacārī.

प्रतिवचनं चैवं नोपपद्यते, स्वरं च दोषो किंसब्रह्मचारी इत्येवं स्वरः प्रसज्येत, किंसब्रह्मचारीति चेप्यते ।

Even then the answer (kaṭhaḥ) does not suit. There will be difficulty with reference to the udātta syllable also. It will chance to have antōdāttatva thus—kimsabrahmacārī', though ādyudāttatva is desired thus—kim'sabrahmacārī.

एवं तर्हि एवं विम्रहः करिण्यते, कः सम्रह्मचारी किंसम्रह्मचारी इति If so, the vigraha of kinisabrahmacārī will be worded thus:—kaḥ sabrahmacārī.

भवेत् प्रतिवचनमुपपन्नम् । स्वरे च दोपो भवति

The answer will suit the question; but there will be difficulty with reference to the udātta syllable.

एवं तर्हि एवं विश्रहः करिप्यते - कः सन्नग्नचारी तव, किंसन्नसचारी स्वम् इति

If so, the vigraha of the first word in kinisabrahmacārī tvam will be worded thus:—kah sabrahmacārī tava.

अथ वा पुनरस्त्वयमेव विम्रहः - के सम्रणचारिणोऽस्य इति
Or, let this alone be the vigraha—kē sabrahmacāriņē asya.

ननु चोक्तं फठ इति प्रतिवचनं नोपपचन इति

Oh, it has been said that the answer kathah does not suit well (since the word will refer to him and not to his classmates).

नैष दोषः । अमौकरवाणिन्यायेन भविष्यति

This difficulty does not arise. It may be met with by the application of $agn\bar{a}u$ -karav $\bar{a}ni$ -ny $\bar{a}ya$.

तद्यथा - It is as follows:-

कश्चित् कञ्चिद् आह अमो करवाणि इति । स आह कुरु इति । कर्तरि अनुज्ञाते कर्माप्यनुज्ञातं भवति । अपर आह - अमो करिप्ये इति । कियताम् इति कर्मण्यनुज्ञाते कर्ताप्यनुज्ञातो भवति ।

One doer of a religious rite says to another (brahmā in the rite) 'Agnāu · karavāṇi' (Let me offer the oblation in fire). He replies, "Kuru." When he who gives the offering is permitted, it is implied that the offering also is permitted to be thrown in fire. Another says, "Agnāu kariṣyē" (I shall offer the oblation in fire). The other permits him thus, "Kriyatām" (let it be offered). When the offering is permitted to be thrown in fire, it is implied that the giver of the offering too is permitted to offer it in fire.

यथैव खल्विप के सब्रह्मचारिणोऽस्य ? इति, कठाः इत्युक्ते सम्बन्धादेतद्भयते नूनमयमिष कठः इति । एवं कठ इत्युक्ते सम्बन्धादेतद् गन्तन्यं स्याद् नृतं तेऽपि कठाः
इति । न खल्विप ते समासेन श्वयाः प्रतिनिर्देष्ट्रम्; उपसर्जनं हि ते भवन्ति
As he who answers kaṭhāḥ to the question kē sabrahmacāriṇaḥ
asya? is understood from the relation to be a kaṭha himself, so
also if the answer here is kaṭha, it is to be understood from the
sambandha that they (his classmates) are also certainly kaṭhās.
It is not possible for them too to be expressed in the samāsa,
they being upasarjana.

VII

अथ अर्द्धतृतीया इति कोऽयं समासः?

What samāsa is, then, the word arddhatrtīyāh?

Note:—Arddhatṛtīyāḥ means two and a half.

बहुत्रीहिरित्याह "Bahurrihi" says he.

1. The word arddhapañcamān followed by māsān in Āpastamba Dharmasūtra is of the same type.

कोऽस्य विश्रहः? What is its vigraha?

अर्द्ध तृतीयमेषाम् इति

Arddham tṛtīyam ēṣām (those of which half of third forms a part).

कः समासार्थः ? समासार्थी नोषपद्यते । अन्यपदार्थी हि नाम स भवति, येषां पदानां समासः ततोऽन्यस्य पदस्य अर्थी अन्यपदार्थः ।

What is $sam\bar{a}s\bar{a}rtha$? $Sam\bar{a}s\bar{a}rtha$ cannot be satisfactorily enunciated. For it is evidently $anyapad\bar{a}rtha$. $Anyapad\bar{a}rtha$ is one which is not denoted by the parts which form the compound.

एवं तर्हि एवं विग्रहः करिष्यते - अर्द्ध तृतीयमनयोः इति
If so, the vigraha will be worded thus:—Arddham tṛtīyam
anayōḥ.

एवमपि कः षष्ट्यर्थः ? षष्ट्यर्थो नोपपद्यते । किं हि तयोर्ध भवति ?
Even then, what is the meaning of şaṣṭhī? The relationship denoted by ṣaṣṭhī in anayōḥ cannot satisfactorily qualify tṛtīyam, which becomes half of them? (i.e.) can the third become half of them?

अस्तु तर्हि अयमेव विमहः - अर्द्ध तृतीयमेपाम् इति
If so, the original vigraha alone arddham trelāyam ēṣām may be resorted to.

ननु चोक्तम समासार्थो नोपपद्यते इति
Oh, it was said that the samāsārtha cannot be satisfactorily chunciated.

नैप दोप: । अवयवेन विम्रहः । समुदायः समासार्थः
This difficulty does not arisc. Vigrahavākya is on avaņavārtha and samudāya (two plus half of the third) is samāsārtha.

यचनयवेन विम्रहः समुदायः समासार्थः, असिद्धितीयोऽनुससार पाण्डवम्, सङ्क्षणिद्धितीयस्य वलं कृष्णस्य वर्द्धताम् इति द्वयोद्धिनचनिमिति द्विनचनं प्राप्नोति । If it is admitted that the vigraha is on avayavārtha and samudāya is samāsārtha, there is chance for the dual suffix at the end of osidvitīyah and Sankarṣaṇa-dvitīyasyo in the sentences

Asi-dvitīyōsnusasāra Pāṇḍavam.

Sankarṣaṇadvitīyasya balam Kṛṣṇasya varddhatām on the authority of Dvayōr dvivacanam (1, 4, 22).

अस्तु तर्हि अयमेव विश्रह: - अर्द्ध तृतीयमनयोः इति - Let this alone be then the vigraha arddham trtīyam anayōḥ.

ननु चोक्तं षप्ट्यर्थी नोपपद्यत इति

Oh, it has been said that it is not possible to give a satisfactory meaning to $sasth\bar{i}$.

नैष दोष: । इदं तावद्यं प्रष्टन्य: - अथेह देवदत्तस्य आता इति कः षष्ट्यर्थ इति This defect cannot stand. The objector is to be put this question — what is the meaning of the şaṣṭhī in the expression Dēvadattasya bhrātā?

तत्रेतत् स्यात् - एकसात् प्रादुर्भाव इति

It is possible to state that the meaning there is the origin from the same source.

एतच वार्तम् । तद्यथा - सार्थिकानामेकप्रतिश्रये उपितानां प्रातरुत्थाय प्रतिष्ठमानानां न कश्चित् परस्परमिसम्बन्धो भवति । एवंजातीयकं आतृत्वं नाम । अस्र चेद्यक्तः षष्ठयथों दृश्यते, इहापि युक्तो दृश्यताम् ।

It is a flimsy answer. There is absolutely no relationship among travellers who stay at a certain place for the night and go away in different directions at sunrise. The relationship between brothers is of the same nature. If it is considered that sasthyartha is appropriate there, it may be considered that it is appropriate here also.

इह तर्हि, अर्द्धनृतीया आनीयन्ताम् इत्युक्ते अर्द्धस्यानयनं न प्राप्नोति If so, when it is said Arddhatṛtīyā ānīyantām, there is no chance for the arddha to be brought.

Note:— Kāiyaļa rends:- Dvayor ēva samāsārthatvād ānayanam syād nārdhasya.

अस्तु तर्हि अयमेव विग्रहः अर्द्धं तृतीयमेपाम् इति If so, let the vigraha be arddham tṛlīyam ēṣām. ननु चोक्तम् - असिद्धितीयोऽनुससार पाण्डवम्, सङ्कर्षणद्वितीयस्य बलं कृष्णस्य वर्द्धताम् इति द्वयोद्धिवचनमिति द्विवचनं शामोति इति ।

Oh, it has been said that dual suffix may appear on the strength of *Dvayōr dvivacanam*, in the words asidvitīyaḥ and Sankarṣaṇadvitīyasya of the sentences

Asi-dvitīyōsnusasāra Pāndavam.

Sankarşana-dvitīyasya balam Krsnasya varddhatām.

नैप दोप: । अयं तीयान्तः शब्दोऽस्त्येव पूरणे वर्तते, अस्ति सहायवाची । तद्यः सहायवाची तस्येदं प्रहणम्, असिद्धिनीयः - असिसहाय इति गम्यते This difficulty does not arise. The word ending in tīya has the sense of pūraṇa and also sahāya. It means sahāya in the word asi-dvitīyaḥ, so that it means asi-sahāyaḥ.

एवमपि अर्द्धतृतीयाः इत्येकसिन्नेकवचनं प्राप्तोति । एकार्था हि समुदाया भवन्ति । तद्यथा-शतं, यूथं, वनम् इति
Even then there is chance for the singular in place of the plural in the word arddhatṛtīyāḥ on the strength of Ekasmin ēkavacanam. For samudāyas are collective in sense, as the

अस्तु तर्हि अयमेन निमहः - अर्द्ध तृतीयमनयोरिति lf so, let the vigraha be arddham trtëyam anayöh.

words salam, yūtham and vanam.

ननु चोक्तम् अर्द्धतृतीया आनीयन्ताम् इत्युक्ते अर्द्धस्य आनयनं न प्राप्तोति इति Ob, it has been said that there is no chance for bringing arddha when one says Arddhotretiyā ānīyanlām.

नैप दोपः । भवति बहुवीहो तद्गुणसंविज्ञानमपि । तद्यथा शुक्कवाससमानय, छोहितोप्गीपाः ऋतिवः प्रचरित इति तद्गुण आनीयते, तद्गुणाश्च प्रचरित । This difficulty does not arise. Tadguṇasamvijnāna-bahuvrīhi too is included under bahuvrīhi. For instance, if one says Śuklavāsasam ānaya and Löhitöṣṇīṣāḥ rtvijaḥ pracaranti, the man who wears the white cloth is brought and the rtviks who wear red turbans walk.

अथवा पुनरस्तु अयमेव विमद्दः अर्द्ध तृनीयभेषामिति Or let the vigraha be arddham trliyom eyam itself. ननु चोक्तम् एकवचनं प्राप्तोति इति

Oh, it has been said that the singular-suffix may appear there.

नैष दोषः । सङ्ख्या नामेयं परप्रधाना । सङ्ख्येयमनया विशेष्यम् । यदि चाल एकवचनं स्यात् सङ्ख्येयमविशेषितं स्यात्

This difficulty does not arise. Number depends upon another. The object to be numbered is to be restricted in its application by this. It ėkavacana is used here, it cannot serve as the viśēṣaṇa to the viśēṣya.

इह तर्हि अर्द्धतृतीया द्रोणा इति, अयं द्रोणशब्दः समुदाये प्रवृत्तो अवयवे नोपपचते

Here, then, in arddhatrtīyā dronāh the word drona is used to denote samudāya and hence cannot be taken to denote avayava.

नैष दोषः । समुदायेषु हि प्रवृताः शब्दा अवयवेष्विप वर्तन्ते । तद्यथा - पूर्वे पञ्चालाः, उत्तरे पञ्चालाः; तैलं भुक्तं, घृतं भुक्तम्; शुक्को नीलः कापिल इति । एवमयं समुदाये द्रोणशब्दः प्रवृत्तोऽवयवेष्विप वर्तते ।

This defect cannot arise. For words denoting wholes are used to denote parts also. Viz. East $Pa\tilde{n}c\bar{a}la$, North $Pa\tilde{n}c\bar{a}la$; taila is taken in, ghrla is taken in; white, blue and brown, objects. So also the word $dr\bar{o}na$ used to denote the whole may also denote a part also.

कामं तर्हि अनेनैव हेतुना यदा द्वौ द्रोणौ अर्धाढकं च तदा कर्तव्यम् अर्धतृतीया द्रोणा इति

It may then be possibe that, on the same basis, the expression $arddhatrt\bar{\imath}y\bar{a}\ dr\bar{o}n\bar{a}h$ may be used to denote $2\ dr\bar{o}nas$ and a half $\bar{a}dhaka$.

न कर्तन्यम् । समुदायेषु वृत्ताः शब्दाः केष्ववयवेषु वर्तन्ते शोऽवयवस्तं समुदायं न न्यभिचरति

No, it cannot be used. Which avayavas can be denoted by words denoting wholes? The avayava which co-exists with the whole.

कं च समुदायं न व्यभिचरति ?

Which avayava co-exists with which whole?

1. Cf. Vol. I (2nd edn.) p. 63

अर्द्धदोणो द्रोणम् Arddhadrona co-exists with drona.

अद्धं दकं पुनर्विभचरति

But arddhāḍhaka exists even where drōṇa does not exist.

Note :—Bhaṭṭōjidīkṣila says in his Śabdakāustubha thus :— Dvōu drōṇāu arddhadrōṇaś ca arddhatṛtīyā drōṇā iti vyavahriyatē ... Drōṇaśabdaś ca drōṇayōr urddhadrōṇē ca lakṣaṇayā.

सङ्ख्ययाव्ययासन्नाद्राधिकसङ्ख्याः सङ्ख्येये (2, 2, 25)

There are four topics here:—1-3. The nature of the $sam\bar{a}sa$ and the $vigrahav\bar{a}kya$ of $dvitr\bar{a}h$, $dvidas\bar{a}h$, and $upadas\bar{a}h$ (4) The need for $sankhy\bar{a}$ in the $s\bar{u}tra$.

T

द्वित्राः, त्रिचतुराः इति कोऽयं समासः ?

What is the nature of the samāsa in dvitrāļ and tricaturāļ?

वहुत्रीहिरित्याह "Bahuvrīhi," says he.

कोऽस्य विमहः? What is its vigraha (of dvitrāḥ)?

द्वी वा त्रयो वा इति $Dv\bar{a}u\ v\bar{a}\ tray\bar{o}\ v\bar{a}$.

भवेद्यदा बहूनामानयनं तदा बहुबचनमुपपन्नम्; यदा तु खल्ल द्वादानीयेते तदा न सिध्यति

The use of the plural (in dvitrāḥ) will be appropriate when many are referred to and it is not so when only two are referred to.

तदापि भिद्धम् It is appropriate even in the latter case.

कथम्? How?

केचित्तावदाहुः, अनिर्क्तातेऽर्थे बहुवचनं प्रयोक्तव्यम् इति । तद्यथा - कति भवतः पत्राः? कति भवतो भार्याः! इति

Some opine that plural number should be used in the question when the speaker is unaware of the number of objects he refers to, as in kati bharatah putrāh (how many sons bave you?) and kati bharatō bhāryāh (how many wives have you?)

अपर आह - द्वी वा इत्युक्ते त्रयो वा इति गम्यते; त्रयो वा इत्युक्ते द्वी वा इति गम्यते । सैषा पञ्चाधिष्ठाना वाक्, तत्र युक्तं बहुवचनम्

Another says, "When $dv\bar{a}u$ $v\bar{a}$ is expressed, $tray\tilde{o}$ $v\bar{a}$ is suggested; and vice versa. The expression here is concerned with five and hence plural number fits in.

Note: $-V\bar{a}$ here expresses doubt and not option,

IT

अथ द्विदशाः त्रिदशाः इति कोऽयं समासः ?

Of what nature is the samāsa in dvidaśāḥ and tridaśāḥ?

बहुत्रीहिरित्याह "Bahuvrīhi," says he.

कोऽस्य विम्रहः ? What is its vigraha (of dvidaśāḥ)?

द्विदेश द्विदशा इति The vigraha of dvidaśāķ is dviķ¹ daśa. सङ्ख्यासमासे सजन्तत्वात्सङ्ख्याप्रसिद्धिः

Absence of $sa\dot{n}khy\bar{a}v\bar{a}citva$ (of dvil) on account of sujantatva in $sa\dot{n}khy\bar{a}sam\bar{a}sa$.

सङ्ख्यासमासे सुजन्तत्वात् सङ्ख्या इति अप्रसिद्धिः । न हि सुजन्ता सङ्ख्या अस्ति

There is no possibility of $sankhy\bar{a}v\bar{a}citva$ (of dvih) on account of sujantatva in $sankhy\bar{a}sam\bar{a}sa$; for sujanta cannot be called $sankhy\bar{a}$.

एवं तर्हि एवं विश्रहः करिष्यते, हो दशती 2 द्विदशा इति
If so, the vigraha of dvidasāh is taken to be dvāu dasatāu.

एवमपि अत्कारान्तत्वात् ³ सङ्ख्येत्य असिद्धिः । न ह्यत्कारान्ता सङ्ख्या अस्ति Even then there is no possibility of sankhyāvācitva (of dasat) on account of atkārāntatva; for the word ending in at is not a sankhyāvācaka,

- 1. Suc in dvih is from the sūtra Dvitricaturbhyah suc (5, 4, 18).
- 2. Dasat is secured from the sūtra Pańcad dasatāu vargē vī (5, 1, 60).
- 3. Sankhyayā is another reading.

अस्तु तर्ह्ययमेव विग्रहः, द्विदेश द्विदशा इति If so, let the vigraha be dvir dasa itself.

ननु चोक्तम् सङ्ख्यासमासे सुजन्तत्वात् सङ्ख्येत्यप्रसिद्धिः इति
Oh, it was said that there is aprasiddhi of sankhyā of dviḥ on account of sujantatva in sankhyāsamāsa.

न वासुजन्तत्वात् No, it being asujanta.

न वेप दोषः This difficulty does not arise.

किं कारणम्? Why?

असुजन्तत्वात् । सुजन्तत्वादिच्युच्यते, न चात्र सुजन्तं परयामः

Since it is not sujanta. The objection is raised on the basis of its being sujanta and we do not see sujanta here.

र्कि पुनः कारणं वाक्ये सुज् ह्रव्यते, समासे तु न द्रश्यते ? Why is suj present in vigrahavākya and absent in samāsa ? सुजभावोऽभिहितार्थत्वात समासे

Absence of suc in samāsa on account of its meaning being conveyed by samāsa.

समासे सुजभावः There is no suc in samāsa.

किं कारणम् ? Why?

अभिहितार्थस्वांत् । अभिहितः युजर्थः समासेनेति कृत्वा समासे युज् न भविष्यति ।

On account of abhihitarthatva. Suc is absent in samāsa, since its meaning is conveyed by samāsa.

किं च भोः सुजर्थे इति समास उच्यते ?

sujartha is secured through implication.

Oh, sir! is the samāsa enjoined to convey sujartha?

न सलु सुजर्थ इत्युच्यते, गभ्यते तु मुजर्थः No, the samāsa is not enjoined to convey sujartha; but

कथम्! How?

यावता सद्ख्येथी यः सद्ख्यया सद्ख्यायते । स च कियाभ्यावृत्त्यर्थः । म चोक्तः समासेनेति कृत्वा समासे युज् न भविष्यति । Since the $sankhy\bar{e}ya$ which is denoted by $sankhy\bar{a}$ is secured through the repetition of $kriy\bar{a}$ and since it is conveyed by the $sam\bar{a}sa$, suc does not present itself in the $sam\bar{a}sa$.

अशिष्यः सङ्ख्योत्तरपदः सङ्ख्येयवाभिधायित्वात

Sankhyōttarapadabahuvrīhi need not be enjoined on account of its conveying the sense of sankhyēya and $v\bar{a}$.

अशिष्यः सङ्ख्योत्तरपदो बहुव्रीहिः

The $bahuvr\bar{\imath}hi$ which has $saikhy\bar{a}\text{-}v\bar{a}czka$ for the second member need not be enjoined.

किं कारणम् Why?

सङ्ख्येयवाभिधायित्वात्

Since the sense of sankhyēya and vā is conveyed by the samāsa.

सङ्ख्येयं वार्थश्च अभिधीयते, तत्रान्यपदार्थ इत्येव सिद्धम्

The sense of both $sankhy\bar{e}ya$ and the meaning of $v\bar{a}$ is conveyed and hence it is secured on the strength of anyapadārthē.

भवेत् सिद्धमधिकविंशाः अधिकित्रिंशा इति, यत्रैतद् विचार्यते विंशत्यादयो दशदर्थे वा स्युः परिमाणिनि वा इति । इदं तु न सिध्यति – अधिकदशा इति यत्र नियोगतः सङ्ख्या सङ्ख्येये एव वर्तते ।

It may be achieved with reference to adhikavimśāḥ and adhikatrimśāḥ, since it is discussed (under 5, 1, 59) that vimśati etc. may refer to daśadarth i (sankhyā) or parimānin (sankhyēya). But the form adhikadaśāḥ cannot be secured, where the number daśa denotes only the sankhyēya by injunction and not the sankhyā.

111

अथ उपद्शाः इति कोऽयं समासः ?

To which samāsa does the word upadaśāh belong?

Note:—The word upadaśah means those which are near daśa and upa means $s\bar{a}m\bar{i}pyavantah$ by $lakṣan\bar{a}$.

बहुत्रीहिरित्याह "Bahuvrīhi," says he.

कोऽस्य विम्रहः ! What is its vigraha?

दशानां समीपे उपदशाः इति Dasanam samīpē.

कस्य पुनः सामीप्यमर्थः ? Whose meaning is sāmīpya?

Note: - Sāmīpyam means sāmīpyavān.

डपस्य Of upa.

यद्येवं, नान्यपदार्थी भवति

If so, the samāsa does not have anyapadārthatva.

Note: -Kāiyaṭa writes that, if saplamī prominently refers to samīpa, the samāsa is avyayībhāva and if it refers to samīpin, it is bahuvrīhi.

IV

तल च प्रथमानिर्दिष्टं सङ्ख्यायहणं जक्यमकर्तुम् Sankhyā read in the first ease in the sūtra may be dropped.

Note: $-K\bar{a}iyata$ says that $saikhy\bar{a}$ need not be read since $dvitr\bar{a}h$ etc. are $anyapad\bar{a}rthaka$.

मत्वर्थे वा पूर्वस्य विधानात

Or on account of the previous sūtra being enjoined with reference to matvartha.

अथवा मत्वर्थे पूर्वी योगः । अमत्वर्थार्थोऽयमारम्मः

Or the previous $s\bar{u}tra$ is with reference to matvartha and this $s\bar{u}tra$ is with reference to amalvarth t.

क्यभावार्थं वा Or for the sake of prohibiting kap.

अथ दा पन् मा भृद् इति Or it is intended to prohibit kap.

दिक्तामान्यन्तराले (2, 2, 26) तेन सहेति तुल्ययोगे (2, 2, 28)

Whether these two sūtras are necessary or not is discussed here.

दिक्तमासमहयोगयोधान्तरालप्रधानाभिधानात्

No need to enjoin bahuvilhitea with reference to diksamasa and sahayiga on account of the abhidhana of antarala and pradhana respectively.

दिक्समाससहयोगयोश्च अशिष्यो वहुत्रीहिः

Bahuvrīhi need not be enjoined with reference to diksamāsa and sahayōga.

Note:—Sahayōga refers to the samāsa saputrah and its vigraha is sahēna yōgōssya.

किं कारणम्? Why?

अन्तरालप्रधानाभिधानात् । दिवसमासे सहयोगे च अन्तरालं प्रधानं च अभिधीयते. तत्र अन्यपदार्थ इत्येव सिद्धम्

On account of antarālatva and pradhānatva being expressed by them. Antarālatva is expressed in diksamāsa and pradhānatva in sahayōga and hence they are secured on the strength of anyapadārthē.

यद्येवं दक्षिणपूर्वा दिक्, समानाधिकरणलक्षणः पुंबद्धावो न प्राप्तोति । अद्य पुनिरयं सैव दक्षिणा सैव पूर्वेति कृत्वा समानाधिकरणलक्षणः पुंबद्धावः सिद्धो भवति If so, pumrādbhāva in dakṣiṇapūrvā which is based on sāmānā-dhikaraṇya cannot be secured. If, on the other hand, this sūtra is read, pumvadbhāva based on sāmānādhikaraṇya is secured by taking dakṣiṇā refer to south east which is near to it and by thus securing sāmānādhikaraṇya.

न सिध्यति । भाषितपुंस्कस्य पुंबद्धावो, न चैतौ भाषितपुंस्कौ No. it is not accomplished. Puinvadbhāva is enjoined only in the case of words which can be used to denote males also. These two are not bhāṣitapuinska.

ननु च भोः दक्षिणशब्दः पूर्वशब्दश्च पुंसि भाष्येते Oh, sir! the words dakṣiṇā and pūrva are used in the masculine gender.

समानायामाकृतो यद्धापितपुंस्कम् । आकृत्यन्तरे चैतौ भाषितपुंस्कौ । दक्षिणा पूर्वा इति दिक्शव्दौ, दक्षिणः पूर्व इति व्यवस्थाशव्दौ

Bhāṣitapuniskatva refers to those which have the same pravṛtli-nimitta. The pravṛttinimitta of these two, being different, the bhāṣitapuniska here is different from them. The words dakṣiṇā and pūrvā refer to directions (south and east) and the words

dakṣiṇa and pūrva refer to respective position (to the right, in front of).

यदि पुनर्दिक्शन्दा अपि न्यवस्थाशन्दाः स्युः Suppose diksabdas too are taken as vyavasthāsabdas.

कथं यानि दिगुपदिष्टानि कार्याणि?

How is it then possible for the karyas enjoined with reference to diksabdas to operate with reference to these two words?

यदा दिशो व्यवस्थां वक्ष्यन्ति When they refer to the vyavasthā of direction.

यदि हि यो यो दिशि वर्तते स स दिक्शब्दः, रमणीयादिषु अतिप्रसङ्गो भवति - रमणीया दिक्, शोभना दिग् इति

If it is taken that whatever is in the direction is dikśabda, there is atiprasanga with reference to ramanīya etc. Cf ramanīyā dik, śōbhanā dik.

अथ मतमेतत् - दिशि दृष्टः दिग्दृष्टः, दिग्दृष्टः शब्दो दिक्शंब्दः यो दिशं न व्यभिचरतीति न रमणीयादिषु अतिवसङ्गो भवति, पुंबद्धावस्तु न प्रामोति । Suppose it is taken thus:— Dikśabdaḥ is split into digdṛṣṭaḥ śabdaḥ and digdṛṣṭaḥ into diśi dṛṣṭaḥ (which means that is seen used to denote direction through rūḍhi or established usage). Then on the basis that it does not go beyond the denotation of dik, there may not be atiprasanga in ramaṇīyā dik etc. But there is no chance for pumvadbhāva.

एवं तर्हि If so,

सर्वनाम्नो वृत्तिमात्रे पुंबद्भाचो वक्तव्यो दक्षिणोत्तरपूर्वाणामित्येवमर्थम् There is need to enjoin punivadbhava in vṛtti alone for sarvanāman, to secure the form dakṣiṇa-uttara-pūrvāṇām.

एवं च ऋत्वास्तु [[]दिक्समाससहयागयोरन्तरालप्रधानाभिधानात् इत्येव In that case let it be Diksamāsasahayōgayōr antarāla pradhānābhi dhānāt.

ननु चोक्तम् दक्षिणपूर्वा दिक्, समानाधिकरणलक्षणः पुंबद्धावो न प्राप्तोति Oh, it was said that there will be no chance for punivadbhāva based on sāmānādhikaranya with reference to dakṣiṇapūrvā dik

नैष दोषः । सर्वनाम्नो वृत्तिमात्रे पुंबद्भावेन परिहृतः

This difficulty does not arise. It is solved by admitting pumvadbhāva for sarvanāmans in vṛtti alone.

मत्वर्थे वा पूर्वस्य विधानात्

Or since the previous sūtra dealing with matvartha.

अथ वा मत्वर्थे पूर्वो योगः । अमत्वर्थार्थोऽयमारम्भः

Or the previous $s\bar{u}tra$ deals with matvartha and this $s\bar{u}tra$ with amatvartha.

कनभावार्थी वा Or for the sake of the absence of kap.

अथ वा दन् मा भूदिति Or, to prevent kap.

तत्र तेनेद्मिति सरूपे (2, 2, 28)

तृतीयासप्तम्यन्तेषु च क्रियाभिधानाद्शिष्यो बहुत्रीहिः

Bahuvrīhi need not be enjoined since $kriy\bar{a}$ related to $trt\bar{i}yanta$ and saptamyanta is expressed.

तृतीयासप्तम्यन्तेषु चाशिप्यो बहुत्रीहिः

There is no need to enjoin $bahuvr\bar{\imath}hi$ with reference to $trl\bar{\imath}y\bar{a}nta$ and saptamyanta.

किं कारणम् ? Why?

क्रियाभिधानात् । क्रिया अभिधीयते । तत्र अन्यपदार्थे इत्येव सिद्धम् । On account of kriyā being expressed; kriyā is expressed by samāsa. Hence bahuvrīhi is decidedly there on the strength of anyapadārthē.

न वैकशेपप्रतिपेधार्थम् No, it is necessary to prohibit ēkaśēṣa.

न वा अशिष्यः It cannot be said that it is unnecessary.

किं कारणम्? Why?

एकशेषप्रतिषेधार्थमिदं वक्तव्यम्

This sūtra must be read to prohibit ēkašēṣa.

पूर्वदीर्घार्थ च

For the sake of lengthening the final vowel of the former member also.

पूर्वदीर्घाध चेदं वक्तव्यम् - केशाकेशि

This $s\bar{u}tra$ must be read also to lengthen the final vowel of the former member, as in $k\bar{e}s\bar{a}k\bar{e}si$.

स्यादेतत् प्रयोजनं यदि नियोगतोऽस्य अनेनैव दीर्घत्वं स्यात्; अथेदानीम् अन्येपामपि दृश्यते इति दीर्घत्वं, न प्रयोजनं भवति ।

There is possibility of this benefit if the lengthening of the former member is enjoined only by this $s\bar{u}tra$; but if the $s\bar{u}tra$ Anyēṣām api drṣśyatē (6, 3, 137) enjoins it, this $s\bar{u}tra$ does not have that benefit.

मत्त्रथें वा पूर्वस्य विधानात्

Or since the previous sūtra is concerned with matvartha.

अथ वा मत्वेथे पूर्वी योगः अमत्वर्थार्थोऽयमारम्भः

Or the previous $s\bar{u}tra$ operates where there is matvartha and this $s\bar{u}tra$ operates where there is no matvartha.

क्रमावार्थ वा Or, for the sake of the absence of kap.

अथ वा कब् मा भूदिति Or, to prevent kap.

चार्थे द्वनद्व: (2, 2, 29)

There are four topics here:—(1) Is dvandva avyaya or not?
(2) Why do not the pairs yāiñikaś cāyam Vāiyākaraṇaś ca etc. form into a dvandva compound? (3) What are the relative advantages and disadvantages reaped by replacing the sūtra Cārthē di andvaḥ by Yugapad adhikaraṇē dvandvaḥ? (4) What is the nature of samāsa in ēkādaśa and dvādaśa?

I

चार्थ इत्युच्यते; चश्च अन्ययं तेन समासस्य अन्ययंसंज्ञा प्राप्नोति
The expression cārthē is read in the sūlra; ca is evidently an avyaya; hence, (through similarity), samāsa may take avyaya-sanijāā.

नैप दोपः । पाठेन अन्ययसंज्ञा कियते । न च द्वन्द्वः समासस्तत्र पट्यते । No, this difficulty does not arise. avyayasaminā is given to those that are read in the list in the ganapāṭha. Dvandvasamāsa samāsa is not read there.

पाठेनाप्यव्ययसंज्ञायां सत्यामिभधेयवाल्लिङ्गवचनानि भविष्यन्ति । यश्चेहार्थोऽ-भिधीयते न तस्य लिङ्गसङ्ख्याभ्यां योगोऽस्ति ।

Granting that it gets avyayasaminā even through $p\bar{a}tha$, the gender and the number should agree with those of the $pradh\bar{a}n\bar{a}rtha$. The $pradh\bar{a}n\bar{a}rtha$ here is not connected with any gender or number.

Note: $-N\bar{a}g\bar{o}jibhatta$ says that this remark holds good only to $itar\bar{e}taray\bar{o}ga-dvandva$ and not to $sam\bar{a}h\bar{a}ra-dvandva$.

नेदं वाचिनिकम् अलिङ्गता असङ्ख्यता च It cannot be stated that the states of having no gender and no number exist at all periods.

किं तर्हि ? How then?

स्वाभाविकमेतत्

It is but natural not to possess them at one stage and to possess them at another.

तद्यथा - समानमीहमानानां चाधीयानानां च केचिद्र्थेर्युज्यन्ते अपरे न । न चेदानीं कश्चिद्र्थेवानिति कृत्वा सर्वेर्थवद्भिः शक्यं भवितुं, कश्चिद्रानर्थक इति सर्वेरनर्थकैः । तत्र किमसाभिः शक्यं कर्तुं, यत् प्राक् समासाचार्थस्य लिङ्गसङ्ख्याभ्यां योगो नास्ति, समासे च भवति । स्वाभाविकमेतत्

For instance, of those persons who study equally with the same hope (of getting money), some get it and others do not. Because one gets money, it need not be that all have got money, and because one has not got money, it need not be that all have not got money. What can be done by us there? It is but natural for an expression denoting a meaning not to possess gender and number before it becomes a compound and to possess the same after it has become a compound.

अथ वा आश्रयतो लिङ्गवचनानि भविष्यन्ति - यथा गुणवचनेषु । गुणवचनानां हि शब्दानामाश्रयतो लिङ्गवचनानि भवन्ति । तद्यथा - शुक्रं वस्तं, शुक्रा शादी शुक्रः कम्बलः, शुक्रों कम्बलों, शुक्राः कम्बला इति । यदसौ द्रव्यं श्रिनो भवति गुणः, तस्य यिष्ठः वचनं च तद् गुणस्थापि भवनि । एवभिहापि यदसौ द्रव्यं श्रिनो भवति समासः, तस्य यिष्ठः वचनं च तत् समासस्थापि भविष्यति ।

Or gender and number of a word are decided from those of the words that are qualified by them as in the case of words denoting quality. Words denoting quality take the gender and the number of the gunins Viz. śuklam vastram, śuklā śāṭī, śuklaḥ kambalaḥ, śuklāu kambalāu, and śuklāḥ kambalāḥ. If the gunavācakaśabda qualifies gunivācakaśabda, the former takes the gender and the number of the latter. So also the samāsa takes the gender and the number of the word which denotes the dravya of which the samāsārtha serves as višēsana.

TT

अर्थेह कस्मान्न भवति याज्ञिकश्चायं वैयाकरणश्च, कठश्चायं बह्वचश्च, औविथकश्चायं मीमांसकश्च इति ?

Which prevents the following pairs: Yājñikaś ca ayam Vāiyākaraṇaś ca; Kaṭhaś ca ayam bahvṛcaś ca and Āukthikaś ca ayam mīmāmsakas ca from forming into dvandvasamāsa?

Note:— This question arises since the dhurmas are different even though dharmin is the same, in the parankāryatvapakṣa. In the ēka-samjñādhikārapukṣa this does not arise on account of their being tatpurusa thro' višēsavidhi.

रोष इति वर्तते अशेषत्वान्न भविष्यति

There is anuvrtti for the word $s\bar{e}sah$ (from the $s\bar{u}tra$ $\hat{S}\bar{e}s\bar{o}$ bahuvrīhih). Dvandva does not set in, since they do not come under the purview of $s\bar{e}sa$ and (since they come under $Vis\bar{e}san$ am $vis\bar{e}s\bar{e}y\bar{e}na$ bahulam. 2-1-57).

यदि शेष इति वर्तते,

उपास्नातं स्थूलसिक्तं तृष्णीङ्गङ्गं महाहदम् । द्रोणं चेदशको गन्तुं मा त्या ताप्तां कृताकृते ॥

If there is anuvitti for śēṣa, the dvandva kṛtākṛtē in the verse Upāsnātam sthūlasiktam tūsnīngangam mahāhradam t

Drōṇam cēd asakō gantum mā tvā tāplām kṛtākṛtē u cannot be secured.

Note: Kāiyaļa reads: Atra "klēna nanvišisļēna anan" (2, 1, 60) iti samāsavidhānād ašēsatvād dvandvā prasangaļi.

Note:—2. $K\bar{a}iy$ $i\!t\!a$ says that $up\bar{a}sn\bar{a}ta$ etc. are five $t\bar{i}rthavis\bar{e}\bar{s}as$.

नैष दोषः; अन्यद्धि कृतम्, अन्यदकृतम्

This difficulty does not arise; for krtam is one and akrtam is another (the former meaning sukrtam or punya and the latter meaning duskrtam or $p\bar{z}pa$).

Note:— Since there need not be $s\bar{a}m\bar{a}n\bar{a}dhikaranya$ between krta and akrta, they come under the purview of $s\bar{e}sa$.

III

चार्थे द्वन्द्वचनेऽसमासेऽपि चार्थसम्प्रत्ययादानिष्टप्रसङ्गः

If the $s\bar{u}lra$ is read $C\bar{a}rth\bar{e}$ dvandvah, there is chance for the $samj\tilde{n}\bar{a}$ to reach in $asam\tilde{a}sa$ where it is not needed, on account of the suggestion of $c\tilde{a}rtha$.

चार्थे द्वन्द्वचनेऽसमासेऽपि चार्थसम्प्रत्ययादिनिष्टं प्रामोति अहरहनेयमानो गामश्वं पुरुषं पशुम् । वैवस्वतो न तृष्यति सुराया इव दुर्मदी ॥ इति

इन्द्रस्वष्टा वरुणो वायुरादित्य इति

Since the meaning of ca is suggested in the expression $g\bar{a}m$ asvam puruṣam pasum in the verse

Ahar-ahar nayamānō gām aṣvām puruṣam pasum ļ Vāivasvatō na tṛpyati surāyā iva durmadī ॥

and in the expression Indras traṣṭā varuṇō vāyur ādityaḥ, there is chance for them to be designated dvandvasamūsa by the sūtra Cārthē dvandvaḥ, though it is not desired.

Note: $-N\bar{a}g\bar{o}jibhaffa$ says that $l\bar{o}k\bar{a}n\bar{a}m$ $p\bar{a}lak\bar{a}h$ is understood after $\bar{a}dityah$.

सिदं तु युगपद्धिकरणवचने ' द्रन्द्रवचनात्

The object is achieved by replacing Carthe dvandvah by Yugapadadhikaranavacane dvandvah.

सिद्धमेतत् This (the object) is achieved.

1. Yugapadadhikaranë is another reading.

कथम How?

¹ युगपद्धिकरणवचने द्वन्द्वो भवेताति वक्तन्यम्

It must be enjoined that the designation dvandva is given only when each member of the compound conveys the meaning of the whole simultaneously.

तत्र पुंबद्धावश्रतिपेधः

There is need then for prohibiting pumvadbhāva.

तत्रैतस्मिन्स्क्षणे पुंबद्धावस्य प्रतिषेधो वक्तज्यः, पट्टीमृद्धौ । समानाधिकरण-रूक्षणः पंबद्धावः प्राप्नोति

If this lak ilde san a is acceded to, there is need to prohibit punivad. $bh \bar a va$, to prevent it in the word $patv \bar u mr dv y \bar a u$; otherwise, $pum vad bh \bar a va$ based on $s \bar a m \bar a n \bar a d hikaranya$ may set in there.

विप्रतिषिद्धेषु चानुपपत्तिः

Impossibility of dvandva in words giving diametrically opposite meanings.

विपतिषिद्धेषु युगपद्धिकरणववनताया अनुपपत्तिः – शीतोष्णे, सुखदुःख, जननमरणे

The reading - Yugapad-adhikaraṇavocanē dvandvaḥ will not suit in compound words made up of antonyms, as śīlōṣṇē, sukhaduḥkhē and janonamaraṇē.

किं कारणम् ? Why?

सुखप्रतिघातेन हि दुःखं, दुःखप्रतिघातेन च सुखम्

For dulkha appears when sukha disappears and sukha appears when dulkha disappears (and hence both cannot be yugapadadhikaranavācin).

यत्तावदुच्यते तत्र पुंबद्धावप्रतिपेध इति, इदं तावद्यं प्रष्टज्यः, अथेह पुंबद्धावः कसान्त भवति दर्शनीयाया माता दर्शनीयामाता इति । अथ मतमेतत्, पाक् समासाद् यत्र सामानाधिकरण्यं तत्र पुंबद्धावो भवति इति, इहापि न दोषो भवति । Firstly with reference to the objection Tatra punivadbhāvapratiṣēdhaḥ, he must be asked why punivadbhāva has not set

Yugapad = ēkāikīna (Kāiyaļa).

in the word darśanīyāmātā, the compound of darśanīyāyāḥ mātā. If he answers that punivadbhāva sets in where there is sāmānādhikaraṇya before they become a samāsa, the same holds good here and hence the objection cannot stand.

यद्प्युच्यते विश्वतिषिद्धेषु चानुपपित्तिरिति, सर्व एव हि श्रुट्स विश्वतिषिद्धाः । इहापि प्रश्नन्यशोधाविति, प्रश्चश्चदः प्रयुज्यमानः प्रश्नार्थं सम्प्रत्याययति, न्यश्रोधार्थं निवर्तयति । न्यश्रोधश्चरः प्रयुज्यमानो न्यश्रोधार्थं सम्प्रत्यायति प्रक्षार्थं निवर्तयति । अथात्र चेद्युक्ता युगपद्धिकरणवचनता दृश्यते, इहापि युक्ता दृश्यताम् ।

With reference to the second objection vipratisiddhësu cānupapattih, all words have meanings not related to one another.
Even here in plakṣa-nyagrōdhāu, the word plakṣa, when used
denotes plakṣa tree and makes nyagrōdhārtha recede. The
word nyagrōdha, when used, denotes nyagrōdha tree and makes
plakṣārtha recede. If it is considered, even then, that there is
yugapad-adhikaraṇavacanaiva, the same exists here also (in
sukhaduḥkē etc.)

एवमपि Even then,

श्चव्दपौर्वापर्यप्रयोगादर्थपौर्वापर्याभिधानम्

Connotation of the meaning in the order of the words used.

ज्ञान्योविषयीयाद् अर्थपोर्वापयाभिष्यानं प्राप्तोति Since words are used in a certain order, their meanings also may have to be conceived in the same order.

अतः किम् What if?

युगपद्धिकरणवचनताया अनुपपत्तिः, ¹ प्रक्षन्यग्रोधो इति । यथैव हि शब्दानां पौर्वार्थ तद्वदर्शानामपि भवितव्यम् ।

There will be impropriety in the yugapad-adhikaranavacanatā in the word plaksanyagrādhāu, since there must be sequence in the conception of meaning in the same way as there is sequence in the use of words.

शब्द्पीर्वापर्यप्रयोगाद् अर्थपार्वापर्याभिधानमिति चेद् द्वियचनबहुवचनानुपपात्तः

¹ Platen pay odkar, plakynnyrgrádlált is another reading.

If it is said that \$abdapāurvāparyaprayōga leads to arthapāurvāparyābhidhāna, there is no chance for dvivacana and bahuvacana.

शव्दपीर्वापर्यश्योगाद् अर्थपीर्वापर्याभिधानमिति चेद् द्विवचनबहुवचनयोरनुपपत्तिः प्रक्षन्यमोधी प्रक्षन्यमोधा इति । प्रक्षशव्दः सार्थको निवृत्तो न्यमोधशव्द उपस्थितः । एक एकार्थः तस्यैकार्थत्वाद एकवचनं प्रामोति ।

If it is admitted that there is sequence in the conception of the meaning of the component parts of a compound on account of the sequence of the component parts of the compound. the use of dual and plural numbers will become inappropriate in the words plakṣa-nyagrōdhāu and plakṣanyagrōdhāh. Since the word nyagrōdha comes in after the word plakṣa has receded with its meaning and since ēkavacana is to be used to denote one object and nyagrōdha denotes only one object, only the singular suffix has a chance to be used after nyagrōdha.

विग्रहे च युगपद्वचनं ज्ञापकं युगपद्वचनस्य

Yugapadvacana in non samāsa is jūāpaka to yugapadvacana in samāsa.

विम्रहे खल्विप युगपद्भचनता दृश्यते – द्याद्यौ हु क्षामी (R. V. 10, 12, 1) द्याद्यौ चिदस्मै पृथिवी नैमेते । (R. ∇ . 2, 12, 13) इति

Yugapadvacanatā is seen even in non-samāsa words as in dyāvā and kṣāmā and as in dyāvā and pṛthivī in Dyāvā cid asmāi.

Note:—1. The words $dy\bar{a}v\bar{a}$, $k\dot{s}\bar{a}m\bar{a}$, and $prthiv\bar{\imath}$ are dual in number. Unless $dy\bar{a}v\bar{a}$ in the first and the second, example refers to both $dy\bar{a}uh$ and $k\dot{s}\bar{a}m\bar{a}$ and $dy\bar{a}uh$ and $prthiv\bar{\imath}$ respectively, the dual number after it cannot be satisfactorily explained. Similarly $k\dot{s}\bar{a}m\bar{a}$ and $prthiv\bar{\imath}$ refer to both $dy\bar{a}uh$ and $k\dot{s}\bar{a}m\bar{a}$ and $dy\bar{a}uh$ and $dy\bar{a}uh$

Note: 2. Dyāvā and kṣāmā are the members of split compound current in Védic Sanskrit.

^{1.} Samnamētē is another reading.

ाकेमेतत्? What is the use of this?

युगपद्धिकरणवचनतायां उपोद्धलकम् । विग्रहे किल नाम युगपद्धिकरण-वचनता स्यात्, किं पुनः समासे?

It lends support to yugapad-adhikaraṇa-vacanatva. When yugapad-adhikaraṇavacanatā is found even in non-compounds, what objection can there be to hold it in the compound?

समुदायात्सिद्धम्

It (the use of the dual and the plural) is achieved through samudāya (whole) being denoted by dvandva.

समुदायात्सिद्धमेतत्

This is achieved through samudāya being denoted by dvandva.

किमेतत् समुदायात् सिद्धम् इति ?

What purpose is served by the statement samudāyāt siddham?

द्विवचनबहुवचनताप्रसिद्धिरिति चोदितं, तस्यायं परिहारः

This serves as the answer to the objection raised that there will be no chance for dual suffix and plural suffix (in plak; a- $nyagr\bar{o}dh\bar{a}u$ and plak; a- $nygr\bar{o}dh\bar{a}h$).

समुदायात्सिद्धमिति चेन्न, एकार्थत्वात्समुदायस

The answer $samud\bar{a}y\bar{a}t$ siddham cannot hold good, since $samud\bar{a}ya$ comprehends oneness.

समुदायात् सिद्धमिति चेत्, तन्न

The answer samudāyāt siddham cannot hold good.

किं कारणम्? Why?

एकार्थत्वात् समुदायस्य । एकार्था हि समुदाया भवन्ति । तद्यथा शतं, यूथं वनम् इति

Since samudāya comprehends oneness. For samudāyās are taken collectively. Viz. satam, yūtham and vanam.

नैकार्थ्यम् There is no ēlkārthatā.

नायमेकार्थः It has no collective sense.

किं तर्हि? What then?

द्यर्थो बहुर्थश्च They denote two and many.

प्रश्लोऽपि द्यर्थो न्यमोघोऽपि द्यर्थः

Plakṣa comprehends two objects and nyagrādha too comprehends two.

यदि तर्हि सुक्षोऽपि द्यर्थः, न्यम्रोघोऽपि द्यर्थः

If, then, it is held that plaksa denotes two objects and nyagrodha too denotes two objects.

तयोरनेकार्थत्वाद् वहुपु बहुवचनप्रसङ्गः

There is chance for the plural suffix, on account of both of them together denoting many.

तयोरनेकार्थस्वाद् बहुपु बहुवचनम् इति बहुवचनं प्राप्तोति Since both of them together denote many, plural suffix may set in by the sūtra Bahusu bahuvacanam.

तयोरनेकार्थत्वाद् बहुवचनप्रसङ्ग इति चेन्न बहुत्वासावात्

There is no chance for plural suffix on the assumption of their denoting many, since there is no bahutva.

तयोरनेकार्थरबाद् बहुवचनप्रसङ्ग इति चेन्न
It is not right to argue that plural suffix may set in since they denote many.

किं कारणम्? Why?

बहुत्वाभावात् । नात्र बहुत्वमस्ति

On account of the absence of bahutva. There is no bahutva here.

किमुच्यते बहुत्वामावादिति, यदा इदानीमेवोक्तं प्रश्लोऽपि द्यर्थो न्यग्रोधोऽपि द्यर्थ इति ?

Is the statement bahutvābhāvāt appropriate when it is just now said that plakṣa is dvyartha and nyayrōdha too is dvyartha?

याभ्यामेवात्रको द्यर्थः, ताभ्यामेवापरोऽपि

One denotes exactly the same two objects as are denoted by the other; hence the objects denoted are only two (and not four). यद्येत्रम् If so.

अन्यवाचकेनान्यस्य वचनानुपपत्तिः

Impossibility of one word denoting the meaning of another,

अन्यवाचकेन शब्देनान्यस्य वचनं नोपपद्यते

It is not fit for a word with one denotation to have that of another.

अन्यवाचकेनान्यस्य वचनानुपपित्तिशित चेत् प्रक्षस्य न्यग्रोधत्वाद् न्यग्राधस्य प्रक्षत्वात् स्वग्रब्देनाभिधानम्

If it is said that it is inappropriate for one object to be denoted by a word which denotes another, it is met by saying that the object is denoted only by the word which has that meaning, since plakṣa is nyagrōdha and nyagrōdha is plakṣa.

अन्यवाचकेन अन्यस्य वचनानुपपत्तिरिति चेद् एवमुच्यते तन्न ।

If it is said that it is inappropriate for one object to be denoted by a word whose meaning is different, it is answered that it is not so.

किं कारणम्? Why?

प्रक्षस्य न्ययोधत्वाद् न्ययोधस्य च प्रक्षत्वाच स्वशब्देन अभिधानं भविष्यति । प्रक्षोऽपि न्ययोधः, न्ययोधोऽपि प्रक्षः

There is abhidhāna by svašabda, since plakṣi is nyagrōdha and nyagrōdha is plakṣa. The word plakṣa denotes nyagrōdha too and the word nyagrōdha denotes plakṣa too.

कथं पुनः प्रक्षोऽपि न्यत्रोधो न्यत्रोधोऽपि प्रक्षः स्याद् यावता कारणाद् द्रव्ये शब्दनिवेशः?

How is it possible for *plakṣa* to denote *nyagrōdha* too and *nyagrōdha* to denote *plakṣa* too, since words are used to denote objects on some basis.

कारणाद् द्रच्ये शब्दनिवेश इति चेत् तुल्यकारणत्वात् सिद्धम्

If it is said that the use of $\hat{s}abda$ to denote dravya is through some $k\bar{a}rana$, the object is achieved here since the same $k\bar{a}rana$ exists in both.

कारणाद् द्रव्ये शब्दिनवेश इति चेदेवमुच्यते, तन्न

If it is said so on the basis that the use of a $\pm abda$ to denote a particular dravya is determined by some $k\bar{a}rana$, it is not so.

तुल्यकारणत्वात् सिद्धम् । तुल्यं हि कारणम् । यदि तावत् प्रक्षरतीति प्रक्षः स्यात्, न्ययोधेऽप्येतद् भवति । तथा यदि न्यग् रोहतीति न्ययोधः, प्रक्षेऽप्येतद् भवति ।

The object is achieved, since the same $k\bar{a}rana$ exists in both. For $k\bar{a}rana$ is the same. If the pravittinimitta of plakṣa is prakṣaranatva (the state of extending wide), the same holds good to nyagrādha too. If that of nyagrādha is nyag-rāhanatva (the state of throwing off-shoots downward), the same holds good for plakṣa too.

दर्शनं वे हेतुः The usage is the kāraņa.

न च न्ययोधे प्रश्नशब्दो दश्यते

The word plaksa is not used to denote nyagrodha.

दर्शनं हेतुरिति चेत्तुल्यम्

If usage is taken to be the kāraņa, it is the same.

दर्शनं हेतुरिति चेत् तुरुयमेतद् भवति । प्रक्षेऽपि न्यग्रोधशब्दो दृश्यते, व्यग्रोधेऽपि प्रक्षशब्दः । तुरुयं हि कारणम् ।

If usage is taken to be the $h\bar{e}tu$, their denotation is the same. $Nyagr\bar{o}dha$ is used to denote plakṣa and plakṣa to denote $nyagr\bar{o}dha$; for the $h\bar{e}tu$ of denotation remains the same.

न वै लोके एप सम्प्रत्ययो भवति । न हि प्रक्ष आनीयतामित्युक्ते न्यग्रीध आनीयते

It is not so taken in the world; for if one says, "Bring plakṣa", nyagrādha is not brought.

तद्विषयं च (One denoting another) is found only in it (dvandva).

तिद्विषयं चेतद् द्रष्टवयं प्रश्नस्य न्यत्रोधत्वम्
It must be comprehended that plakşa denotes nyagrödha in it alonc.

किंविषयम्? In which alone?

द्वन्द्वविषयम् In dvandva alone.

युक्तं पुनर्यन्नियतविषया नाम शब्दाः स्यु ?

Is it proper to take that words are restricted in their usage?

बाढं युक्तम् It is certainly proper.

अन्यत्रापि तद्विषयदर्शनात्

On account of niyata-viṣayatva (restricted application) being seen elsewhere too.

अन्यतापि हि नियतिविषयाः श्राच्या दृश्यन्ते । तद्यथा - समाने रक्ते वर्णे, गौं कृष्ण इति भवति, अश्वः शोण इति; समाने च काले वर्णे, गौं: कृष्ण इति भवति, अश्वा हेम ईति; समाने च शुक्के वर्णे, गौं: श्वेन इति भवति, अश्वः कर्क इति । Words have restricted application elsewhere too. It is illustrated thus:- Though red colour is one, the word ohita is used with reference to the bull, and the word sono, with reference to the horse; though black colour is one, the word kṛṣṇa is used with reference to the bull and the word hēma with reference to the horse; and even though white colour is one, the word śvēta is used with reference to the bull and word karka with reference to the horse.

यदि ताई प्रश्लोऽपि न्यमोधः, न्यमोधोऽपि प्रक्षः, If, then, it is taken that plakṣa denotes nyagrādha too and vice-versa,

एकेनोक्तत्वादपरस्य प्रयोगोऽनुपपन्नः

The use of another is inappropriate on account of its meaning being expressed by one.

एकेनोक्तत्वात्तस्यार्थस्य अपरस्य प्रयोगो नोपपद्यते, प्रक्षेण न्यमोधस्य, न्यमोध-प्रयोगः

Since one expresses the meaning of another, the use of the second is inappropriate. If the meaning of nyagrādha is expressed by plakṣa, the use of nyagrādha is unnecessary.

एकेनोक्तत्वादपरस्य प्रयोगोऽनुपपन इति चेदनुक्तत्वात् छुन्नेण न्यग्रोधस्य न्यग्रोधप्रयोगः

If it is said that the use of the second is not necessary on account of its meaning being expressed by the first, there is need for the use of $nyagr\bar{o}dha$, since its meaning has not been expressed by plaksa.

एकेनोक्तत्वाद् अपरस्य प्रयोगोऽनुपपन्न इति चेत्, तन्न ।
It is not right to say that the second need not be used, since its meaning has been expressed by the first.

किं कारणम् ? Why?

अनुक्तत्वात् प्रक्षेण न्यग्रोधस्य न्यग्रोधप्रयोगः - अनुक्तः प्रक्षेण न्यग्रोधार्थ इति कृत्वा न्यग्रोधशब्दः प्रयुज्यते

The use of nyagrādha on account of nyagrādha not being denoted by plakṣa. Nyagrādha is read on the understanding that its meaning has not been denoted by plakṣa.

कथमनुक्तः, यावतेदानीमेवोक्तं प्रक्षोऽपि न्यमोधः, न्यमोधोऽपि प्रक्ष इति ? . How is it that its meaning has not been expressed by plakṣa, even though it has just now been said that plakṣa is nyagrōdha and nyagrōdha is plakṣa?

सहम्तावेतौ अन्योऽन्यस्यार्थमाहतुः, न पृथग्भृतौ ?

Only when they are knit together as in dvandva, one can denote another and vice versa and not when they are separated from each other.

कि पुनः कारणं सहभूतावेती अन्योन्यस्यार्थमाहतुः, न पृथाभूती ? What is the authority to determine that one denotes the other too only when they are knit together and not when they are separated from each other?

अभिधानं पुनः खाभाविकम् The denotion is inherent in them.

स्वाभाविकमभिधानम्

It is in their very nature to have such a denotation.

अथ वा इह को चित् प्राथमकि । स्थानयग्रोधो, को चित् कियया वा गुणेन वा प्रक्ष इवायं प्लक्षः न्यग्रोध इवायं न्यग्रोध इति । तत्र प्लक्षो इति उक्ते सन्देहः स्थात् - किमिवो प्लक्षावेव आहोस्वित् प्लक्षन्यग्रोधो इति । तत्र असन्देहार्थं न्यग्रोधशब्दः प्रयुज्यते ।

Or the words plak ilde a and nyagr ilde a have firstly their <math>primary sense and then secondary sense on the basis of similarity in kriy ilde a or guna. If the word plak ilde a ilde a is read, the doubt whether it denotes two plak ilde a ilde a or a plak ilde a and a nyagr ilde a ilde b a may arise. In order to clear the doubt the word nyagr ilde a ilde b a is read (along with plak ilde a ilde a).

सेयं युगपदिधिकरणवचनता नाम दुःखा च दुरुपपादा च । यच्चाप्यस्या निवन्धनमुक्तं चावा ह क्षामा इति, तदिप छान्दसम् । तत्र सुपां सुपो भवन्तीत्येव सिद्धम् । सूत्रं च भिद्यते ।

This Yugapad-adhikaraṇa-vacanatā is beset with difficulties and is not supported with pramāṇa. The point stated in support of it— $dy\bar{a}v\bar{a}$ ha $kṣ\bar{a}m\bar{a}$ is $V\bar{e}dic$ expression. The use of one case-suffix for another there may be on the strength of the $s\bar{u}tra$ Supām suluk...(7, 1, 39). Besides the $s\bar{u}tra$ has to be reworded.

यथान्यासमेवास्तु Let the sūtra be as it is.

ननु चोक्तं चार्थे द्वन्द्वचने असमासेऽपि चार्थसम्प्रत्ययादनिष्टपसङ्गः इति । Oh, it was said that the reading Cārthē dvandvaḥ will land us in difficulties, since cārtha is found in non-samāsas too.

नैष दोषः । इह चे द्वन्द्वः इतीयता सिद्धम्

This difficulty does not arise. The purpose is served by reading the $s\bar{u}tra\ C\bar{e}\ dvandva\dot{p}$.

कथं पुनश्चे नाम वृत्तिः स्यात्, शब्दो होषः ?

How is it possible for vitti to exist in ca, it being only śabda

शब्दे कार्यासम्भवाद् अर्थे कार्थ विज्ञास्यते

Since it is not possible to have kārya in ŝabda, it is taken that it takes place in artha.

सोऽयमेवं सिद्धे सित यदर्थमहणं करोति तस्यतत् प्रयोजनम् - एवं यथा विज्ञायेत - चेन क्वनोऽर्थः चार्थः इति

When the object is capable of being thus achieved even without artha, the benefit of its reading is this-that the word cārtha should be split as cēna kṛtaḥ arthaḥ so that it may mean the artha expressed by ca alone (and not suggested).

कः पुनश्चेन कृतोऽर्थः What is the artha conveyed by ca.

समुच्चयोऽन्वाचय इतरेतरयोगः समाहार इति Samuccaya, anvācaya, itarētarayoga and samāhāra.

े समुच्चयः - प्लक्षश्च इत्युक्ते, गम्यते एतद् न्यग्रोधश्च इति ; तथा न्यग्रोधश्च इत्युक्ते, गम्यते एतत् प्लक्षश्च इति ।

Samuccaya (aggregation). If plakṣaś ca is read, nyagrōdhaś ca is suggested and if nyagrōdhaś ca is read, plakṣaś ca is suggested.

Note: Kāiyaṭa says that plakṣaś ca suggests nyagrādhśa ca if it is read after Nyagrādhō dṛśyatām.

अन्वाचयः - सक्षश्च इत्युक्ते गम्यते एतत्, सापेक्षोऽयं प्रयुज्यते इति ।

Anvācaya (Associating a subordinate one with the principal):If plakṣaś ca is read, it suggests that something else is associated with it.

Note: $K\bar{a}iyala$ says that there is no dvandva between a word denoting $pradh\bar{a}na$ and another denoting an object associated with it.

इतरेतरयोगः - प्रश्नश्च न्यमोधश्च इत्युक्ते गम्यते एतत्, प्रशोऽपि न्यमाध-सहायः, न्यमोधोऽपि प्रश्नसहाय इति

Itaritarayêgah (Mutual association). If plakşas ca nyagrêdhas ca is read, it is suggested that plakşa is in association with nyagrêda and nyagrêdha too is in association with plakşa.

^{1.} Somecony' etc. is another reading.

स्थ्रश्च न्यत्रोधश्च इत्युक्ते समाहारेऽपि कियते स्थ्रन्यत्रोधम् इति । तत्राय-प्यर्थः - द्वन्द्वैकवद्भावो न पठितन्यो भवति, समाहारैकत्वादेव सिद्धम् ।

When plakṣaś ca nyagrōdhaś ca is read, they are combined nto samāhāradvandva thus:-plakṣanyagrōdham. This too becomes the prayōjana that dvandvāikavadbhāva need not be enjoined in the sūtras Dvandvaś ca.... (2, 4, 2) etc, since its purpose is served by samāhāradvandva.

Note: $-N\bar{a}g\bar{e}\dot{s}abhatta$ says that ca is $dy\bar{o}taka$ in samuccaya and $anv\bar{a}caya$ and $v\bar{a}caka$ in the other two.

1 V

एकाद्ञ द्वाद्श इति कोऽयं समासः

To which samāsa do ēkādaša and dvādašī belong?

एकादीनां दशादिभिर्द्धन्द्वः

Dvandva between ēka etc. and daśa etc.

एकादीनां सह दशादिभिर्द्धन्द्वः समासः

Dvandva is the samāsa between ēka etc. and daśa etc.

Note: Kāiyaṭa says that ādi refers to vimsati etc.

एकादीनां दशादिभिद्देन्द्र इति चेद् विंशत्यादिषु वचनप्रसङ्गः

On admitting dvandva between ēka etc. and daša etc. there is chance for dual and plural suffixes after vims iti etc.

एकादीनां दशादिभिर्द्ध-द्व इति चेद् विशत्यादिपु वचनं प्राप्तोति एकविंशतिः, द्वाविंशतिः

If it is admitted that there is dvandva between $\bar{e}ka$ etc. and $da\dot{s}a$ etc. dual and plural suffixes may appear after $vi\dot{m}\dot{s}ati$ in $\bar{e}kavi\dot{m}\dot{s}ati\dot{h}$, $dv\bar{a}vi\dot{m}\dot{s}ati\dot{h}$.

सिद्धं त्विधिकान्ता सङ्ख्या सङ्ख्यया समानाधिकरणाधिकारेऽधिकलोपश्च
The object is achieved by reading in samānādhikaraṇādhikāru :
Adhikāntā sankhyā sankhyayā adhikalōpas ca.

सिद्धमेतत् The object is achieved.

कथम्! How?

समानाधिकरणाधिकारे वक्तव्यम् – अधिकान्ता सङ्ख्या सङ्ख्या च सह समस्यते अधिकग्रव्दस्य च लोपो भवति इति । एकाधिका विंशतिः एकविंशतिः, द्यधिका विंशतिः द्वाविंशतिः ।

The following has to be read in samānādhikaraṇādhikāra:-Adhikāntā sankhyā sankhyayā saha samasyatē adhikaśabdasya ca lōpō bharati, (a number followed by adhika eompounds with another number and the word adhika is dropped) so that ēkavimšatiḥ and dvāvimšatiḥ may have the vigraha ēkādhikā vimšatiḥ and dvyadhikā vimšatiḥ.

यदि समानाधिकरणः, स्वरो न सिद्धग्रति । यद्धि तत् 'सङ्ख्या पूर्वपदं प्रकृतिस्वरं भवति ' इति, द्वन्द्वे इत्येवं तत् ।

If it is read in the samānādhikaranādhikāra, the udātta eannot appear at the desired place. The rule that the sankhyā takes pūrvapadaprakrtisvam will operate in dvandva.

किं पुनः कारणं द्वन्द्व इत्येवं तत् Why should it be taken to operate in dvandva?

इह मा भूत् शतसहस्रम्

To prevent the same in \$1tasahasram (the compound of sahasrānām and satam).

अस्तु तर्हि द्वन्द्वः Let it then be dvandva in ēkāduśu etc.

ननु चोक्तम् एकादीनां दशादिभिर्द्धन्द्व इति चेत् विश्वत्यादिषु वचनप्रसङ्ग इति Oh, the following:- Ekādīnām dasādibhir dvandva iti cēd vimsatyādisu vacanaprasaigah was raised against it.

नेप दोप: । सर्वो हि द्वःद्वो विभाषेकवद् भवति This difficulty does not arise. All dvan lvas can be optionally treated like singular nouns.

यदा तर्हि एकवचनं तदा नपुंसकलिक्नं प्रामोति If singular appears, neuter suffix may set in.

लिप्तमशिष्यं लोकाश्रयस्यालिप्तस्य Linga need not be enjoined since it follows the usage in the world.

उपसर्जनं पूर्वम् (2, 2, 30)

किमर्थमिद्मुच्यते ? Why is this read?

पसर्जनस्य पूर्ववचनं परप्रयोगीनवृत्त्यर्थम्

Reading of Upasarjanam pūrvam is to prohibit paraprayoga.

उपसर्जनस्य पूर्ववचनं कियते, परप्रयोगो मा भूदिति

 $Par{u}rvavacana$ to upasarjana is enjoined to prevent it from peing the latter member of a compound.

न वानिष्टादर्शनात्

It need not be since there is no $pray ilde{o}ga$ contrary to it.

न वा एतत्प्रयोजनमस्ति This is not the real benefit.

किं कारणम् ? Why?

अनिष्टादर्शनात् । न हि किञ्चिदनिष्टं दृश्यते । न हि कथ्चित् राजपुरुष इति प्रयोक्तन्ये पुरुषराज इति प्रयुङ्क्ते । यदि चानिष्टं प्रसज्येत ततो यलाई स्यात् ।

On account of the absence of undesired element. None uses nothing that we do not wish for is seen here. the word puruṣarāja in place of rājapuruṣa. Attempt is

necessary only when there is a chance for anista.

Note:— $V\bar{a}rttikak\bar{a}ra$ feels that this $s\bar{u}tra$ need not be read, since Grammar has to deal with only the forms current in the world.

अथ यत्र द्वे पष्टचन्ते भवतः कस्मात् तत्र प्रधानस्य पूर्वनिपातो न भवति, राज्ञः पुरुषस्य राजपुरुषस्य इति ?

Why is there no pūrvanipāta to the pradhana when there are two nouns in the sixth case, as rājāah puruṣasya? We have only rājapursasya.

NOTE: -This question arises on the assumption that both form a compound by Sasthī (2, 2, 8) which is in the nominative case.

पष्ठचन्तयोः समासेऽर्थाभेदात् प्रधानस्यापूर्वनिवातः

There is no pūrvanipāla to the pradhāna in the between two sasthyanta's, since both denote the same.

षण्ठ्यन्तयोः समासे अथिमेदात् प्रधानस्य पूर्वनिपातो न भविष्यति There is no pūrvanipāta to the pradhāna in the samāsa between two sasthyanta's since both denote the same.

NOTE:—The objector takes $r\bar{a}japuru\bar{s}asya$ as the sixth case of $r\bar{a}japuru\bar{s}a$,—the compound of $r\bar{a}j\tilde{n}ah$ puru $\bar{s}ah$, while the $siddh\bar{a}ntin$ takes it only as the compound of $r\bar{a}j\bar{a}$ $c\bar{a}s\bar{a}u$ purusas ca.

एवं न चेदमकृतं भवति उपसर्जनं पूर्वमिति Hence is this sūtra read Upasarjanam pūrvam.

अर्थश्च अभिन्न इति कृत्वा प्रधानस्य पूर्वनिपातो न भविष्यति । There is no pūrvanipāta to the pradhāna on account of their meanings having the sambandha of abhēdatā and not pradhānāpradhānatā.

अल्पाच्तरम् (२, २, ३४)

किमयं तन्त्रं तरनिर्देशः, आहोस्विद् अतन्त्रम् ? Is the suffix tara read here to denote comparative degree enjoined in Dvivacana.... (5, 3, 57) or for euphony?

िक चातः ? What does it matter if it is either?

यदि तन्त्रं द्वयोनियमो बहुष अनियमः

If it is tantra, niyama-sūtra will apply only when the compound has two components and not more than two.

तत्र को दोष:? What harm is there?

शङ्खदुन्दुभिर्वाणानाम् इति न सिध्यति । दुन्दुभिशन्दस्यादि पूर्वनिपातः प्रामोति ।

The form Śankha-dundubhi-vīṇānām (with śankha as the first member) cannot be secured. There is chance for dundubhi also to be used as the first member.

अथ अतन्त्रं, मृदङ्गशङ्कृतूणवाः पृथङ्नदन्ति संसदि, प्रासादे धनपतिराम-केशवानाम् इत्येतन्न सिध्यति ।

If it is atantra, the forms mṛdanga-śankha-tūṇavāḥ and dhana-pati-rāma-kēśavānām in mṛdanga-śankhatūṇavāḥ pṛthan nadanti

 $sa\dot{m}sadi$ and in $Pr\bar{a}s\bar{a}d\bar{e}$ $dhanapati-r\bar{a}ma-k\bar{e}\acute{s}av\bar{a}n\bar{a}m$ cannot be secured (since $\acute{s}a\dot{n}kha$ and $R\bar{a}ma$ which are $alp\bar{a}c$ may be used as first members).

यथेच्छिस तथास्तु Let it be as you please.

अस्तु तावत् तन्त्रम् Let it be tantra.

ननु चोक्तं द्वयोर्नियमः बहुष्विनयम इति । तत्र शङ्खदुन्दुभिवीणानाम् इति न सिध्यति । दुन्दुभिशव्दस्थापि पूर्वनिपातः प्राप्तोतीति

Oh, it was said Dvayōr niyamaḥ bahuṣu aniyamaḥ and the form śankhadundubhivīṇānām cannot be secured and there may be pūrvanipāta to dundubhi also.

नैष दोषः । यदेतद्रुगच्तरमिति तद्रुगाजिति वक्ष्यामि । This difficulty does not arise. I shall replace alpāctaram by alpāc.

अथ वा पुनरस्त्वतन्त्रम् Or let it be atantra.

ननु चोक्तं मृदङ्गशङ्खतूणवाः पृथङ् नद्नित संसदि, प्रासादे धनपतिराम-केशवानाम् इत्येतन्त्र सिध्यति इति

Oh, it was said that mṛdaṅga-śaṅkha-tūṇavāḥ and dhanapati-rāmakēśavānām in the expressions Mṛdaṅga-śankha-tūṇavāḥ pṛthaṅ nandanti saṅsadi, Prāsādē dhanapati-rāma-kēśavānām cannot be secured.

अतन्त्रे तरानिर्देशे शङ्खतूणवयोर्मृदङ्गेन समासः

When tara is atantra, $\dot{s}a\dot{n}khat\bar{u}\dot{n}av\bar{a}u$ forms $sam\bar{a}sa$ with $m\dot{r}da\dot{n}ga$.

अतन्त्रे तरिनिर्देशे शङ्खतूणवयोर्मदङ्गेन सह समासः करिष्यते - शङ्खश्च तूणवश्च शङ्खतूणवा ; मृदङ्गश्च शङ्खतूणवा । रामश्च केशवश्च रामकेशवा ; धनपतिश्च रामकेशवा च धनपतिरामकेशवाः, धनपतिराम-केशवानाम् इति ।

If tara is not taken as comparative suffix, saikha-tūņavāu compounds with mṛdaiga thus: - Śaikhaś ca tūṇavaś ca

^{1.} Some editions invert the order.

šankha-tūṇavāu; mṛdaṅgas ca saṅkhatūṇavāu ca mṛdaṅgasaṅkha tūṇavāḥ. Similarly Rāmas ca Kēšavas ca, Rāmakēšavāu Dhanapatis ca Rāmakēšavāu ca, Dhanapatirāmakēsavāḥ, Dhana patirāmakēsavānām.

अथ यत्र बहूनां पूर्वनिपातप्रसङ्गः किं तत्रैकस्य नियमो भवति, आहोस्वि अविशेषेण

When there is a chance for many words to have pūrva-nipāta, does it hold good for one or for all?

अनेकप्राप्तावेकस्य नियमोऽनियमः शेवेषु

When there is a chance for many, there is niyama for one and aniyama for others.

अनेकस्य प्राप्ती एकस्य नियमो भवति, शेषेव्वनियमः - पटुमृदुशुङ्काः, पदुशुक्कमृद्व इति

When there is a chance for many, there is niyama for one and aniyama for the rest viz Paţu-mṛdu-śuklāḥ and paţu-sukla-mṛdavaḥ.

ऋतुनक्षत्राणामानुपूर्व्येण समानाक्षराणाम्

In their order in the case of rtus and naksatras of equal syllables.

ऋतुनक्षत्राणामानुपूर्व्येण समानाक्षराणां पूर्वनिपातो वक्तव्यः - शिशिरवसन्तौ उदगयनस्थो, कृत्तिकारोहिण्यः

Pūrvanipāta, in their order, must be enjoined with respect to words denoting seasons and constellations having the same number of syllables. Viz sisiravasantāu, udagaņanasthāu and kṛttikā-rōhiṇṇaḥ.

अभ्यहितम् Pūrvanipāta of the more respected.

अभ्यहितं च पूर्व निपततीति वक्तव्यम् - मातापितरी, श्रद्धामेधे lt must be enjoined that the more respected get the piirvanipāta. Viz Mātāpitarāu and śraddhāmēdhē.

लघ्नक्षरम् Word having a short vowel.

लघ्नक्षरं पूर्व निपततीति वक्तव्यम् - कुशकाशम् , शरचापम् ।

It must be enjoined that laghvakṣara has the pūrvanipāta. Viz. kuṣakāṣam and ṣaracāpam.

अपर आह - सर्वत एव अभ्यहिंतं पूर्वं निपततीति वक्तव्यम् - लध्वक्षरादिष श्रद्धातपसी, दीक्षातपसी

Another says that the more respected deserves $p\bar{u}rvanip\bar{a}ta$ everywhere, even in preference to laghvakṣara. Viz. $śraddh\bar{a}$ - $tapas\bar{\imath}$ and $d\bar{\imath}kṣ\bar{a}tapas\bar{\imath}$.

वर्णानामानुपूर्व्येण In their order with respect to castes.

वर्णानाञ्च आनुपूर्वेण पूर्वनिपाता भवन्तीवि वक्तव्यम् - ब्राह्मणक्षत्रियविट्शूद्धाः $P\bar{u}rvanip\bar{a}ta$ must be enjoined in their order with respect to castes. Viz $Br\bar{a}hmana-kṣatriya-vit-ʻs\bar{u}dr\bar{a}h$.

भातुश्र ज्यायसः To the elder between brothers.

श्रातुश्च ज्यायसः पूर्वनिपातो भवतीति वक्तव्यम् - युधिष्ठिरार्जुनौ

Pūrvanipāta must be enjoined to the elder between brothers

Viz. Yudhişṭhira-arjunāu.

सङ्ख्याया अल्पीयसः To the smaller between numbers.

सङ्ख्याया अल्पीयसः पूर्वनिपातो भवतीति वक्तन्यम् - एकादश, द्वादश It must be enjoined that the smaller between numbers gets the pūrvanipāta. Viz. Ekādaśa and dvādaśa.

धर्मादिपूभयम् Both among dharma etc.

धर्मादिषु उभयं पूर्व निपततीति वक्तन्यम् - धमार्थो, अर्थधर्मो ; कामार्थो, अर्थकामौ ; गुणवृद्धी, वृद्धिगुणौ ; आद्यन्तौ, अन्तादी

Pūrvanipāta must be enjoined to both among dharma etc. Viz. Dharmārthāu, arthadharmāu; kāmārthāu, arthakāmāu; guņavṛddhī, vṛddhiguṇāu; ādyantāu, antādī.

सप्तमीविशेषणे बहुवीहाँ (2, 2, 35)

यहुत्रीहाँ सर्वनामसङ्ख्ययोरुपसङ्ख्यानम् Need to add sarvanāmasankhyayōh with reference to bahuvrīhi. बहुवीहों सर्वनामसङ्ख्ययोक्त्यसङ्ख्यानं कर्तव्यम् - विश्वदेवः, विश्वयशाः ; हिपुत्रः, हिभार्यः

There is need to add that pronouns and numerals get the pūrvanipāta, so that the forms viśvadēvaḥ, viśvayaśāḥ, dviputraḥ and dvibhāryaḥ may be secured.

Note: $-K\bar{a}iyaļa$ states that $vi\acute{s}va$ is $vi\acute{s}\bar{e}\dot{s}ya$ in $vi\acute{s}vad\bar{e}va$ and prefers the example $dvi\acute{s}uklah$ to the last two.

अथ यत्र सङ्ख्यासर्वनाम्नोरेव बहुवीहिः कस्य तत्र पूर्वनिपातेन भवितव्यम् ? Which should have pūrvanipāta when both sankhyā and sarvanāman appear in bahuvrīhi?

परत्वात् सङ्ख्यायाः - द्यन्याय व्यन्याय

To sankhyā since it is read later in the vārtlika. Viz. Dvyanyāya and tryanyāya.

वा प्रियस Optional pūrvanipāta to priya.

वा ित्रयस्य पूर्विनिपातो भवतीति वक्तन्यम् - पियगुडः, गुडिपियः It must be stated that pūrvanipāta is optional with reference to priya. Viz. Priyaguḍaḥ and guḍapriyaḥ.

सप्तम्याः पूर्वनिपाते गड्वादिभ्यः परवचनम्

Need to read that the saptamī will follow gadu etc. with reference to saptamī-pūrvanipāta.

सप्तम्याः पूर्विनिपाते गड्वादिभ्यः परा सप्तमी भवतीति वक्तव्यम् न गडुकण्ठः, गडुशिराः

It must be enjoined that the saptamī which is entitled to have pūrvanipāta gets paranipāta if gadu etc. is qualified by it. Viz. gadukanthah and gaduśirāh.

निष्टा (2, 2, 36)

निष्टायाः पूर्वनिपाते जातिकालसुखादिभ्यः परवचनम् Need to enjoin that nisṭhā which is entitled to have pūrvanipāta follows jāti, kāla; sukha etc.

निष्ठायाः पूर्वनिपाते जातिकालसुखादिभ्यः परा निष्ठा भवतीति वक्तन्यम् -शार्क्कजग्वी, पलाण्डुनक्षिती, मासजाता, संवत्सरजाता, सुखजाता, दुःखजाता।

There is need to enjoin that $nisth\bar{a}$ follows $j\bar{a}ti$, $k\bar{a}la$, sukha, etc. though it is entitled to have $p\bar{u}rvanip\bar{a}ta$ viz. $s\bar{a}rigajagdh\bar{i}$, $pal\bar{a}ndubhaksit\bar{i}$, $m\bar{a}saj\bar{a}t\bar{a}$, $samvatsaraj\bar{a}t\bar{a}$, $sukhaj\bar{a}t\bar{a}$ and $duhkhaj\bar{a}t\bar{a}$.

न बोत्तरपदस्थान्तोदात्तवचनं ज्ञापकं परभावस्य

It need not be read; the injunction of antōdāttatva to the uttarapada is $j\bar{n}\bar{a}paka$ to parabhāva.

न वा वक्तव्यम् No, it need not be read.

किं कारणम् ? Why?

उत्तरपद्स्यान्तोदात्तवचनं ज्ञापकं परभावस्य । यद्यं जातिकालसुखादिभ्यः परस्या निष्ठाया उत्तरपद्स्यान्तोदात्तत्वं शास्ति तद् ज्ञापयत्याचार्यः, पराल निष्ठा भवतीति ।

The injunction of $aut\bar{o}d\bar{a}ttatva$ of uttarapada is $j\bar{n}\bar{a}paka$ to $parabh\bar{a}va$. Since he $(S\bar{u}trak\bar{a}ra)$ enjoins $ant\bar{o}d\bar{a}ttatva$ to the $nisth\bar{a}$ which follows jati, $k\bar{a}la$, sukha etc. in the $s\bar{u}tra$ $J\bar{a}ti$ - $k\bar{a}la$ - $sukh\bar{a}dibhyah$... (6, 2, 170), he suggests that $nisth\bar{a}$ is here uttarapada.

प्रतिषेधे तु पूर्वनिपातप्रसङ्गस्तस्माद्राजदन्तादिषु पाठः

On account of pratiṣēdha (for some) there is chance for them to have $p\bar{u}rvanip\bar{a}ta$ and hence there is need to read them in $r\bar{a}jadant\bar{a}digana$.

प्रतिषेधे तु पूर्वनिपातः प्रामोति अकृतमितप्रतिपन्नाः इति, तसाद्राजदन्तादिषु पाठः कर्तन्यः

There is chance for pūrvanipāta for kṛta, mita etc. on account of the pratiṣēdha akṛta-mita-pratipannāḥ (6, 2, 170) and hence they will have to be read in Rājadantādigaņa.

न वा प्रतिपेधवचनं ज्ञापकं परभावस्य

No, they need not be read; pratisēdha-vacana is jūapaka to parabhāva.

न वा कर्तन्यः । अत्रापि प्रतिपेधवचनं ज्ञापकं परा निष्ठा भवतीति । No, it need not be read. Even here the mention of pratisēdha suggests that niṣṭhā becomes parā.

प्रहरणार्थेभ्यश्च

 $Nisth\bar{a}$ and $saptam\bar{i}$ after words denoting beating instruments.

प्रहरणार्थेभ्यश्च परे निष्ठासप्तम्यौ भवत इति वक्तन्यम् - अस्युद्यतः, मुसलोद्यतः असिपाणिः, दण्डपाणिः

It must be enjoined that $nisth\bar{a}$ and $saptam\bar{\imath}$ get $paranip\bar{a}ta$ when they qualify beating instruments. Viz. Asyudyatah, musalodyatah, asipānih and daṇḍapāṇih.

द्वन्द्वे ध्यजाद्यदन्तं विप्रतिषेधेन

Ajādyanta separates Dvandvē ghi through vipratiṣēdha.

द्वन्द्रे वि इत्यसाद् अजाद्यदन्तिमित्येतद्भवति विषातिषेधेन । द्वन्द्वे वि इत्यस्य अवकाशः - पटुगुप्तौ ; अजाद्यदन्तिमित्यस्य अवकाशः - उपूल्तरी । इहोभयं प्राप्तोति - इन्द्रासी ; अजाद्यदन्तम् इत्येतद् भवति विषतिषेधेन ।

The sūtra Ajādyantam (2, 2, 33) supersedes the sūtra Dvandvē ghi (2, 2, 32) through vipratiṣēdha. Dvandvē ghi operates at paṭuguptāu; Ajādyadantam operates at uṣṭra-kharāu. Here in Indrāgnī both have a chance to operate and Ajādyanta operates through vipratiṣēdha.

उभाभ्यामल्पाच्तरम्

Alpāctaram (2, 2, 34) supersedes both.

उमाभ्यामल्पाच्तरामित्येतद् भवति विश्वतिषेधेन । द्वन्द्वे घि इत्यस्य अवकाशः - पटुगुप्तौ ; अल्पाच्तरमित्यस्य अवकाशः - वाग्डपदौ ; इहोभयं प्राप्तोति - वागशी - अल्पाच्तरमित्येतद् भवति विश्वतिषेधेन । अजाद्यदन्तमित्यस्य अवकाशः उष्ट्रखरा ; अल्पाच्तरामित्यस्यावकाशः स एव । इहोभयं प्राप्तोति वागिन्दौ ; अल्पाच्तरामित्येतद् भवति विश्वतिष्धेन ।

The sūtra Alpāctaram supersedes both through vipratigādia. Dvandvē ghi operates at paļuguptāu; Alpāctaram operates at vāg-drṣadāu; herein vāgagnī both may operate and Alpāctaram

operates through $vipratis\bar{e}dha$. $Aj\bar{a}dyadantam$ operates at $ustrakhar\bar{a}u$ and $Alp\bar{a}ctaram$ operates at the same place $(v\bar{a}g-drsad\bar{a}u)$; here-in $v\bar{a}g$ -indrau both may operate; $Alp\bar{a}c$ -turam operates through $vipratis\bar{e}dha$.

कडाराः कर्मधारये (2, 2, 38)

कडारादयः Kadārādayah in place of kadārāh.

कडारादय इति वक्तन्यम् । इहापि यथा स्यात् - गडुरुशाण्डिल्यः, शाण्टियगडुरुः ; खण्डवात्स्यः, वात्स्यखण्डः ।

Kaḍārādayaḥ should have been read in place of kaḍārāḥ, so that the $s\bar{u}tra$ may operate here too in $Gaḍulaś\bar{a}nḍilyaḥ$, $Ś\bar{a}nḍilyagaḍulaḥ$, Khanḍavātsyaḥ and $V\bar{a}tsyakhanḍaḥ$.

तत्तर्हि वक्तन्यम् It, then, must be so read.

न वक्तन्यम् । बहुवचननिर्देशात् कडाराद्य इति विज्ञास्यते ॥
No, it need not be so read. From the use of the plural number in kaḍārāḥ. it is taken to refer to kaḍārādis.

Āhnika - Twentythree ends.

(Second Adhyāya, second Pāda, second Āhnika ends.)

Ahnika - Twentyfour

(Second adhyāya, third pāda, first āhnika).

अनभिहिते (2, 3, 1)

The meaning of anabhihitē and the necessity of this sūtru or otherwise are discussed here.

T

अनभिहित इत्युच्यते ; किमिदमनभिहितं नाम ?

The sūtra is read Anabhihitē. What does anabhihita mean?

उक्तं, निर्दिष्टम्, अभिहितम् इति अनर्थान्तरम् । यावद् ब्रूयाद् अनुक्ते, अनिर्दिष्टे इति, तावद् अनभिहिते इति ।

The words uktam, nirdistam and abhihitam are synonyms. The word anabhihitē conveys the same meaning as the words anuktē and anirdistē.

II

अनभिहितवचनमनर्थकमन्यत्रापि विहितस्याभावादभिहिते

The sūtra Anabhihitē is not necessary on account of the absence of injunction of what is abhihita elsewhere.

अनभिहितवचनमनर्थकम्

The sūtra Anabhihitē is not necessary.

किं कारणम् ? Why?

अन्यत्रापि विहितस्याभावाद् अभिहिते - अन्यत्राप्यभिहिते विहितं न भवति l On account of the absence of vihitatā of what has been abhihita clscwhere. What is abhihita clscwhere is never enjoined once again.

कान्यत्र ? What does anyatra refer to?

चित्रगुः, शबलगुः - बहुबीहिणोक्तत्वान्मत्वर्थस्य मत्वर्थायो न भवति । गर्गाः, वत्साः, विदाः, उर्वाः - यत्रक्र्यामुक्तत्वाद् अपत्यार्थस्य न्याय्योत्पत्तिर्ने भवति । सप्तपर्णोऽष्टापद इति समासेनोक्तत्वाद् वीप्साया द्विषेचनं न भवति । Matvartha-pratyaya does not appear in the words Citraguh and sabalaguh, since the matvartha is expressed by bahuvrīhi; the general rule enjoining the apatyapratyaya with reference to Gargāḥ, Vatsāḥ, Bidāḥ and Urvāḥ does not operate, since apatyārtha is expressed by yañ and añ. Dvirvacana (reduplication) does not take place in Saptaparṇaḥ and aṣṭāpadam, since vīpsā is expressed by samāsa.

NOTE:—1. $K\bar{a}iyata$ says that the word $ny\bar{a}yyah$ was used by predecessors in place of (the general rule).

Note:—2. The general rule referred to here is Ata in (4, 1, 95).

Note:—3. Kāiyata says that there is $v\bar{\imath}ps\bar{a}$ in sapta-parnah thus:- Sapta sapta parnāni asya.

यत्तावदुच्यते - चित्रगुः शवलगुः इति बहुत्रीहिणोक्तत्वान्मत्वर्थस्य मत्वर्थीयो न भवति इति, अस्तिसामानाधिकरण्ये मतुब् विधीयते, न चाल अस्तिना सामानाधिः करण्यम् ।

With reference to the first statement that matvarthapratyaya is not used after the words citraguh and śabalaguh on account of its meaning having been expressed by bahuvrīhi, the answer is this:— Matup is enjoined to it which is samānādhikaraṇa with asti and here the component parts of the compound have no sāmānādhikaranya with asti.

यद्प्युच्यते - गर्गा वत्सा विदा उर्वाः, यञञ्भ्यामुक्तत्वाद् अपत्यार्थस्य न्याय्योत्पित्तिने भवति इति, समर्थानां प्रथमाद्वा इति वर्तते, न चैतत् समर्थानां प्रथमम्

With reference to the next statement that the general rule enjoining apatyapratyaya does not operate in the words Gargāḥ, Vatsāḥ, Bidāḥ, Urvāḥ, the answer is this:—There is anuviti for samarthānām prathamād vā and this Gargāḥ etc. does not refer to the first (denoted by tasya in the sūtra Tasyāpatyam) among samarthas.

किं तर्हि? What then?

द्वितीयमधेमुपसंकान्तम्

It has reference only to the artha of the second word in the sūtra Tasyāpatyam.

यद्प्युच्यते - सप्तपर्णोऽष्टापद इति समासेनोक्तत्वाद् वीप्साया द्विवेचनम् न भवतीति, यदत्र वीप्सायुक्तं नादः प्रयुज्यते

With reference to the last statement that reduplication is not found in the words saptaparṇaḥ and aṣṭāpadaḥ on account of the $v\bar{v}ps\bar{a}$ having been expressed by $sam\bar{a}sa$, the answer is this:- I hat which is associated with $v\bar{v}ps\bar{a}$ is not used here.

कि पुनस्तत् ? What is it?

पर्वणि पर्वणि सप्त पर्णान्यस्य, पङ्क्ती पङ्क्ती अष्टी पदानि अस्य
The words which are associated with vīpsā are parvan and paikti, since the vigrahavākyas of Saptaparnah and aṣṭāpadaḥ are parvaṇi parvaṇi sapta parṇāni asya and paiktāu paiktāu aṣṭāu padāni asya.

श्रम्बहुजकक्षु तर्हि - श्रम्, भिनित्त छिनित्त, श्रमा उक्तत्वात् कर्तृत्वस्य कर्तिर शव् न भवति ; बहुच्, बहुकृतं बहुभिन्नम् इति बहुचा उक्तत्वाद् ईपदसमाप्तेः कल्पबादयो न भवन्ति ; अकच् उचकः नीचकेः इति अकचोक्तत्वात् कुत्सादीनां कादयो न भवन्ति

If so, anyatra refers to snam, bahuc and akac. With reference to snam - Kartari sip does not operate in bhinatli and chinatli since kartriva is expressed by snam 1. With reference to bahuc the suffixes kalpap etc. denoting īṣad-asamāpti do not appear in bahukrtam, and bahubhinnam, since it is expressed by bahuc; with reference to akac - the pratyayas ka etc. denoting kutsatva etc. do not appear in the words uccakāiḥ and nīcakāiḥ, since it is expressed by akac.

ननु च श्रम् बहुजकचोऽपवादाः, ते अपवादत्वात् वाधका भविष्यन्ति ।

This is based on the view of the Pūrrūcūryū* that bhūra, karma and karlū are the meanings of conjugational signs.

Oh! the $s\bar{u}tras$ dealing with $\acute{s}nam$, bahuc and akac are $apav\bar{a}das$. Since they are $apav\bar{a}das$, they veto the $s\bar{u}tras$ $Kartari \acute{s}ap$ etc.

श्रम्बहुजकक्षु नानादेश्चत्वाद् उत्सर्गाप्रतिषेधः

With reference to śnam, bahuc and akac, there is no pratiṣēdha for the utsarga on account their being in different places.

समानदेशेरपवादैरुत्सर्गाणां बाधनं भवति; नानादेशत्वान्न प्राप्ताति । Utsargas are vetoed by apavādas only if they are in the same place. Since, in these cases, they are in different places, they cannot veto utsargas.

किं पुनिरह अकर्तव्योऽनिमहिताधिकारः कियते, आहोस्विद् अन्यत्र कर्तव्यो न कियते ?

Which is the view of the objector, whether the $anabhih\bar{a}dhi-k\bar{a}ra$, which should not be read here, is read, or whether the $anabhihit\bar{a}dhik\bar{a}ra$ which should be read elsewhere is not read there?

इह अक्तेब्यः क्रियते । एप एव हि न्याय्यः, यद्भिहिते विहितं न स्यात् It should not be read here, but it is read. This is the proper course not to enjoin anything in the śāstra which is already expressed by another.

अनिमहितस्तु विभक्त्यर्थः तस्मादनिमहितं वचनम्

Vibhaktyartha (ēkatva etc.) is anabhihita and hence is anabhihitē read.

अनिमहित्तस्तु विभक्त्यर्थः Vibhaktyartha has not been expressed.

कः पुनर्विभवत्यर्थः ? What is vibhaktyartha?

एकत्वादयो विभक्त्यर्थाः । तेप्वनिभिहितेषु कर्माद्योऽभिहिता विभक्तीनामुलकौ निभिक्तत्वाय मा भूवित्रिति । तसाद् अनिभिहितवचनम् । तसाद् अनिभिहिताधिकारः कियते । अवस्यं चैतदेवं विज्ञेयम् – एकत्वादयो विभक्त्यर्था इति ।

Ekatva etc. are vibhaktyarthas. When they are not expressed, it is not desired that the karmatva etc. expressed otherwise need not serve as nimitta to decide the vibhakti. Hence is the

necessity to read Anabhihitē. For the same reason anabhihitādhikāra is resorted to. It must necessarily be understood that ēkatva etc. are vibhaktyarthas.

अभिहिते हि प्रथमाभावः

If it is taken as abhihita, there is no chance for prathamā.

यो हि मन्यते ' कर्मादयो विभक्तयर्थाः तेष्वभिहितेषु सामध्यन्मि विभक्तीनाः मुत्रिचिनं भविष्यति ' इति, प्रथमा तस्य न प्रामोति

There is no chance for $pratham\bar{a}$ according to him who thinks that, on taking $karm\bar{a}dis$ to be vibhaktyarthas and on their being expressed, there is no chance for other vibhaktis to appear through $s\bar{a}marthya$.

酥! Where?

रक्षः, इश्वः In vṛkṣaḥ and plakṣaḥ.

किं कारणम् ? Why?

प्रातिपदिकेनोक्तः प्रातिपदिकार्थ इति

Since prātipadikārtha is expressed by prātipadika.

न कचित् प्रातिपदिकेनानुक्तः प्रातिपदिकार्थः । उच्यते च प्रथमा । सा वचनाद् भविष्यति । तवेत्र तु खरुत्रप दोपः - यस्य ते एकत्रत्वादयो विभक्त्यर्थाः । अभिहिते प्रथमाभावः इति प्रथमा ते न प्राप्नोति

There is no place where prātipadikārtha is not expressed by prātipadika. Prathamā is enjoined and hence prathamā sets in on the strength of the injunction. But, on the other hand, the defect that was raised against me by you will appear in your case, who hold that that a term of that it is expressed.

既! Where?

पचत्योदनं देवदत्त इति

In the word Dreadaltsh found in the sentence Parati Idanam Dreadaltah,

किं कारणम् ? Why?

तिङोक्ता एकत्वादयः इति । अनभिहिताधिकारं च त्वं करोपि, परिगणनं च Since ēkatva atc. are expressed by tin. You read anabhi-hitādhikāra and parigaṇana 1.

न कचित् तिङा एकत्वादीनामनिभधानम्, उच्यते च प्रथमा, सा वचनाद् भविष्यति

There is no place where $\bar{e}katva$ etc. are not expressed by tin; it is enjoined as $pr\bar{a}tipadik\bar{a}rtha$... (2, 3, 46) and it makes its appearance on the strength of the injunction.

ननु चेशनिभधानं वृक्षः प्रक्ष इति

Oh, there will be anabhidhāna here, in vṛkṣaḥ, and plakṣaḥ.

अत्राप्यभिधानमस्ति There is abhidhana even here.

कथम् श How?

वक्ष्यत्येतत् - अस्तिर्भवन्तीपरः प्रथमपुरुषोऽप्रयुज्यमानोऽप्यस्ति इति । वृक्षः प्रक्षः, अस्तीति गम्यते । तवैव तु खल्वेष दोपो यस्य ते कर्माद्यो विभक्त्यर्थाः, अभिहिते प्रथमाभाव इति, प्रथमा ते प्राप्तोति ।

He is going to say that the root as followed by lat, though not mentioned, may be taken as understood. With reference to vrksal and plaksal, asti is taken to be understood. This defect that $pratham\bar{a}$ will not appear will arise only to you who hold the view that karmatva etc. are the vibhaktyarthas and $pratham\bar{a}$ sets in, if karmatva etc. are expressed.

क ? Where?

करं करोति भीष्ममुदारं शोभनं दर्शनीयम् इति - कटशब्दात् उत्पद्यमानया द्वितीयया अभिहितं कर्मेति कृत्वा भीष्मादिभ्यो द्वितीया न प्राप्तोति ।

Dvitīyā will have no chance to appear after the words bhīṣma, udāra, śōbhana and darśanīya in the sentence kaṭam karōti bhīṣmam udāram śōbhanam darśanīyam, since karmatva is expressed by the dvitīyā which follows the stem kaṭa.

1. Pariganana is dealt with later on in the satra.

necessity to read Anabhihitē. For the same reason anabhihitādhikāra is resorted to. It must necessarily be understood that ēkatva etc. are vibhaktyarthas.

अभिहिते हि प्रथमाभावः

If it is taken as abhihita, there is no chance for prathamā.

यो हि मन्यते ' कर्मादशो विभक्त्यर्थाः तेष्वभिहितेषु सामर्थ्यान्मे विभक्तीनाः मुत्रचिर्न भविष्यति ' इति, प्रथमा तस्य न प्राप्तोति

There is no chance for prathamā according to him who thinks that, on taking karmādis to be vibhaktyarthas and on their being expressed, there is no chance for other vibhaktis to appear through sāmarthya.

斯? Where?

दुसः, प्रश्नः In vrkşalı and plakşalı.

किं कारणम् ? Why?

पातिपदिकेनोक्तः पातिपदिकार्थ इति

Since prātipadikārtha is expressed by prātipadika.

न कचित् प्रातिपदिकेनानुक्तः प्रातिपदिकार्थः । उच्यते च प्रथमा । सा वचनाद् भविष्यति । तयेत्र तु खल्वेप दोषः - यस्य ते एकवस्वादयो विभक्त्यर्थाः । अभिहिते प्रथमाभावः इति प्रथमा ते न प्राप्तोति

There is no place where prātipadikārtha is not expressed by prātipadika. Prathamā is enjoined and hence prathamā sets in on the strength of the injunction. But, on the other hand, the defect that was raised against me by you will appear in your ease, who hold that that a ten i ihhakty in thas. Prathamā will not appear, since it is expressed.

听! Where?

पचत्योदनं देवदन इति

In the word Decadatt the found in the sentence Parali Clarent Decadattale. किं कारणम् ? Why?

तिङोक्ता एकत्वादयः इति । अनभिहिताधिकारं च त्वं करोषि, परिगणनं च Since ēkatva atc. are expressed by tin. You read anabhi-hitādhikāra and parigaņana 1.

न कचित् तिङा एकत्वादीनामनिभधानम्, उच्यते च प्रथमा, सा वचनाद् भविष्यति

There is no place where $\bar{e}katva$ etc. are not expressed by tin; it is enjoined as $pr\bar{a}tipadik\bar{a}rtha$... (2, 3, 46) and it makes its appearance on the strength of the injunction.

ननु चैशनिभधानं वृक्षः स्रक्ष इति

Oh, there will be anabhidhāna here, in vrkṣaḥ, and plakṣaḥ.

अत्राप्यभिधानमस्ति There is abhidhana even here.

कथम् ? How ?

वक्ष्यत्येतत् - अस्तिर्भवन्तिपरः प्रथमपुरुषोऽप्रयुज्यमानोऽप्यस्ति इति । वृक्षः प्रक्षः, अस्तीति गम्यते । तवैव तु खल्वेष दोपो यस्य ते कर्मादयो विभक्त्यर्थाः, अभिहिते प्रथमाभाव इति, प्रथमा ते प्राप्तोति ।

He is going to say that the root as followed by lat, though not mentioned, may be taken as understood. With reference to vṛkṣaḥ and plakṣaḥ, asti is taken to be understood. This defect that prathamā will not appear will arise only to you who hold the view that karmatva etc. are the vibhaktyarthas and prathamā sets in, if karmatva etc. are expressed.

新? Where?

कटं करोति भीष्ममुदारं शोभनं दर्शनीयम् इति - कटशब्दात् उत्पद्यमानया द्वितीयया अभिहितं कर्मेति कृत्वा भीष्मादिभ्यो द्वितीया न प्राप्तोति ।

Dvitīyā will have no chance to appear after the words bhīṣma, udāra, śōbhana and darśanīya in the sentence kaṭam karōti bhīṣmam udāram śōbhanam darśanīyam, since karmatva is expressed by the dvitīyā which follows the stem kaṭa.

1. Pariganana is dealt with later on in the sūtra.

का तार्ह प्राम्नोति ? What will, then, have the chance to come ?
प्रथमा । तद्यथा, कृतः कटो भीष्म उदारः शोभनो दर्शनीय इति करोतेरूलद्यमानेन क्तेन अभिहितं कर्मेति कृत्वा भीष्मादिभ्यो द्वितीया न भवति

 $Pratham\bar{a}$. It may be explained thus:—On taking that karmalva is expressed by the suffix ta after the root kr, $dvit\bar{\imath}y\bar{a}$ does not set in after the words $bh\bar{\imath}shma$ etc. in the sentence krtah $kat\bar{\imath}$ $bh\bar{\imath}sma$ $ud\bar{a}rah$ $s\bar{\imath}$ $bhan\bar{\imath}$ $darsan\bar{\imath}yah$.

का तिहें ? What, then, will come there?

प्रथमा Prathama.

नैष दोषः । न हि ममानभिहिताधिकारोऽस्ति । नापि परिगणनम् । सामध्यन्मे विभक्तीनामुत्पत्तिभैविष्यति, अस्ति च सामध्येम् This difficulty does not arise. For there is neither anabhihitādhikāra nor parigaṇana according to my hold. Vibhaktis appear, in my opinion, according to sāmarthya. There is sāmarthya.

किम् ? What?

कर्मविशेषो वक्तव्यः Karmaviśēṣu has to be stated.

अथ वा कटोडिप कर्म, भीष्मादयोडिप, तत्र कर्मणि इत्येव सिद्धम् Or, kaṭa is karma and bhīṣma etc. too are karma. Hence dvitīyā comes after each of them by the sūtra Karmaṇi dvitīyā itself.

Note: —Kāiyaļa says that dvilīyā appears after each by associating it with karōti individually and the višēṣaṇa-viṣēṣya-

bhāva is afterwards resorted to by ēkavākyalā.

अथ वा कट एव कर्म, तत्सामानाधिकरण्याद् भीष्मादिभ्यो द्वितीया भविष्यति। Or kala alone is karma and dvilīyā comes after bhī smādis on account of their sāmānādhikaranya with kala.

Note:— $K\bar{a}iyala$ says that this solution arises on the assumption that dravya alone takes $karmasanij\bar{n}\bar{a}$ and not guna.

अस्ति खल्पपि विशेषः - कटं करोति भीष्ममुदारं शोभनं दर्शनीयं इति च, कृतः कटः भीष्मः उदारः शोभनः दर्शनीय इति च - करोतेरुत्वद्यमानः क्तः अनवयवेन सर्वं कर्माभिधत्ते, कटशब्दात् पुनरुत्वद्यमानया द्वितीयया यत् कटस्थं कर्म तत् शक्य-मभिधातुं न कर्मविशेषः

Besides there is some difference between the expressions, kaṭam karōti bhīṣmam udāram śōbhanam darśanīyam and kṛtaḥ kaṭaḥ bhīṣmaḥ udāraḥ śōbhanaḥ darśanīyaḥ. The kta which is added to the root kṛ takes all as its karma, while the second case suffix added to the word kaṭa can refer only to the karmatva in kaṭa and nothing else.

तवैव तु खळु एष दोषो यस्य ते एकत्वादयो विभक्त्यर्थाः, अभिहिते प्रथमाभावः इति प्रथमा ते न प्राम्नोति

This defect will arise only according to your theory that $\bar{\epsilon}katv\bar{a}dis$ are vibhaktyarthas. You will have no chance to use $pratham\bar{a}$, since it has been expressed.

事? Where?

एकः, द्वौ, बहवः इति In the words ēkaḥ, dvāu and bahavaḥ.

किं कारणम्? Why?

प्रातिपदिकेनोक्ता एक त्वाद्य इति

Since ēkatva etc. has been expressed by the stem.

कर्मादिष्विप वै विभक्त्यर्थेषु, अवश्यम् एकत्वादयो निमित्तत्वेनोपादेयाः -कर्मण एकत्वे, कर्मणो द्वित्वे, कर्मणो बहुत्वे इति । न च एकत्वादीनामेकत्वादयः सन्ति । अथ सन्ति, ममापि सन्ति । तेष्वनभिहितेषु प्रथमा भविष्यति ।

Even when karmādis are taken as vibhaktyartha, ēkatvādis have to be taken as their viśēṣaṇas thus:-Karmaṇa ēkatvē, karmaṇō dvitvē and karmaṇō bahutvē. There cannot be ēkatvādis in ēkatvādis. If they are in your opinion, they are also in my opinion. Since they are not expressed, prathamā sets in.

Note: $-K\bar{a}iyata$ says that $\bar{e}katva$, the meaning of the stem, is different from $\bar{e}katva$, the meaning of the suffix.

अथ वा उभयवचना होते द्रव्यं चाहुर्गुणं च । यत्स्योऽसौ गुणः, तस्यानुक्ता एकत्वादय इति कृत्वा प्रथमा भविष्यति । Or these express both – dravya and guṇa. $Pratham\bar{a}$ sets in since the $\bar{\epsilon}katv\bar{a}dis$ of that (dravya) in which they are $apradh\bar{a}na$ are not expressed.

NOTE:—Kāiyata says that dravya which is gunopasarjana is expressed by the stem and the suffix expresses the guna which is dravyopasarjana.

अथ वा सङ्ख्या नामेयं परप्रधाना, सङ्ख्येयमनया विशेष्यम् । यदि चात्र प्रथमा न स्थात सङ्ख्येयमविशेषितं स्थात्

Or what is called $saikhy\bar{a}$ has another for its $\bar{a}\acute{s}raya$ and $saikhy\bar{e}ya$ is its $vi\acute{s}\bar{e}\acute{s}ya$. If there is no $pratham\bar{a}$ here, $saikhy\bar{e}ya$ will be left $avi\acute{s}\bar{e}sita$.

Note: $-K\bar{a}iyala$ says that stem alone is never used and its meaning is the $vi\hat{s}\hat{\epsilon}sya$ of the $sa\hat{n}khy\bar{a}$.

अथ वा वक्ष्यति तत्र वचनग्रहणस्य प्रयोजनम् - उक्तेष्वप्येकत्वादिषु प्रथमा यथा स्याद इति ।

Or he is going to say (under 2, 3, 46) that the prayojana of reading vacana in that $s\bar{u}tra$ is that $pratham\bar{a}$ will be used even though $\hat{e}katra$ has been expressed.

अथ वा समयादु भविष्यति

Or it is used by the accepted principle (that neither the stem alone can be used without the pratyaya nor the pratyaya alone without prakrti.)

यदि सामयिकी, न नियोगतः, अन्याः कसान्न भवन्ति ! If it is through samaya and not through niyama, how is it that other vibhaktis do not make their appearance there ?

कर्मादीनामभावात्

(There is no chance for others to set in,) since karmādis do not exist.

पर्धा तर्हि पामोति In that case şaşthī has a chance.

शेपलक्षणा पछी, अशेपत्वान्त्र भविष्यति

 \S{asthi} is enjoined with reference to that which is other than $karm\bar{a}dis$ and $pr\bar{a}tipadik\bar{a}rtha$ and it does not set in here in the absence of \S{esutva} .

एवमपि व्यतिकरः पामोति - एकस्मिन्नपि द्विवचनबहुवचने प्राप्नुतः, द्वयो-प्येकवचनबहुवचने प्राप्नुतः, बहुष्वपि एकवचनद्विवचने प्राप्नुतः

Even then there is chance for one to be used in place of another—Dual and plural suffixes may be used even to denote one object; singular and plural suffixes may be used even to lenote two objects; and singular and dual suffixes may be used to denote many.

अर्थतो व्यवस्था भविष्यति

It will be determined by $sar{a}$ marthya.

Note: $-K\bar{a}iyata$ reads here that the need of the $s\bar{u}tra$ is established on the tenet that $sankhyar{a}$ is vibhaktyartha.

परिगणनं कर्तव्यम् There is need to make an inventory.

तिङ्कुचद्धितसमासैः परिसङ्ख्यानम्

Specification through tin, krt, taddhita and samāsa.

तिङ्क्ताद्धितसमासैः परिसङ्ख्यानं कर्तव्यम् तिङ् - कियते कटः । कृत् - कृतः

कटः । तद्धितः - औपगवः, कापटवः । समासः - चित्रगुः, शवलगुः

It must be specified that the abhidhana is made by tin, krt, taddhita and samāsa, as in kriyatē kaṭaḥ (tin); krtaḥ kaṭaḥ (krt); Aupagavah and Kāpaļavah (taddhita); Citraguh and Śabalaguh

Note: $-K\bar{a}iyata$ says that $sasth\bar{\imath}$ does not appear in (samāsa). āupagava, since the taddhita suffix expresses the relation of apatya and apatyavān and in Citragu, since the samāsa expresses the relation of $sva-sv\bar{a}mitva-bh\bar{a}va$ in case anabhihitē is taken as adhikāra.

उत्सर्गे हि प्रातिपदिकसामानाधिकरण्ये विभक्तिवचनम्

Need for the injunction of the vibhakti with reference to those which are samānādhikaraņa with the stem in case anabhihitē is taken as adhikāra.

उत्सर्गे हि प्रातिपदिकसामानाधिकरण्ये विभक्तिर्वक्तव्या

lf Anabhihitē is taken as adhikāra, there is need to enjoin the vibhakti which is to be used along with the words which are samānādhikaraņa with the stem.

क! Where?

कटं करोति भीष्ममुदारं शोभनं दर्शनीयमिति । कटशब्दाद् उत्पद्यमानया द्वितीयया अभिहितं कर्मेति कृत्वा भीष्मादिभ्यो द्वितीया न प्रामाति । In the sentence kaṭam karōli bhīṣmam udāram śōbhanam darśanīyam. Dvitīyā has on chance to be used after the words bhīṣma etc. on the understanding that karmatva has been expressed by the dvitīyā used after the word kata.

का तर्हि स्यात्? What case will then appear? पष्टी Sasthī.

शेषरुक्षणा षष्ठि, अशेषत्वान्न भविष्यति । अन्या अपि न प्राप्नुवन्ति S_{asth} is enjoined with reference to S_{asth} and S_{asth} does not exist here. Other cases too may not appear.

किं कारणम्? Why?

कर्मादीनामभावात् On account of the absence of karmatva etc.

समयश्च कृतः - न केवला प्रकृतिः प्रयोक्तन्या, न च केवलः प्रत्ययः इति । न चान्या उत्पद्यमाना एतमभिसम्बन्धमुत्सहन्ते वनतुमिति कृत्वा द्वितीया भविष्यति । There is the tenet that neither prakṛti alone nor pratyaya alone should be used. Second case suffix is used there, since other suffixes cannot express the desired relation between them and kaṭa.

अथ वा कटोऽपि कर्म भीष्मादयोऽपि, तत्र कर्मणि इत्येव सिद्धम् Or kata is karma and bhīṣmādis too; dvitīyā sets in there on the strength of the sūtra Karmaņi dvitīyā.

अथ वा कट एव कर्म, तत्सामानाधिकरण्याद् भीष्मादिभ्यो द्वितीया भविष्यति Or kala alone is karma and dvilīyā is used after bhīṣmādis on account of their sāmānādhikaranya with kala.

तसान्नार्थः परिगणनेन

Hence no purpose is served by pariganana. द्वयो: क्रिययो: कारकेऽन्यतरेणाभिहिते विभक्त्यभावग्रसङ्घः

Vibhakti has no chance after the noun denoting the dravya if its meaning is expressed by the pratyaya after one of the two kriyās.

क ? Where?

प्रासादे आस्ते, शयने आस्ते इति

In the sentences Prāsādē āstē and śayanē āstē.

किं कारणम् ? Why?

सदिपत्ययेन अभिहितमधिकरणिमति कृत्वा सप्तमी न भवति

Taking that adhikaranatva is expressed by the pratyaya ghañ after the root sad, saptamī cannot be used after prāsāda.

न वान्यतरेणानभिधानात

No, since it is not expressed by the pratyaya after another.

न वैष दोषः This difficulty does not arise.

किं कारणम् ? Why?

अन्यतरेणानभिधानात् । अन्यतरेणात्रानभिधानम्; सदिपत्ययेनाभिधानम्, असिपत्ययेनानभिधानम् ; यतोऽनभिधानं तदाश्रया सप्तमी भविष्यति ।

On account of its not being expressed by one of the two. There is anabhidhāna by one of the two; there is abhidhāna by the pratyaya after sad, but there is no abhidhana by the pratyaya after ās; since there is anabhidhāna by one, saplamī depending upon it, appears.

कुतो नु खल्वेतत् सत्यभिधाने चानभिधाने चानभिहिताश्रया सप्तभी भविष्यति, न पुनरभिहिताश्रयः प्रतिषेध इति?

What is the authority sanctioning that, in the presence of abhidhāna and anabhidhāna, the saptamī depending anabhidhāna sets in and the pratisēdha of the same depending upon abhidhāna does not appear?

अनभिहिते हि विधानम्

For there is vidhāna in the presence of anabhidhāna.

अन्मिहिते हि सप्तमी विधीयते, नामिहिते प्रतिषेधः

For there is the injunction of saplamī when there is anabhidhāna and there is no pratisēdha when there is abhidhāna.

यद्यपि तावदत्रैतच्छक्यते ववतुं यत्रान्या चान्या च क्रिया, यल तु खल्ल सैव क्रिया तत्र कथम् - आसने आस्ते, शयने शेते

Even though such an answer can be given when there are two different $kriy\bar{a}s$, what answer can be given when the two $kriy\bar{a}s$ are the same, as in the sentences $\bar{A}san\bar{e}$ $\bar{a}sl\bar{e}$ and $\bar{s}ayan\bar{e}$ $\bar{s}\bar{e}l\bar{e}$?

अत्राप्यन्यत्वमस्ति Even here one is different from the other. कुतः! How?

कालमेदात् साधनमेदाच । एकस्य अत्र आसेः आसिस्साधनं, सर्वकालश्च प्रत्ययः । अपरस्य वाह्यं साधनं, वर्तमानकालश्च प्रत्ययः

On account of $k\bar{a}labh\bar{e}da$ and $s\bar{a}dhanabh\bar{e}da$. For one the meaning of the root $\bar{a}s$ is $s\bar{a}dhana$ and the pratyaya denotes all time and for another the $s\bar{a}dhana$ is the meaning of the word other than the verb (like $D\bar{e}vadatta$) and the pratyaya denotes the present time.

Note:— $K\bar{a}iyata$ says that the words $\bar{a}sana$, sayana etc. denote only the object and case-suffix after them is necessary to denote its relation with the following verb.

कि पुनर्द्रव्यं साधनमाहोस्विद् गुणः? Is dravya sādhana or guṇa?

Note: -Kāiyata says that šakti is referred to by guṇa.

किं चातः ? What if, if it is either?

यदि द्रव्यं साधनं नैतदन्यत् भवत्यभिहितात् । अथ हि गुणः साधनं, भवत्येतद् अन्यद् अभिहितात् । अन्यो हि सदिगुणः, अन्यश्च व्यासिगुणः । If dravya is sādhana, it does not become different from the abhihita; if, on the other hand, guṇa is sādhana, it is different

from the abhihita. For sadi-guna is one and asi-guna is another.

किं पुनः साधनं न्याय्यम् ?

Which is legitimate to be taken as sādhana?

गुण इत्याह Guna, says he.

कथं ज्ञायते ? How is it arrived at?

एवं हि कश्चित् कञ्चित् पृच्छति - क देवदत्त इति । स तस्मै आचष्टे - असौ वृक्षे इति । कतरस्मिन्? यस्तिष्ठति इति । स वृक्षोऽधिकरणं भूत्वा अन्येन शब्देनाभि-सम्बध्यमानः कर्ता सम्पद्यते । द्रव्ये पुः साधने सति यत्कर्म कर्मैव स्थात्, यत्करणं करणमेव, यद्धिकरणमधिकरणमेव ।

One asks another, "Where is Dēvadalta?" He replies to him, "He is on the tree." "In which?" "On that which stands." The tree which was adhikarana becomes kartā when it is associated with another word. If sādhana is taken to be dravya, that which was karma will ever remain karma, that which was karana will ever remain karana and that which was adhikarana will ever remain adhikarana.

अनभिहितवचनमनर्थकं प्रथमाविधानस्थानवकाशत्वात्

Reading of anabhihitādhikāra is unnecessary, on account of the prathamā which has been enjoined not having room to operate.

अनभिहितवचनमनर्थकम्

Reading of Anabhihitē serves no purpose.

किं कारणम् ? Why?

प्रथमाविधानस्यानवकाश्रत्वात् । अनवकाशा प्रथमा, सा वचनाद् भविष्यति On account of prathamā which is enjoined not having room to operate. Prathamā is anavakāśā and it must be used since it is enjoined.

सावकाशा प्रथमा ! Prathamā has room to operate.

कोऽनकाशः ? What is the avakāśa?

अकारकम् - वृक्षः प्रश्नः इति

Isolated word like vṛkṣaḥ and ptakṣaḥ.

अवकाशोऽकारकमिति चेन्न, आस्तिर्भवन्तीपरः प्रथमपुरुपोऽप्रयुज्यमानोऽप्यस्ति It is not right to say that akāraka is arakāša, since the root as followed by lat is understood after the nouns in third person.

अवकाशोऽकारकमिति चेत्, तन्न

If it is said that akāraka is avakāśa, it is not correct.

कि कारणम् Why?

अस्तिर्भवन्तीपरः प्रथमपुरुषोऽप्रयुज्यमानोऽप्यस्ति इति गम्यते - वृक्षः प्रश्नः अस्ति इति गम्यते

It is taken that the root as followed by lat is understood after the words of third person. When vrkṣaḥ or plakṣaḥ alone is read, it is taken to mean vrkṣaḥ asti or plakṣaḥ asti.

विप्रतिपेधाद्वा प्रथमाभावः

Or the presence of prathamā through vipratiṣēdha.

अथ वा द्वितीयादयः कियन्तां प्रथमा वा इति, प्रथमा भविष्यति विप्रतिषेधेन । द्वितीयादीनामवकाशः – कटं करोति भीष्मम् उदारं शोभनं दर्शनीयम् इति । प्रथमाया अवकाशः, अकारकं वृक्षः ष्रश्न इति । इहोभयं प्राप्तोति – कृतः कटो भीष्म उदारः शोभनो दर्शनीय इति । प्रथमा भविष्यति विप्रतिषेधेन ।

Or when doubt arises whether to use dvitīyādis or prathamā, prathamā sets in through vipratiṣēdha. Kaṭam karōti bhīṣmam udāram śōbhanam darṣanīyam is the avakāṣa for dvitīyādis. Vṛkṣaḥ and plakṣaḥ, which are akārakas are the avakāṣa for prathamā. Both may operate in kṛtaḥ kaṭō bhīṣma udāraḥ śōbhanō darṣanīyaḥ and prathamā sets in through vipratiṣēdha.

न सिध्यति, परत्वात् षष्ठी प्राप्तोति

No, it cannot be accomplished; saṣṭhī being para, will set in.

शेपलक्षणा पष्ठी, अशेपत्वाच भविष्यति

Ṣaṣṭhī is enjoined to śēṣa and it does not set in on account of this not coming within the purview of śēṣatva.

कृत्वयोगे तु परं विधानं पष्ट्यास्तत्प्रतिपेधार्थम्

To prohibit ṣaṣṭhī which has a chance in kṛt-prayōga being para.

कृत्प्रयोगे तु परस्वात् पष्टी प्राप्नोति । तत्प्रतिपेधार्थमनभिहिताधिकारः कर्तव्यः -कर्तव्यः कट इति

कृत्वयोगे तु परत्वात् षष्ठी प्राप्तोति । तत्प्रतिषेघार्थमनभिहिताधिकारः कर्तव्यः - कर्तव्यः कट इति

There is chance for $sasth\bar{\imath}$, being para, in kṛtprayōga.

Anabhihitādhikāra is necessary to prohibit it so that the expression kartavyah katah can be accomplished.

स कथं कर्तेव्यः?

Under which circumstances should it be done?

यदि एकत्वादयो विभक्त्यर्थाः

If ēkatva etc. are the meanings of vibhakti.

अथ हि कर्मादयो विभक्त्यर्था नार्थोऽनिमहिताधिकारेण

If, on the other hand, karmādis are vibhaktyarthas, no purpose is served by anabhihitādhikāra.

कर्मणि द्वितीया (2, 3, 2)

समयानिकवाहायोगेषूपसङ्ख्यानम्

Need to supplement that $dvitar{\imath}yar{a}$ takes place in association with the words samayā, nikaṣā, and hā.

समयानिकषाहायोगेषूपसङ्ख्यानं कर्तव्यम् - समया त्रामम्, निकषा त्रामम्, हा देवदत्तम्, हा यज्ञदत्तम्

There is need for $upasankhy\bar{a}na$ of $dvit\bar{\imath}y\bar{a}$ in association with samayā, nikaṣā and hā. Viz. Samayā grāmam, nikaṣā grāmam, $har{a}$ Dēvadattam and $har{a}$ Yaj $ilde{n}$ ıdattam.

अपर आह - Another says:

द्वितीयात्रिधानेऽभितःपरितःसमयानिकपाध्यधिधिग्योगेषृपसङ्ख्यानम्

With reference to $dvit\bar{\imath}y\bar{a}$ - $vidh\bar{a}na$, there is need for upasankhyāna in association with abhitah, paritah, samayā, nikaṣā, adhyadhi and dhik.

द्वितीयाविधानेऽभितःपरितःसमयानिकषाध्यधिघिग्योगेषूषसङ्ख्यानं अभितो ग्रामम्, परितो ग्रामम्, समया ग्रामम्, निकवा ग्रामम्, अध्यधि ग्रामम्, धिग् जाल्मम्, धिग् वृपलम्

There is need to supplement that $dvit\bar{\imath}y\bar{a}$ appears in association with abhitah, paritah and $samay\bar{a}$, $nika\bar{\imath}a$, adhyadhi and dhik. Viz. $abhit\bar{\imath}a$ $gr\bar{a}mam$, $parit\bar{\imath}a$ $gr\bar{a}mam$, $samay\bar{a}$ $gr\bar{a}mam$, $nika\bar{\imath}a$ $gr\bar{a}mam$, adhyadhi $gr\bar{a}mam$, dhig $j\bar{a}lmam$ and dhig $vr\bar{\imath}alam$.

अपर आह Another says:

उभसर्वतसोः कार्या धिगुपर्यादिषु त्रिषु । द्वितीयाम्रेडितान्तेषु ततोऽन्यत्रापि दृश्यते ॥

 $Dvit\bar{t}y\bar{a}$ is seen after ubhayatah, sarvatah, dhik, uparyupari, adhyadhi, $adh\bar{o}dhah$ and elsewhere.

उभर्सवहत्येताभ्यां तसन्ताभ्यां योगे द्वितीया वक्तज्या - उभयतो व्रामम्, सर्वतो व्रामम् । धिग्योगे - धिग् जाल्मम्, धिग् वृषलम् । उपयदिषु त्रिप्वाक्रीडि-तान्तेषु द्वितीया वक्तज्या - उपर्युपिर व्रामम्, अध्यधि व्रामम्, अधोधो व्रामम् । ततोऽन्यत्रापि दृश्यते - न देवदत्तं प्रतिभाति किञ्चित्, बुभुक्षितं न प्रतिभाति किञ्चित् Dvitīyā should he enjoined in association with the stem ubha and sarva followed by tas. Viz. Ubhayatō grāmam and sarvatō grāmam; in association with dhik viz. dhig jālmam and dhig vṛṣalam; in association with upari etc. in reduplication viz. uparyupari grāmam, adhyadhi grāmam, adhōdhō grāmam. It is seen elsewhere too viz. Na Dēvadattam pratibhāti kiñcit, bubhukṣitam na pratibhāti kiñcit.

तृतीया च होश्छन्दिस (2, 3, 3)

किमर्थमिदमुच्यते ? Why is this sūtra read?

तृतीया यथा स्यात्

So that the third case suffix may he used.

अथ द्वितीया सिद्धा ?

Has the use of the second case suffix been sanctioned.?

सिद्धा Yes, it has been sanctioned.

कथम् ? By which ?

कर्मणि इत्येव Evidently by the sūtra Karmaņi dvitīyā.

तृतीयापि सिद्धा भवति Trtiva, too, has been sanctioned. कथम् ? By which ?

सुपां सुपो भवन्ति इत्येव By the vārttika Supām supā bhavanti.

असत्येतस्मिन् सुपां सुपो भवन्ति इति, तृतीयार्थोऽयमारम्भः - यवाग्वा अमिहोत्नं जुहोति ।

This sūtra was read to sanction $trtiy\bar{a}$ before the $v\bar{a}rttika$ Supām supā bhavanti was read. Viz. $yav\bar{a}gv\bar{a}$ agnihātram juhāti.

एवं तर्हि तृतीयापि सिद्धा If so, $trt\bar{\imath}y\bar{a}$ too has been sanctioned. कथम् ! How ?

कर्नृकरणयोरित्येव । अयमिश्रहोत्रश्चां उत्योतिषि वर्तते ; तद्यथा अश्विहोत्रं जुहोति इति । अश्विहोत्रं प्रज्वितम् इति । अस्ति हिविषि वर्तते ; तद्यथा अश्विहोत्रं जुहोति इति । जुहोतिश्च अस्त्येव प्रक्षेपणे वर्तते, अस्ति प्रीणात्यर्थे वर्तते । तद्यदा तावद् यवाग्शव्दात् तृतीया तदा अश्विहोत्रश्च्दो ज्योतिषि वर्तते जुहोतिश्च प्रीणात्यर्थे । यवाग्शव्दात् तृतीया तद्यथा - यवाग्या अश्विहोत्रं जुहोति, अश्वि प्रीणाति । यदा यवाग्शव्दाद् द्वितीया तदा अश्विहोत्रं जुहोति, जुहोतिश्च प्रक्षेपणे ; तद्यथा यवाग्मिश्चहोत्रं जुहोति - यवाग्रं हिविष्मौ प्रक्षिपति ।

Evidently by the sūtra Kartrkaranayōs trtīyā. This word agnihōtra denotes flame, as in Agnihōtram prajvalitam; and denotes offering, as in Agnihōtram juhōti. Hū in juhōti means to throw and also to please. If trtīyā is used after yavāgū, to throw ameans flame and juhōti means pleases, so that agnihōtra means flame and juhōti means pleases, so that yavāgvā agnihōtram juhōti means 'he pleases agni with yavāgū' yavāgvā is used after yavāgū, agnihōtra means offering and If dvitīyā is used after yavāgū, agnihōtra means offering and juhōti means throws, so that yavāgūm agnihōtram juhōti means juhōti means in fire the offering of yavāgū'.

Note:—Nāgēšabhaṭṭa clearly explains how this view differs from that of Jāimini regarding Agnihōtram juhōti.

अन्तरान्तरण युक्ते (2, 3, 4)

इह कसान भवति - किं ते वाभवशालक्षायनानामन्तरेण गतेन ? इति

Why does not the sūtra operate here:-Kim tē Bābhravašā-lankāyanānām antarēna gatēna? 1

लक्षणपतिपदोक्तयोः प्रतिपदोक्तस्येव प्रहणम् इति ।

On the strength of the $paribh\bar{a}$, \bar{a} -Lak, $a\eta a$ - $pratipad\bar{o}ktay\bar{o}k$ $pratipad\bar{o}ktay\bar{a}iva$ $graha\eta am$.

Note:—Antarēṇa in the sūtra is nipāta and hence pratipadēkta and that before gatēna is the third case of antara and hence $l\bar{a}k$ ṣaṇika.

अथ वा यद्यपि तावद् अयम् अन्तरेणशञ्दो दृष्टापचारो निपातश्च अनिपातश्च ; अयं तु खल्वन्तराशञ्दो अदृष्टापचारः निपात एव । तस्यास्य कोऽन्यो द्वितीयः सहायो भवितुमहिति अन्यद् अतो निपातात् । तद्यथा अस्य गोद्वितीयेनार्थः इति गारेव आनीयते, नाश्चो न गर्दभः ॥

Or, even though this word $antar\bar{e}na$ is found current both as $nip\bar{a}ta$ and $anip\bar{a}ta$, this word $antar\bar{a}$ is invariably used only as $nip\bar{a}ta$. Which word other than a $nip\bar{a}ta$ can be used in association with it in a sentence? When the sentence Asya $g\bar{o}r$ $dvit\bar{i}y\bar{e}n\bar{a}rthah$ (second to this bull is needed), it is the bull and not a horse or a donkey that is brought.

अन्तरान्तरेण युक्तानामप्रधानवचनम्

Reading of apradhānē with reference to those in association with antarā and antarēna.

अन्तरान्तरेण युक्तानामप्रधानग्रहणं कर्तन्यम्, अप्रधाने द्वितीया भवतीति वक्तन्यम् = अन्तरा त्यां मां च कमण्डलुः इति, कमण्डलोद्वितीया मा भृद् इति The word apradhānē should be read in the sūlra as the visēṣaṇa of antarāntarēṇa yuktē, so that dvitīyā appears after apradhāna, as in Antarā tvām mām ca kamaṇḍaluḥ and not after kamaṇḍalu.

Note:—Kāiyaļa says that the meanings of yuşmad and asmad are apradhāna, they being višēṣaṇa, and kamaṇḍalu is pradhāna, it being višēṣya.

^{1.} It means this: -What do you gain by knowing in detail about Bibbras rillankäyanas f

कः पुनरेताभ्यां कमण्डलोयींगः ?

Which is the bond connecting these two with kamandalu?

यत्तत् त्वां च मां च अन्तरा तत् कमण्डलोः स्थानम्

The space between you and me is the place for kamandalu.

तत्तिहं वक्तव्यम् It has to be read then.

न वक्तव्यम् No, it need not be read.

कमण्डलोर्द्वितीया कस्मान्न भवति ?

Why will not dvitīyā be suffixed to kamaṇḍalu?

उपपद्विभक्तेः कारकविभक्तिर्वेलीयसी इति प्रथमा भविष्यति

 $Prathamar{a}$ is suffixed to it on the strength of the $paribhar{a}sar{a}$ - $Upapadavibhaktar{\epsilon}h$ k $ar{a}rakavibhaktir$ bal $ar{\imath}yasar{\imath}.$

Note: -Kāiyaṭa says that kamaṇḍalu takes the nominative singular suffix after it, it being the subject of asti (understood).

कालाध्वनोरत्यन्तसंयोगे (2, 3, 5)

अत्यन्तसंयोगे कर्मवछाद्यर्थम्

Need to add karmavat at the end of the sūtra for the sake of lādi.

अत्यन्तसंयोगे कालाध्वानो कर्मवद्भवत इति वक्तन्यम्

There is need to enjoin that $k\bar{a}la$ and adhvan behave like karma in close association.

किं प्रयोजनम् ? Why?

लाद्यर्थम् लादिभिरभिधानं यथा स्यात् 1 - आस्यते मासः, शय्यते कोशः । For the sake of lakāra, etc. So that there may be abhidhāna by lakāra etc. to enable it have karmaņi-prayoga as in Āsyalē māsaļi and šayyatē krōšaļi.

अथ वत्करणं किमर्थम्! What for is, then, vat?

1. Lādibhirabhihitē dvitīyā mā bhūt is another reading. This is noted in the Uddyöta.

स्वाश्रयमपि यथा स्यात् - आस्यते मासम्, शय्यते कोशम् । अकर्मकाणां भावे लो भवति इति भावे लो यथा ^{स्यात्} ।

So that the operation based on its original nature also may appear. So that $lak\bar{a}ra$ in $bh\bar{a}v\bar{e}$ may appear in the expressions $\bar{A}syat\bar{e}$ $m\bar{a}sam$ and $\hat{s}ayyat\bar{e}$ $kr\bar{o}\hat{s}am$ on the strength of $Akarmak\bar{a}v\bar{a}m$ $bh\bar{a}v\bar{e}$ $l\bar{o}$ bhavati.

तत्तर्हि वक्तन्यम् It must, then, be so enjoined.

न वक्तव्यम् । प्राकृतमेवैतरकर्म, यथा कटं करोति शकटं, करोतिं इति It need not be enjoined. The karma, here, is only prakṛta (i.e.) īpsitatama, as in kaṭam karōti and śakaṭam karōti.

एवं मन्यते, यत्र कश्चित् क्रियाकृतो विशेष उपजायते, तद् न्याय्यं कर्मेति । न चेह कश्चित् क्रियाकृतो विशेष उपजायते ।

Suppose one thinks that the legitimate karma is only that which has undergone some modification through kriyā. Such a modification is not seen here.

नैवं शक्यम् । इह हि दोपः स्यात् - आदित्यं पश्यति, हिमवन्तं शृणोति, आमं गच्छति इति । तस्मात् प्राकृतमेव एत्हकमे, यथा कटं करोति शकटं करोति इति । It is not correct to think so; for difficulty will arise here in Adityam pasyati, Himavantam srnēti and grāmam gacchati since the objects of the verbs pasyati, srnēti and gacchati have not undergone any modification. Hence this karma is only prākṛta, as in kaṭam karēti and sakaṭam karēti.

यदि तर्हि प्राकृतमेवैतत्कर्भ, अकर्मकाणां भावे हो भवति इति भावे हो न प्रामोति, आस्यते मासं देवदत्तेन इति

If it is then evidently prākṛta-karma, it is not possible for it to have bhāvē-prayōga — Asyatē māsam Dēvadattēna on the strength of the statement akarmakāṇām bhāvē lē bhavati.

तचिंह वक्तज्यम The satra then has to be so modified.

न वक्तत्र्यम् । अकर्मकाणाम् इत्युच्यते, न च केचित् कालभावादिभि-रकर्मकास्त एवं विज्ञास्यामः - फचिषे अकर्मका इति No, it need not. Akarmakāṇām is read in the sūtra Gati-buddhi (1, 4, 52). None is discerned to be akarmaka on the basis of $k\bar{a}la$ and $bh\bar{a}va$; hence we take them to be akarmakas on the basis of something else (like dravya).

अथ वा येन कर्मणा सकर्मकाश्च अकर्मकाश्च भवन्ति, तेन अकर्मकाणाम्, न वैतेन कर्मणा कश्चिद्यकर्मकः

Or $akarmak\bar{a}n\bar{a}m$ refers to those alone which become sakarmakas if they take a particular object and akarmakas if they do not take it and none is akarmaka in its association with $k\bar{a}la$ and adhvan.

अथ वा यत्कर्म भवति, न च भवति, तेनाकर्मकाणाम्, न चैतत् कर्म

Or akarmakāṇām has reference with that alone which sometimes serves as karma and which sometimes does not serve as karma. Nowhere is kāla or adhvan not a karma.

न तहींदानीमिदं सूत्रं वक्तव्यम् In that case this sūtra need not be read.

वक्तन्यं च This has to be read.

किं प्रयोजनम्? Why?

यत्राक्रिययात्यन्तसंयोगस्तद्र्थं, कोशं कुटिला नदी, कोशं रमणीया वनराजिः

It is for the sake of the instances where there is atyanta-samyōja with reference to non-kriyā, as in $kr\bar{o}\dot{s}am$ kuṭilā nadī and $kr\bar{o}\dot{s}am$ ramaṇīyā nadī.

अपवर्गे तृतीया (2, 3, 6)

क्रियापवर्गे

Apavargē, in the sūlra, should be replaced by kriyāpavargē.

क्रियापवर्ग इति वक्तव्यम्, साधनापवर्गे मा भृत् - मासमधीतो अनुवाकः, न चानेन ग्रहीतः इति

Kriyāpavargē must be read in the sūtra, so that it may not take place when there is sādhanāpavarga, as in Māšam adhītē anuvākah, na ca anēna gṛhītah. (The anuvāka was

studied by him for a month without break, but it is not made his own.)

Note: $-N\bar{a}g\bar{e}\hat{s}abhatta$ explains that $kriy\bar{a}pavarga$ (the end of the effort) takes place only on reaching the fruit aimed at and $s\bar{a}dhan\bar{a}pavarga$ may take place whether the goal is reached or not.

सप्तमीपश्चम्यौ कारकमध्ये (2, 3 7)

क्रियामध्ये Need to read kriyāmadhyē.

कियामध्य इति वक्तन्यम्, इहापि यथा स्यात् - अद्य देवदत्तो भुक्त्वा च्याहाद् भोक्ता, द्याहे भोक्ता । कारकमध्ये इतीयस्युच्यमाने इतेव स्यात् - इहस्योऽय-मिष्यासः कोशाल्लक्ष्यं विध्यति, कोशे लक्ष्यं विध्यति । यं च विध्यति यतश्च विध्यति उभयोक्तन्मध्यं भवति ।

Kriyāmadhyē has to be read so that the sūtra may operate here also—Adya Dēvadattō bhuktvā dvyahād bhōktā, dvyahē bhōktā. If it is read kārakamadhyē, the sūtra will apply only here:— Ihasthō ayam iṣvāsaḥ krōšād lahṣyam vidhyati, krōšē lakṣyam vidhyati (Archer strikes at the target at a distance of krōša). Madhya is that which is between the target and the place of archer.

तर्ताह वक्तन्यम् It, then, has to be so read.

न वक्तन्यम् ; नान्तरेण साधनं क्रियायाः प्रवृत्तिर्भवति । क्रियामध्यं चेत् कारकमध्यमपि भवति । तत्र कारकमध्ये इत्येव सिद्धम्

No, it need not be so read. $Kriy\bar{a}$ cannot have its course without $k\bar{a}raka$ (śakti). $Kriy\bar{a}madhya$ is possible only in the presence of $k\bar{a}raka$ madhya too. Hence the object is achieved by reading $k\bar{a}rakamadhy\bar{e}$ in the $s\bar{u}tra$.

कर्मप्रवचनीययुक्ते द्वितीया (2, 3, 8)

कर्मप्रवचनीययुक्ते प्रत्यादिभिश्व लक्षणादिष्य्पसङ्ख्यानं सप्तमीपञ्चम्योः प्रतिपेषार्थम

There is need for the upasankhyāna of karmapravacanīyayuktē prayādibisca lakṣaṇādiṣu so that the following forms can be secured:-vykṣam prati vidyōtatē ridyut, vykṣam pari vidyōtatē

vidyut, vrkṣam anu vidyōtatē vidyut. Sādhur Dēvadattō mātaram prati, Sādhur Dēvadattō mātaram pari, Sādhur Dēvadattō mātaram anu.

किं प्रयोजनम् ? Why?

सप्तभीपञ्चम्योः प्रतिषेधार्थम् । सप्तभीपञ्चम्यौ मा भूतामिति, साधुनिपुणाभ्या-मर्चायां सप्तमीति सप्तमी, पञ्चम्यपाङ्परिभिरिति पञ्चमी

To prohibit saptamī and pañcamī. So that saptamī and pañcamī do not appear there, the saptamī being enjoined by Sādhunipuṇābhyām arcāyām saptamī (2, 3, 43), and the pañcamī being enjoined by Pañcamyapānparibhih (2, 3, 10)).

तत्रायमप्यर्थ: - अप्रतेरिति न वक्तन्यम् भवति
This, too, is an additional benefit that the word aprateh need not be read (in 2, 3, 43).

तत्ति वक्तन्यम् It, then, should be read as a supplement. न वक्तन्यम् । उक्तं वा No, it need not. It has been answered.

किमुक्तम् How has it been answered?

एकत्र तावदुक्तम् अप्रतेरिति । इतरत्रापि यद्यपि तावदयं परिः दृष्टापचारो वर्जने चावर्जने च, अयं खल्वपश्रद्धोऽदृष्टापचारो वर्जनार्थ एव । तस्य कोऽन्यो द्वितीयः सहायो भवितुमहीति अन्यद्तो वर्जनार्थात् । तद्यथा अस्य गोद्धितीयेनार्थ इति गौरेव आनीयते, नाश्चो न गर्दभः ॥

Prati in apratēh in 2, 3, 43 is taken as upalakṣaṇa. Even though this pari is used sometimes in the sense of varjana and sometimes in the sense of avarjana, this apn is invariably used in the sense of varjana. Which else can be associated with it (apa) other than that which has the meaning of varjana? When it is said that one needs an associate to a bull, a bull alone is brought and neither a horse nor a donkey.

यसादधिकं यस चेश्वरवचनं तत्र सप्तमी (2, 3, 9)

कथिमदं विज्ञायते - यस्य च ऐश्वर्य ईश्वरता ईश्वरभावः तस्मात् कर्मप्रवचनीय-युक्ताद् इति, आहोस्विद् यस्य स्वस्य ईश्वरः तस्मात् कर्मप्रवचनीययुक्ताद् इति ?

^{1.} Cf. Vol. IV p. 277.

How is this - yasya īśvaravacanam tatra—to be interpreted, 'after that which is karmapravacanīyayukta and which is endowed with īśvaratā (lordship)' or 'after that which is karmapravacanīyayukta and which has a lord over it'?

कश्चाल विशेषः? What is the difference here?

यस चेश्वरवचनिमित कर्तृनिर्देशश्वेदवचनात सिद्धम्

If the stein yad in yasya refers to the lord, the object is achieved without this sūtra.

यस्य चेश्वरवचनमिति कर्तृनिर्देशश्चेत् अन्तरेण वचनं सिद्धम् – अधिब्रह्मदत्ते पञ्चालाः, आधृतास्ते तस्मिन् भवन्ति

If yad in yasya refers to the lord, the object is achieved without the $s\bar{u}tra$. In the expression Adhi Brahmadaltē $Pa\bar{u}c\bar{a}l\bar{a}h$, he becomes $\bar{a}dh\bar{a}ra$ and they become $\bar{a}dh\bar{e}ya$ (and seventh case after Brahmadalta is secured by saplamyadhi-karanē ca 2, 3, 36).

सत्यमेवमेतत् - नित्यं परिम्रहीतव्यं परिम्रहीत्रधीनं भवति lt is certainly so that subjects are always under the lord.

प्रथमानुपपत्तिस्तु The impropriety of prathamā also.

प्रथमा नोपपद्यते

It is not proper to have nominative ease-suffix.

कुतः? After what?

पञ्चारेभ्यः After the word pañcāla.

का तर्हि स्यात ! Which ease-suffix will then be?

पष्ठीसप्तम्यौ, स्वामीश्वराधिवती दायाद इति

The sixth and seventh case-suffixes will appear on the strength of the sūtra Svāmīśvarādhipati ... (2, 3, 39).

न तत्र अधिशब्दः पट्यते The word adhi is not read there.

यद्यपि न पट्यते, अधिरीधरवाची

Even though it is not read, the word adhi means isvara.

न तत्र पर्यायवचनानां अहणं भवति

The synonyms of words read there are not taken as targets.

कथं ज्ञायते ? How is it known?

यदं कस्यचित् पर्यायवचनस्य ग्रहणं करोति - अधिपतिदायादेति Since he (Sūtrakāra) reads certain synonyms like svāmī, īśvara, adhipati etc. together (in 2, 3, 39).

षष्ठी तर्हि प्रामोति If so, sasthī may set in.

शेषलक्षणा षष्ठी, अशेषत्वान्त्र भाविष्यति

Ṣaṣṭhī is with reference to $\frac{6}{6}$ ṣa and since there is no $\frac{6}{6}$ ṣatva, it may not appear.

द्वितीया तर्हि प्रामोति - कर्मपवचनीययुक्ते द्वितीया इति

If so, $dvit\bar{\imath}y\bar{a}$ may set in by $Karmapravacan\bar{\imath}yayukt\bar{\epsilon}\ dvit\bar{\imath}y\bar{a}$.

सप्तम्योक्तत्वात्तस्यार्थस्य द्वितीया न भविष्यति

Since that meaning is expressed by $saptam\bar{\imath}$, $dvit\bar{\imath}y\bar{a}$ has no chance.

भवेद्योऽधेर्वह्मदत्तस्य चाभिसम्बन्धः स सप्तम्योक्तः स्याद्, यस्तु खल्ल अधेः पञ्चालानां चाभिसम्बन्धः तत्र द्वितीया प्रामोति ।

If adhi is related to Brahmadatta, it may be expressed by $saptam\bar{\imath}$; but if it is related to $Pa\tilde{n}c\bar{a}la$, $dvit\bar{\imath}y\bar{a}$ may set in.

खबचनाचु सिद्धम्

The object is achieved by taking the stem in yasya refer to sva.

अस्तु - यस्य खस्य, ईश्वरः तसात् कर्मभचनीययुक्तादिति
Let the sīitra be taken to mean thus:-yasya = svasya, īśvaravacanam = īśvaraḥ, tatra = tasmāt karmapravacanīyayuktāt,
saptamī (bhavuti).

एवमप्यन्तरेण वचनं सिद्धम् । अघि ब्रह्मदत्तः पञ्चालेषु । आधृनः स तेषु भवति

Even then the object is achieved without the sūtra. In Adhi Brahmadatlaḥ pañcālēṣu, Brahmadatla becomes the ādhāra with reference to Pañcālas.

सत्यमेवमेतत् - नित्यं परिम्रहीता परिम्रहीतव्याधीनो भवति । It is evidently true that the lord is dependent upon his subjects. प्रथमानुपपत्तिस्तु The impropriety of prathamā also.

प्रथमा तु नोपपद्यते Prathamā is not proper.

कृतः ? After which?

ब्रह्मचात After Brahmadatta.

का तर्हि स्थात What, then, will apear?

षष्ट्रीसप्तम्यौ - स्वमीश्वराधिपतीति

Sasthī and saptamī will appear on the strength of the sūtra Svāmīśvarādhipati (2, 3, 39).

न तत्राधिशब्दः पठ्यते The word adhi is not read in that sūtra.

यद्यपि न पट्यते. अधिरीश्वरवाची

Though adhi is not read, it is a synonym of īśvara.

न तत्र पर्यावचनानां ग्रहणं भवति

Synonyms of the words read there are not operated upon.

कथं ज्ञायते? On which authority is it so taken?

यद्यं कस्यचित् पर्यायवचनस्य ग्रहणं करोति अधिपतिदायादेति Since he reads certain synonyms like svāmī, īśvaraļi and adhipatili in the sūtra.

पष्टी तर्हि शमोति If so, sasthī may set in.

रोपलक्षणा पछी, अरोपत्वान्न भविष्यति

Sasthī is with reference to śēsa and it will not set in on account of the absence of śēsatva.

द्वितीया तर्हि प्रामोति - कर्मप्रवचनीययुक्ते द्वितीया इति Dvitīyā, then, will appear on the strength of the $s\bar{u}tra$ Karmapravacanīyayuktē dvitīyā.

सप्तम्योक्तत्वात्तस्याभिसम्बन्धस्य द्वितीया न भविष्यति Since the sambandha is expressed by saptamī, dvitīyā does not appear.

भवेद्योऽधेः पञ्चालानां चाभिसम्बन्धः स सप्तम्योक्तः स्यात्, यस्तु खटु अधेः

ब्रह्मदत्तस्य चाभिसम्बन्धः तत्र द्वितीया प्रामोति

If adhi is related to $pa\tilde{n}c\bar{a}la$, it will be expressed by $saptam\bar{i}$, but if adhi is related to Brahmadatta, it will get $dvit\bar{i}y\bar{a}$.

एवं तर्हि स्ववचनातु सिद्धम् इति

If so, the object is evidently achieved by reading $sv\bar{e}$ in place of $\bar{\imath}\dot{s}var\bar{e}$ in the $s\bar{u}tra$ $Adhir.\bar{\imath}\dot{s}var\bar{e}$.

अधिः स्वं प्रति कर्मप्रवचनीयसंज्ञो भवति इति वक्तव्यम्
It must be read that adhi becomes karmapravacanīya with reference to sva.

एवमपि यदा ब्रह्मदत्ते अधिकरणे सप्तमी तदा पञ्चालेभ्यो द्वितीया प्राप्नोति Even then if adhikaraṇa-saptamī follows Brahmadatta, dvitīyā will follow Pañcāla.

कथम् ? On the strength of which sūtra?

कर्मप्रवचनीययुक्ते द्वितीया इति

On the strength of the sūtra Karmapravacanīya yuktē dvitīyā.

उपपद्चिभक्तेः कार्कविभक्तिर्बलीयसी इति प्रथमा भविष्यति । Prathamā follows it on the strength of the parithāṣā—Upapadavibhaktēḥ kārakavibhaktir balīyasī.

Note:— $K\bar{a}iyata$ says that the nominative case-suffix which is $k\bar{a}rakavibhakti$ follows $pa\tilde{n}c\bar{a}la$, since verbs like tisthanti santi etc. are understood after it.

गत्यर्थकर्मणि द्वितीयाचतुथ्यों चेष्टायामनध्वनि (2, 3, 12)

अध्वन्यर्थग्रहणम्

Need to read Anadhvanyarthē in place of anadhvani.

अध्वन्यर्थत्रहणं कर्तव्यम् । इह मा भूत्, पन्थानं गच्छति, वीवधं गच्छति इति ।

It is necessary to read adhvanyurtha in place of adhvan, so that the fourth-case suffix may not appear after pathi and vīvadha in Panthānam gacchati and vīvadham gacchati.

आस्थितप्रतिपेधश्र

Also the pratisēdha is with reference to the used one.

अ'स्थितपतिषेषश्चायं वक्तव्यः । यो हि उत्पंथेन पन्थानं गच्छति, पथे गच्छति इत्येव तत्र भवितव्यम्

It must be said that the pralisēdha holds good only to the used way or path. Pathē gacchati is certainly to be read with reference to one who reaches the used road through a wrong one.

किमर्थ पुनिरिदमुच्यते ? Why is this sūtra read?

चतुर्थी यथा स्यात् So that caturthi may set in there.

अथ द्वितीया सिद्धा ? Has dvitīyā been secured?

सिद्धा, कर्मणि इत्येव

It is secured evidently by the sūtra Karmaņi dvitīyā.

चतुर्श्यपि सिद्धा Caturthī, too, is secured.

कथम् ? How?

सम्प्रदाने इत्येव Certainly by the sūtra Sampradānē caturthī.

न सिध्यति । कर्मणा यमभिष्रेति स सम्प्रदानम् इत्युच्यते, क्रियया चासौ प्राममभिष्रेति ।

No, it cannot be secured by that $s\bar{u}tra$, since $karman\bar{a}$ $abhi-pr\bar{a}yanam$ is read there and here he aims at $gr\bar{a}ma$ through $kriy\bar{a}$.

कया कियया ? By which kriyā?

गमिकियया By the act of going.

कियाग्रहणमपि तत्र चोद्यते

The need for reading $kriy\bar{a}$ also was discussed there (in 1, 4, 32)

Note:-But kriyāgrahaņa was pratyākhyāta there.

चेष्टायामनध्यनि स्त्रियं गच्छत्यजां नयतीत्यतिप्रसङ्गः

There will be alivyāpti of cēstāyām anadhrani in striyam gacchati and ajām nayati.

चेष्टायमनध्वनि स्त्रियं गच्छति अञां नयति इत्यतिप्रसङ्गो भवति

There will be atiprasaiga of cēṣṭāyām anadhvani in striyam gacchati and ajām nayati.

The object is achieved by reading asamprāpta (in place of gatyartha).

सिद्धमेतत् The object is achieved.

कथम्? How?

असम्प्राप्ते कर्मणि द्वितीयाचतुर्थ्यो भवत इति वक्तव्यम्

The $sar{u}tra$ must be modified thus :-Asampr $ar{a}$ pt $ar{e}$ karmaṇi dvit $ar{i}yar{a}$ caturthyāu bhavataļi.

अध्वनश्चानपवादः No need for the apavāda, anadhvani

एवं च कृत्वा अनध्वनि इत्येद्िप न वक्तव्यं भवति । सम्प्राप्तं ह्येतत्कर्म

अध्वानं गच्छति इति On this understanding the word anadhvani too need not be read in the sūtra. The adhvan which is karma in Adhvānam gacchati is samprāpta.

चतुर्थी सम्प्रदाने (2, 3, 13)

चतुर्थीविधाने तादर्थ्व उपसङ्ख्यानं

Need to add $t\bar{a}darthy\bar{e}$ in the $caturth\bar{\imath}\text{-}vidh\bar{a}yaka\text{-}s\bar{\imath}ttra.$

चतुर्थीवियाने ताद्रथें उपसङ्ख्यानं कर्तव्यम् - यूपाय दारु, कुण्डलाय हिरण्यम् इति

There is need to add $t\bar{a}darthy\bar{e}$ in the $s\bar{u}tra$ enjoining $caturth\bar{\imath}$ viz. Yūpāya dāru, and kundalāya hiranyam.

Note: -Kāiyaļa states that tad in tādarthyē refers to kārya.

किमिदं ताद्ध्येम्! What is this - tādarthya? तद्रथस्य भावः ताद्रध्यम् Tādarthya means tadarthasya bhāvaḥ. तद्धे पुनः किम्? What then is this - tadartham? सर्वनाम्नोयं चतुर्थ्यन्तस्य अर्थे शब्देन सह समासः

This is the compound of the demonstrative pronoun in the fourth case with the word artha.

कथं चात्र चतुर्थी On what authority is caturthi used here? अनेनैव Evidently by this vārttika

यद्येवंम् इतरेतराश्रयं भवति If so, there is interdependence.

का इतरेतराश्रयता ? Of what nature is itarētarāśrayatā?

निर्देशोत्तरकालं चतुर्थ्या भवितन्यं, चतुर्थ्यां च निर्देशः, तदेतद् इतरेतराश्रयं भविति । इतरेतराश्रयाणि च कार्याणि न प्रकल्पन्ते

Caturihī must set in after this vārtlika is read and this word tādarthyam can be used after there is chance for caturthī. This is interdependence. Deeds which are interdependent are not accomplished.

तत्तिई वक्तव्यम्

Another vidhi enjoining the fourth case must then be read.

न वक्तन्यम् । आचार्यप्रवृत्तिज्ञापयित – भवति हि अर्थशन्देन योगे चतुर्थाति, यद्यं चतुर्था तद्यार्थिति चतुर्थम्तस्य अर्थशन्देन सह समासं शास्ति No, it need not be read. The procedure of $Ac\bar{a}rya$ ($S\bar{u}trak\bar{u}ra$) suggests that $caturth\bar{\imath}$ sets in after a word which is in association with the word artha, since he enjoins $sam\bar{a}sa$ between a word ending in the fourth case and the word artha in the $s\bar{u}tra$ $Caturth\bar{\imath}$ $tadarth\bar{a}rthabali$... (2, 1, 36).

न खल्बय्यवश्यं चतुर्थ्यन्तस्येव अर्थशब्देन सह समासो भवति lt is not absolutely necessary that only a word in the fourth case can form a compound with the word artha,

किं तर्हि ? What then ?

पष्टचन्तस्यापि भवति । तद्यथा गुरोरिदं गुर्वर्थम् इति

A word in the sixth case also does it, as gurōḥ idam compounds into gurvartham.

Note: $-N\bar{a}g\bar{e}sabhatta$ states that this argument proves the absence of interdependence.

यदि तादर्थ्ये उपसङ्ख्यानं क्रियते, नार्थः सम्प्रदानग्रहणेन । यो ह्युनाध्यायाय गौदीयते उपाध्यायार्थः स भवति, तत्र ताद्ध्ये इत्येव सिद्धम्

If $T\bar{a}darthy\bar{e}$ upasankhy \bar{a} nam is read, no purpose is served by reading $samprad\bar{a}n\bar{e}$ in the $s\bar{u}tra$. The cow that is given to $up\bar{a}dhy\bar{a}ya$ becomes $up\bar{a}dhy\bar{a}y\bar{a}rtha$ and $caturth\bar{\iota}$ is secured after $up\bar{a}dhy\bar{a}ya$ on the strength of $t\bar{a}darthy\bar{e}$.

अवर्यं सम्प्रदानमहणं कर्तव्यम् - यान्येन लक्षणेन सम्प्रदानसंज्ञा, तद्रथम्, छात्राय रुचितं, छात्राय स्वदितम् इति ।

There is absolute need for reading sampradānē for the sake of those which take sampradānasamjñā through other sūtras (like Rucyarthānām prīyamāṇāḥ), so that expressions chātrāya rucitam, and chātrāya svaditam may be secured.

तत्ति उपसङ्ख्यानं कर्तव्यम् It is then necessary to read the upasankhyāna.

न कर्तव्यम् । आचार्यप्रवृत्तिज्ञापयित - भवति हि ताद्थेये चतुर्थीति, यद्यं चतुर्थी तद्र्थायित चतुर्थ्यन्तस्य तद्र्येन सह समासं शास्ति

No, it need not be read. $\bar{A}c\bar{a}rya$ -pravitti suggests that there is $caturth\bar{\imath}$ in $t\bar{a}darthya$, since he enjoins $sim\bar{a}sa$ of caturthyanta with artha in the $s\bar{u}tra$ $Caturth\bar{\imath}$ $tadarth\bar{a}rtha$... (2, 1, 36).

क्लिप सम्पद्यमाने

In association with klp in the sense of transformation.

क्छिपि सम्पद्यमाने चतुर्थी वक्तव्या - मूत्राय कल्पते यवागूः, उच्चाराय कल्पते यवाचम् इति ।

There is need to enjoin caturthī in association with kļp meaning to transform. Viz. Mūtrāya kulputē yavāgūļi ind uccārāya kalpatē yavānnam.

उत्पातेन ज्ञाप्यमाने After what is suggested by utpāta.

उत्पातेन ज्ञाप्यमाने चतुर्थी वक्तन्या – वाताय कपिला विद्युदातपायातिलोहिनी । कृष्णा सर्वविनाशाय दुर्भिक्षाय सिता भवेत् ॥ मांसीदनाय न्याहरति मृगः There is need to use the fourth case after what is suggested by unforeseen occurrences. Viz.

 $Var{a}tar{a}ya$ $kapilar{a}$ vidyut (Lightning in kapila colour for

heavy wind)

Ātapāya atilohinī (Deep red lightning forebodes extreme heat) Krṣṇā sarvavināsāya (Black lightning forebodes entire destruction)

Durbhikṣāya sitā bhavēt (White lightning forebodes famine). Māmsāudanāya vyāharati mṛgaḥ (Deer cries foreboding death).

हितयोगे च In association with the word hita also.

हितयोगे चतर्था वक्तव्या - हितमरोचिकने, हितमामयाविने

Caturthi has to be enjoined to that which is in association with the word hita too, as in Hitam arocakine and Hitam āmayāvinē.

नमः खस्तिस्वाहास्वधालंबपङ्योगाच (2, 3, 16)

स्वस्तियोगे चतुर्थी क्वश्नलार्थेराशिष वा विधानात्

Caturthī alone in association with svasti on account of vibhāsā in kuśalartha and aśis.

स्वस्तियोगे चतर्थी कुशलार्थेराशिषि वा विधानाद्भवति विप्रतिषेधेन

Caturthi alone is used in association with svasti by pūrvavipratisēdha, since either caturthi or sasthi is enjoined with reference to kuśalārtha and āśis in the sūtra Caturthī cāśisi ... (2, 3, 73).

स्वित्तियोगे चतुथ्यां अवकाशः - स्वित्ति जाल्माय, स्विस्ति वृषलाय ; कुशलार्थे-राशिषि वाविधानस्य अवकाशः - अन्ये कुशलार्थाः - कुशलं देवदत्ताय, देवदत्तस्य; इहोभयं प्राप्नोति - स्वत्ति गोभ्यः, स्वस्ति ब्राह्मणेभ्यः इति; चतुर्थी भवति विप्रतिषेधेन

Room for the use of caturthi in association with svasti is svasti jālmāya and svasti vrṣalāya; room for the application of kuśalārthāir āśisi vāvidhānam is kuśalam Dēvadattāya and kusalam Dēvadallasya, the others āyusya, bhadram etc. being kušalārthas; both have a chance to operate here and caturthi

takes place in preference to $vibh\bar{a}s\bar{a}$ by $p\bar{u}rvavipratis\bar{e}dha:-svasti g\bar{o}bhyah$ and $svasti br\bar{a}hman\bar{e}bhyah$.

अलिमिति पर्याप्त्यर्थग्रहणम्

There is need to enjoin that alam in the $s\bar{u}lra$ means $pary\bar{a}pti$ (sufficiency).

अलिमिति पर्याप्त्यर्थमहणं कर्तेब्यम्; इह मा भृत् - अलंकुरुने कन्याम् इति । अपर आह - अलिमिति पर्याप्त्यर्थमहणं कर्तव्यम्; इहापि यथा स्यात् - अलं मल्लो मल्लाय, प्रभुमेल्लो मल्लाय, प्रभुमेल्लो मल्लाय, प्रभवति मल्लो मल्लाय इति

The word alam should be taken to 'suggest sufficiency, to prevent the fourth case in Alankurutē kanyām. Another says that alam in the sūtra should be said to have paryāptyartha, so that the fourth case may be used in the following cases also:—Alam mallō mallāya; prabhur mallō mallāya and prabhavati mallō mallāya.

मन्यकर्मण्यनादरे विभाषाऽप्राणिषु (2, 3, 17)

अप्राणिष्वित्युच्यते । तलेदं न सिध्यति - न त्वा श्वानं मन्ये, न त्वा शुने मन्ये इति

Aprāṇiṣu is read in the $s\bar{u}tra$. Hence the following is not possible to be secured:—Na $tv\bar{a}$ ${}^{\acute{s}}v\tilde{a}nam$ $many\bar{e}$, and Na $tv\bar{a}$ ${}^{\acute{s}}un\bar{e}$ $many\bar{e}$.

एवं तर्हि योगविभागः करिष्यते - मन्यकर्भण्यनादरे विभाषा, ततः अपाणिषु - अपाणिषु च विभाषेति ।

If so, the sūtra is split into two thus:-Manyakarmanyanādarē vibhāṣā and Aprāṇiṣu. Vibhāṣā is taken to Aprāṇiṣu also by anuvrtti.

इहापि तर्हि प्राप्तोति - न त्वा कार्क मन्ये, न त्वा शुक्तं मन्ये इति It will, then, operate even here (by the first sūtra):-Na tvā kākam manyē, and Na tvā sukam manyē.

यदेतद् अपाणिष्त्रिति, एतद् अनावादिष्त्रिति वक्ष्यामि I shall qualify aprāṇiṣu by anāvādiṣu.

इमे च नावादयो भविष्यन्ति - न त्वा नावं मन्ये यावत्तीर्णे न नाव्यम्. न त्वा अन्नं मन्ये यावद्भक्तं न श्राद्धमिति ।

These will come under $n\bar{a}v\bar{a}dis:-Na$ $tv\bar{a}$ $n\bar{a}vam$ $many\bar{e}$ $y\bar{a}vat$ $t\bar{i}rnum$ na $n\bar{a}vyam$. (Since you have not crossed the sea, I do not consider you to be a ship). Na $tv\bar{a}$ annam $many\bar{e}$ $y\bar{a}vad$ bhuktam na $śr\bar{a}ddham$ (I do not consider you to be food since you have not been eaten in a $śr\bar{a}ddha$).

अत्र येषु प्राणिषु नेष्यते ते नावादयो भविष्यन्ति se. among *māvis*, which are not wanted her

Those, among $pr\bar{a}nis$, which are not wanted here may be taken under $n\bar{a}v\bar{a}dis$.

मन्यकर्मणि प्रकृष्यकुत्सितग्रहणम्

Anādarē in the sūtra should be replaced by prakrsyakutsitē.

मन्यकर्मणि प्रकृष्यकुत्सिनम्रहणं कर्तव्यम् - इह मा भूत् - त्वां तृणं मन्य इति The word prakṛṣyakutsitē should be read with reference to manyakarma, so that the sūtra may not operate here:-Tvām trnam manyē.

Note: Vārttikakāra wishes to replace anādarē by prakrṣyakutsitē and Mahābhāṣyakāra wishes to qualify aprānisu by anāvādiṣu.

Ahnika - Twentyfour ends.

(Second adhyāya, third pāda, first āhnika ends.

Ahnika - Twentyfive

(Second adhyāya, third pāda, second āhnika)

कर्तकरणयोस्तृतीया (2, 3, 18)

ोयाविधाने प्रकृत्यादिभ्य उपसङ्ख्यानम्

akrtyādibhyah is to be added in the triīyāvidhāy ikasūtra,

तृतीयाविधाने प्रकृत्यादिभ्य उपसङ्ख्यानं कर्तव्यम् - प्रकृत्या अभिरूपः, त्या दर्शनीयः ; प्रायेण याज्ञिकाः , प्रायेण वैयाकरणाः ; माठरोऽस्मि गोत्रेण, ग्योंऽस्मि गोत्रेण; समेन धावति, विपमेण धावति; द्विद्रोणेन धान्यं कीणाति; द्रोणेन कीणाति ; पञ्चकेन पश्न् कीणाति, सहस्रेण अधान् कीणाति । here is need to add prakrtyādibhyah to allow the third case ster prakrti etc. as in prakrtyā abhirūpak (one who is beautiful y nature); prakriyā daršanīyah (one who is fine by nature o look at); prāyēṇa yājñikāḥ (mostly yājñikas), prāyēṇa 'āiyākaraṇāḥ; Māṭharōsmi gōtrēṇa (1 belong to Māṭharagōtra), ¹ārgyōsmi gōtrēṇa; Samēna dhāvati (he runs evenly), viṣamēṇa hāvati (he runs unevenly); Dvidronēna dhānyam krīnāti; he buys two dronās of corn). tridronēna dhānyam krīnāti; Paūcakēna pašūn krīnāti (he buys goats by fives), sahasrēņa ıśvān krīņāti (he buys horses by thousands.)

Note: - Kāiyaṭa says that, otherwise, sixth case may appear after prakrti, first case after praya, first or sixth case after gōtra; second case after sama, dvidrōṇa and pañcaka.

तत्ति वक्तन्यम् It has to be read then.

न वक्तव्यम् । कर्तृकरणयोस्तृतीया इत्येव सिद्धम्

No, it need not be read. The object is achieved by kartrkarayōs trtīyā itself.

इह तावत्, प्रकृत्या अभिरूपः, प्रकृत्या दर्शनीय इति, प्रकृतिकृतं तस्य

Firstly with reference to prakrtyā abhirūpah and prakrtyā आभिरूप्यम् darsanīyah, his ābhirūpya is got through this prakrti.

प्राथेण याज्ञिकाः, प्रायेण वैयाकरणाः इति, एष तत्र प्रायो येन तेऽधीयते With reference to Prāyēṇa yājīiikāḥ and prāyēṇa vāiyā-karaṇāḥ, it is bahula there, and it is the karaṇa of their study.

Note: $-K\bar{a}iyata$ reads: $-Pr\bar{a}ya$ iti: $-b\bar{a}hulyam$ ityarthah. Tacca adhyayanasya karanati \bar{c} na vivaksitam.

माठरोऽसि गोत्रेण, गार्ग्योऽसि गोत्रेण इति, एतेन अहं संज्ञाये With reference to Māṭharōsmi gōtrēṇa and Gārgyōsmi gōtrēṇa. I am known by this.

समेन घावति, विषमेण घावति इति, इदमत्र प्रयोक्तव्यं सन्न प्रयुज्यते, समेन पथा घावति, विषमेण पथा घावति इति ।

With reference to Samēna dhāvati and viṣamēṇa dhāvati this (pathā) is to be read there, but is not read :-and hence they stand for samēna pathā dhāvati and viṣamēṇa pathā dhāvati.

द्विद्रोणेन धान्यं कीणाति, त्रिद्रोणेन धान्यं कीणाति इति, तादर्थ्यात् ताच्छट्यम् । द्विद्रोणार्थं द्विद्रोणं, द्विद्रोणेन हिरण्येन धान्यं कीणाति इति । With reference to Dvidrēṇēna dhānyam krīṇāti, the word is used in the sense of what it is intended for.

Note: $-Dvidr\bar{o}na$ means for the sake of $dvidr\bar{o}na$ and hence the sentence means he buys with money to secure two $dr\bar{o}nas$ of corn.

पञ्चकेन पश्न् कीणाति इति, अत्रापि तादर्थात् ताच्छव्यम् - पञ्चपस्यर्थः पञ्चकः, पञ्चकेन पश्न् कीणातीति

With reference to $Pa\tilde{n}cak\bar{e}na$ $pa\hat{s}\bar{u}n$ $kr\bar{\imath}n\bar{a}ti$, here too the word is used in tadartha. $Pa\tilde{n}cakah$ means $pa\tilde{n}capa^{s}varthah$. Hence is the expression $Pa\tilde{n}cak\bar{e}na$ $pa^{s}\bar{u}n$ $kr\bar{\imath}n\bar{a}ti$.

साहस्रेण अश्वान् कीणाति इति, सहस्रारिमाणं साहस्रं, साहस्रेग हिरण्येन अश्वान् कीणाति इति ।

With reference to Sāhasrēņa ašvān krīņāti, sāhasram means sahasra-parimāņam and hence it means that he buys horses with gold sufficient to purchase thousand.

सहयुक्तेऽप्रधाने (2, 3, 19)

किमुदाहरणम् ! What is the example ?

तिलैः सह भाषान् वपति इति

Tilāiḥ saha māṣān vapati. (He sows black gram with gingilly seed).

नैतद्स्ति ; तिले: मिश्रीकृत्य मापा उप्यन्ते तल करणे इत्येव सिद्धम् । No, it cannot serve as the example. Black $m\bar{a}sa$ mixed with tila is sown and hence $tr\bar{t}\bar{\imath}y\bar{a}$ may be used there on the strength of $karan\bar{e}$ (in the $s\bar{u}tra$ $Kartrkaranay\bar{o}s$ $tr\bar{t}\bar{\imath}y\bar{a}$).

इदं ति पुत्रेण सहागतो देवदत्तः इति ; अश्रधाने क्तिरि तृतीया यथा स्यात् If so, this may serve as the example – $Putr\bar{\epsilon}\eta a$ saha $\bar{a}gat\bar{o}$ $D\bar{\epsilon}vadatta\dot{\mu}$, so that $tri\bar{\imath}y\bar{a}$ may be used with reference to apradhāna-kartr.

एतदिप नास्ति प्रयोजनम् । प्रधाने कर्तरि लादयो भवन्तीति प्रधानकर्ता क्तेन अभिधीयते, यश्च अप्रधानं सिद्धा तल कर्तरीत्येव तृतीया

This too does not serve as $pray\bar{o}jana$ to the $s\bar{u}tra$. $Pradh\bar{a}na-kart\bar{a}$ is expressed by kta in gata on the maxim that $lak\bar{a}r\bar{a}dis$ are used only with reference to the $pradh\bar{a}nakartr$ and $trt\bar{i}y\bar{a}$ is secured here by kartari with reference to $apradh\bar{a}nakartr$.

इदं तर्हि - पुत्रेण सहागमनं देवदत्तस्य इति

If so, let this be the example - Putrēṇa saha āgamanam Dēvadattasya.

षप्ठ्यत्र बाधिका भविष्यति Ṣaṣṭhī may veto this.

Note: $-K\bar{a}iyaţa$ reads -Kartṛkarmaṇōḥ kṛti ityanēna sā ca pradhānayōr ēva kurtṛkarmaṇōḥ prādhānyād ēva smaryatē iti apradhānē kartari na bhaviṣyati.

इदं तर्हि - पुत्रेण सह स्थूलः, पुत्रेण सह पिङ्गल इति If so, let this be the example:—Putrēṇa saha sthūlaḥ, putrēṇa saha piṅgaluḥ.

1. This is not found in Bombay edition.

इदं चाप्युदाहरणम् - तिलैः सह मापान् वपति इति
This, too, may be taken as the example—Tilāiḥ saha māṣān vapati.

ननु चोक्तं - तिलैर्मिश्रीकृत्य मापा उप्यन्ते तत्र करण इत्येव सिद्धम् इति Oh, it was said that $trt\bar{t}y\bar{a}$ is secured on the strength of karaṇē, since black gram mixed with gingelly is sown.

भवेत्सिद्धं यदा तिलैर्मिश्रीकृत्योप्येरन् । यदा तु खळु कस्य चिन्माषवीजावाप उपस्थितः, तद्र्थं च क्षेत्रमुपार्जितं, तत्रान्यद्गिप किञ्चिदुप्यते, यदि भविष्यति भविष्यति इति तदा न सिध्यति

It is secured if black gram mixed with gingelly is sown. But, if it was the time for black gram to be sown, if the land is made ready for it and it is sown and if, afterwards, something other than that (say gingelly) is sown with the idea "If it chances to be fruitful, let it be", it cannot be secured.

सहयुक्तेऽप्रधानवचनमनर्थकप्रपपद्विभक्तेः कारकविभक्तिवलीयस्त्वाद् अन्यत्रापि No purpose is served by reading the sūtra Sahayuktēspradhānē on account of kārakavibhakti overruling the upapadavibhakti here as elsewhere.

सहयुक्तेऽपधानवचनमनर्थकम्

It is needless to read Sahayuktēspradhānē.

किं कारणम् ? Why?

उपवद्विभक्तेः कारकविभक्तिवर्लायस्त्वात् । अन्यत्रापि उपवद्विभक्तेः कारक विभक्तिर्वर्लीयसी इति प्रथमा भवति, एवमलापि उपवद्विभक्तेः कारकविभक्तिर्वर्लीयसी इति प्रथमा भविष्यति

On account of kārakavibhakti overruling upapadavibhakti. Prathamā sets in elsewhere on the strength of the dictum-Upapadavibhaktēļ kārakavibhaktir balīyasī. So also prathamā will set in here on the strength of the dictum Upapadavibhaktēļ kārakavibhaktir balīyasī.

कान्यत्र To which does anyatra refer?

गाः स्वामी त्रजति इति In the sentence Gāḥ svāmī vrojati.

97

Note:— The upapadavibhakti - ṣaṣṭhī or saptamī is enjoined to $g\bar{o}$ by the $s\bar{u}tra$ $Sv\bar{a}m\bar{\imath}\acute{s}vara$ (2,3,39) and the $k\bar{a}rakavibhakti$ - $dvit\bar{\imath}y\bar{a}$ - is enjoined by Karmani $dvit\bar{\imath}y\bar{a}$. The latter overrules the former.

येनाङ्गविकारः (2, 3, 20)

इह कस्मान भवति - अक्षि काणम् अस्य इति?

Why does not $tr\bar{t}\bar{y}\bar{a}$ set in here (after $k\bar{a}na$) in Aksi $k\bar{a}nam$ asya?

अङ्गाद्विकृतात्तद्विकारतश्चेदङ्गिनो वचनम्

It must be enjoined after the deformed anga in case the defect serves to denote the angin.

अङ्गाद् विकृतात् तृतीया वक्तव्या, तेनैव चेद् विकारेण अङ्गी द्योत्यते इति वक्तव्यम्

It $(trt\bar{t}y\bar{a})$ must be enjoined after the word denoting the deformed limb, if it alone serves to denote the whole.

तत्ति वक्तन्यम् It must, then, be so read.

न वक्तन्यम् । अङ्गश्चन्द्रोऽयं समुदायशच्दः; येनेति च करणे एषा तृतीया । येनावयवेन समुदायोऽङ्गी द्योत्यते तिस्मन् भिवतन्यम् । न चेतेनावयवेन समुदायो द्योत्यते No, it need not be so read. This word anga in the sūtra means angin; tṛtīyā in yēna has karaṇatva for its artha. Hence the sūtra means that tṛtīyā should be used after that anga-vācaka by which deformity angin is suggested. Angin is not suggested by the anga here (in the expression akṣi kāṇam asya).

Note:—1. Kāiyaṭa derives anga thus:—Angāni asya santi.

Note:—2. Vārttikakāra suggests modification of the sūtra and Mahābhāṣyakāra does not want it.

इत्थंभूतलक्षणे (2, 3, 21)

इत्थंभूतलक्षणे तत्म्स्थे प्रतिषेधः

Prohibition if ittham-bhūta-lakṣaṇa is in lakṣya-vāci-śabda.

इत्थं मृतलक्षणे तत्स्थे प्रतिषेधो वक्तज्यः – अपि भवान् कमण्डलुपाणि छात्रमदाक्षीत् इति । There is need to prohibit $trt\bar{v}\bar{v}\bar{a}$ after ittham- $bh\bar{u}ta$ -laksana if the same is in laksya- $v\bar{a}ci$ -śabda, as in Api $bhav\bar{a}n$ kamandalup $\bar{a}n$ im $ch\bar{a}tram$ $adr\bar{a}k$ s $\bar{i}t$? (Did you see the pupil having kamandalu in his hand?)

Note:— $Kamandalup\bar{a}ni$ is $lakşyav\bar{a}caka$ and kamandalu is $itthambh\bar{u}talaksana\cdot v\bar{a}caka$.

न वेत्थंभूतस्य लक्षणनापृथग्भावात्

No, it is not necessary on account of the laksya of this nature not being separated from the laksana.

न वा वक्तव्यम् It is not necessary.

किं कारणम्? Why?

इत्थंभृतस्य लक्षणेनऽपृथाभावात् - यत्रेत्थम्भृतस्य पृथाभूतं लक्षणं तत्र भवितव्यम् । न चाल इत्थंभतस्य पृथाभृतं लक्षणम्

On account of the lakṣya of this nature not being separated from lakṣaṇa. It (third ease) will appear if lakṣya of this nature has its lakṣaṇa separated from it. But here the lakṣya of this nature does not have the lakṣana separated from it.

किं वक्तव्यमेतत्? Is this to be so explained?

न हि No, it need not.

कथमनुच्यमानं गंस्यते

How will it be known without the explanation?

तथा ह्ययं प्राधान्येन लक्षणं प्रतिनिर्दिशति, इत्थेमूतस्य लक्षणम् इत्थंमूतलक्षणं तस्मिन् इत्थंभतलक्षणे इति ।

For he gives prominence to lakṣana by reading it as the second member of ithambhūtalakṣaṇē, the seventh case of the tutpuruṣa-itthambhūtalakṣaṇam.

संज्ञोडन्यतरस्यां कर्मणि (2, 3, 22)

संज्ञः कृत्प्रयोगे पष्टी विप्रतिपेधेन

There is need to enjoin sasthī with the root jāā preceded by the preposition sam and followed by kṛt suffix through vipratiṣēdha.

संज्ञोऽन्यतरस्यां कर्मणि इत्येतस्मात् कृद्योगे षष्ठी भवति वित्रतिषेधेन । संज्ञोऽन्यतरस्यामित्यस्य अवकाशः - मातरं संज्ञानीते, मात्रा संज्ञानीते; कृत्ययोगे षष्ठ्या अवकाशः - इध्मप्रव्रध्यनः, पलाशशातनः । इहोभयं प्राप्नोति - मातुः संज्ञाता, पितुः संज्ञाता इति । पष्ठी भवति विप्रतिषेधेन ।

Kṛdyōgē ṣaṣṭhī bhavati vipratiṣēdhēna has to be read supplementing the sūtra Sanijūōsnyatarasyām karmaṇi. The place where the sūtra Sanijūōsnyatarasyām operates is: mātaram sanijānītē and mātrā sanijānītē. The place where ṣaṣṭhī appears with kṛtprayōga is Idhmapravraścanaḥ and palāśaśātanaḥ. Both may operate here and ṣaṣṭhī appears through vipratiṣēdha:—Mātuḥ sanijūātā and pituḥ sanijūātā.

उपपद्विभक्तेश्वोपपद्किः

Need for the supplement that the *upapadavibhakti* which is enjoined later overrules that enjoined earlier through *viprati-sēdha*.

उपपद्विभक्तेश्चोपपद्विभक्तिभवति विपतिषेधेन

One upapadavibhakti overrules another through vipratisēdha.

अन्यारादितरतेदिक्छट्दाञ्चूत्तरपदाजाहियुक्ते इत्यस्य अवकाशः अन्यो देव-दत्तात् । स्वामीश्वराधिपतिदायादसाक्षिपतिभूषसूतैश्च इत्यस्य अवकाशः गोषु स्वामी गवां स्वामी । इहोभयं प्रामोति - अन्यो गोषु स्वामी, अन्यो गवां स्वामी इति । स्वामीश्वराधिपतिदायादसाक्षिपतिभूषसूतैश्च इत्येतद् भवति विप्रतिषेधेन ।

The room for the $s\bar{u}tra$ $Anya-\bar{a}r\bar{a}d....(2, 3, 29)$ to operate is $Any\bar{o}$ $D\bar{e}vadatt\bar{a}t$. The room for the $s\bar{u}tra$ $Sv\bar{a}m\bar{i}svara...(2, 3, 39)$ is $G\bar{o}su$ $sv\bar{a}m\bar{i}$ and $gav\bar{a}m$ $sv\bar{a}m\bar{i}$. Both may operate here and the latter $Sv\bar{a}m\bar{i}...$ operates through $vipratis\bar{e}dha-Any\bar{o}$ $g\bar{o}su$ $sv\bar{a}m\bar{i}$ and $any\bar{o}$ $gav\bar{a}m$ $sv\bar{a}m\bar{i}$.

नैष युक्तो विप्रतिषेधः । न ह्यत्र गावोऽन्ययुक्ताः

Vipratiṣēdha here is not legitimate; for cows are not here related to anya.

कस्तर्हि ? What then ? स्वामी Svāmī

एवं तर्हि, तुल्यार्थेरतुलोपमाभ्यां तृतीयान्यतरस्याम् इत्यस्य अवकाशः तुल्यो देवदत्तेन इति । स्वामीश्वराधिपतिदायादसाक्षिप्रतिभूप्रसृतैश्च इत्यस्य अवकाशः स एव । इहोभयं प्राप्तोति – तुल्यो गोभिः स्वामी, तुल्यो गवां स्वामी इति । तुल्यार्थेरतुलोपमाभ्यां तृतीयान्यतरस्याम् इत्येतद् भवति विप्रतिपेधेन । If so, room for sūtra Tulyārthāir....(2, 3, 72) to operate is Tulyō Dēvadattasya and tulyō Dēvadattēna. Room for Svāmīšvara.... (2, 3, 39) is the same mentioned above. Here both have room to operate and Tulyārthāir....overrules the other through vipratiṣēdha and hence the forms Tulyō gōbhiḥ svāmī and tulyō gavām svāmī are secured.

हेतौ (2, 3, 23)

निमित्तकारणहेतुषु सर्वासां प्रायद्र्शनम्

Appearance of almost all case-suffixes with *nimitta*, $k\bar{a}rana$ and $h\bar{e}tu$.

निमित्तकारणहेतुपु सर्वाः प्रायेण दृश्यन्त इति वक्तव्यम् । किं निमित्तं वसित, केन निमित्तंन वसित, कस्मै निमित्ताय वसित, कस्मित्रिमित्ताद्वसित, कस्य निमित्तस्य वसित, किसित्तिमेत्ते वसित । किं कारणं वसित, केन कारणेन वसित, कस्मै कारणाय वसित, कस्मात् कारणाद्वसित, कस्य कारणस्य वसित, किस्मिन् कारणे वसित । को हेतुर्वसित, कं हेतुं वसित, केन हेतुना वसित, कस्मै हेतवे वसित, कस्माद्धेतो-वसित, कस्म हेतोंवसित, कस्मिन् हेतों वसित ॥ 1

It must be stated that almost all case-suffixes are used after the words nimitta, kāraņa and hētu. Viz. Kim nimittam vasati, kēna nimittēna vasati, kasmāi nimittāya vasati, kasmād nimittād vasati, kasya nimittasya vasati, kasmin nimittē vasati. Kim kāraņam vasati, kēna kāraņēna vasati, kasmāi kāraṇāya vasati, kasmāt kāraṇād vasati, kasya kāraṇasya vasati. kasmin kāraṇē vasati. Kō hētur vasati, kam hētum vasati, kēna hētunā vasati, kasmāi hētavē vasati, kasmād hētōr vasati, kasya hētōr vasati, kasmin hētāu vasati.

^{1.} Since the stem means cause, it seems immaterial which cases suffix is used after it.

ÄHNIKA TWENTYFIVE—APADANE: PANCAMI

Note: $-K\bar{a}iyata$ says that the enumeration of synonyms is, according to some, to ward off others and according to others, to show that that they are upalaksana.

अपादाने पश्चमी (2, 3, 28)

पश्चमीविधाने लयव्लोपे कर्मण्युपसङ्ख्यानम्

Need to supplement Lyab-lõpē karmaņi under pañcamyadhikāra

पञ्चमीविधाने रुयटरोपे कमीण पञ्चम्या उपसङ्ख्यानं कर्तव्यम् - प्रासादमारुह्य प्रेक्षते - प्रासादारप्रेक्षते

There is need to supplement $lyab-l\tilde{o}p\tilde{e}$ $pa\tilde{n}cam\tilde{\imath}$, so that $pa\tilde{n}cam\tilde{\imath}$ may be used after the karman of the indeclinable participle which is dropped $Pr\tilde{a}s\tilde{a}d\tilde{a}t$ $pr\tilde{e}ksat\tilde{e}$ for $pr\tilde{a}s\tilde{a}dam$ $\tilde{a}ruhya$ $pr\tilde{e}ksat\tilde{e}$.

अधिकरणे च Need to supplement Adhikaraṇē ca

अधिकरणे चोपसङ्ख्यानं कर्तव्यम् - आसनात्वेक्षते, शयनात्वेक्षते

There is need to add that $pa\tilde{n}cam\tilde{i}$ is used in place of adhikarana to secure the forms $\tilde{a}san\tilde{a}t$ $pr\tilde{e}ksat\tilde{e}$ and $\hat{s}ayan\tilde{a}t$ $pr\tilde{e}ksat\tilde{e}$ (in case there is $lyab-l\tilde{o}pa$).

प्रश्नाख्यानयोश्च

Need to allow the use of $pa\tilde{n}cam\bar{\imath}$ in question and answer also.

प्रश्नाख्यानयोध्य पञ्चमी वक्तन्या - कुतो भवान्? पाटलिपुत्रात्

There is need to enjoin $px\tilde{n}xum\tilde{i}$ in question and answer also. Viz. $Kut\bar{o}\ bhav\bar{a}n$? $P\bar{a}taliputtr\bar{a}t$.

यतश्राध्यकालानिर्माणम्

Pañcamī after that from which distance and time are calculated.

यतश्चाध्वकालनिर्माणं तल पञ्चमी वक्तत्रया » गवीधुमतः साङ्काश्यं चत्वारि योजनानि ; कार्तिक्या आग्रहायणी मासे

Pañcamī has to be enjoined after that whence distance and time are calculated. Viz. Gauīdhumataḥ Sāṅkśyam catvāri yōjanāni (Sānkāśya is four yōjanas from Gavīdhuman; kārttikyā āgrahāyaṇī māsē. (One month passing from kārttika it is āgrahāyaṇī).

तद्यक्तात्काले सप्तमी

Saptamī with reference to the kāla associated with it.

तद्युक्तात्काले सप्तमी वक्तव्या - कार्तिक्या आग्रहायणी मासे Saptamī is to be enjoined to the kāla associated with it Viz. Kārttikyā āģrahāyanī māsē.

अध्वनः प्रथमा च The distance to be in the first case too.

अध्वनः प्रथमा च सप्तमी च वक्तव्या - गवीधुमतः साङ्काश्यं चत्वारि योजनानि, गवीधुमतः साङ्काश्यं चतुर्षु योजनेषु

There is need to enjoin prathamā and sap!amī after adhvan viz. Gavīdhumataḥ Sāṅkāsyam catvāri yōjanāni, Gavīdhumataḥ Sāṅkāsyam caturṣu yōjanēṣu,

तत्तर्हादं वहु वक्तव्यम् If so, much has to be enjoined here.

न वक्तव्यम् । अपादाने इत्येव सिद्धम्

No, it need not; everything is secured from Apādānē pañcamī.

इह तावत् प्रासादात् प्रेक्षते, शयनात्प्रेक्षते इति, अपकामित तत्तसाद्र्शनम् Firstly with reference to Prāsādāt prēkṣatē and sayanāt prēkṣatē, the sense of sight departs from it.

यद्यपकामति किं नात्यन्तायापकामति ?

If it departs, does it not completely depart?

सन्ततत्वात् It departs, in succession.

अथ वा अन्यान्यप्रादुर्भावात् - अन्या चान्या च प्रादुर्भवति
Or it departs one after another. The sight that departs at first is different from that which departs next and so on.

प्रश्नास्यानयोश्च पञ्चमी वक्तन्येति, इदमत्र प्रयोक्तन्यं सन्न प्रयुज्यते - कुतो भवानागच्छति इति, पाटलिपुत्रादागच्छामि इति With reference to Prasnākhyānayōš ca pañcamī vaktavyā, the word āgacchati or āgacchāmi is found dropped in kuts

bhavan agacchati? and Pataliputtrad agacchami.

यतध्याध्वकालनिर्माणं तत्र पद्ममी वक्तन्येनि, इदमत्र पयोक्तन्यं सस प्रयुज्यने -गवीधुमतो निःसत्य साद्वादयं चत्वारि योजनानि । कार्निष्या आम्रहायणी मामे इति - इदमत्र प्रयोक्तन्यं सन्न प्रयुज्यने - कार्निष्या प्रभृति आम्रहायणी मामे इनि With reference to the statement that $p n \tilde{n} cam \tilde{t}$ should be used after that whence distance and time are calculated, the word $n i h \tilde{s} r t y a$ to be used after the first word is dropped:—in $Gav \tilde{t} dhumat \tilde{o} S \tilde{a} n k \tilde{a} s y am catv \tilde{a} r i y \tilde{o} j an \tilde{a} n i$ and the word p r a b h r t i is dropped in $k \tilde{a} r t t i k y \tilde{a} a g r a h \tilde{a} y a n \tilde{t} m \tilde{a} s \tilde{e}$.

तद्युक्तात् काले सप्तमी वक्तज्येति, इदमत्र प्रयोक्तज्यं सन्न प्रयुज्यते कार्तिवया प्रभृति आग्रहायणी गते मास इति

With reference to $Tadyukt\bar{a}t$ $k\bar{a}l\bar{e}$ $saplam\bar{\imath}$ $vaktavy\bar{a}$, the word $gat\bar{e}$ to be used before $m\bar{a}s\bar{e}$ is left out in $k\bar{a}rttiky\bar{a}$ $\bar{a}grah\bar{a}-yan\bar{\imath}$ $m\bar{a}s\bar{e}$.

अध्वनः प्रथमा च सप्तमी च इति - इद्मन्न प्रयोक्तव्यं सन्न प्रयुज्यते -गवीधुमतो नि.सृत्य यदा चत्वारि योजनानि गतानि भवन्ति, ततः साङ्काश्यं - चतुर्षु योजनेषु गतेषु ततः साङ्काश्यम् इति.।

With reference to Adhvanah prathamā ca saptamī ca, the sentences are read with ellipsis in place of Gavīdhumatō niḥṣrtya yadā catvāri yōjanāni gatāni bhavanti, tataḥ Sāṅkāśyam; and Caturṣu yōjanēṣu gatēṣu tataḥ Sāṅkāśyam.

Note:— $Mah\bar{a}bh\bar{a}syak\bar{a}ra$ argues that the purpose of the supplementary $v\bar{a}rttikas$ is served by the $s\bar{u}tra$ itself.

अन्यारादितरतेंदिक्शब्दाश्चृत्तरपदाजाहियुक्ते (2, 3, 29)

अञ्चत्तरपदप्रहणं किमर्थ ? न दिक्श व्हेंयोंग इत्येव सिद्धम् ? What for is añcūttara pada read? Is not its purpose served by Dikśabdāir yōgē?

पष्ठ्यतसर्थप्रत्ययेनेति वक्ष्यति, तस्यायं पुरस्तादपकर्षः

He is going to read the sūtra Ṣaṣṭhyatasarthapratyayēna and this is its apavāda in advance.

षष्ट्यतसर्थप्रस्थयेन (2, 3, 30)

अर्थग्रहणं किमर्थम्? Why is artha read?

षष्ठ्यतस्प्रत्ययेन इत्युच्यमाने इहैव स्यात् - दक्षिणतो ग्रामस्य, उत्तरतो ग्रामस्य इति ; इह न स्यात् - उपिर ग्रामस्य, उपिष्टाद् ग्रामस्य इति । अर्थग्रहणे पुनः कियमाणे अतस्प्रत्ययेन च सिद्धं भवति यश्चान्यस्तेन समानार्थः If the sūtra is read Ṣaṣṭhyataspratyayēna, it will operate only here—Dakṣiṇatō grāmasya and uttaratō grāmasya and not here—Upari grāmasya and upariṣṭād grāmasya. If, on the other hand, the word artha is read, it will operate with reference to the words ending in atas-pratyaya and also words having the same meaning.

अथ प्रत्ययग्रहणं किमर्थम् ? Why is pratyaya read?

इह मा भूत - प्राम् प्रामात, प्रत्यम् प्रामात _ So that the sūtra may not operate here in Prāg grāmāt and pratyag grāmāt.

अञ्चत्तर्याच्येतस्त्रयोजनमुक्तम् । तत्र अन्यतरत् शक्यमवक्तुम् । The same benefit is said with reference to Añcūttarapada in the previous sūtra also. Hence either of the two may be dropped.

पृथग्विनानानाभिसतृतीयान्यतरस्याम् (२, ३, ३२)

पृथगादिपु पञ्चमीविधानम्

Need to enjoin pañcamī with reference to pṛthagādis.

पृथगादिषु पञ्चमी विधेया - पृथम् देवदत्तात्

There is need to enjoin pañcamī after pṛthagādis to seeure Prthag Dēvadattāt.

किमर्थम्? न प्रकृतं पञ्चमीग्रहणमनुवर्तते !

What for? Is there no anuvitti for pañcamī from the context?

क प्रकृतम्? What is the sūtra referred to?

अपादाने पश्चमी इति The sutra Apadane pañcami.

अनिधकारात् On account of the absence of adhikāra,

अनिधिकारः सः It is not endowed with the sign of adhikara.

अधिकारे हि डितीयापष्टीविषये प्रतिपेधः

If there is adhikāra, it should be prohibited in Enapā dvilīyā and Şaşihyatasarthapratyayēnu enjoining dvilīyā and şaṣihī.

अधिकारे हि द्विनीयापष्टीविषये प्रतिषेधो वक्तव्यः स्यात् - दक्षिणेन आमं, दक्षिणतो आमस्य । For, if there is $adhik\bar{a}ra$, it should be prohibited in the preceding $s\bar{u}tras$ enjoining $dvit\bar{\imath}y\bar{a}$ and $sasth\bar{\imath}$, to secure only the following expressions— $Daksin\bar{e}na$ $gr\bar{a}mam$ and $daksinat\bar{o}$ $gr\bar{a}masya$.

एवं तर्हि अन्यत्रस्यांग्रहणसामध्यात्पञ्चभी भविष्यति । If so, pañcamī is secured here on the strength of the word anyatarasyām read here.

अस्यन्यद् अन्यतरस्यांग्रहणस्य प्रयोजनम् Another purpose is served by anyatarasyām.

किम्? What?

यस्यां नाप्राप्तायां तृतीया आरभ्यते सा यथा स्यात्

To allow such case-suffix to appear whose chance disappears on account of the reading of $trt\bar{\imath}y\bar{a}$.

कस्यां च नाप्राप्ताथाम्? In whose chance?

अन्ततः षष्ट्याम् In the place of sasthī enjoined at the end.

तत्ति वक्तन्यम् It must then be read.

न वक्तव्यम् । प्रकृतमनुवर्तते

No, it need not be read. There is anuvrtti for the prakrta.

क प्रकृतम् ? What is it which is prakrta.

अपादाने पञ्चमी इति The sūlra Apādānē pañcamī.

ननु चोक्तम् - अनिधकारः सः, अधिकारे हि द्वितीय। षष्टीविषये प्रतिषेध इति Oh, it was said that it is not endowed with adhikāratva and if it is so, there is need for the pratisēdha to pañcamī in the sūtras enjoining dvitīyā and şaṣṭhī.

एवं तर्हि सम्बन्धमनुवर्तिष्यते - अपादाने पश्चमी - अन्यारादितरतेदिक्शब्दाश्चत्तर-पदाजाहियुक्ते पञ्चमी - षण्ठ्यतसर्थेशत्ययेन, अन्यारादिभियोगेपञ्चमी - एनपा द्वितीया, अन्यारादिभियोगे पञ्चमी - पृथग्विनानानाभिस्तृतीयान्यतरस्याम् - पञ्चमीग्रहणमनुवर्तते, अन्यारादिभियोगे इति निवत्तम् ।

If so anuvrtti for that connected with anya etc. is resorted to:Apādānē pañcamī, Anyārāditartēdikśabdāncūttarpadājāhiyuktē
pañcamī, Ṣaṣṭhyatasarthapratyayēna, anyārādibhiryōgē pañcamī,

Enapā dvitīyā, anyārādibhiryēgē pañcamī and then Pṛthagvinānānābhis tṛtīyānyatarasyām is read. The expression pañcamī is supplied and the expression Anyārādibhiryēgē is made to recede.

अथवा मण्डूकप्छतयोऽधिकाराः । तद्यथा - मण्डूका उल्प्छत्योल्प्छस्य गच्छन्ति तद्वद्रधिकाराः ।

Or anuvittis are like frog-leap. As frogs skip over intermediate things, so are adhikāras.

अथ वा Or

अन्यवचनाचकाराकरणात्प्रकृतस्थापवादो विज्ञायते यथोत्सर्गेण प्रसक्तस्य Or on account of the reading of another vibhakti and the absence of ca, it is understood to be an exception as a special rule prevents the application of a general rule.

अन्यस्या विभक्तेर्वचनात् चकारस्य अनुकर्पणार्थस्य अकरणात् प्रक्कतायाः पञ्चम्याः द्वितीयापच्छो वाधिके भविष्यतः, यथोरसर्गेण प्रसक्तस्यापवादो वाधको भविष्यति । Since another vibhakti is enjoined and since the word ca which denotes grammatical attraction is not read, dvitīyā and şaṣṭhī set aside the pañcamī enjoined first, in the same way as a special rule sets aside what will, otherwise, happen by the general rule.

अथ वा वक्ष्यत्येतत् अनुवर्तन्ते च नाम विधयः, न चानुवर्तनादेव भवन्ति
Or he is going to say this-that, though rules have the capacity
to be supplied later on, they do not do so only on account
of it.

िंक तर्हि ? By what then ? यज्ञाद् भवन्ति इति By the effort.

द्रान्तिकार्थभयो द्वितीया च (2, 3, 35)

द्रान्तिकार्थभ्यः पञ्चमीविधाने तशुक्तात् पञ्चमीप्रतिपधः

Need to prohibit pañcamī after the word associated with dūra, antika and their synonyms when pañcamī is enjoined after them.

दूरान्तिकार्थेभ्यः पश्चमीविधाने तद्युक्तात् पश्चम्याः प्रतिषेधो वक्तव्यः - दूराद्

There is need to prohibit $pa\tilde{n}cam\tilde{i}$ after the word associated with $d\tilde{u}ra$, antika and their synonyms, when $pa\tilde{n}cam\tilde{i}$ is enjoined after them, to secure the expression $D\tilde{u}r\tilde{a}d$ $gr\tilde{a}masya$.

न वा तलापि द्रशनादप्रतिपेधः

No, it need not be prohibited, since it too is current.

अनर्थकः प्रतिषेधः अपितषेधः । न वा तत्रापि दर्शनात् पञ्चम्याः प्रति-षेधोऽनर्थकः । तत्रापि हि पञ्चमी दृश्यते—

> दूरादावसथान्मूत्रं दूरात्पादावसेचनम् । दूराच भाव्यं दस्युभ्यो दूराच कुपितादुरोः ॥

Apratisēdhah means the pratisēdha which is unnecessary. The prohibition is not necessary since $pa\tilde{n}cam\bar{t}$ is current there too. $Pa\tilde{n}cam\bar{t}$ is seen in such places in the following verse:—

 $D\bar{u}r\bar{a}d$ $\bar{a}vasath\bar{a}n$ $m\bar{u}tram$ $d\bar{u}r\bar{a}t$ $p\bar{a}d\bar{a}vas\bar{e}canam$ | $D\bar{u}r\bar{a}cca$ $bh\bar{a}vyam$ $dasyubhy\bar{o}$ $d\bar{u}r\bar{a}cca$ $kupit\bar{a}d$ $gur\bar{o}h$ ||

Note:—The fifth case-suffix in $\bar{a}vasath\bar{a}t$, dasyubhyah and $kupit\bar{a}d$ is the point referred to above.

सप्तम्यधिकरणे च (2, 3, 36)

सप्तमीविधाने क्तस्येन्विषयस्य कर्मण्युपसङ्ख्यानम्

Need to read the supplement ktasya inviṣayasya karmani in $saptamyadhik\bar{a}ra$.

सप्तमीविधाने क्तस्येन्विषयस्य कर्मण्युपसङ्ख्यानं कर्तव्यम् - अधीती व्याकरणे, परिगणिती याज्ञिक्ये, आम्नाती छन्दसि ।

It is necessary to supplement that $saptam\bar{\imath}$ follows the karma of the verbal noun ending in kta followed by in. Viz. $Adh\bar{\imath}t\bar{\imath}$ $Vy\bar{a}karan\bar{\imath}\bar{e}$ (student in grammar). $Pariganit\bar{\imath}$ $y\bar{a}j\bar{n}iky\bar{e}$ (Renowned in priesthood in sacrifices), $\bar{A}mn\bar{a}t\bar{\imath}$ chandasi (specialist in the study of the $V\bar{e}das$).

साध्वसाधुप्रयोगे च

After the words qualifying sādhu and asādhu.

साध्वसाधुत्रयोगे च सप्तमी वक्तन्या - साधुर्देवदत्तो मातिर, असाधुः पितिर There is need to enjoin saptamī after words qualifying sādhu and asādhu. Viz. Sādhur Dēvadattō mātari and asādhuļ pitari.

कारकार्हाणां च कारकत्वे

Also when those that deserve to do action do it.

. कारकार्हाणां च कारकत्वे सप्तमी वक्तव्या - ऋद्धेषु भुञ्जानेषु दरिद्रा आसते, बाह्मणेषु तरत्यु वृषठा आसते ।

Saptamī is to be enjoined also when those that deserve to do action do it. Viz. Rddhēṣu bhuñjānēṣu daridrā āsatē (when men in prosperity enjoy, the poor keep quiet); brāhmaṇēṣu toratsu vṛṣalā āsatē (when brahmans eross, vṛṣalas keep quiet).

अकारकार्हाणां चाकारकत्वे

Also when those that do not deserve to do an action do not do it.

अकारकार्हाणां चाकारकत्वे सप्तमी वक्तन्या - म्खेंप्वासीनेषु ऋद्धा सुझते, वपलेप्वासीनेषु बाह्मणास्तरन्ति

Also when those that do not deserve to do an action do not do it. Viz. Mūrkhēṣu āsīnēṣu rddhā bhuñja'ē, Vrṣalēṣu āsīnēṣu brāhmaṇās taranti.

तिद्वपर्यासे च Also when the same is topsyturvy.

तद्विपर्यासे च सप्तमी वक्तन्या - ऋद्धेप्वासीनेषु मूर्खा भुझते, ब्राह्मणेप्वासीनेषु वृषलास्तरन्ति

Saptamī is to be enjoined even when the same is topsyturvy. Viz. Radhēşu āsīnēşu mūrkhā bhuñjatē, brāhmaņēşu āsīnēşu vrṣalās turanti.

निमित्तात्कर्मसंयोगे च

Also after the word denoting the fruit of the action when it is in association with the karma of the action.

निमित्तात् कर्मसंयोगे सप्तमी वक्तव्या त्रमणि द्वीपिनं हन्ति दन्तयोहिन्त युद्धरम् । केशेषु त्रमरी हन्ति सीति पुष्करुको हतः ॥ Saplamī is to be enjoined to the word denoting $kriy\bar{a}phala$ when it is in association with the karma of the $kriy\bar{a}$.

Carmaṇi dvīpinam hanti. (He kills the leopord for the skin)

Dantayōr hanti kuñjaram. (He kills the elephant for tusks)

Kēšēṣu camarīm hanti. - (He kills camarī for the hair)

Sīmni puskalakō hatah. (Musk-deer is killed for the scrotum)

यस च भावेन भावलक्षणम् (2, 3, 37)

भावलक्षणे सप्तमीविधानेऽभावलक्षणे उपसङ्ख्यानम्

Need to add that the seventh case-suffix follows $kriy\bar{a}v\bar{a}cuka$ when the $kriy\bar{a}$ is not the nimitta of another $kriy\bar{a}$.

भावलक्षणे सप्तमीविधानेऽभावलक्षण उपसङ्ख्यानं कर्तव्यम् - अमिषु ह्रयमानेषु प्रस्थितः, हुतेषु आगतः; गोषु दृश्यमानासु प्रस्थितः, दुग्धास्वागतः।

When saptamī is enjoined to bhāva which serves as lakṣaṇa, there is need to enjoin the same even when it does not serve as lakṣaṇa. Viz. Agniṣu hūyamānēṣu prasthitaḥ, hutēṣu āgataḥ (He started when agnihōtra was started and returned when it ended); Gōṣu duhyamānāsu prasthitaḥ, dugdhāsvāgataḥ. (He started when the cows were being milked and returned when the milking was over).

किं पनः कारणं न सिध्यति?

How is it not accomplished from the sūtra itself?

लक्षणं नाम तद् भवति येन पुनः पुनर्रुक्ष्यते । सक्चासौ कथं चिद्मिषु ह्यमानेषु प्रस्थितः, हुतेष्वागतः; गोषु दुद्यमानासु प्रस्थितः, दुग्धास्वागतः ॥

Lakṣaṇa is that which is frequently seen in concomitance with lakṣya. This is seen only once by chance that he started when agnihōtra commenced and returned when it ended or that he started when the cows were being milked and returned when the milking was over.

सिद्धं तु भावप्रवृत्तौ यस्यंभावारम्भवचनात्

The object is achieved by reading the sūtra Yasya ca bhāva-pravṛttāu bhāvārambhaḥ.

सिद्धमेतत् The object is achieved.

कथम् १ How?

यस्य भावपदृत्तौ द्वितीयो भाव आर्भ्यते तत्र सप्तभी वक्तव्या $Saptam\bar{\imath}$ is to be enjoined to the word which denotes an action, when another action takes place at the same time.

सिध्यति । सतं तर्हि भिद्यते

Yes, the object is accomplished. But the sūtra is to be recast-

यथान्यासमेवास्त Let the sūtra remain as it is.

ननु चोक्तं भावलक्षणे सप्तमीविधानेऽभावलक्षण उपसङ्ख्यानम् इति
Oh, it was said Bhāvalakṣaṇē saptamīvidhānē abhāvalakṣaṇa
upasankhyānam.

नैप दोषः । न खल्वश्यं तदेव लक्षणं भवति येन पुनः पुनर्लक्ष्यते । सक्दिपि यित्रिमित्तत्वाय कल्पते तदिपि लक्षणं भवति । तद्यथा - अपि भवान् कमण्डलुपाणि छालमद्राक्षीदिति ! सक्दसौ कमण्डलुपाणिः दृष्टः छातः, तस्य तदेव लक्षणं भवति । This difficulty does not arise. It is not absolutely necessary that it alone deserves to be lakşana which is frequently seen in concomitance with lakşya. Even when two things are seen together for a moment, one becomes the lakṣaṇa of another. For instance, one puts this question, "Did you see the pupil having kamaṇḍalu in his hand?" The pupil was seen only once with kamaṇḍalu in his hand. The same becomes his lakṣaṇa.

पश्चमी विभक्ते (2, 3, 42)

इह कसान्न भवति - कृष्णा गवां संपन्नक्षीरतमा इति?

Why does not pañcamī appear here in gavām of Kṛṣṇā gavām sampannakṣīratamā (Black eow among cows gives a large quantity of milk)?

िभक्त इत्युच्यते, न चतद् विभक्तम्
The word vibhakta is read and this is not vibhakta (different element).

विभक्तमेतत् - गोभ्यः कृष्णा विभज्यते

This too is vibhakta. The black cow is different from cows.

विभक्तमेव यत्रित्यं तत्र भवितव्यम्, न चैतन्त्रित्यं विभक्तम It should appear where vibhaktatva is nitya and the vibhaktatva here is not nitya.

Note:—Vibhakta refers to those which belong to different genera and not to those which have different individuality but belong to the same genus.

किं वक्तव्यमेतत् ? Is this to be stated ?

न हि No, It need not.

कथमनुच्यमानं गंस्यते ।

How is it to be understood without its being stated?

विभक्तम्रहणसामध्यत्

On the sāmarthya of the word vibhakta which is read.

यदि यद् विभक्तं चाविभक्तं च तत्र स्याद् विभक्तग्रहणम् अनर्थकं स्यात् If it applies with reference to those which are vibhakta (with reference to individuality) and avibhakta (with reference to genus), the reading of the word vibhakta in the sūtra is unnecessary.

साधुनिपुणाभ्यामचीयां सप्तम्यप्रतेः (२, ३, ४३)

अप्रसादिभिः Apratēḥ is to be replaced by apratyādibhiḥ.

अप्रत्यादिभिरिति वक्तव्यम् - इहापि यथा स्यात् - साधुर्देवदत्तो मातरं परि, मातरमन् ।

Apratyādibhih is to be read in place of apratēh, so that the seventh case may not follow mātr in the following expressions: Sādhur Dēvadattō mātaram pari, mātaram anu.

प्रसितोत्सुकाभ्यां तृतीया च (2, 3, 44)

प्रसित इत्युच्यते, कः प्रसितो नाम ? The word prasita is read. What is that word prasita? यस्तत्र नित्यं प्रतिबद्धः

It means one who is pratibaddha intermittently.

कृत एतत् ? How is it so interpreted ?

सिनोतिरयं वध्नात्यर्थे वर्तते, वद्ध इवासौ तत्र भवति

The root si (5th conjugation) means to bind; he remains as if he is bound.

नक्षते च छिप (2, 3, 45)

इह कस्मान्न भवति - अद्य पुष्यः अद्य मघा

Why does not the $s\bar{u}tra$ operate here in Adya pusyah and adya maghā?

अधिकरण इति वर्तते There is anuvṛlti to the word adhikaraṇē.

Āhnika - Twentyfive ends.

(Second adhyāya, third pāda, second āhnika ends.

Ahnika — Twentysix

(Second adhyāya, third pāda, third āhnika)

प्रातिपदिकार्थलिङ्गपरिमाणवचनमात्रे प्रथमा (2, 3, 46)

There are eight topics dealt with here:—(1-5) Benefits of reading prātipadika, linga, parimāna, vacana and mātra in the sūtra: (6) Need or otherwise of the upasankhyāna of Padasāmānādhikaranyē (7-8). Replacing the sūtra by Abhihitē prathamā or Tinsamānādhikaranē prathamā.

T

प्रातिपदिकमहणं किमध्यम्? Why is prātipadika read?

उच्चैः, नीचैः इत्यत्रापि यथा स्यात्

To allow prathamā in the avyayas-uccāih and nīcāih also.

किं पुनरत्र प्रथमया प्रार्थ्यते ?

What is aimed at by admitting $pratham\bar{a}$ (which is elided) after them?

पद्रवम् Padatvam

Note: $-K\tilde{a}iya$ ta says that padatva is secured by the dictum: $-Pratyayal\tilde{o}p\tilde{e}$ pratyayalakṣaṇam,

नैतदस्ति । षष्ट्या अत्र पदस्वं भविष्यति

It is not so. Padatva is secured here through $sasth\bar{\imath}$ on the strength of the $s\bar{\imath}tra$ $sasth\bar{\imath}$ $s\bar{e}s\bar{e}$.

इदं तर्हि प्रयोजनम् - ग्राम उचैस्तव स्वम्, ग्राम उचैरते स्वम् - सपूर्वायाः प्रथमाया विभाषा इत्येष विधियथा स्थात्

This, then, is the benefit that the sūtra Sapūrvāyūḥ prathamāyā vibhāṣā (8, 1, 26) may operate to secure tē in Grāma uccāis tē svam along with tava in Grāma uccāis tava sv.m.

II

अय लिङ्गमहणं किमर्थम् ? Why is linga read?

स्त्री, पुमान्, नपुंसकम् इत्यत्रापि यथा स्यात् To allow prathamā after the words strī, pumān and napumsakam also. नैतदस्ति प्रयोजनम्, एप एवाल प्रातिपादिकार्थः

No, it cannot be the benefit, since the same is the meaning of the stem there.

इदं तर्हि, कुमारी, वृक्षः, वुण्डम् इति

If so, the use of $pratham\bar{a}$ after the words $kum\bar{a}r\bar{\imath}$, vrksah and kundam is the benefit.

Note: - Kāiyaṭa prefers taṭaḥ and taṭam as udāharaṇa.

III

अथ परिमाणग्रहणं किमर्थम्? Why is parimāņa read?

द्रोणः, खारी, आढकम् इत्यत्रापि यथा स्यात्

To allow prathamā after the words drona, khārī and āḍhakam also.

Note:—1. The words $dr\bar{o}na$ etc. denote measure. If they are used in the sense of objects that serve as measure, $parim\bar{a}na$ is the meaning of the $pr\bar{a}tipadika$ and hence the word $parim\bar{a}na$ is not needed in the $s\bar{u}tra$. But if, on the other hand, they denote g_rain of that measure $(parim\bar{e}ya)$ by $lak san\bar{a}$, it does not become the $pr\bar{a}tipadik\bar{a}rtha$ and hence it is to be read in the $s\bar{u}tra$.

Note:—2. Nāgēšabhaļļa explains the bhāṣya thus:—So that there may be anvaya of parimāṇa which is vibhaktyartha, with vrīhi, the parimēya, through measured measuring relationship. He further states that the meaning of the stem in drēṇa is drēṇalva and not parināmatva and the reading of parimāṇa in the sūtra is for vāilakṣaṇya in śābdabōdha.

IV

अथ वचनग्रहणं किमर्थम् ! Why is vacana read?

इह समुद्राये वावयपिरसमाप्तिर्दृश्यते । तद्यथा - गर्गाः शतं दृष्ट्यम्ताम् इति, अधिनश्च राजानो हिर्ण्येन भवन्ति, न च प्रत्येकं दृण्टयन्ति । सत्येतमिन् दृष्टान्ते यंत्रतानि सर्वाणि समुद्रितानि भवन्ति तत्रिय स्यात् - द्रोणः सारी आदकम् इति । इष्ट न स्यात् - कुमारी, युक्षः, कुण्टम् इति । The fruit of the vidhi in this $s\bar{u}tra$ is seen collectively (so that, $pratham\bar{a}$ may appear where all the three - $pr\bar{a}tipadik\bar{a}rtha$, linga and vacana - are present). This is seen from the following $ny\bar{a}ya$:- $Garg\bar{a}h$ $\dot{s}atam$ $dandyant\bar{a}m$ (Let Gargas be fined hundred coins). Kings want money and they do not fine them individually. Following this $ny\bar{a}ya$, $pratham\bar{a}$ will set in only where all the three are expressed, as in $dr\bar{o}nah$, $kh\bar{a}r\bar{\imath}$ and $\bar{a}dhakam$ and will not appear in $kum\bar{a}r\bar{\imath}$, $vrk\bar{s}ah$ and kundam.

नैतद्दित प्रयोजनम् । प्रत्येकमपि वाक्यपरिसमाप्तिर्दृश्यते । तद्यथा गुण-वृद्धिसंज्ञे प्रत्येकं सवतः ।

This cannot be the benefit. The fruit of the meaning of the sentence is seen individually also, as with reference to the designations guna and vrddhi.

इदं तर्हि प्रयोजनम् - उक्तेप्वप्येकत्वादिषु प्रथमा यथा स्यात् - एकः, द्वौ, बहवः इति

This, then, is the benefit that $pratham\bar{a}$ appears in the words $\bar{e}kah$, $dv\bar{a}u$ and bahavah even though $\bar{e}katva$ etc. have been expressed (by the stem).

Note:—Vacana refers to $sahkhy\bar{a}$ according to $p\bar{u}rv\bar{a}$ - $c\bar{a}ryas$.

V

अथ मात्रग्रहणं किमधेम् ? Why is mātra read?

एतन्मात्र एव प्रथमा यथा स्थात् कर्मादिविशिष्टे मा भूदिति - कटं करोति To allow prathamā only when the meaning of the stem alone is expressed and not when karmatva etc too are expressed in addition, as in kaṭam karōti.

Note:—This arises in pratyayaniyama-pakṣa thus-Karmaṇi $dvit\bar{\imath}y\bar{a}$ etc. are taken that $dvit\bar{\imath}y\bar{a}$ etc. may express only karmatva etc. This will not prohibit $pratham\bar{a}$ from expressing them.

नैतद्स्ति प्रयोजनम् । कर्मादिषु द्वितीयाद्याः विभक्तयः । ताः कर्मादिविशिष्टे वाधिका भविष्यन्ति ।

No, this is not the benefit. The $vibhaktis-dvitiy\bar{a}$ etc. enjoined to denote karmatva etc. prevent $pratham\bar{a}$ being used there (i.e.) in arthaniyama-pakṣa,

अथ वा आचार्यप्रवृत्तिर्ज्ञापयित न कर्मादिविशिष्टे प्रथमा भवतीति, यदयं सम्बोधने प्रथमां शास्ति ।

Or the procedure of $\bar{A}c\bar{a}rya$ ($S\bar{u}trak\bar{a}ra$) suggests that $pratham\bar{a}$ does not appear to denote karmatva etc. also, since he enjoins $pratham\bar{a}$ in the vocative case (and hence there is no harm in pratyayaniyama-pakṣa),

Note: $-K\bar{a}iyala$ says that the statement that $pratham\bar{a}$ denotes vocative will be unnecessary, if it is taken to express karmatva etc.

नैतद्क्तिं ज्ञापकम् । अस्ति ह्यन्यदेतस्य वचने प्रयोजनम्
This does not serve as a jñāpaka; for another purpose is served by reading it.

किम्? What?

सामन्त्रितमिति वक्ष्यामि इति

I am going to give the $sainj\tilde{n}\tilde{a}$ $S\tilde{a}mantritam$ to that which ends in it.

यत्ति योगिविभागं करोति । इतरथा हि सम्बोधने आमिन्त्रितम् इत्येव ब्रूयात् । It is not the ease, since he reads them as two sūtras. Otherwise he would have read them as one sūtra thus: Sambādkanē āmantrijam.

इदं तर्हि उक्तेष्विप एकत्वादिपु प्रथमा यथा स्यात् - एकः, द्वौ, वहवः इति
This, then, is the benefit that prathamā appears in ēkaḥ, dvāu
and bahavaḥ even though ēkatva etc. are expressed by the
prātipadikas.

वचनग्रहणस्यापि एतत् प्रयोजनमुक्तम् । अन्यतरत् शक्यमवक्तुम् । The same prayojana was stated for reading vacana and hence either of the two - vacana and mātra - may be dropped.

VI

प्रातिपदिकार्थलिङ्गपरिमाणवचनमात्रे प्रथमालक्षणे पदसामानाधिकरण्ये उप-सङ्ख्यानमधिकत्वात्

There is need for adding padasāmānādhikaraņyē in the prathamālakṣaṇasūtra-Prātipadikārtha-linga-parimāṇa-vacana-mātrē prathamū, since it makes its appearance in addition.

प्रातिपदिकार्थेलिङ्गपरिमाणवचनमात्रे प्रथमालक्षणे पदसामानाधिकरण्ये उप-सङ्ख्यानं कर्तव्यम् - वीरः पुरुषः इति ।

There is need for the upasankhyāna of padasāmānādhikaruṇyē in the sūtra Prātipadikārtha-linga-parimāṇa-vacana-mātrē prathamā, so that prathamā may follow puruṣa in vīraḥ puruṣaḥ.

किं पुनः कारणं न सिध्यति? Why will it not follow it?

अधिकत्वात् । व्यतिरिक्तः पातिपदिकार्थ इति कृत्वा प्रथमा न प्रामोति On account of an extraneous element. Prathamā can not appear since the prātipadikārtha is something other linga, parimāņa and vacana alone.

कथं व्यतिरिक्तः?

What is it which makes it other than linga etc.?

पुरुषे वीरत्वम्

Vīratva in the meaning of puruşa is an extraneous element.

न वा वाक्यार्थत्वात्

No, it need not be read, on account of its $vi\hat{s}\bar{e}\hat{s}ana-vi\hat{s}\bar{e}\hat{s}yabh\bar{a}va$ being the meaning of $v\bar{a}kya$.

न वा वक्तव्यम् It need not be read.

किं कारणम्? Why?

वाक्यार्थत्वात् । यदत्राधिकयं वाक्यार्थः सः

Since it comes under $v\bar{a}ky\bar{a}rtha$. The additional element is taken under $v\bar{a}ky\bar{a}rtha$.

VII

अथ वा 'अभिहिते प्रथमा" इत्येत छक्षणं करिप्यते Or the sūtra is recast thus:— Abhihité prathamā.

Note: $K\bar{a}iyata$ reads: $Ti\dot{n}-k\dot{r}t$ -taddhita-sam $\bar{a}s\bar{a}ir$ abhihit \bar{e} kartr $\bar{a}d\bar{a}u$ pratham \bar{a} ityarthah.

अभिहितलक्षणायामनभिहिते प्रथमाविधिः

If Abhihite prathamā is agreed to, there is need to enjoin prathamā where it is anabhihita.

अभिहितलक्षणायामनभिहिते प्रथमा विघेया - वृक्षः, प्रक्षः इति

There is need to enjoin prathamā where there is anabhihitatva, as in vṛkṣaḥ, plakṣaḥ, if the lakṣaṇa Abhihitē prathamā is accepted.

डक्तं वा It has been answered.

किमुक्तम्? How has it been answered?

अस्तिर्भवन्तीपरः प्रथमपुरुषोऽपयुज्यमानोऽप्यस्तीति गम्यते - वृक्षः ष्रक्षः अस्तीति गम्यते इति

Asti in the present tense is taken to be understood after a noun of the third person though it is not read. Hence asti is taken to be understood after vrksah and plaksah.

अभिहितानभिहिते हि प्रथमाभावः

There is chance for prothamā where there is abhihitatva and anabhihitatva.

अभिहितानभिहिते हि प्रथमा प्रामोति

There is chance for prothamā where there is abhihitatva and anabhihitatva.

雨? Where?

प्रासादे आस्ते, शयने आस्ते इति । सदिप्रत्ययेन अभिहितमधिकरणमिति कत्वा प्रथमा प्राप्तोति ।

There is chance for prathamā after prāsāda and śayana in the sentences Prāsādē āstē and Śayanē āstē, since adhikaraṇatva is expressed by the kṛt-pratyaya a after sad (and śi).

VIII

एवं तर्हि 'तिङ्समानाधिकरणे प्रथमा ' इत्येतल्लक्षणं करिष्यते If so, the laksana is recast thus:—Tinsamanadhikarane prathama.

तिङ्समानाधिकरण इति चेत् तिङोऽप्रयोग प्रथमाविधिः

If the laksana is recast Tin-samānādhikaraņē prathamā, there is need to enjoin prathamā where tin is not used.

तिङ्समानाधिकरण इति चेत् तिङोऽप्रयोगे प्रथमा विधेया वृक्षः, प्रक्षः If the lakṣaṇa is recast Tin-samānādhikaraṇē prathamā, there is need to enjoin prathamā where tin is not used, as in vrksah and plaksah.

उक्तं पूर्वेण It was answered previously.

किमुक्तम्? How was it answered?

अस्तिर्भवन्तीपरः प्रथमपुरुपोऽप्रयुज्यमानोऽप्यस्ति इति गम्यते - वृक्षः प्रक्षः, अस्तीति गम्यते इति

Asti in the present tense is taken to be understood after a noun of third person, if no verb is used after it. When vrkṣaḥ or plakṣaḥ is used above, the word asti is taken to be understood.

श्रतशानचोश्र निमित्तभावात्तिङोऽभावस्तयोरपवादत्वात्

No chance for tin on account of satr and sanac which are its apavada having nimitta to appear.

शतृशानचोश्च निमित्तमावात्तिङोऽभावः

There is no chance for tin, since there is nimitta for saty and sanac to appear.

Note:—1. The nimitta for śatr and śānac is aprathamā-sāmānādhikaranyam mentioned in the sūtra Laṭaḥ śatṛśānacā-vaprathamāsamānādhikaraṇē (3, 2, 124).

Note:—2. $K\bar{a}iyata$ says that nominative suffix alone follows $D\bar{e}vadatta$ only when the finished word pacati follows it. Before it there is chance for the second case-suffix to appear. In that case $\hat{s}atr$ and $\hat{s}anac$ alone will follow pac and not tin.

酥? Where?

पचत्योदनं देवदत्त इति

After the root pac in the sentence Pacati odanam Devadattah.

किं कारणम् ? Why ?

तयोरपवादत्वात् । शतृशानचो तिङपवादौ । तो अत्र वाधकौ । न च अपवादविषये उत्सर्गोऽभिनिविशते – पूर्वं ह्यपवादा अभिनिविशन्ते पश्चादुत्सर्गाः; प्रकरुप्य च अपवादविषयमुत्सर्गोऽभिनिविशते । न तावदत्र कदाचित् तिङादेशो भवति । अपवादौ तावत् शतृशानचौ प्रतीक्षते । On account of their being apavāda. Śatr and śānāc are apavāda of tin. They may serve as bādhaka here. Utsarga does not step in the sphere of apavāda. For apavādas are given the first preference to act and then only atsargas operate; utsargas operate reserving room for apavādas to operate. In either case there is no chance for tin to take the place of lakāra. It expects the apavādas-satr and śānac to appear and recedes.

Note:—The former of the two principles stated above rests on lakṣaṇāika-cakṣuṣka-darśanam and the latter on lakṣyāika-cakṣuṣka-darśanam.

पाक्षिक एप दोपः

This difficulty will arise only when a particular doctrine is held.

कतरसिन्पक्षे श्रतृशानचे हुँतं भवति - अत्रथमा वा विधिना आश्रीयते प्रथमा वा प्रतिषेधेन ; विभक्तिनियमे चापि हुतं भवति, विभक्तिनियमो वा स्याद अर्थनियमो वेति ?.

In what pakṣa does the difficulty arise? Is there conflict between śatṛ and śānac on one side and tin on the other, when aprathamā is taken as paryudāsa or prasajya pratiṣēdha and when vibhakti-niyama is taken in the sūtras Karmaņi dvitīvā etc. or arthaniyama is taken?

Note:—If aprathamā is taken as paryudāsa, the word aprathamāsamānādhikaraņē means when there is sāmānādhikaraņya with dvitīyā, trīīyā etc. and if it is taken as prasajyapratiṣēdha. it means satr and sānac do not replace lakāra when there is sāmānādhikaraṇya with prathamā. If vibhaktiniyama is taken in Karmaṇi dvitīyā etc., it means karma etc, are denoted by, dvitīyā etc. alone and dvitīyā etc. may have other meanings If arthaniyama is taken, dvitīyā etc. are used to denote karma etc. alone and karma etc. may be denoted by other cases also. Nāgēšabhaṭṭī says that pratyayaniyama alone is acceptable to Sūtrakāra and arthaniyama to Vārttikakāra.

तद्यदा तावद् अर्थनियमः, अवथमा च विधिना, आश्रीयते तदेष दोपो भवति । यदा हि विभक्तिनियमः, तदा यद्येत्रमप्रथमा विधिनाश्रीयते अथापि प्रथमा प्रतिपेधेन, तदा न दोषो भवति ॥

This difficulty arises only when arthaniyamapakṣa and paryu-dāsapakṣa of aprothamā are adhered to. With reference to vibhaktiniyamapakṣa, the difficulty does not at all arise whether aprathamā is paryudāsa or prasajyapratiṣēdha.

प्ट्री शेषे (2, 3, 50)

There are four topics here:—(1) The denotation of the word $\hat{se}_{,a}$ (2) Its connotation (3) The need for $\hat{se}_{,a}$ in the $\hat{su}tra$ and (4) The need or otherwise of the $\hat{vise}_{,a}$ yapratisedha.

I

शेष इत्युच्यते ; कः शेषो नाम?

The word śēṣē is read. What does it denote?

कर्मादिभ्यो येऽन्येऽर्थाः स ज्ञेषः

Śēśa denotes the meanings other than karmādis.

यद्येवं शेषो न प्रकल्पते । न हि कर्मादिभ्योऽन्येऽर्थाः सन्ति । इह तावत्, राज्ञः पुरुषः इति, राजा कर्ता, पुरुषः सम्प्रदानम् । वृक्षस्य ज्ञाखा इति, वृक्षः शाखाया अधिकरणम् । तथा यदेतत् स्वं नाम् चतुर्भिरेतत्प्रकारेभैवति - क्रयणाद् अपहरणाद्, याच्ञायाः, विनिमयाद् इति । अत्र च सर्वत्र कर्मादयः सन्ति । If so, nothing can be denoted by $\delta \bar{e} \bar{s} a$; for nothing is beyond the range of karmādis. Firstly with reference to $r\bar{a}j\bar{n}alpha puruṣalpha, r\bar{o}j\bar{a}$ is kartā and puruṣa is sampradānam . With reference to $Vrkṣasya \delta \bar{a}kh\bar{a}$, vrkṣa is the adhikarana of $\delta \bar{a}kh\bar{a}$. With reference to ownership, it arises in four ways:—from purchase, from taking away, from requesting and from exchange. In all these cases one of karmādis does exist.

11

एवं तर्हि कर्मादीनामविवक्षा भेषः

If so, seșa connotes non-cognizance of karmādis.

1. This is so said since purusa, being under the service of the king, receives remuneration from him.

कथं पुनः सतो नामाविवक्षा स्यात् ?

How cannot one take cognizance of what actually exists?

सतोऽप्यविवक्षा भवति - तद्यथा अलोमिका एडका, अनुद्रा कन्या इति । असतश्च विवक्षा भवति - तद्यथा समुद्र: कुण्डिका, विन्ध्यो वर्धितकम् इति । Sometimes even things that do exist are not taken cognizance of, as in—Alōmikā ēḍakā (eve without wool), and Anudarā kanyā (girl without abdomen). Sometimes even those that do not exist are expressed, as in Samudraḥ kuṇḍikā (the little pot is an ocean), and Vindhyō vardhitakam (the heap of food is Vindhyas).

III

किमर्थ पुनः शेपग्रहणम् ? Why is śēṣē read ?

प्रत्ययावधारणाच्छेपवचनम्

Need to read śēṣē, since pratyayas are niyata.

मत्ययावधारणात् शेषम्रहणं कर्तव्यम् । मत्यया नियताः, अर्था अनियताः, तत्र पष्ठी मामोति । तत्र शेषम्रहणं कर्तव्यं पष्ठीनियमार्थं, शेष एव पष्ठी भवति, नान्यत्र इति ।

There is need to read sess on account of pralyayas being restricted. Pralyayas are niyala and meanings are aniyala and sasthī may appear there. Hence there is need to read sess to restrict that sasthī can be used only with reference to sess and none else.

अर्थावधारणाद्वा Or on account of the niyatatra of meanings.

अथ वा अर्था नियताः, प्रत्यया अनियताः, ते शेषऽपि प्राप्नुवन्ति । तत्र शेषप्रहणं कर्तन्यं शेषिनयमार्थं - शेषे पष्ट्येय भवति नान्या इति । Or meanings are niyata and pratyayas are aniyata and they may chance to appear with reference to seşa. Hence is the need to read seşe for seşaniyama, that sasthe alone should be used with reference to seşa.

अर्थनियमे हे।पप्रदर्ण जनयमफर्तुम् It is possible to manage without ६१९६ in arthaniyama-pakça.

क्षम् ! How?

अर्था नियताः, प्रत्यया अनियताः । ततो वक्ष्यामि षष्ठी भवति इति । तिन्यमार्थे भविष्यति - यत्र षष्ठी चान्या च प्रामोति, षष्ठ्येव तत्र भवति इति । Meanings are restricted and pratyayas are unrestricted. I shall, then, read that ṣaṣṭhī makes its appearance. It serves the purpose of niyama, that ṣaṣṭhī alone appears, where both ṣaṣṭhī and non-ṣaṣṭhī have a chance to appear.

IV

पष्टी शेष इति चेद् विशेष्यस्य प्रतिषेधः

If the $s\bar{u}tra$ is read $sasth\bar{i}$ $s\bar{e}s\bar{e}$, there is need to prohibit $vis\bar{e}sya$ from taking it.

षष्ठी शेष इति चेद् विशेष्यस्य प्रतिषेधो वक्तव्यः । राज्ञः पुरुष इत्यल राजा विशेषणं, पुरुषो विशेष्यः । तत्र प्रातिपदिकार्थो व्यतिरिक्त इति कृत्वा प्रथमा न प्रामोति । तत्र पष्ठी स्यात्, तस्याः प्रतिषेधो वक्तव्यः

If the sūtra is read Ṣaṣṭhī śēṣē, there is need to prohibit viśēṣya from taking ṣaṣṭhī. In the expression Rājñaḥ puruṣaḥ, rājā is viśēṣaṇa and puruṣa is viśēṣya. There is no chance for prathamā on the strength of the sūtra Prātipadikārtha-linga ... (2, 3, 46) after the word puruṣa, since its meaning has within it rāja-nirūpita-viśēṣyatva which is beyond the range of the prātipadikārtha. Hence is the chance for ṣaṣṭhī to appear there and it should be prohibited.

तत्र प्रथमानिधिः Need to enjoin prathamā there.

तत्र षष्ठीं प्रतिषिध्य प्रथमा विधेया, राज्ञः पुरुषः इति । There is need to enjoin $pratham\bar{a}$, after prohibiting sasthī to secure the expression $R\bar{a}j\tilde{n}al$; purusal.

उक्तं पूर्वेण

It has already been answered (in the bhāṣya under 2, 3, 46)

किमुक्तम्? How has it been answered?

न वा वाक्यार्थत्वाड् इति । यदत्राधिक्यं वाक्यार्थः सः It need not be read, on account of its being vākyārtha. The additional element which is mentioned here comes within the purview of the meaning of the sentence.

कुतो नु खल्वेतत् - पुरुषे -यदाधि श्यं स वाक्यार्थ इति, न पुना राजनि यदाधि श्यं स वाक्यार्थः स्यात How is it that the additional element with reference to purusa comes within the the purview of $v\bar{a}ky\bar{a}rtha$ and that the additional element with reference to $r\bar{a}jan$ does not come under it?

अन्तरेणापि पुरुषशब्दस्य प्रयोगं राजनि सोऽर्थो गम्यते, न पुनरन्तरेण राज-शब्दस्य प्रयोगं पुरुष सोऽर्थो गम्यते ।

The additional element with reference to $r\bar{a}jan$ comes within eognition even if purusa is not read; but, on the other hand, additional element with reference to purusa does not come within cognition except in its association with the word $r\bar{a}j\bar{n}ak$.

अस्ति कारणं यनैतदेवं भवति

There is reason for such a conclusion.

कि कारणम्? What is the reason?

राजगठदाद्धि भवान् पष्ठीमुचारयति । अङ्ग हि भवान् पुरुषगठदादप्युचारयतु, गंस्यते सोऽर्थः

Oh, you read $sasth\bar{i}$ after $r\bar{a}jan$. You better use, sir, the same after purusa also, and the same meaning is found

नतु च नेतेनैवं भवितव्यम् - न हि शब्दछतेन नामार्थेन भवितव्यम् , अर्थक्रोन नाम शब्देन भवितव्यम् ।

Oh, cannot we decide so on the basis that meaning should not be ascertained from the words used, but words have to be chosen to express the desired meaning?

तदेतदेवं दृश्यताम् - अर्थरूपमेवेतद् एवंजातीयकं येनात्र अन्तरेणापि पुरुष शब्दमयोगं राजनि सोऽर्थो गम्यते

Let it be taken so that word is chosen to suit the meaning. That meaning is suggested in rājan even if purusa is not read.

कि पुनस्तत्! What is it?

स्वामित्वम् The idea of svämitva

कि छतं पुनम्तन्? By which is it understood?

खहनम् It is understood from its own capacity.

तराथा - प्रातिपिटिकार्थानां क्रियाकृता विशेषा उपज्ञायन्ते, तरकृताय अस्ययः प्रादुर्भवन्ति - क्रमे, करणस्, अपादानं, सम्यदानस्, अधिरमणस् इति । ताश्र पुनर्विभक्तीनासुर्वर्षः पदानिशिमित्तन्वेगोपादीयन्ते पदान्ति । This is explained thus: Some višēṣas in the meanings of prātipadikas through their vyāpāra are taken eognisance of and from them, names like karma, karaṇam, apādānam, sampradānam and adhikaraṇam are given. They sometimes serve as nimitta to choose the ease suffixes and sometimes do not.

कदा च विभक्तीनामुत्पत्ती निमित्तत्वेन नोपादीयन्ते ?

When do they not serve as nimitta to choose the ease-suffixes?

यदा व्यभिचरन्ति प्रातिपदिकाथम्

When they (śakti-viśēṣas) are outside the sphere of $pr\bar{a}ti$ - $padik\bar{a}rtha$.

यदा हि न व्यभिचरन्ति, आख्याभूता एव तदा भवन्ति - कर्म, करणम्, अपादानं, सम्प्रदानं, अधिकरणम् इति

When they are within the sphere of prātipadikārtha, karma, kuraņam, apādānam, sampradānam and adhikaraņam serve as mere names denoting the function of case-suffixes.

यथेव तहि राजनि स्वकृतं स्वामित्वं तल षष्ठी भवति, एवं पुरुषेऽपि स्वामिकृतं स्वत्वं तत्र षष्ठी प्रामोति ।

Just as $sasth\bar{\imath}$ is used after $r\bar{a}jan$ on the basis that there is $sv\bar{a}mitva$ created by himself in him, there is chance for the same $sasth\bar{\imath}$ to be used after purusa, since there is svatva in him created by $sv\bar{a}mitva$.

राजशब्दाद् उत्पद्यमानया पष्ट्या अभिहितः सोऽर्थ इति कृत्वा पुरुपशब्दात् पष्टी न भविष्यति

Since that meaning-sva- $sv\bar{a}mitva$ -sambandha has been expressed by the $sasth\bar{i}$ after $r\bar{a}jan$, it cannot be used after purusa.

न तर्हि इदानीमिरं भवति - पुरुषस्य राजा इति

If so, is there no chance for the expression $Purusasya r\bar{a}j\bar{a}$?

भवति । राजशब्दात्त् तदा प्रथमा

Yes, it has. $Pratham\bar{a}$ alone can then be used after $r\bar{a}jun$.

न तर्हि इदानीमिदं भवति राज्ञः पुरुपस्य इति ?

If so, is there is no chance for the expression Rājñaḥ puruṣasya?
भवति वाद्यपर्थमभिसभीङ्य

Yes, it has a chance, on considering its relation with an external object.

Note:-If puru, a subordinates itself by governing another, it takes sasth after it, even though it is pradh ana with reference to $r\bar{o}jan$.

अधीगर्थदयेशां कर्मणि (2, 3, 52)

कर्मादिष्यकर्मकत्रद्वचंनम्

Need to read akarmakarad with reference to the āśrayas of karma.

कर्मादिष्वकर्मकवद्भावो वक्तत्र्यः

Akarmakavadbhāva has to be enjoined with reference to the āṣrayas of karma, (the dhātus read in the sūtras from 2, 3, 52 to 2, 3, 61.)

कि प्रयोजनम्? What is the benefit?

अकर्मकाणां भावे लो भवति इति भावे लो यथा स्यात् - मातुः सार्यते, पितुः सार्यते इति

So that the expressions Mātuḥ smaryatē and Pituḥ smaryatē in bhāvē-prayōga on the authority of Akarmakāṇām bhāvē lö bhavati may be secured.

अंथ वस्करणं किमर्थम्! What is the purpose served by vat?

स्वाश्रयमपि यथा स्थात् - माता सार्वते, पिता सार्वते इति

So that the expressions Mātā smaryatē and pitā smaryatē based on karmaņi-prayēga also may be secured.

कर्माभिधाने हि लिङ्गवचनानुपपत्तिः

For in the absence of akarmakavadbhāva, there will be anupapatti of linga and vacana.

कर्माभिधाने हि सति लिक्षयननयोरनुष्पत्तिः स्थान् - मान्ः स्मृतम्, मान्नेः स्मृतम्, मान्गां स्मृतम् इति । मानुर्येष्ठिक्षं यननं तन् स्मृत्याव्यस्मापि पामोति । If akarmakavadbhava is not read, the linga (napumeala) and vacana (ekavacana) after the word emrta in Matuh emytam, Matrèh emytam and Matinam emytam may not be appropriate, since it will have to take the *linga* and the racana of mātṛ that precedes it.

पष्टीप्रसङ्गश्च Chance too for sasthī.

षष्ठी च प्राप्नोति There is chance for sasthī too to appear.

कुतः? After what?

स्मृतशब्दात्, मातुः सामानाधिकरण्यात् षष्ठी प्राप्नोति

After the word smrta which is $sam\bar{a}n\bar{a}dhikarana$ with $m\bar{a}tr$.

अपर आह Another says.

पष्टीप्रसङ्गश्च Need to make şasthī to appear.

षष्ठी च प्रसङ्क्तन्या There is need to make sasthī appear.

कुतः? After what?

मातृशब्दात् । स्मृतशब्देनाभिहितं कभेति कृत्वा षष्ठी न प्राप्नोति After the word mātṛ. There will be no chance for ṣaṣṭhī, since karmatva is expressed by the smrta.

तत्ति वक्तन्यम् It (akarmakavat) has to be enjoined then.

न वक्तव्यम् । अविवक्षिते कर्मणि पष्टी भवति

No, it need not be enjoined. \S{asthi} sets in where there is no $vivaks\bar{a}$ for karma.

किं वक्तव्यमेतत्? Is this to be stated?

न हि No, it need not.

कथमनुच्यमानं गंस्यते

How is it to be so understood without its being stated? शेष इति वर्तते There is anuvṛtti for śēṣē.

शेषश्च कः ? What does the word śēṣa connote?

The word śēṣa connotes the avivakṣā of karmādis.

यदा च कर्म विवक्षितं भवति, तदा षष्ठी न भवति - तद्यथा, साराम्यहं मातरं, साराम्यहं पितरं इति ।

When there is vivakṣā for karmatva, ṣaṣṭhī does not set in, as in Smarāmi aham mātaram and Smarāmi aham pitaram.

Note:—Kāiyata clearly explains how bhātavacanānām means bhāvakartrkānām.

रुजार्थानां भाववचनानामज्वरेः (2, 3, 54)

अन्यरिसन्ताप्योः Need to replace Ajvarēļi by Ajvari-santāpyēļi.

अज्विरसन्ताप्योरिति वक्तव्यम् , इहापि यथा स्यात् चोरं सन्तापयित, वृपलं सन्तापयित

Ajvarisantāpyāh is to be read, so that the expressions Cōram santāpayati and Vṛṣalam santāpayati may be secured.

अथ किमर्थ भाववचनानाम् इत्युच्यते, यावता रुजार्था भाववचना एव गवन्ति! What is the need for the word bhāvavacanānām when rujārthas are only bhāvavacanas?

भावकतृकाद् यथा स्यात्, इह मा भृत् - नदी क्रुणानि रुजति इति So that it may be after bhāvakartṛka, so as to prevent its operation here in Nadī kūlāni rujati.

द्वितीया त्रासणे (2, 3, 60)

किमुटाहरणम् ? What is the example?

गां प्रस्ति, गां प्रदीवयन्ति, गां सभासदभ्य उपहरन्ति

The examples are:-Gám ghnanti, gãm pradīvyanti. and gâm sabhāsadbhya upaharanti.

नेतदहित, पूर्वणाप्येतत् सिद्धम्

No, this is not; this is secured even by the previous sulta (Yibhāsēpasargē).

हदं तर्हि, गामस्य तदहः सभायां दीव्येयुः This, then, is the example:-Gom esta ted-chali sathöröm diengyuh.

प्रव्यव्यविधियो देवतासम्प्रदाने (१, ३, ६१)

र निवाडप्रस्थितस

चतुर्थ्यथें बहुलं छन्दिस (2, 3, 62)

षष्ट्यर्थे चतुर्थी 1 Need to read Sasthyarthe caturthi.

षण्ठ्यर्थे चतुर्था वक्तव्या - या खर्वेण पित्रीत तस्य खर्वः (जायते)

There is need to read Ṣaṣṭhyarthē caturthī, to sanction tasyāi for tasyāḥ in Yā kharvēṇa pibati tasyāi kharvaḥ (jāyatē).

यां पर्राचीं तस्य हीतमुख्यपगलमो या स्नाति तस्या अप्युमारको, या अभ्यङ्के तस्य दुश्चर्मा, या प्रिल्खित तस्य खलितिरपमारी, या अङ्के तस्य काणः, या दतो धावेते तस्य स्यावदन्, या नखानि निक्नन्तते तस्य कुनखी, या कृणित तस्य क्लीवः, या रज्जे स्वति तस्या उद्घन्धको, या पर्णेन पिनित तस्या उन्माद्कः ॥ तितिरीयसंहिता (2, 5, 1, 6-7) अइल्याय जारः (तै. आर. 1, 58), मनाय्ये तन्तुः

In the following Vēdic quotation the fourth case in tasyāi, Ahalyāyāi and Manāyyāi is found in place of genetive:— Yām malavadvāsasam sambhavanti yas tatē jāyatē sēsbhiśastaḥ, yām araṇyē tasyāi stēnaḥ, yām parācīm tasyāi hrītamukhyapagalbhaḥ, yā snāti tasyāi apsumārakaḥ, yā abhyanktē tasyāi duścarmā, yā pralikhatē tasyāi khalatir-apamārī, yā anktē tasyāi köṇaḥ, yā datē dhāvatē tasyāi śyāvadan, yā nakhāni nikrntatē tasyāi kunakhī, yā krṇatti tasyāi klībaḥ, yā rajjum srjati tasyā udbandhukaḥ, yā parṇēna pibati tasyā unmādukaḥ. Ahalyāyāi jāraḥ, Manāyyāi tantuḥ.²

तत्ति वक्तन्यम् It must, then, be enjoined.

न वक्तव्यम् No, it need not.

योगविभागात् सिद्धम्

It is accomplished by splitting the sūlra into two.

- 1. Caturthicacanam is another reading.
- 2. This passage in the Tāittirīyasanhitā teils us how advanted the Science of Psychology was in Vidic times and how careful the wife should be when she is in her manses.

चतुर्थी । ततः, अर्थे बहुलं छन्दिस

First Caturthī is taken as one sūtra and then Arthī bahulam chandasi is taken as another sūtra.

कर्त्वकर्मणोः कृति (2, 3, 65)

Whether there is need for the use of the word kṛti in the sūtra is the only topic that is discussed here.

इद्धरणं किमर्थम्? Why is kṛti read?

इह मा भूत् - पचत्योदनं देवदत्त इति

So that the $s\bar{u}tra$ may not operate here when a finite verb like pacati as in Pacati $\bar{o}danam$ $D\bar{e}vadattah$ is read.

कर्तृकर्मणोः पष्टीविधाने कृद्धहणानर्थक्यं लप्रतिवेधात्

Reading of krti with reference to sasthīvidhāna of kartr and karman is unnecessary, on account of the niṣēdha of lakāra.

कर्तृकर्मणोः पद्याविधाने कृद्धहणमनर्थकम्

Reading of kṛṭi is unnecessary with reference to the vidhāna of ṣaṣṭhī of kartṛ and karman.

किं कारणम्? Why?

लवितेषेषात् । प्रतिपिध्यतेऽत्र पष्टी लप्रयोगे न इति

On account of the prohibition before lakāra. Ṣaṣṭhī is going to be prohibited when lakāra is used, in the sūtra Na lõka...(2, 3, 69).

. तस्य कर्मकर्त्रश्चे तर्हि कुद्रहणं कर्तन्यम् । कृतो ये कर्तृकर्मणी तत्र यथा स्यादन्यस्य ये कर्तृकर्मणी तत्र मा मृदिति ।

There is need for the word kṛti, so that it may serve as the viṣṣṣaṇa of karmakartṛ, to allow the sūtra to operate with reference to the kartṛ and karman of kṛt and not with reference to those of another.

नैतद्दित प्रयोजनम् । घातोहि द्वये प्रत्यया विधीयन्ते, तिष्टश्च कृतश्च । तत्र फ़रवयोग इप्यते, तिङप्रयोगे प्रतिषिध्यते ।

This is not the benefit; for, two kinds of praty syns—tin and ket are enjoined to roots. Of them, this satra is intended to operate if ket-pratyaya is used and not to operate if tin is used.

न जूमः - इहार्थ तस्य कर्मकर्त्वर्थ क्रद्धहणं कर्तव्यमिति
We do not say that the word kṛti should be used to serve as
the viśēsana of kartrkarmaṇōḥ in this sūtra.

किं तर्हि ? Where then?

उत्तरार्थम् - 1 अन्ययप्रयोगे न इति षण्ठ्याः प्रतिषेधं वक्ष्यति, स कृतोऽन्ययस्य ये कर्तृकर्मणी तत्र यथा स्याद्, अकृतोऽन्ययस्य ये कर्तृकर्मणी तत्र मा भूत् - उच्चेः कटानां स्रष्टा इति ।

For the sake of what follows. He is going to prohibit saṣṭhī with reference to the prayōga of avyaya. It should apply to the kartr and karman of the avyaya which is krt and should not apply to the kartr and karman to other avyayas, so that the following expression can be secured—Uccāiḥ kaṭānām sraṣṭā.

तस्य कर्मकर्त्रथीमिति चेत् प्रतिपेधेऽपि तदन्तकर्मकर्तृत्वात्सिद्धम्

If it is said that krt is to serve as the visēṣaṇa of karmakartr with reference to avyaya, the object is achieved since the avyaya which takes kartr and karman is only krd-anta.

कृत एते कर्नुकर्मणी, नान्ययस्य, अधिकरणमत्रान्ययम् । Kartr and karman belong only to krdanta and not to avyaya; avyaya, here (uccāiḥ) is only adhikaraṇa.

इदं तर्हि प्रयोजनम् - उभयपाप्तौ कर्मणि पष्ट्याः प्रतिरेधं वक्ष्यिति, स कृतो ये कर्तृकर्मणी तत्र यथा स्यात् कृतोर्थे कर्तृकर्मणी तत्र मा भूदिति - आश्चर्यमिदं वृत्तम्, ओदनस्य च नाम पाकः, ब्राह्मणानां च प्राद्र्भीव इति

This, then, is the benefit, that the pratisedha which he is going to enjoin with reference to sasthi in the sutra Uthayapraptau karmani may apply to the kartr and karman of the same krdanta and not to the kartr and karman of two krts, as in Ascaryam idam vrttam, odanasya ca nāma pākaḥ, brāhmaṇānān ca prādurbhāvaḥ (This is a strange occurrence—Oh. there is cooking of food and there is the arrival of brahmans)

अथ कियमाणिपि कुद्रहणे कसादेवात्र न भवति?

1. अन्यययोगे is another reading.

Even on reading the word krti, how does it (the sūtra - Ubhaya-prāptāu karmani) not operate here?

उभयप्राप्ती इति नैवं विज्ञायते - उभयोः प्राप्तिः उभयप्राप्तिः, उभयप्राप्ती इति The word ubhayaprāptāu is not taken as the seventh case of ubhayaprāpti whose vigraha is ubhayāḥ prāptiḥ.

कथं तर्हि ? How then?

उभयोः प्राप्तिर्थस्मिन् कृति सोऽयमुभयप्राप्तिः कृत्, उभयप्राप्तो इति । It is taken as the seventh ease of ubhayaprāpti which qualifies kṛt and whose vigraha is ubhayōh prāptih yasmin.

अथ वा कृतो ये कर्तृकर्मणी तल यथा स्यात्, तद्धितस्य ये कर्तृकर्मणी तत्र मा भृदिति - कृतपूर्वी करं, भुक्तपूर्वी ओदनम् इति । Or, in order that it may operate with reference to the kartr and karman of kṛḍanta alone and not to those of taddhitānta, as in kṛṭapūrvī kaṭam, bhuktapūrvī ōdanam.

ननु च वावयेनैवानेन न भवितन्यम्
Oh, there is no chance for sasthī from the nature of the sentence.

तत्र द्वितीयया तावन्न भवितन्यम् Oh! there is no ehance even for $dvit\bar{\imath}y\bar{a}$ there (after kata and $\bar{\imath}dana$.)

किं कारणम् ? Why?

क्तेनाभिहितं कर्मेति कृत्वा

Taking that karman is expressed by kta.

इनिश्रत्ययेन चापि नोत्यचन्यम्

There is no chance for ini-pratyaya too to appear.

किं कारणम्? Why?

असामध्यांत On account of the absence of samarthya.

ម្មារាជាប្រស្នឹង ? Why is samarthya absent?

मार्देशमसम्बं भवति

On the dictum Sāpēkşam asamartham bhavati.

यत्तावदुच्यते - द्वितीयया तावन्न भवितव्यम्, किं कारणम्, क्तेन अभिहितं कर्मीति कृत्वा - इति, योऽसौ कृतकटयोरभिसम्बन्धः स उत्यन्ने प्रत्यये निवर्तते ; अस्ति च करोतेः कटेन सामर्थ्यम् इति कृत्वा द्वितीया भविष्यति ।

Firstly with reference to the objection that there is no chance for $dvit\bar{\imath}y\bar{a}$ after kata on account of the karmatva being expressed by kta, the sambandha between krta and kata recedes from the mind the moment ini-pratyaya is used and $dvit\bar{\imath}y\bar{a}$, then, sets in on the assumption that there is samarthya between the meaning of the root kr and kata.

यद्प्युच्यते - इनिप्रत्ययेन चापि नोत्पत्तव्यम्, किं कारणम्, असामध्यत्, कथमसामध्यम्, सापेक्षमसमर्थं भवति - इति, नेदमुभयं युगपद् भवति वाक्यं प्रत्ययश्चः यदा वाक्यं न तदा प्रत्ययः; यदा प्रत्ययः सामान्येन तदा वृत्तिः । तत्र अवस्यं विशेषार्थिना विशेषोऽनुप्रयोक्तव्यः - कृतपूर्वी । किम् १ कटमिति । भुक्तपूर्वी - किम् १ ओदनमिति

With reference to the second objection too that there is no chance for ini-pratyaya on account of $as\bar{a}marthya$ which is based on $s\bar{a}p\bar{e}hsatva$, the answer is this:—Both the $v\bar{a}kya$ and the pratyaya do not operate simultaneously; when the $v\bar{a}kya$ operates, pratyaya does not. When the pratyaya makes its appearance, it has its vrtii only in a general sense and hence one who is bent upon informing the $vis\bar{e}sa$ has to make use of $vis\bar{e}sa$. On saying $krtap\bar{u}rv\bar{v}$, he gives room for the object of krta to be known and hence reads katam. Similarly he reads $\bar{o}danam$ after $bhuktap\bar{u}rv\bar{v}$.

अथ वा इदं प्रयोजनम् - कर्तृभूतपूर्वमात्रादिष पष्टी यथा स्यात् भेदिका देवदत्तस्य यज्ञदत्तस्य काष्ठानाम् इति

Or this is the benefit that sasthī may be used after prayōjya-kartr as Bhēdikā Dēvadattasya Yajñadattasya kāsthānām.

Note:—Kāiyaṭa derives Kṛt as Kartari iti and states that it refers to prayōjyakartā who is apradňāna. Nāgēśabhoṭṭa says that taddhitanivrtti alone is the prayōjana of kṛdgrahaṇa.

^{1.} Vrttil: = Parārthābhidhānam.

उभयप्राप्ती कर्मणि (2, 3, 66)

उभयप्राप्ती कर्मणि पष्ट्याः प्रतिपेधेऽकादिप्रयोगेऽप्रतिपेधः

There is need for apratisēdha with reference to those which end in aka etc. under the sūtra Ubhayaprāptāu karmani.

उभयपाप्ती कर्मणि पष्ठ्याः प्रतिषेधे अकादिप्रयोगे प्रतिषेधो न भवतीति वक्तव्यम् - भेदिका देवदत्तस्य काष्ठानाम्, चिकीर्पा विष्णुपित्रस्य वटस्य It must be enjoined that the pratisedha of sasthi to the karty by the sūtru Ubhayaprāptāu karmani does not hold good if the krt is aka etc. Viz. Bhēdikā Dēvadattasya kāsthānām, cikīrsā Visnumitrasya katasya.

अपर आह Another says:

अकाकारयोः प्रयोगे प्रतिषेधो नेति वक्तव्यं, शेषे विभाषा

It must be enjoined that the pratisēdha does not hold good if the krt is aka, and \bar{a} and there is $vibh\bar{a}s\bar{a}$ with reference to the rest.

शोभना खलु पाणिनेः सूत्रस कृतिः, शोभना खलु पाणिनिना स्त्रस कृतिः । शोभना खलु दाक्षायणस्य सङ्गहस्य कृतिः, शोभना खलु दाक्षायणेन सङ्गहस्य कृतिः इति ।

Viz. Śōbhanā khalu Pāṇinēḥ Sūtrasya kṛtıḥ, Śōbhanā khalu Pāṇininā Sūtrasya kṛtiḥ. Śōbhanā khalu Dākṣāyaṇasya Sangrahasya kṛtiḥ, Śōbhanā khalu ¹ Dākṣāyaṇēna Sangrahasya krtih.

Note:— $Kar{a}$ iyata reads:— $Akar{a}kar{a}$ ravyatiriktastr $ar{\imath}$ pratyaya $ar{\epsilon}$ ra nānyasminniti kēcid āhuļi. Aparē tu pratyayamātrē akākāravarjitē vikalpam icchanti—Śabdānām anuśāsanam Ācāryasya

Acāryēna vā iti.

क्तस्य च वर्तमाने (2, 3, 67)

क्तस्य च वर्तमाने नंषुसके भाव उपसङ्ख्यानम् There is need to add Napumsake bhave to the sutra Klasya ca vartamānē.

This shows that Vyā,B, the author of the Sangral a is a descendant of Parini.

क्तस्य च वर्तमाने नपुंसके भाव उपसङ्ख्यानं कर्तव्यम् - छात्रस्य हसितं, नटस्य भुक्तम्, मयूरस्य नृत्तम्, कोकिलस्य व्याहृतम् इति

There is need to add Napunisakē bhāvē under the sūtra Ktasya ca vartamānē to secure the forms Chātrasya hasitam, Naṭasya bhuktam, Mayūrasya nṛttam and Kōkilasya vyāhṛtam.

तत्तर्हि वक्तन्यम् It must, then, be read.

न वक्तज्यम् No, it need not be read.

शेषविज्ञानात् सिद्धम् 1 - शेष छक्षणात्र षष्ठी भविष्यति ।

It is accomplished through $\dot{s}\bar{e}s\bar{e}$. The $sasth\bar{i}$ will appear here on the strength of the $s\bar{u}tra$ $\dot{S}\bar{e}s\bar{e}$ $sasth\bar{i}$.

शेष इत्युच्यते । कश्च शेषः ?

The word $\hat{s}\bar{e}\bar{s}\bar{e}$ is read. What does $\hat{s}\bar{e}\bar{s}a$ connote?

कर्मादीनामविवक्षा शेषः

 $\hat{S}\bar{e}$ sa connotes the avivaks \bar{a} of karm \bar{a} dis.

कथं पुनः सतो नाम अविवक्षा स्यात्, यदा छात्रो हसति, नटो भुङ्क्ते, मयूरो नृत्यिति, कोिकेलो व्याहरति ?

How is it possible to have avivakṣā of that which exists, as Chātrō hasati, Naṭō bhuṅktē, Mayūrō nṛṭyati and Kōkilō vyāharati?

सतोऽप्यविवक्षा भवति । तद्यथा - अलोमिका एडका, अनुदरा कन्या इति । असतश्च विवक्षा - समुद्रः कुण्डिका, विनध्यो वर्द्धितकम् इति

Sometimes even things that do exist are not taken cognizance of as in $Al\bar{o}mik\bar{a}$ $\bar{e}dak\bar{a}$ and $Anudar\bar{a}$ $kany\bar{a}$. Sometimes even those which do not exist are expressed as in $Kundik\bar{a}$ samudrah and Varddhitakam vindhyah.

यद्येवम् उत्तरत्र चातु शब्दां प्राप्तोति - इदमहेः सप्तम्, इहाहिना सप्तम्, इहाहिः सप्तः, इहाहेः सप्तम्, प्रामस्य पार्थे, प्रामस्य मध्ये इति lf so, there will be chance for the following four-fold expression:—(1) Idam ahēḥ srptam grāmasya pārśvē, grāmasya madhyē (2) Iha ahinā srptam... (3) Iha ahiḥ srptam... (4) Iha ahēh srptam...

1. This is printed as a vārttika in the printed editions. But, in the opinion of Nāgēšabhaṭṭa, it seems to be bhāṣṇa.

इप्यत एव चातुःशब्द्यम्

The four-fold expression is evidently a desired one.

Note:— $N\bar{a}g\bar{e}\hat{s}abha\underline{t}ta$ says that, according to $V\bar{a}rttikak\bar{a}ra$, the ways of expression are three, that, according to $Mah\bar{a}-bh\bar{a}syak\bar{a}ra$, they are four and that, according to some, they are five.

. न लोकाव्ययनिष्टाखलर्थतृनाम् (२, ३, ६९)

लादेशे सिछड्ग्रहणं किकिनोः प्रतिपेधार्थम्

Need to replace la by sallit to prohibit ki and kin.

लादेशे सिछड्यहणं कर्तव्यम् - सिछटोः प्रयोगे नेति वक्तव्यम्

It is necessary to read sallit in place of la. It must be enjoined that there is pratisēdha when sat and lit are used.

Note:— $K\bar{a}iya$ and says that sad refers to sair and sanac and lit refers to kanac and kvas.

किं प्रयोजनम्? Why?

किकिनोः प्रतिपेधार्थम् - किकिनोरिप प्रयोगे प्रतिपेधो यथा स्यात्, पिः सोमम्, दिवर्गाः

To prohibit with reference to ki and kin. So that the pratised may take place when ki and kin also are used, as in Papih somam and Dadir gah.

किं पुनः कारणं न सिध्यति?

How is it not secured from the sūlra?

तयोरलादेशत्यात् On account of their not being lādēśa.

न हि ती लादेशी For those two are not the ādēšas of lakāra. अथ तो लादेशी स्थातां. स्थात्तिविषेधः?

अथ ता लादशा स्थाता, स्थातातपथः। Can there be pratisedha if they are ladesa?

वाद स्यात Certainly will it be.

हादेशी तर्हि भविष्यतः If so, they are taken as ladesa.

कथम्! How?

आहगमहनजनः किकिनो लिट् च इति, लिड्ड्विति वक्ष्यामि I shall take lit ca in the $s\bar{u}tra$ \bar{A} -dr-gama h lit lit

स तर्हि वतिनिर्देशः कर्तव्यः, न ह्यन्तरेण वतिमतिदेशो गम्यते । If so, vat has to be read; for atidēśa is not possible without vat.

अन्तरेणापि वतिमतिदेशो गम्यते । तद्यथा, एप श्रह्मदत्तः, अब्रह्मदत्तं ब्रह्मदत्त इत्याहं, ते मन्यामहे ब्रह्मदत्तवद्यं भवतीति । एविमहाप्यिक्टिं लिडित्याह, लिड्वदिति विज्ञास्यते ।

Atidēśa is suggested even in the absence of rat. For instance, one, on seeing a person who is not Brahmadatta, says, 'This man is Brahmadatta' and we infer from it that he is like Brahmadatta. So also he reads aliţ as liţ. It is construed liḍvat.

उकारप्रयोगे न Need to prohibit where ukāra is used.

उकारप्रयोगे नेति वक्तन्यम् - कटं चिकीर्षुः, ओदनं बुमुक्षुः । It is necessary to prohibit it with reference to ukārānta. Viz. Kaṭam cikīrṣuḥ and ōdanam bubhukṣuḥ.

तत्ति वक्तज्यम् It must, then, be read.

न वक्तव्यम् । उकारोप्यत्र निर्दिश्यते

It need not be read. $Uk\bar{a}ra$, too, is found in the $s\bar{u}tra$.

कथम्? How?

शिक्ष्यिनिर्देशोऽयम् – उ + उक = ऊक, $\varpi +$ ऊक = छोक इति
The word $l\bar{b}ka$ embraces within it la, u and uka where the latter two first combine to form $\bar{u}ka$.

उकप्रतिषेधे कमेर्भाषायामप्रतिषेधः

Need for apratiṣēdha of kāmuka in Classical Sanskrit.

डकपतिषेथे कमेर्भाषायां प्रतिषेधो न भवतीति वक्तन्यम् - दास्याः कामुकः, वृषल्याः कामुकः ।

lt must be enjoined that, with reference to uka-pratiṣēdha, there is no pratiṣēdha for kāmuka in Classical Sanskrit. Viz. Dāsyāḥ kāmukaḥ and Vṛṣalyāḥ kāmukaḥ.

अन्ययप्रतिषेधे तोसुन्कसुनोरप्रतिषेधः

Need for upratisēdha with reference to tosun and kasun.

अव्ययप्रतिषेधे तोसुन्कसुनोः प्रतिषेधो न भवर्ताति वक्तव्यम् - पुरा सूर्यस्योदे-तोराधेयः, पुरा वत्सानामपाकर्तोः, पुरा कूरस्य विसरो विरप्शिन्

It must be enjoined that the pratisedha with reference to avyayas does not embrace tosun and lasun. Viz. Purā sūryasya udētār ādhēyaḥ, Purā vatsānām apākartāḥ and Purā krūrasya visr pē virapsin.

शानंश्वानक्शृतृणामुपसङ्ख्यानम्

There is need to add sanan, canas and satr.

शानैश्चानक्शतृणामुपसङ्ख्यानं कर्तव्यम् , सोमं पवमानः, नटमाझानः, अधीयन् पारायणम् । लप्रयोगे न इति प्रतिषेघो न प्राप्नोति

There is need to add under the sūtra śānan, cānaś and śatr so that the pratiṣēdha may operate here:—Sōmam pavamānak, Natam āghnānah, and Adhīyan pārāyanam. These cannot be secured from the pratisēdha laprayogē na.

मा भदेवं; तृत्रित्येवं भविष्यति Let it not be secured by it; it will be secured by trn found in the sūtra.

कथम ! How?

तृत्रिति नेदं प्रत्ययग्रहणम् Trn, here, is not the pratyaya.

किं तर्हि ? What, then, is it?

प्रत्याहारब्रहणम् It is pratyāhāra.

क सन्निविष्टानां प्रत्याहारः ? Whose pratyāhāra is it ?

लटः शत इत्यतः प्रभृति आतनो नकारात

It is the pralyāhāra from tr in Lalah sati... (3, 2, 124) to n in Trn (3, 2, 135).

यदि प्रत्याहारबर्णं चोरस्य द्विपन्, वृपलस्य द्विपन् अत्रापि प्रामोति । If it refers to pratyāhāra, the pratisēdha will have chance here also in Cērasya drisan and Vṛṣalasya dvisan.

द्विपः शतुर्वावचनम् There is need to read Drisali Saturva.

द्विषः शतुर्वेति वक्तव्यम् । तचावर्यं वक्तव्यम् , प्रत्ययग्रहणे सति प्रतिषेधार्थं , तदेव पत्याहारम्रहणे सति विध्यर्थं भविष्यति

There is need to state Dviṣaḥ śaturvā. It must, necessarily be read for the sake of pratisēdha if trn is taken as a pratyaya and for the sake of vidhi if trn is taken as a $praty\bar{a}h\bar{a}ra$.

अकेनोर्भविष्यदाधमण्ययोः (२, ३, ७०)

अकस्य भविष्यति Need to restrict aka only to bhavisyati.

अकस्य भविष्यतीति वक्तव्यम् - यवान् लावको व्रजति, ओदनं भोजको वर्जति, सक्तून् पायको व्रजति

There is need to restrict aka only to bhavisyati, Viz. Yavān āvakō vrajati, Ōdanam bhōjakō vrajati and Saktūn pāyakōl vrajati.

इन आधमण्यें च In in the sense of ādhamarnya too.

तत इन आधमण्यें च भविष्यति चेति वक्तत्र्यम् - शदं दायी, सहस्रं दायी, ग्रामं गमी ।

Then it is necessary to enjoin that in is used to denote ādhamarņya in addition to bhavişyati.

कृत्यानां कर्तरि वा (2, 3, 71)

कर्तृग्रहणं किमर्थम् ? Why is kartari read?

कर्माण मा भूदिति To prevent it in karmani.

नैतद्स्ति प्रयोजनम् । भावकर्मणोः कृत्या विधीयन्ते, तत्र कृत्यैर्भिहितत्वात् कर्मणि षष्टी न भविष्यति

This is not the benefit. Krtyapratyayas are enjoined to denote bhāva and karman, and since karman is expressed by kriyas, there is no chance for karmaņi ṣaṣṭhī.

अत उत्तरं पठति He, then, reads the answer.

भव्यादीनां कर्मणोऽनभियानात् कृत्यानां कर्तृग्रहणम्

Since karman is not expressed by krtya in $bhavy\bar{a}di$ noted in 3, 4, 68, kartari is read in the $s\bar{u}tra$.

भन्यादीनां कर्म कृत्येरनभिहितम् - गेयो माणवकः साम्नाम् The karman of bhavyādis is not expressed by kṛtya. Gēyō māṇavakaḥ sāmnām.

भन्यादीनां कर्मणोऽनभिधानात् कृत्यानां कर्तृग्रहणं कियते Since the karman of bhavyādis is not expressed, there is need to read kartari in the sūtra.

किमुच्यते - भव्यादीनां कर्भ कृत्यैरनिमहितम् इति, नेहाप्यनिमहितं भवति, आकष्टव्या श्रामं शाखा इति ?

Why is it said that the karman of bhavyādis is not expressed by kṛṭṭyas? Is it not that it is not expressed even here in the sentence Ākṛaṣṭavyā grāmam śākhā?

Note:—Kāiyaļa says here: Kṛṣēr dvikarmakatvāt pradhānakarmanah kṛṭyēna abhidhānam, na tu apradhānakarmanah iti tannivṛṭṭyariham kartṛgrahaṇam kasmān na bhavati iti bhāvaḥ.

एवं तर्हि योगविभागः करिष्यते - क्रत्यानाम् - क्रत्यानां प्रयोगे पष्टी न

If so, the $s\bar{n}tra$ is split into two:— Firstly $krty\bar{a}n\bar{a}m$ is read and it means that $sasth\bar{i}$ does not appear when krtyas are used.

किमुराहरणम् What is the udāharaņa ? त्राममाकष्टव्या शाला Grāmam ākrastavyā Sākhā.

ततः कर्तरि वा इति Secondly kartari vā is read.

इहापि तर्हि प्रामोति, गेयो माणवकः साझामिति
If, so, the niçedha will appear here too in Geyő māṇavakaļi
sāmnām.

डभयशासाविति वर्तते There is anuvytti for ubhayaprapti.

ननु चोभयप्राप्तिरवैषा - गेयो माणवकः साम्नाम् इति च, गेयानि माणवकेन सामानि इति च भवति

Oh this too is a case where there is $ubhayaprapti := G\bar{e}y\bar{o}$ māṇavakalī sāmnām and Gēyāni māṇavakēna sāmāni.

उभयप्राप्तिर्नाम सा भवति यत्रोभयस्य युगपत् प्रसङ्गः । अत्र च यदा कर्माण न तदा कर्ति, यदा कर्तिर न तदा कर्मणीति ॥

Ubhayaprāpti is that where both have a chance to appear simultaneously. Here when it comes with reference to karman, it does not come with reference to kartr and when it comes with reference to kartr, it does not come with reference to karman.

Ahnika - Twentysix ends.

(Second adhyāya third pada third ahnika ends.)

Ahnika — Twentyseven

(Second adhyāya, fourth pāda, first āhnika)

द्विगुरेकवचनम् (2, 4, 1)

The need or otherwise of this suira is discussed here.

किमर्थमिद्मुच्यते ? Why is this read?

प्रत्यधिकरणं वचनोत्पत्तेः सङ्ख्यासामानाधिकरण्याच द्विगोरेकवचनविधानम् Injunction of singular number suffix to dvigu on account of vacuna being related to each dravya and dvigu has sāmānādhikaraṇya with sankhyāvacaka.

प्रत्यधिकरणं वचनोत्पत्तिर्भवति

Number-suffix follows each dravya-vācaka stem.

किमिदं प्रत्यधिकरणम् इति ?

What does pratyadhikaranam mean?

अधिकरणम् अधिकरणं प्रति - प्रत्यधिकरणम्

Pratyadhikaranam means with reference to each dravya.

सङ्ख्यासामानाधिकरण्याच - सङ्ख्यया वहर्थया चास्य सामानाधिकरण्यम् । प्रत्यधिकरणं वचनोत्पत्तेः सङ्ख्यासामानाधिकरण्याच वहुपु वहुवचनमिति वहुवचनं प्रामोति । इज्यते चैकवचनं स्यादिति । तचान्तरेण यत्नं न सिध्यति इति द्विगो-रेकवचनविधानम्

On account of the stem being in $s\bar{a}m\bar{a}n\bar{a}dhikaranya$ with number-suffix also. There is $s\bar{a}m\bar{a}n\bar{a}dhikaranya$ between dravya and number which may be one, two or many. There is chance for plural number suffix on the strength of the $s\bar{u}tra$ Bahuṣu bahuvacanam, since each dravya has its number and both of them have $s\bar{a}m\bar{a}n\bar{a}dhikaranya$; but singular suffix is desired there. It cannot be accomplished without effort and hence is the $vidh\bar{a}na$ of $\bar{e}karacana$ to dviga.

अस्ति प्रयोजनमेसत् ? Is this the benefit ?

कि तहाँति? What then?

तत्रानुप्रयोगस्यैकवचनाभावोऽद्विगुत्वात्

If so, there is no chance for the singular suffix in anuprayoga (addition of one after another) on account of its not being dvigu.

तत्नानुप्रयोगस्यैकवचनं न प्रामोति पञ्चपूलीयम् इति If so, singular suffix cannot be used in the anuprayoga, pañcapūlīyam.

किं कारणम् Why?

अद्विगुस्वात् । द्विगुरेकवचनित्युच्यते, न चाल अनुप्रयोगो द्विगुसंज्ञः । On account of its not being dvigu. Dvigu is read to take ēkavacana and anuprayōga, here, does not have the dvigusamjñā.

सिद्धं तु द्विग्वर्थस्यैकवद्वचनात्

It is accomplished by reading dvigvartha and ēkavad in place of dvigu and ēkavacana.

सिद्धमेतत् This is accomplished.

कथम् ? How ?

द्विग्वर्थ एकवद्भवतीति वक्तव्यम्

Dvigvartha ēkavadbhavati should be read in place of Dvigur-ēkavacanam.

तत्ति वक्तन्यम् It, then, has to be read.

न वक्तव्यम् । नेदं पारिभाषिकस्य वचनस्य ग्रहणम्

No, it need not be so read. The word vacana here is not used in the technical sense of number.

किं तर्हि ? In what sense then ?

अन्वर्थप्रहणम् । उच्यते वचनम् , एकस्यार्थस्य वचनम् एकवचनम् इति
It is used in its derivative sense. The word ēkavacana means
ēkasya arthasya vacanam (mention of one object) where the derivation of vacanam is ucyatē.

एकशेषप्रतिषेधश्च Need to prohibit êkavadl hava.

एकशेषस्य च प्रतिषेधो वक्तव्यः - पञ्चपूली च पञ्चपूली च पञ्चपूली च पञ्चपूलाः ।

There is need for pratisēdha with reference to ēkavadbhāva to secure pañcapūlyah from pañcapūlī ca pañcapūlī ca pañcapūlī ca pañcapūlī ca.

न वान्यस्यानेकत्वात्

No, it need not be prohibited on account of anekatva belonging to another.

न वा वक्तव्यः No, it need not be enjoined.

किं कारणम् ? Why?

अन्यस्यानेकत्वात् । नैतद् द्विगोरनेकत्वम्

On account of anēkatva belonging to another. This anēkatva does not belong to dvigu.

कस्य तर्हि ? To what then ?

द्विग्वर्थसमुदायस्य

To the collection which forms the meaning of dvigu.

समाहारग्रहणं च तद्धितार्थप्रतिपेधार्थम्

Need to read samāhāra to prohibit taddhitārtha.

समाहारग्रहणं च कर्तव्यम् There is need to read samahāri.

किं प्रयोजनम् Why?

तद्धितार्थवितिषेधार्थम् - तद्धिनार्थे यो द्विगुः तस्य मा भृदिति - पद्मकपारी पञ्चकपारा इति

To prohibit dvigu having tad Ihitārtha. So that the sūtra may not operate with reference to dvigu having taddhitārtha, as paūcakapālāu and paūcakapālāķ.

िक पुनर्य पञ्च हपालशबदः प्रत्येकं परिक्षमाप्यते, आहोस्विन् समुदाये पर्तते ! Does the word pañca-kapāla refer to the purēdaša placed on each kapāla separately or to that placed on all simultaneously?

र्कि चातः ? What difference does it make ? यदि तावन् प्रत्येकं परिसमाध्यते, पुरस्तादेव चोदिनं परिसनं च If it is taken to be pratyēka-parisamāpti, it was raised previously and answered (under 2, 1, 4).

अथ समुदाये वर्तते Suppose it is taken to be samudāyavṛtti, न वा समाहारैकत्वात्

The end is not gained on account of ēkatva of samāhāra.

न वैतत् समाहारैकत्वादि सिध्यति

No, the end is not gained since samāhāra is one.

एवं तर्हि, प्रत्येकं परिसमाप्यते

If so, pratyēkaparisamāpti is resorted to.

पुरस्तादेव चोदितं परिहृतं च

It was raised previously and answered.

अपर आह Another says:-

न वा समाहारैकत्वात

The sūtra is not necessary on account of the ēkatva of samāhāra.

न वा योगारम्भेणैवार्थः No purpose is served by the sūtra.

किं कारणम्? Why?

समाहारैकत्वात्। एकोऽयमर्थः समाहारो नाम, तस्यैकत्वाद् एकवचनं भविष्यति। On account of oneness of samāhāra. Samāhāra is one and on account of its oneness, singular suffix will be used.

द्दन्द्वश्च प्राणित्र्यसेनाङ्गानाम् (2, 4, 2)

प्राणितूर्यसेनाङ्गानां तत्पूर्वपदोत्तरपदग्रहणम्

With reference to $pr\bar{a}ni-t\bar{u}rya-s\bar{e}n\bar{a}ngas$, need to enjoin that both the $p\bar{u}rvapada$ and the uttarapada should denote the anga of one and the same.

प्राणित्र्येसेनाङ्गानां तत्पूर्वपदोत्तरपद्यहणं कर्तन्यम् । प्राण्यङ्गानां प्राण्यङ्गीरिति वक्तन्यम् ; त्याङ्गानां त्याङ्गीरिति वक्तन्यम् ; सेनाङ्गानां सेनाङ्गीरिति वक्तन्यम् There is need to enjoin, with reference to prāṇi-tūrya-sēnāṅgas, that the pūrvapada and the uttarapada should denote the aṅga of one and the same. It must be read that prāṇyaṅgas compound with prāṇyṅgas, tūryāṅgas with tūryāṅgas and sēnāṅgas with sēnāṅgas.

किं पयोजनम्? Why?

व्यतिकरो मा भूदिति

To prevent mixing up of the anga of one with that of another.

तत्ति वक्तन्यम् It must, then, be so enjoined.

न वक्तव्यम् No, it need not.

योगिवभागात्सिद्धम् It is accomplished by sūtra-split.

योगविभागः 'करिष्यते - द्वन्द्वश्च प्राण्यङ्गानाम् । ततः, तूर्याङ्गानाम्; ततः सेनाङ्गानाम् इति

The sūlra is split thus:—First Dvandvas ca prānyangānām is read; then Tūryūnjānām and then Sēnāngānām.

स तर्हि योगविभागः कर्तव्यः

The sūlra-split has, then, to be done.

न कर्तच्यः । प्रत्येकमङ्गश्रावदः परिसमाप्यते

No, it need not. The word anga is taken with each of them.

अनुवादे चरणानाम् (2, 4, 8)

इह कसान्न भवति - नन्दन्तु कठकालापाः, वर्धन्तां कठकौथुमाः ? Why does not the sūtra operate here, in Nandantu kaṭhakālāpāḥ and vardhantām koṭhakāuthumāḥ ?

स्थेणी: Only in association with the roots sthā and in

स्येणोरिति वक्तव्यम्

It must be said that it appears only in association with the roots $sth\bar{a}$ and in.

एवमपि तिष्टन्तु कटकालापाः इत्यत्रापि प्रामोति If so, it will operate here in tisthantu kathaküläpäl:-

अद्यतन्यां च Only in aorist.

अद्यतस्यां चेति वक्तत्र्यम् - उदगात् कठकालापं, प्रत्यष्ठात् कठकेशियुमं, उदगाकोमोर्देषप्पलादम्

lt must be enjoined only in aorist. Viz. Udagāt kaļhakālāpam, Pralysļhāt kaļhakāuthumam. Udagāt kaumēdapāippalādam.

विशिष्टलिङ्गो नदीदेशेऽग्रामाः (2, 4, 7))

ग्रामप्रतिवेधे नगरप्रतिवेधः

Nagara should not be taken within the range of grāma.

अग्रामा इत्यत्र अनगराणामिति वक्तव्यम् - इह मा मृत् मधुरापाटिलपुलम् । Cities should be taken off the range of grāmus to avoid the prohibition in Madhurāpāṭaliputram (both being cities.)

उभयतश्च ग्रामाणाम्

Prohibition to gramas both ways (i.e.) when both are gramas or either of the two is a $gram \iota$.

उभयतश्च ग्रामाणां प्रतिषेधो वक्तत्यः - शौर्यं च केतवता च शौर्यकेतवते ; जाम्बर्वं च शास्त्रिकी च आम्बवशास्त्रिकेम्यौ

There is need to prohibit both ways with reference to $gr\bar{a}mas:-\hat{S}\bar{a}uryam$ ca $k\bar{e}tavat\bar{a}$ ca $=\hat{s}\bar{a}uryak\bar{e}tavat\bar{e}$; $j\bar{a}mbavam$ ca $\hat{s}\bar{a}l\bar{u}kin\bar{v}$ ca $=j\bar{a}mbava\hat{s}\bar{a}l\bar{u}kiny\bar{a}u$.

क्षुद्रजन्तवः (2, 4, 8)

क्षुद्रजन्तव इत्युच्यते । के क्षुद्रजन्तवः ?

Kṣudrajantavaḥ is read. What are kṣudrajantus?

क्षोत्तव्या जन्तवः क्षुद्रजन्तवः

Kṣudrajantus are those that do not die tho' crushed under feet.

यधेवं यूकालिंशं कीटिपिपीलिकं दंशमशकम् इति न सिध्यति

If so, the following forms $y\bar{u}k\bar{a}lik$ am (louse and nit), $k\bar{i}t$ $pip\bar{i}lik$ am (worm and ant) $da\dot{m}$ samasakam (gad-fly and mosquito) cannot be secured.

🕯 एवं तर्हि अनास्थिकाः क्षुद्रजन्तवः

If so, ksudrajantus are those that have no bones.

अथ वा येषां स्वं शोणितं नास्ति ते क्षद्रजन्तवः

Or kṣudrajantus are those which do not have blood of their own-अथ वा येषामा सहस्रादञ्जालिन पूरी ते क्षुद्रजन्तवः

^{1.} These two are examples where the former member is nagara and the latter, $gr\bar{a}ma$.

148

Or ksudrajantus are those which do not fill the hollow of the hands even though they are thousand in number.

अय वा येषां गोचर्ममात्रं राशिं हत्वा न पतितो भवति ते क्षद्रजन्तवः Or ksudrajantus are those by killing which occupying an area of gocarman one does not become a patita.

अथ वा नकुरुपर्यन्ताः क्षुद्रजन्तवः

Or ksudrajantus are those in the list including mungoose.

येपां च विरोधः शाश्वतिकः (2, 4, 9)

किमर्थश्रकार: ? In which meaning is cakāra used ?

एवकारार्थश्रकारः । येवां विरोधः शाश्चतिकः तेवां द्वन्द्व एकवचनमेव यथा स्याद यदन्यत् प्राप्तोति तन्मा भदिति ।

Cakāra means ēva. Singular number alone may be used in the dvandva of those denoting permanent enemies and none else.

किञ्च अन्यत प्रामोति ?

What is it other than the singular number that may appear?

पशुशकुनिद्वःद्वे विरोधिनां पृत्रीविपतिपिद्धम् इत्युक्तं स पूर्वपतिपेधो न वक्तव्यो भवति

The pūrcavipratisēdha enjoined in Pasu-sakunidvandvē virādhinām pūrvavipratisidham under (2,4,12) is unnecessary.

शृद्राणामनिरवसितानाम् (2, 4, 10)

अनिरवसितानाम् इत्युच्यते, क्रुतोऽनिरवसितानाम् ?

The word aniravasitanam is read in the satra. What is the place that is referred to from which they are not banished?

आर्यावर्नाद्रनिरवसितानाम्

The place from which they are not banished is Aryāvarta.

फः पुनरार्थावर्तः! Which is, then, Aryāvarla?

भागादर्शात, प्रत्यक् कालकवनात, दक्षिणेन हिमयन्तम्, उत्तरेण पारियासम् The country to the east of Adarsa, to the west of Kālakarana, to the north of the Himalayas and to the north of Pariyatra.

यरेपवं विविद्यागन्धिकं शक्षयपतं शीर्यजाञ्चम् इति न विध्यति

If so, the forms Kişkindhagındhikam, śakayavanam and śāurya-krāuñcam are not secured.

एवं तर्हि आर्यनिवासादनिरवसितानाम्

If so, it refers to those not banished from the residence of aryas

क पुनरार्थनिवासः ? Which is the place where āryas reside?

त्रामो घोषो नगरं संवाह इति Grāma, ghōṣa, nagara and samvāḥa.

Note: $-Gh\bar{o}$ a refers to the place where eattle is kept and $sa\dot{m}v\bar{a}ha$ to the place where merchants reside.

एवमपि य एते महान्तः संस्त्यायास्तेष्वभ्यन्तराश्चण्डाला मृत्याश्च वसन्ति तत्र चण्डालमृतपाः इति न सिध्यति ।

Even then, the form caṇḍālamṛtapāḥ is not secured to denote the dwelling of caṇḍālas and mṛtapas in outhouses of big houses.

एवं तर्हि यज्ञात् कर्भणोऽनिरवसितानाम्

If so, it refers to those not prevented from doing sacrifice.

एवमपि तक्षायस्कारं, रजकतन्तुवायम् इति न सिध्यति
If so, the forms Takṣāyaskāram and rajakatantuvāyam cannot be secured.

एवं तर्हि पात्राद् अनिरवसितानाम् । येर्भुक्ते पात्रं संस्कारेण शुध्यति तेऽनिरवसिताः; येर्भुक्ते पात्रं संस्कारेणापि न शुध्यति ते निरवसिताः इति lf so, it refers to pātrād aniravasitas. Aniravasitas are those whose dining plates are considered fit for use after cleaning and niravasitas are those whose dining plates are not considered

गवाश्वप्रभृतीनि च (2, 4, 11)

fit for further use even after ceremonial cleaning.

गवाश्वप्रभृतिषु यथोचरितं द्वन्द्ववृत्तम्

 $Dvandva-vy\bar{a}p\bar{a}ra$ in $gav\bar{a}svam$ etc. is as it is read in the $Gunap\bar{a}tha$.

गवाश्वनभृतिषु यथोचारितं द्वन्द्ववृत्तं द्रष्टव्यम् - गवाश्वम्, गवाविकम्, गवैडकम्

Dvandva-vyārāra in gavāśvam etc. is to be observed as read in the Ganapāṭha. Viz. Gavāśvam, gavāvikam,gavāiḍakam.

विभाषा दृक्षमृगतृणधान्यव्यञ्जनपञ्चश्चन्यश्ववडवपूर्वापराधरोत्तराणाम् (२. ४, 12)

बहुप्रकृतिः फलसेनावनस्पतिमृगशकुनिक्षुद्रजन्तुधान्यतृणानाम्

Vibhāṣā of ēkavacana of the dvandvas where component parts are in plural number and denote phala, sēnā, vanaspati, mṛga, śakuni, kṣudrajantu, dhānya and tṛṇa.

फलसेनावनस्पतिमृगशकुनिश्चद्रजन्तुधान्यनृणानाम् द्वन्द्वे विभाषेकवद्भवति बहु-प्रकृतिरिति वक्तव्यम्

It must be enjoined that the dvandvas whose component parts are in plural number and which denote phala, $s\bar{e}n\bar{a}$. vanaspati, mrga, sakuni, ksudrajantu, $dh\bar{a}nya$ and trna optionally take singular number.

फल - बद्रामलकं, वद्रामलकानि । सेना - हस्त्यश्वं, हस्त्यश्वाः । वनस्पिन - ह्रक्षन्यत्रोधं, ह्रक्षन्यत्रोधाः । मृग - रुरुप्पतं, रुरुप्पताः । शकुनि - हंसचक्रवाकं, हंसचक्रवाकाः । क्षुद्रजन्तु - यूकालिक्षं, यूकालिक्षाः । धान्य - त्रीहियवं, त्रीहियवं, न्रापतिलं, मापितलं, मापितलंः । तृण - कुशकाशं, कुशकाशाः; शरशीपं, शरशीपंः Phala - Badarāmalakam, badarāmalakāni; Sēnā - Hastyaśvam, hastyaśvāḥ; Vanaspati - Plakṣanyagrōdham, plakṣanyagrōdhāh; Mrga - Rurupṛṣatam, rurupṛṣatāḥ; Śakuni - Hamsacakravākam, hamsacakravākāḥ; kṣudrajantu - yūkālikṣam, yūkālikṣāḥ; dhānya - vrīhiyavam, vrīhiyavāḥ; māṣatilam, māṣatilah; Trna - kuśakāśam, kuśakāśāh; śaraśīrsam, śaraśīrsāḥ.

िकं प्रयोजनम् ? What is the purpose served by this vārttika? बह्मकृतिरेव यः, तत्र यथा स्थात्

To restrict it only to where the component parts are plural.

क मा भ्त ! Where should it not be?

वदरामलके तिष्ठतः In badarāmalakē tiṣṭhataḥ.

किं पुनरनेन या प्राप्तिः सा नियम्यते, आहोस्विद्विशेषेण ?

Does this restrict the application of those enjoined in this $s\bar{u}tra$ or in all the $s\bar{u}tras$ in this context?

किञ्चातः! What does it matter if it is one or the other?

यद्यनेन या प्राप्तिः सा नियम्यते, प्रसन्यत्रोधो - जातिरप्राणिनाम् इति नित्यो द्वन्द्वैकवद्भावः प्राम्नोति । अथ अविशेषेण, न दोषो भवति

If this serves as the niyama to what is enjoined in this $s\bar{u}tra$, there is chance for $dvandva-\bar{c}kavadbh\bar{a}va$ alone in place of $plaksanyagr\bar{o}dh\bar{a}u$ by the $s\bar{u}tra$ $J\bar{a}tir$ $apr\bar{a}nin\bar{a}m$. If it serves as the niyama to what is enjoined in all the $s\bar{u}tras$ in the context, there will be no defect.

यथा न दोपः, तथास्तु

Let it be taken in the way free from any defect.

पशुशकुनिद्वन्द्वे विरोधिनां पूर्वविप्रतिपिद्धम्

Pūrvavipratiṣēdha with reference to the dvandva of paśu and śakuni which are enemies.

पशुशकुनिद्वन्द्वे विरोधिनां येषां च विरोधः शाश्वितिकः इत्येतद् भविति पूर्वविषितिषेधेन । पशुशकुनिद्वन्द्वस्य अवकाशः - महाजोरश्रं, महाजोरश्राः ; हंस-चक्रवाकाः । येषां च विरोधः शाश्वितिकः इत्यस्यावकाशः = श्रमण- ब्राह्मणम् । इहोभयं प्राप्नोति - काकोल्द्रकं, श्वशृगालम् इति । येषां च विरोधः शाश्वितिकः इत्येतद् भवित पूर्वविष्ठतिषेधेन ।।

The sūtra Yēṣām ca virōdhaḥ śāśvatikaḥ will operate through pūrvavipratiṣēdha with reference to to the dvandva of words denoting paśu and śakuni which are natural enemies. The room for this sūtra dealing with paśu-śakuni-d andva is mahājōrabhram, mahājōrabhrāḥ; hamsacakravākam, hamsacakravākah. The room for the sūtra Yēśām ca virōdhaḥ śāśvatikaḥ to operate is śramaṇa-brāhmaṇam Both have a chance to operate with reference to kākōlūkam, śvaśrgālam and the sūtra Yēṣām ca virōdhaḥ śāśvatikaḥ operates through pūrvavipratiṣēdha.

स तर्हि पूर्वविप्रतिवेधो वक्तव्यः

If so, pūrvavi pratisēdha has to be enjoined.

न वक्तव्यः । उक्तं तत्र चकारकरणस्य श्योजनम् - येपां च विरोधः शाश्वितिकः तेषां द्वनद्वे एकवचनमेव यथा स्याद् यदन्यत् शामोति तन्मा भूदिति ।

No, it need not. It was pointed out under the $s\bar{u}tra$ $Y\bar{e}s\bar{a}m$ ca $vir\bar{o}dhah$ $s\bar{a}svatikah$ that $cak\bar{a}ra$ is read to suggest that only singular number will be used and none else in the dvandva of words denoting objects which are natural enemies.

अश्ववडवयोः पूर्विलिङ्गत्वात्पशुद्वन्द्वनपुंसकम्

Need to enjoin the napumsakatva of pasudvandva since the linga of the former is enjoined (in $P\bar{u}rvavad$ osvavadavāu 2, 4, 27).

अश्वनडवयोः पूर्विरुङ्गत्वात् पशुद्धन्द्वनपुंसकं भवति पूर्विविविष्धेन । अश्व-वडवयोः पूर्विरुङ्गत्वस्थावकाशः - विभाषा पशुद्धन्द्वनपुंसकम् यदा न पशुद्धन्द्वनपुंसकं सोऽवकाशः - अश्वनडवै । महाजोरशाः । पशुद्धन्द्वनपुंसकपसङ्ग उभयं प्रामोति, अश्वनडवं पशुद्धन्द्वनपुंसकं भवति पूर्वविपतिषेधेन ।

There is need to enjoin paśu-dvandva napumsakatva through $p\bar{u}rvavipratis\bar{e}dha$ since $aśvavadav\bar{a}u$ takes the linga of the former member. Room for the $p\bar{u}rvalingatva$ of the dvandva of aśla and $vadav\bar{a}$ is where paśudvandvanapumsakatva does not set in on account of its $vibh\bar{a}s\bar{a}$ - $Aśvavadav\bar{a}u$. Room for paśu-dvandva-napumsakatva is paśudvandvas other than this — $Mah\bar{a}j\bar{o}rabhram$, $mah\bar{a}j\bar{o}rabhr\bar{a}h$. Both have a chance when paśudvandvanapumsakatva begins to operate and it is to be enjoined that paśudvandva-napumsakatva sets in through $p\bar{u}rva-vipratis\bar{e}dha$.

स तर्हि पूर्वविप्रतिपेधो वक्तव्यः

Then there is need to enjoin pūrvavipratiṣēdha.

न वक्तव्यः No, it need not.

प्रतिपदिविधानात् सिद्धम्

It is accomplished on account of the injunction with reference to the particular words.

प्रतिपदमल नपुंसकं विश्रीयते - अश्ववडवपूर्वापर इति
Napumsakatıa is enjoined here in the sūtra Asvavaḍavapūrva-apara to individual words.

एकवचनमनर्थकं समाहारैकत्वात्

Non-necessity of the anuviti of ēkavacanam here from Dvigur ēkavacanam on account of oneness of samāhāra.

एकवद्भावोऽनर्थकः Injunction of ēkavadbhāva is unnecessary. किं कारणम् ? Why?

समाहारैकत्वात्। एकोऽयमधः समाहारो नाम। तस्यैकत्वाद् एकवचनं भविष्यति। On account of oneness of samāhāra. The word samāhāra means collection. Since it is one, it takes singular number.

इदं तर्हि प्रयोजनम् - एवं विज्ञास्यामि - इह नित्यो विधिरिह विभाषेति This, then, is the prayōjana. I shall state that the ēkavadbhāva is nitya in this prakaraṇa and there it is vibhāṣā.

नैतद्गित प्रयोजनम् - आचार्यप्रवृत्तिर्ज्ञापयित सर्वो द्वन्द्वो विभाषेकवद्भवित इति यद्यं तिप्यपुनर्वस्त्रोनिक्षलद्वन्द्वे बहुवचनस्य द्विवचनं नित्यम् इत्याह । This is not the benefit. The procedure of Ācārya suggests that all dvandvas take ēkavadbhāva optionally, since he enjoins dual number alone in tişya-punarvasū in place of plural in Tiṣya-punarvasvōr nakṣatradvandvē bahuvacanasya dvivacanam nityam.

इदं तर्हि प्रयोजनम् - स नपुंसक्तमिति वक्ष्यामि इति

I shall say that the injunction of neuter gender is the benefit.

एतद्पि नास्ति प्रयोजनम् । लिङ्गमशिप्यं लोकाश्रयत्वालिङ्गस्य This, too, is not the benefit. The gender need not be enjoined since it is decided from usage.

न तहींदानीमिदं वक्तन्यम्? Is not this sūtra necessary then? वक्तन्यं च The sūtra has to be read.

किं प्रयोजनम् Why?

पूर्वत्र नित्यार्थमुत्तरत्र व्यभिचारार्थं विभाषा वृक्षमृगेति

To enable the $s\bar{u}tras$ that precede to be nitya and $Vibh\bar{a}s\bar{a}$ $v_!ksam_!ga$ and the next $s\bar{u}tra$, to be $vibh\bar{a}s\bar{a}$ unlike them.

विभाषा समीपे (2, 4, 16)

किमुदाहरणम्? 1 What is gained from it?

UdāharaṇaśabdōSpi prayōjanaparaḥ (Nāgēśa).

उपदशं पाणिपादम्, उपदशाः पाणिपादाः

Upadaśam pāṇipādam and upadaśāḥ pāṇipādāḥ are secured.

नैतदस्ति प्रयोजनम् । अयं द्वन्द्वैकवद्भाव आरभ्यते । तत्र कः प्रसङ्को यदनु-प्रयोगस्य स्थातः?

This is not the benefit. Dvandva-ēkavadbhāva is the point at issue here. What will appear in anuprayōga? other than this¹

एवं तर्हि अन्ययस्य सङ्ख्यया अन्ययीभावोऽप्यारभ्यते, बहुवीहिरिप, तद्यदा तावदेकवचनं तदा अन्ययीभावे।ऽनुप्रयुज्यते एकार्थस्यकार्थ इति, यदा बहुवचनं तदा बहुवीहिरनुष्रयुज्यते बहुर्थस्य बहुर्थ इति

If so, both $avyay\bar{\imath}bh\bar{a}va$ and $bahuvr\bar{\imath}hi$ are enjoined between avyaya and $sankhy\bar{a}$ If the compound is singular, $avyay\bar{\imath}-bh\bar{a}va$ form is used in $anupray\bar{\jmath}ga$, singular following singular and if the compound is plural, $bahuvr\bar{\imath}hi$ form is used in $anupray\bar{\jmath}ga$, plural following plural.

तत्पुरुपोऽनञ्कर्मधारयः (2, 4, 19)

किमधीमदमुच्यते ? Why is this sūtra read?

संज्ञायां कन्थोज्ञीनरेषु इति वक्ष्यति । तदतत्पुरुपस्य नज्यसमासस्य कर्मधारयस्य वा मा भूदिति ।

Acārya is going to read $Samj\tilde{n}ay\bar{a}m \, kanth\tilde{o}s\tilde{i}nar\tilde{e}su$ (2, 4, 20). This $s\tilde{u}tra$ is read to prevent it from operating in $na\tilde{n}-sam\bar{a}s_a$ and $karmadh\bar{a}raya$ which is not tatpurusa.

नैतदस्ति प्रयोजनम् । न हि संज्ञायां कन्थान्तः उशीनरेषु अतत्पुरुषो नञ्समासः, कर्मधारयो वास्ति

This is not the benefit; for the word ending in $kanth\bar{a}$ of usinaras used as $samj\tilde{n}\bar{a}$ is neither $na\tilde{n}$ -samāsa nor $karma-dh\bar{a}raya$ which is not tatpurusa.

उत्तरार्थं तर्हि । उपज्ञोपक्रमं तदाद्याचिष्ट्यासायाम् इति वक्ष्यति, तद् अतत्पुरुषस्य नञ्समासस्य कर्मधारयस्य वा मा भृदिति ।

For the sake of the next sūtra then. He is going to read Upajūōpakramam tudādyācikhyāsāyām (2, 4, 21). This is read to prevent it from operating in naūsamās and karmadhāraya which is not tatpuruṣa.

1. Anuprayogah = Associative word.

एतद्पि नास्ति पयोजनम् । न हि तदाद्याचिरूयासायामुपज्ञोपक्रमान्तोऽ तत्पुरुषो नञ्समासः कर्मधारयो वास्ति

This, too, is not the benefit; for there is no word ending in $upain\bar{a}$ or upakrama denoting beginning etc. which is a $na\tilde{n} \cdot sam\bar{a}sa$ or $karmadh\bar{a}raya$ which is not tatpurusa.

उत्तरार्थमेव तर्हि । छाया वाहुल्ये इति वक्ष्यति, तद्तत्पुरुपस्य नञ्समासस्य कर्मधारयस्य वा मा भृदिति ।

If so, it is for the sake of the next $s\bar{u}tra$. He is going to read $Ch\bar{a}y\bar{a}$ $b\bar{a}huly\bar{e}$ (2, 4, 22). This is read so that it may not operate in $na\tilde{n}$ $sam\bar{a}sa$ or $karmadh\bar{a}raya$ which is not tatpuruṣa.

नैतद्दित प्रयोजनम् । न हि च्छायान्तो बाहुल्ये अतत्पुरुषो नञ्समासः कर्मधारयो वा अस्ति ।

This, too, is not the benefit; for there is no word ending with $ch\bar{a}y\bar{a}$ preceded by a word denoting an object in plenty which is $na\tilde{n}$ -sam $\bar{a}sa$ or $karmadh\bar{a}raya$ which is not tatpuru, a-

उत्तरार्थमेव तर्हि । सभा राजामनुष्यपूर्वा अशाला च इति वक्ष्यति । तद्तत्पुरुषस्य नञ्समासस्य कर्मधारयस्य वा मा भृदिति ।

If so, it is for the sake of the next sūtras. He is going to read Sabhā rājāmanusyapūrvā (2, 4, 23), Asālā ca (2, 4, 24). This is read so that they may not operate with reference to nañ-samāsa or karmadhāraya which is not tatpuruṣa.

एतद्पि नास्ति, प्रयोजनम् । न हि सभान्तः अशालायाम् अतत्पुरुषो नञ्समासः कर्मधारयो वास्ति ।

This, too, is not the benefit; for there is no word ending in $sabh\bar{a}$ not referring to $saigh\bar{a}ta$ which is $na\tilde{n}sam\bar{a}sa$ or $karmadh\bar{a}raya$ which is not talpurusa.

इदं तर्हि विभाषा सेनामुरिति वक्ष्यति, तदतत्पुरुषस्य नञ्समासस्य कर्मधारयस्य

वा मा भूदिति | If so, he is going to read $vibh\bar{a}$ $s\bar{a}$ $s\bar{e}n\bar{a}sur\bar{a}$ (2, 4, 25). This is read so that it may not operate with reference to $na\tilde{n}$ - $sam\bar{a}sa$ or $karma-dh\bar{a}raya$ which is not tatpurusa.

तत्पुरुष इति किमर्थम् ? Why is talpuruşalı read?

दृढसेनो राजा

So that this sūlra may not operate with reference to Drāhasēnē rājā.

अनञिति किमर्थम् ? Why is anañ read?

असेना So that this sittra may not operate in asēnā. अकर्मधारय इति किमर्थम्? Why is akarmadhārayah read? परमसेना, उत्तमसेना

So that this sūtra may not operate in paramasēnā and uttamasēnā.

परविश्वङ्गं द्वनद्वतत्पुरुषयोः (2, 4, 26)

किमधीमदमुच्यते ? Why is this sūtra read ?

Note: $-K\bar{a}iya\dot{t}a$ says that the question here is whether this $s\bar{u}tra$ enjoins the gender of dvandva and $tatpuru\dot{s}a$ $sam\bar{a}sas$ or of that which precedes them. The former is based upon taking $dvandva-tatpuru\dot{s}ay\bar{o}\dot{h}$ as the sixth case and the latter upon taking the same as the seventh case.

द्वन्द्वोऽयमुभयपदार्थप्रधानः । तत्र कदाचित् पूर्वपदस्य यिछक्तं तत् समासस्यापि स्यात्, कदाचिद् उत्तरपदस्य ; इप्यते च परस्य यिछक्तं तत् समासस्य यथा स्यादिति ; तचान्तरेण यत्नं न सिद्ध्यति इति परविछिक्तं द्वन्द्वतरपुरुषयोगिति । एवमर्थमिदमुच्यते This dvandva is a coordinating compound. It may, sometimes, take the gender of the former member and sometimes that of the latter and it is desired that it should take the gender of the latter member. This cannot be achieved without effort and hence Acārva reads this sūtra – Paravallingam dvandvatatpuruṣayōḥ. This is the purpose served by the sūtra.

तत्पुरुपश्चापि कः प्रयोजयति ?

Which kind of tatpurusa makes use of this sūtra?

यः पूर्वपदार्थप्रधान एकदेशिसमासः अर्धपिष्पली इति । यो ह्युत्तरपदार्थप्रधानः, दैवकृतं तस्य परविलक्षेत्रम् ।

The *ēkadēsisamāsa* of the type *ardhapippalī* where the former member is more prominent. Where the latter member is prominent it takes its gender without any effort.

परविश्चनं द्वनद्वतत्पुरुपयोरिति चेत् प्राप्तापन्नालंपूर्वगतिसमासेपु प्रतिपेधः

Need for pratisēdha in compounds whose former member is prāpta, āpannna or alum and in gatisamāsas, if paravallingatva of dvandva and tatpurusa is admitted.

परवाल्लिङ्गं द्वन्द्वतत्पुरुषयोरिति चेत् प्राप्तापन्नालंपूर्वगतिसमासेषु वक्तव्यः - प्राप्तो जीविकां प्राप्तजीविकः, आपन्नो जीविकाम् आपन्नजीविकः, अलं जीविकायै अलंजीविकः, निष्कौशाम्बिः निर्वाराणसिः ।

If it is enjoined that dvandva and tatpurusa take the linga of the latter, there is need to prohibit the same in the samāsas whose former member is prāpta, āpanna or alam and in gatisamāsas, as prāptajīvikah (prāpto jīvikām), āpannajīvikaļi (āpannaļi jīvikām), alamjīvikaļi (alam jīvikāyāi), Niskāušāmbih and nirvārāņasih.

पूर्वपदस्य च

Need of prohibiting the former member taking that of the latter too.

पूर्वपदस्य च प्रतिषेधो वक्तव्यः, मयूरीकुक्कुटौ

There is need to prohibit the former member, as in Mayūrīkukkuṭāu, taking that of the latter.

Note: This point arises on taking the word dvandvatatpuruṣayōļi as the seventh case. If so, there is chance for the former member to take the linga of the latter member since the kāryin is not read in the sūtra and the samāsa will take the form mayūra-kukkuṭāu.

यदि पुनर्यथाजातीयकं परस्य लिङ्गं तथाजातीयकं समासाद् अन्यदु अतिदिश्यते ।

Suppose the linga of the latter member which is other than samāsalinga is taken by atidēśa.

समासादन्यछिङ्गमिति चेदश्ववडवयोष्टाव्छग्वचनम्

It it is conceded that the linga of the latter member other than $sam\bar{a}salinga$ is taken, there is need to enjoin the $l\bar{o}pa$ of ţāp in aśvavadavāu.

समासाद् अन्यलिङ्गमिति चेद् अश्ववडवयोष्टापो छुग्वक्तज्यः, अश्ववडवौ ।

If it is conceded that the gender of the latter member other than $sam\bar{a}salinga$ is taken, there is need to enjoin the prohibition of $t\bar{a}p$ in asva of the compound $asvavadav\bar{a}u$.

निपातनात्सिद्धम् It is secured from nipātana.

निपातनारिसद्भमेतत् This is secured from nipātana.

किं निपातनम्? What is the nipātana?

अधवडनपूर्वापर इति Aśvavadava-pūrvāpara (1, 4, 27)

उपसर्जनहस्तरं वा Or there is shortening in the upasarjana.

अथ वा उपसेजनस्येति हस्वत्वं भविष्यति

Or upasarjana will be shortened by .. upasarjanasya (2, 2, 48).

Note: $-K\bar{a}iyaļa$ says that $avayav\bar{a}rtha$ is subordinate to $samud\bar{a}y\bar{a}rtha$ and hence upasarjana.

इहापि तर्हि प्राप्तोति कुक्कुरमयूर्यौ इति

If so, shortening may appear in kukhuṭamayūryāu too

परवाछिङ्गमिति शब्दशब्दार्थौ

The word lings in paravallings refers to the lingspratysys and its meaning.

परविष्ठिङ्गमिति शञ्दशञ्दार्थी अतिदिश्येते । तत्रीपदेशिकस्य हस्वत्वम् , आतिदेशिकस्य श्रवणं भविष्यति ।

The word lings in paravallingsm is taken by atidēsa to refer to gender-suffix and its meaning. There will be shortening where it is enjoined and there will be no shortening where it is got by atidēsa.

Note:— Kāiyaļa reads:— Lingaśaldēna lingābhidhāyī pratyayō arthaś ca tantrēṇa ēkaśēṣēṇa vā ucyatē ityarthaḥ.

इदं तर्हि - दत्ता च कारीपगन्ध्या च दत्ताकारीपगन्ध्ये, दत्ता च गार्ग्यायणी च दत्तागार्ग्यायण्यो - द्वी प्यडो द्वी प्की च प्राप्ततः

If so, there is chance for two syans and two sphas in the words Dallā-kārīṣagandhyē and Dallā-gārgyāyaṇyāu, whose vigrahavākya is Daltā ca kārīṣagandhyā ca and Daltā ca Gārgyāyaṇī ca.

स्ताम् । पुंबद्भावेनैकस्य निवृत्तिर्भविप्यति

Let them be. One of them will be dropped thro' puinvadbhāva.

इदं तर्हि दत्ता च युवतिश्च दत्तायुवती; द्वौ तिश्च हो प्रामुनः ।

If so, there is chance for two ti's in Daltāyuvatī whose vigrahavākya is Dattā ca yuvatis ca.

तसानितच्छवयं व इतुं श्रव्दश्रव्दार्थी अतिदिश्येते इति । Hence it cannot be said that there is atidēsa for the pratyaya and its artha.

ननु चोक्तं समासादन्याल्लिङ्गमिति चेद्, अश्ववडवयोष्टाट्लाग्वचनम् इति Oh it was raised that, if one other than the samāsa is conceded to take paravallinga, lug of ṭāp in aśva-vaḍavāu has to be enjoined.

परिहतमेतत्, निपातनात् सिद्धम् इति 'The objection was met by Nipātanāt siddham.

अथ वा नैवं विज्ञायते पर्ह्यैव प्रविदिति Or paravad is not taken in the sense of parasya. ēva.

कथं तर्हि ? In what sense is it taken then?

परस्येव परवद् इति । यथाजातीयकं परस्य छिङ्गं तथाजातीयकं समासस्या-तिदिश्यते ।

It is taken in the sense of parasya iva. There is the atidēśa of that linga to the samāsa which is similar to that of the latter member.

Note:—Kāiyaṭa says that dvindva is taken in three ways:—(1) Dvandva connotes only its component members which are interdependent. (2) It connotes a samudāya which is different from the component members, and it takes the gender of either of them, (3) It connotes a samudāya different from the component members whose gender is to be enjoined. With reference to (1) and (2), this sūtra is a niyama-sūtra and with reference to (3) It is a vidhi-sūtra. Nāgēšabhaṭṭa says that there is sanction in the bhāṣya for items (1) and (3) and it is doubtful whether there is sanction for item (2).

अथ पूर्वपदस्य न प्रतिषिध्यते

Then that of the former member is not prohibited.

प्राप्तादिपु कथम् ?

Which will sanction the $sam\bar{a}sa$ whose former member is $pr\bar{a}pla$ etc.

प्राप्तादिषु चैकदेशिग्रहणात् सिद्धम्

The object is achieved with reference to $pr\bar{a}pt\bar{a}dis$ by reading $\bar{e}kad\bar{e}in$ in the $s\bar{u}tra$.

द्वःद्वेकदेशिनोः इति वक्ष्यामि I shall read Dvandvāikadēśinōli.

तदेकदेशियहणं कर्तेत्र्यम् Dvandvāikadēsinöli must be read then.

न कर्तेव्यम् No, it need not be read.

एकदेशिसमासो नारभ्यते

 $S\bar{u}tras$ dealing with the $sam\bar{a}sa$ of words with $\bar{e}kcad\bar{e}\dot{s}iv\bar{a}caka-sabdas$ are dropped.

Note:—The sūtras are Pūrvāparādharōttaram ēkadēśināikādhikaraņē (2, 2, 1) Ardham napumsakam (2, 2, 2), and Dvitīya (2, 2, 3).

भथमधीपेप्पली इति ?

How are we to arrive at the form ardha-pippali?

समानाधिकरणो भविष्यति - अर्द्धे च सा पिष्यली च अर्द्धापिष्यली इति Samāsa takes place having both the members to be samānādhikaraņa thus:- Arddham ca sā pippalī ca arddhapippalī.

Note:—Kāiyaļa roads:—Avayavē samudāyopacārat sāmānādhikaranyam.

न सिद्धचति, परत्वात् पष्टीसमासः प्रामोति

No, it is not seeured. Sightsamasa, being para, will operate.

अग पुनरयमेकदेशिसमास आरम्यमाणः पष्टीसमासं वाधते The injunction of ekadesisamāsa here vetoes sasthīsamāsa-

इप्यते च पष्टीसमासोऽपि । तद्यथा, अपूर्वार्द्धं मया भक्षितं, मामार्द्धं मया उड्डपम् इति । एवं पिप्पहयद्धिमत्यपि भवितन्यम् ।

Ṣaṣṭhīsamāsa too is desired. Like apūpārddham and grāmārddham in Apūpārddham mayā bhakṣitam and Grāmārddham mayā labdham will pippalyarddham be arrived at.

कथमद्भिपिपारी ! How is arddhapippalī secured ?

समानाधिकरणो भविष्यति

The two members will be taken to be in apposition.

Note: -Kāiyaṭa says that Mahābhāṣyakāra's range of knowledge of Literature is wider than that of Sūtrakāra and Vārttikakāra, and hence his words carry greater weight.

रात्राह्वाहाः पुंसि (2, 4, 29)

अनुवाकादयः पुंसि

Need to enjoin that anuvaka etc. is masculine in gender.

अनुवाकाद्यः पुंसि भाष्यन्ते इति वक्तव्यम् - अनुवाकः, श्रंयुवाकः, सूक्तवाकः It must be enjoined that anuvāka etc. are used in masculine gender. Viz. Anuvākaļi, šaniyuvākaļi and sūktavākaļi.

अपथं नप्ंसकम् (2, 4, 30)

पुण्यस्रिदनाभ्यामह्रो नपुंसकत्वम्

Ahan after the words punya and sudina to be neuter.

पुण्यसुदिनाभ्यामहो नपुंसकत्वं वक्तव्यम् - पुण्याहम्, सुदिनाहम् । It must be enjoined that ahan after punya and sudina is neuter. Viz. Puņyāham and sudināham.

Note: -Kāiyaṭa says that sudina means superiority.

पथः मङ्ख्याव्ययादेः

Putha to be neuter after words denoting number, avyayas etc.

पथः सङ्ख्याव्ययादेरिति वक्तव्यम् - द्विपथं, त्निपथं, चतुष्पथम्, उत्पथं

विपथम् It must be enjoined that patha after words denoting number avyayas, etc. is neuter. Viz. Dvipatham, tripatham, catus patham, utpatham and vipatham.

दिगुश्च Dvigu too.

द्विगुश्च समासो नपुंसकालेक्को भवतीति वक्तन्यम्, पञ्चगवं, दशगवम् । It must be enjoined that dvigusamāsa is neuter in gender. Viz. Puñcagavam and dasagavam.

अकारान्तोत्तरपदो द्विगुः स्त्रियाम्

Dvigu whose latter member ends in a takes feminine suffix after it.

अकारान्तोत्तरपदो द्विगुः स्त्रियां भाष्यत इति वक्तन्यम् - पञ्चपूली, दशपूली It must be enjoined that dviqu whose latter member ends in a takes feminine suffix after it. Viz. Pañcapūlī and dašapūlī.

वायन्तः

Dvigu whose latter member ends in \bar{a} takes feminine suffix optionally.

वा आवन्तः स्त्रियां भाष्यत इति वक्तन्यम् – पञ्चलट्टी पञ्चलट्टं, दशसद्दी, दशसद्देम् It must be enjoined that dvigu whose latter member ends in ā takes feminine suffix optionally. Viz. Pañca'chaṭvī, and Pañcakhaṭvam; daśakhaṭvī and daśakhaṭvam.

अनो नलोपश्च The elision of n of an too.

अनो नलोपश्च, वा च स्त्रियां भाष्यत इति वक्तत्र्यम् - पञ्चतक्षं, पञ्चतक्षी, दशतक्षं दशतक्षी ।

पात्रादिभ्यः प्रतिपेधः Prohibition with reference to pātrādis.

पात्रादिभ्यः प्रतिषेधो वक्तव्यः - पञ्चपात्रं, द्विपात्रम् There is need to prohibit pātrādis Viz. Pañcapātram and dvipātram.

अर्द्धर्चाः षुंसि च (2, 4, 31)

अद्वर्चाद्यः Arddharcadayalı to replace arddharcalı.

अर्द्धनांद्य इति वक्तत्र्यम् - अर्द्धर्नम्, अर्द्धर्नः; फार्पापणम्, फार्पापणः; गोमयं, गोमयः; सरकं, सरकः

163

Arddharcādayaḥ should replace arddharcāḥ to get the following forms:-arddharcam and arddharcaḥ; kārṣāpaṇam and kārṣā-paṇaḥ; gōmayam and gōmayaḥ; sarakam and sarakaḥ.

तत्तर्हि वक्तत्र्यम् It must be so read then.

न वक्तत्र्यम् No, it need not.

वहुवचननिर्देशात् सिद्धम्

It is secured by the plural suffix (in arddharcāh).

वहुवचननिर्देशाद् आद्यर्थो गम्यते

The meaning of adi is suggested by the plural suffix.

इद्मोऽन्वादेशेऽशनुदात्तस्तृतीयादौ (2, 4, 32)

Three topics are dealt with here:-(1) The interpretation of the expression $anv\bar{a}d\bar{e}\hat{s}a$ (2) The need to read $\bar{a}d\bar{e}\hat{s}a$ as (3) The need or otherwise of sitkaraṇa in as.

1

अन्वादेशे समानाधिकरणग्रहणम्

Need to read samānādhikaraņam with reference to anvādēśa.

अन्वादेशे समानाधिकरणग्रहणं कर्तव्यम्

Samānādhikaraņam is to be read with reference to anvādēśa.

कि प्रयोजनम् ? Why?

देवदत्तं भोजयेमं चेत्यप्रसङ्गार्थम्

To prevent ēnam in place of imam in Dēvadattam bhōjaya, imam ca.

इह मा भूत् - देवदत्तं भोजय इमं च यज्ञदत्तं भोजय इति ।

To prevent ēnam in place of imam in Dēvadattam bhōjaya imam ca yajñadattam bhōjaya.

अन्त्रादेशश्च कथितानुकथितमात्रम्

Anvādēša means reference to that alone which has been previously read.

अन्वादेशस्य कथितानुकथितमात्रं द्रष्टव्यम् । तद् द्वेप्यं विजानीथाद् इदमा कथितिमद्मैव यदानुकथ्यत इति । तदाचार्यः सुहृद् भूत्वा अन्वाचष्टे - अन्वादेशस्य कथितानुकथितमात्रम् इति

It must be taken that $anv\bar{a}d\bar{e}\acute{s}a$ means $kathit\bar{a}nukathita$ alone. It is not desired if one denoted by idam is referred to again by idam. Hence $\bar{A}c\bar{a}rya$ ($V\bar{a}rt'ikak\bar{a}ra$), being our friend, explains that $anv\bar{a}d\bar{e}\acute{s}a$ means $kathit\bar{a}nukathita$ (and not) $pa\acute{s}c\bar{a}t$ kathanam).

11

अथ किमर्थ । जादेशः । कियते, न तृतीयादिषु इत्येबोच्येत । टायामोसि चैनेन भवितव्यम्, अन्याः सर्वा हलादयो विभक्तयः । तत्र इद्भूपलेषे कृते केवल-मिदमोऽनुदात्तत्वमेव वक्तव्यम् ।

Why is the word as read in the $s\bar{u}tra$? It will do if $trt\bar{v}y\bar{a}d\bar{a}u$ is read as $trt\bar{v}y\bar{a}disu$. When the case-suffixes $t\bar{a}p$ and $\bar{o}s$ are used, let $\bar{e}na$ be the $\bar{a}d\bar{e}sa$. The other case-suffixes all commence in a consonant. When the form id is elided before them, it is necessary only to enjoin $anud\bar{a}ttatva$.

अत उत्तरं पठित The answer is hence read.

अशादेशवचनं साकच्कार्थम्

The reading of aśādēśa is for the sake of akac.

अशादेशवचनं साक्रच्कार्थं कियते । साक्रच्कस्यापि अयम् आदेशो यथा स्यात् - इमकाभ्यां छात्राभ्यां रात्रिरधीता अथो आभ्यामहरूप्यधीतम् इति Aśādēśa is read to allow the same for idam with akac. To allow idam with akac take the ādēśa as in Imakābhyöm chātrābhyām rātrir adhītā, athō ābhyām ahar apyadhītam.

111

अथ किमर्थ शित्करणम्? Why is a read with s as it? शित्करणं सर्वादेशार्थम् Sitkaraņa is to allow sarvādēša,

शित्करणं कियते । सर्वादेशार्थम् - शित् सर्वस्य इति सर्वादेशो यथा स्यात् - इमकाभ्यां छात्राभ्यां रालिरधीता, अथो आभ्यामहरप्यधीतम् इति । अकियमाणे हि शित्करणे अलोऽन्त्यस्य विधयो भवन्तीति अन्त्यस्य प्रसन्धेत । Sit is read. For the sake of sarvādēša. To allow sarvādēša by "... sit sarvasya" (1.1,55) and the word ābhyām can be used in the sentence Imakābhyām chātrābhyām rātrir adhītā, athō

ābhyām ahar apyadhītam. If sit is not read, the ādēša will replace only the final syllable by Alontyasya (1, 1, 52).

न वान्त्यस्य विकारवचनानर्थक्यात्

It need not be read on account of the anarthakya of the vikāravacana to the final otherwise.

न वा वक्तव्यम् It need not be read.

किं कारणम? Why?

अन्त्यम्य विकारवचनानर्थक्यात् । अकारस्य अकारवचने प्रयोजनं नास्तीति कृत्वा अन्तरेणापि शकारं सर्वादेशो भविष्यति ।

Since the injunction of $\bar{a}d\bar{e}sa$ to the final will prove unnecessary. Sarvādēśa will take place even without śakāra, since, otherwise, no purpose will be served by saying that akāra is replaced by akāra.

अर्थवत्त्वादेशप्रतिपेधार्थम्

On account of its having the purpose of preventing other ādēśas from appearing.

अर्थवत्तु अकारस्य अकारवचनम्

Injunction of akāra to replace akara has its own purpose.

कोडर्थः ? What is the purpose?

आदेशपतिपेधार्थम् । येऽन्ये अकारस्यादेशाः प्राप्तुवन्ति तद्घाधनार्थम् । तद्यथा मो राजि समः कौ इति मकारस्य मकारवचने प्रयोजनं नास्तीति कृत्वा अनुस्वारादयो वाध्यन्ते

To prohibit other $\bar{a}dar{e}\hat{s}as$ which have a chance to replace $akar{a}ra$ from making their appearance. It has an analogy in the sūtra Mō rāji samaḥ kvāu which is taken to prohibit the ādēśas like anusvāra at the idea that no purpose is served by enjoining the ādēśa m to m.

तस्माच्छित्करणम् Hence is the need for sitkarana.

तसाच्छकारः कर्तव्यः Hence & (as it) has to be read.

न कर्तव्यः । प्रिष्ठिष्टनिर्देशोऽयम् अ - अ इति । अनेकाल् शित् सर्वस्य इति सर्वादेशो भविष्यति ।

No, it need not be read. The two a's are read with a break between. Hence $sarv\bar{a}d\bar{e}^{\xi} \iota$ takes place on the strength of the $s\bar{u}tra$ $An\bar{e}k\bar{a}l$ (it sarvasya (1, 1, 55).

अथ वा विचित्रांस्तद्धितवृत्तयः । नान्वादेशेऽकजुत्पत्त्यते

Or wonderful is the nature of tad-thitavrttis. Akac may not appear with reference to anvādēśa.

एतदस्रतसोस्रतसौ चानुदात्तौ (2, 4, 33)

किमर्थं त्रतसोरनुदात्तत्वमुच्यते ?

Why is anudattatva enjoined to tral and tasl?

उदाचौ मा म्तामिति So that they may not be udātta.

नैतद्स्ति प्रयोजनम् । लिखरे कृते ¹ निषाते एतद्रोऽनुद्रात्तःथैन सिद्धम् This is not the benefit. When the stem takes udāttasvara or account of its being followed by a suffix having l for the a (by the sūtra Liti 6, 1, 193) and consequently tra and to become anudātta, the ādēśā of ētad becomes anudātta by thi sūtra.

इदमिह सम्प्रधार्यम् - अनुदात्तत्वं क्रियतां, लिखर इति
This is to be determined here whether anudāttatva of as by the previous sūtra operates first or the udāttatva of the stem by the sūtra Liti.

किमत्र कर्तन्यम् ? What is to operate here?

परस्वाञ्चित्स्वरः

Svara by Liti (6, 1, 193), being para, operates first.

नित्यमनुदात्त्वम् । इतेऽपि हित्त्वरे प्राप्ताति, अञ्चतेऽपि The anudattatva is nitya. It appears whether litsvara has appeared or not.

तत्र नित्यत्वादनुदात्तत्वे कृते लिति पूर्व उदात्तभावी नास्तीति कृत्वा यथाप्राप्त प्रत्ययस्वरः प्रसज्येत । तद्यथा गोष्पद्मं वृष्टो देवः इत्यूलोपे कृते पूर्व उदात्तमार्व नास्तीति कृत्वा यथाप्राप्तः प्रत्ययस्वरो भवति । तसात् त्रनसोग्नुदात्तत्वं वक्तव्यम् ।

- 1. Kitë is omitted in Bombay edition.
- 2. Etat is another reading.

After anudattate t of as, being nitya, has set in, there is chance for the usual pratyayasvara (which is udatta) to set in, since there is no udatta stem to enable tral and tast to become anudatta. In the word gospadapram in the sentence Gospadapram vṛṣṭō dēvaḥ, ū of pūram has been dropped and consequently ra has become udatta. Hence is the need to enjoin anudattatva to tra and tas here.

दितीयाहोस्खेनः (२, 4, 84)

कायायमेना विशीयने ? To which is inas enjoined?

एतदः प्राप्तोति । इदमोऽपि त्विष्यने ।

It may be the adesa of etad; but it is desired to be of idam also.

Note: This arises by taking claduly here by anuvrtti from the previous sūtra.

तिद्रमो अहणं कर्तेव्यम् If so, idamalı has to be read here.

न कर्तव्यम् । प्रकृतमनुवर्तते । No, it need not be read. It, being in this prakarana, is taken here by anuvrtti.

क प्रकृतम्? What is the sūtra referred to ?

इद्मोऽन्वादेशेऽशनुदात्तस्तृतीयादे। इति

The sūtra Idamēsnvādēšēs⁵ anudāttas tṛtīyādāu (2, 4, 32).

योद तद् अनुवर्तते एतद्स्रतसोस्रतसो चानुदाची इदमश्च इतीदमोऽपि प्रामोति ।

If it is taken by anuvṛlli, the sūtra Etadas tratasās tratasās cānudāttāu has to be read with idamus ca at the end so that idam also will be replaced by as before tras and tasl.

नेष दोषः । सम्बन्धमनुवर्तिष्यते । इदमोऽन्वादेशेऽशनुदात्तस्तृतीयादौ, एत-दस्रतसोस्रतसो चानुदाचो, इदमोऽन्वादेशेऽशनुदात्तस्तृतीयादावश् भवति । ततो द्वितीयाटौस्स्वेनः, इदमः एतद्धा, तृतीयादौ इति निवृत्तम् । This difficulty does not arise. There is anuvriti only to the connected element thus:-Idamôsnvādēšēsš anudāllas trtīyādāu,

Etadas tratasos tratasou connudattou. Idamosnvādēšēss anudattas

trtīyādāvas. Then the sūtra Dvitīyāṭāussvēnah Idamah and ētadah are supplied here and the word trtīyādāu is allowed to recede.

अथ वा मण्डूकगतयोऽधिकाराः । तद्यथा - मण्डूका उत्प्लुत्योत्प्लुत्य गच्छन्ति तद्वदिधकाराः

Or anuvittis are like frog-leap. As frogs skip over intermediate things, so are adhikāras.

अथ वैकयोगः करिप्यते इदमोऽन्वादेशेशनुदात्तस्तृतीयादावेतदस्रतसोस्रतसौ चानुदात्तौ । र्ततो द्वितीयाटौस्स्वेनः, इदम एतदश्च तृतीयादाविति निशृत्तम्

Or the two sūtras are read as one thus:- $Idam\bar{o}$ anvādēsēs\$ anudāttas tṛtāyādāu ētadas tratasās tratasāu cānudāttāu. Then is the sūtra $Dvit\bar{\imath}y\bar{a}t\bar{a}ussv\bar{e}nah$ read. Idamah and ētadas ca are taken here. $Trt\bar{\imath}y\bar{a}d\bar{a}u$ recedes.

अथ वा उभयं निवृत्तं तद्वेक्षिप्यामहे

Or both are not taken by anuvitti, but we take them by adhyāhāra.

एनीदिति नपुंसकैकवचने Need to read enad in the neuter singular.

एनदिति नपुंसकैकवचने कर्तव्यम् । इदं कुण्डमानय, प्रक्षालय एनत्, परिवर्तयैनत्

There is need to read ēnad in the neuter singular to secure ēnat in idam kundam ānaya, prakṣālaya ēnat; parivartaya ēnat.

यद्येनत् कियते एनो न वक्तव्यः

If ēnat is read, ēnas need not be enjoined.

का रूपसिद्धिः - अथो एनम्, अथो एने, अथो एनानि

How are the forms athō ēnam, athō ēnē, athō ēnāni to be got? त्यदादायेन ।सद्भम

It will be secured by the atra of tyadādi (by the sūtra Tyadādīnām aḥ (7, 2, 102).

यधेयमेनश्रितको न सिध्यति, एनच्छितक इति प्रामोति

If so, the form *enascitakah* cannot be secured and the form *enacchritakah* will be secured.

यथालक्षणमप्रयुक्ते

Grammar has to decide the form of a word not current in the world.

आर्द्धधातुके (2, 4, 35)

जग्ध्यादिष्ट्रार्द्धधातुकाश्रयत्वात्सति तस्मिन्त्रिधानम्

Injunction of the $\bar{a}d\bar{e}\hat{s}as$ like jagdhi can take place only after the definite $\bar{a}rddhadh\bar{a}tuka$ -pratuaya makes its appearance, since they depend upon it.

जम्ध्यादिष्वार्द्धधातुकाश्रयत्वात् सति तसिन्नार्द्धधातुके जम्ध्यादिभिर्भवितव्यम्
The ādēśas like jagdhi will have to replace sthānin only after
the particular ārddhadhātuka-pratyaya makes its appearance,
since the appearance of the former depends upon that of the
latter.

किमतो यत्सति भवितव्यम्

What is the harm if the $\bar{a}d\bar{e}\hat{s}a$ will have to set in only in the presence of the particular $\bar{a}rddhadh\bar{a}tuka$ -pratyaya?

तत्रोत्सर्गलक्षणप्रतिपेधः

Need, then, to prohibit the operation of the sūtras relating to sthānin.

तत्रोत्सगेलक्षणं कार्य प्राप्ताति, तस्य प्रतिषेघो वक्तव्यः, भव्यं, प्रवेयम् आख्येयम् इति । ण्यत्यत्रस्थितेऽनिष्टे प्रत्यय आदेशः स्यात् ; ण्यतः श्रवणं प्रसज्यते । There is chance, in that case, for the operation of the sūtras relating to $sth\bar{a}nin$ and it must be prohibited. When the unwanted nyat-pratyaya has to follow $bh\bar{u}$, $v\bar{\imath}$ and $khy\bar{a}$, the vowel may take vrddhi and the desired forms bhavyam $prav\bar{e}yam$ and $\bar{a}khy\bar{e}yam$ cannot be secured.

नैष दोष: I his difficulty cannot arise.

सामान्याश्रयत्वाद्विशेषस्थानाश्रयः

The particular pratyaya is not taken into account on account of taking the $\bar{a}rddhadh\bar{a}tukatva-j\bar{a}ti$ into consideration.

सामान्ये ह्याश्रीयमाणे विशेषो नाश्रितो भवति । तत्र आर्द्धघातुकसामान्ये जम्ध्यादिष्वादेशेषु कृतेषु यो यतः प्रत्ययः प्राप्ने ति स ततो भविष्यति ।

When the $\bar{a}rddhadh\bar{a}tukaj\bar{a}ti$ is taken into account, the particular is not taken into consideration. After the $\bar{a}d\bar{e}\hat{s}as$ $j\cdot gdhi$ etc. replace $sth\bar{a}nins$ with the view that an $\bar{a}rddhadh\bar{a}tuka$ is after them, the particular pratyaya will take its place.

नामान्याश्रयत्वाद्विशेषस्थानाश्रय इति चेदुवर्णाकारान्तभ्यो ण्यद्विधिप्रसङ्गः

There is chance for nyadvidhi to ukārānta and akārānta if the principle sāmānyāśrayatvād viśēṣasya anāśrayah is conceded.

सामान्याश्रयत्वाद् विशेषस्यानाश्रय इति चेद् उवर्णाकारान्तेभ्यो ण्यत् प्रामोति -लब्यं, पत्र्यम् इति - आर्द्धधातुकसामान्ये गुगे कृते, यि प्रत्ययसामान्ये च वान्ता देशे, हलन्तात् इति ण्यत् प्रामोति । इह च दित्म्यं, धित्स्यम्, आर्द्धधातुकसामान्येऽकार-लोपे कृते हलन्तादिति ण्यत् प्रामोति !

If the principle $s\bar{a}m\bar{a}ny\bar{a}srayalv\bar{a}d$ $vis\bar{e}sasya$ $an\bar{a}srayah$ is conceded, there is chance for nyal with reference to $uk\bar{a}r\bar{a}nta$ and $ak\bar{a}r\bar{a}nta$. After \bar{u} of the roots $l\bar{u}$ and $p\bar{u}$ takes guna on account of being followed by $\bar{a}rddhadh\bar{a}tukapratyaya$, it may take $v\bar{a}nl\bar{a}d\bar{e}sa$ since it is followed by ya- $j\bar{a}ti$ -pratyaya, It may then take nyat by the $s\bar{u}tra$ $Rhal\bar{o}r$ nyat (3, 1, 124), since it ends in a consonant and consequently $l\bar{u}$ and $p\bar{u}$ cannot take the pratyaya yat after them to seeme the forms lavyam and pavyam. Similarly $d\bar{a}$ and $dh\bar{a}$ will take nyat by the $s\bar{u}tra$ $Rhal\bar{o}r$ nyat after \bar{a} is clided on account of their being followed by $\bar{a}rddhadh\bar{a}tuka$ -pratyaya and not yat to secure the forms ditsyam, dhitsyam.

Note:—Nāgēšabhaṭṭa reads:-Ditsyadhitsayōr yati "Yatōsnāva ..." iti ādyudāttatvam, nyati "Titsvaritam" iti svaritatvam iti bhēdaḥ.

पीर्वापर्याभावाच सामान्येनानुपपत्तिः

Inappropriateness of taking the jati on account of the absence of paureaparya.

पौर्वापर्यामावाच सामान्येन जग्ध्यादीनामनुपपत्तिः । न हि सामान्येन पौर्वापर्यमस्ति

lt is not possible for the ādēśas jagdhi etc. to make their appearance if we take the jāti ārddhadhātukatva into consideration, since it cannot be taken that it follows the sthanin.

Note: — Kāiyaṭa reads: - Sāmānyasya vyāpakatvād nityatvācca dēśakālakṛtam pāurvāparyam nāsti.

सिद्धं तु सार्वधातुके प्रतिपेधात्

The object is achieved by prohibiting the $\bar{a}d\bar{e}\dot{s}a$ when $s\bar{a}rva$. dhātuka follows.

सिद्धमेतत् This (the object) is achieved.

कथम ? How?

अविशेषेण जम्ध्यादीनुक्त्वा सार्वधातुके न इति प्रतिषेधं वक्ष्यामि

Having said that the jugdhi etc. replace the sthanin whatever be the pratyaya which follows it, I shall state that it is prohibited when sārvadhātukapratyaya follows it.

सिध्यति । सूत्रं तर्हि भिद्यते

It is accomplished; but the sūtras are modified.

यथान्यासमेवास्त्र Let the sūlras remain as they are.

ननु चोक्तं जग्ध्यादिष्वार्द्धधातुकाश्रयत्वात् सति तस्मिन् विधानमिति Oh, it was said $jagdhyar{z}di$ şu $ar{a}rddhadhar{a}tukar{a}$ ś $rayatvar{a}t$ tasmin vidhānam.

परिहृतमेतत् - सामान्याश्रयत्वाद् विशेषस्यानाश्रय इति It was met by saying Sāmānyāśrayatvād višēṣasya anāśrayaļi.

ननु चोक्तं सामान्याश्रयत्वाद् विशेषस्यानाश्रय इति चेद् उवर्णाकारान्तेभ्यो ण्यद्विधिप्रसङ्गः इति

Oh it was raised sāmānyāśrayatvād viśēṣasya anāśraya iti cēd uvarņākārāntēbhyō nyadvidhiprasanguh.

नैष दोषः ; वक्ष्यति तत्राज्यहणस्य प्रयोजनम् , अजन्तभृतपूर्वमात्रादिष यथा स्यादु इति

This difficulty does not arise. He will say under the $s\bar{u}tra$ $Ac\bar{o}$ yat (3, 1, 97) that the purpose of reading acah in the $s\bar{u}tra$ is that the same may take place even in cases where ac was and has now been elided.

Note: -- Here vak syati refers to Mahābhāsyakāra himself.

यद्प्युच्यते पौर्वापर्याभावाच सामान्येनानुपपत्तिरिति, अर्थसिद्धिरेवैषा यत् सामान्येन पौर्वापर्यं नास्ति । असित पौर्वापर्ये विषयसप्तमी विज्ञास्यते - आर्द्धधातुके विषये इति । तत्र आर्द्धधातुके विषये जम्ध्यादिषु कृतेषु यो यतः प्रामोति स ततो भविष्यति ।

With reference to the objection $P\bar{a}urv\bar{a}pary\bar{a}bh\bar{a}v\bar{a}cca$ $s\bar{a}m\bar{a}ny\bar{a}nupapattih$, the object is achieved even though there is no $p\bar{a}urv\bar{a}parya$ when $j\bar{a}ti$ is taken into consideration by taking the $saptam\bar{\imath}$ to be $vi\bar{s}ayasaptam\bar{\imath}$, so that $\bar{a}rddhadh\bar{a}tuk\bar{\epsilon}$ may be taken to mean when $\bar{a}rddhadh\bar{a}tuka$ is eonceived in the mind. After the $\bar{a}d\bar{\epsilon}sas$ jagdhi etc. have set in when the $\bar{a}rddhadh\bar{a}tuka$ is eoneeived in the mind, the particular pratyaya which is to eome sets in.

अथवा आर्द्धभातुकासु इति वक्ष्यामि
Or Arddhadhatukasu will be read instead.

कासु आईधातुकासु ?

With reference to which arddhadhatukas?

Note:—Here ārddhadhātukāḥ is taken to refer to the words bhavya, lavya which have ārddhadhātukapratyayas as their avayava. Hence Kāiyaṭī says that there is no harm even in vyaktipakṣa, since Grammar simply decides the correctness of words which already exist.

टक्तिपु युक्तिपु रहिषु प्रतीतिषु श्रुतिपु संज्ञासु ।

With reference to words denoting their derivative meaning, and conventional meaning, to those formed only by grammatical rules, and current in the world and to those used as sanijāas.

Note: - Kāiyata reads here: - Ārddhadhātukāsu samhatişu vyutpādyamānāsu astyādīnām bhvādaya ādēśā ityuktam bhavati.

अदो जिम्बर्यप्ति किति (2, 4, 30)

ल्यव्यहणं किमर्थम् ? न 'ति किति ' इत्येव सिद्धम् ?

Why is lyap read in the $s\bar{u}tra$? Will it not do if the $s\bar{u}tra$ is read Adō jagdhis ti kiti?

ल्यपि कते न प्राप्नोति

The ādēśa jagdhiḥ may not replace at before lyap.

इदिमह सम्प्रधार्थ, ल्यप् कियताम् आदेश इति

This has to be decided which of lyap and adesa should be given precedence.

किमत्र कर्तव्यम्? Which should be done here?

परत्वारूरुयप् Lyap, being para, should precede.

अन्तरङ्क आदेश: The ādēśa is antaranga.

Note:—Kāiyaṭa reads:-Antaranga ādēśa iti-Takārādi pratyayamātrā pēkṣatvāt $;\;lyab ext{-}ar{a}$ dē \acute{s} as tu p \ddot{u} rvapad \ddot{a} pēkṣasam \acute{a} s \ddot{a} śrayatvād bahirangah.

एवं तर्हि सिद्धे सित यल्ल्यव्यहणं करोति तद् ज्ञापयत्याचार्यः अन्तरङ्गानिप विधीन् वहिरङ्गो ल्यव् वाधते इति

Since $ar{A}car{a}rya$ reads lyap though the object is achieved Otherwise, he suggests that lyap, though bahiranga, can veto sūtras which are antaranga.

किमेतस्य ज्ञापने प्रयोजनम् ?

What is gained from this suggestion?

ल्यवादेश उपदेशिवद्वचनमनादिष्टार्थ वहिरङ्गलक्षणत्वात् इति वस्यति, तन्न वक्तव्यं भवति

He (Vārttikakāra) is going to read (under 7, 1, 37) Lyabādēśa upadēsivad-vacanam anūdistārtham bahirangalakṣaṇatvāt and it is unnecessary.

Note:—1. $N\bar{a}g\bar{e}\hat{s}abhatta$ reads:— $Upad\hat{e}\hat{s}ivadvacanam$ iti $upad\bar{e}\hat{s}\bar{i}=kt_1\bar{a}$, tadvad $lyap\bar{o}$ vacanam $k\bar{a}ryam$ ityarthah.

Note:—2. Kāiyaļa reads:— Anādisļārtham iti:-Pradhāy prasthāya ityādāu hitvādişu akṛtēṣvēva lyab yathā syād ityartha

जिभविधिरुर्येपि यत्तदकस्मात् सिद्धमदस् ति कितीति विधानात् ।

हिशमृतींस्तु सदा बहिरङ्गो रयञ्भरतीति कृतं विद्धि ॥
Injunction of jagdhi before lyap is of no use. Its purpose served by reading Ti kiti alone. Hence learn that lya, though bahiranga vetoes hi etc.

Note: $-K\bar{a}iyata$ says that the above verse was read b $Vy\bar{a}ghrabh\bar{u}ti$.

एप एवार्थः

जग्धो सिद्धेऽन्तरङ्गस्वात्ति कितीति चयबुच्यते । ज्ञापयत्यन्तरङ्गाणां चयपा भवति वाधनस् ॥

The same is the meaning of the following verse:-

Jagdhāu siddhēsntarungatvāt tikiti lyab ucyatē । Jñāpayatyantarangāṇām lyapā bhavati bādhanam ॥

Note: $-N\bar{a}g\bar{e}sabhatta$ feels that the above verse perhap belongs to $Mah\bar{a}bh\bar{a}syak\bar{a}ra$ himself.

छङ्सनोर्घस्ट (2, 4, 37)

घस्त्रभावेऽच्युपसङ्ख्यानम्

Need to add that ghas! replaces ad before ac-pratyaya.

घर्छभावेऽच्युपसङ्ख्यानं कर्तव्यम - प्राचीति प्रघसः

It must be added that ghas replaces ad before ac-pratyaya t secure the form praghasah (pra atti iti).

हनो वध लिङि (2, 4, 42); लुङि च (2, 4, 43)

फिमयं विधिव्यक्षनान्तः, आहोस्विद् अदन्तः !

Does the root in radha end in consonant or vowel? (i.e., Is the final akāra in radha a part of the root or used t facilitate pronunciation?

ৰ্দ্ধি বার:! What does it matter if it is either?

यदि व्यञ्जनान्तः If it ends in the consonant,

वधौ व्यञ्जनान्त उक्तम्

If vadha is vyanjanānta, the defect was pointed out.

किमुक्तम् ? What was it?

वध्यादेशे वृद्धितत्वपतिषेध इडि्षिश्च इति

Vadhyādēśē vrddhitatvapratiṣēdha idvidhiś ca (1, 1, 56) 2

अथ अदन्तः, न दीषो भवति

If it is taken to end in a, there will be no defect.

यथा न दोषस्तथास्तु Let it be such as is unquestionable.

इणो गा लुङि (2, 4, 45)

इण्वदिक: To ik like in.

इण्वदिक इति वक्तव्यम् - इहापि यथा स्यात्, अध्यगात्, अध्यगाताम्, अध्यग्

It must be said that the $\bar{a}d\bar{e}\dot{s}a$ replaces ik like in, to secure the forms $adhyag\bar{a}t$, $adhyag\bar{a}t\bar{a}m$ and adhyaguh.

णो गमिखोधने (2, 4, 46)

इण्विदिक इत्येव - अधिगमयित, अधिगमयतः, अधिगमयिन्त । Here too it must be said that the ādēśa replaces ik like iņ to secure adhigamayati, adhigamayataḥ and adhigamayanti.

सनि च (2, 4, 47)

इण्वदिक इत्येव - अधिजिगमिषति, अधिजिगमिषतः, अधिजिगमिषन्ति । Here too it must be said that the ādēśa replaces ik like iņ to secure adhijigamiṣati, adhijigamiṣataḥ and adhijigamiṣanti.

गाङ्क्षिटि (2, 4, 4º)

डिस्करणं किमर्थम् ! Why is gān read as nit?

- This may be taken as bhāṣya.
- 2. Cf. Vol. III pp. 105, 106.

Note: $-K\bar{a}iyata$ says that, since the $sth\bar{a}nin$ (iii) is a this is unnecessary.

गांक्चनुबन्धकरणं विशेषणार्थम्

Reading \dot{n} as it in $g\bar{a}\dot{n}$ is for restriction.

गाङि अनुबन्धकरणं क्रियते, विशेषणार्थम्

 \dot{N} is read as it in $g\hat{a}\dot{n}$ to restrict the application.

क विशेषणार्थेनार्थः ? Where is viśēṣaṇa useful?

गाङ्कुटादिभ्योऽञ्णिन्डिद् इति In gán of Gān/cuṭādibhyōsñṇi-n-1

गाकुटादिभ्योऽञ्जिन्हिद् इतीयत्युच्यमाने इणादेशस्यापि प्रसज्येत । २ sūtra is read Gākutādibhuðsñ, nin úit, it will, operat

If the $s\bar{u}tra$ is read $G\bar{a}kut\bar{a}dibhy\bar{o}s\tilde{n}$ nin nit, it will operate relation to the $\bar{a}d\bar{e}sa$ of in also.

ज्ञापकं वा सानुबन्धकसादेशवचन इत्कार्याभावस

Or reading the $\bar{a}d\bar{e}^{\dot{s}a}$ with anubandha suggests the absertherein of the $itk\bar{a}rya$ of the $sth\bar{a}nin$.

अय वैततद् ज्ञापयत्याचार्यः, सानुबन्धकस्यादेशे इस्कार्यं न भवतीति Or Acārya (Sūtrakāra) suggests that the reading of anubana in ādēša prevents it from taking the itkārya of the sthānin.

किमेतस्य ज्ञापने प्रयोजनम्? What is the benefit of this $j \tilde{n} \tilde{a} p a r$

प्रयोजनं चक्षिकः ख्याञ्

Benefit is seen in khyāñ, the ādēśa of cakṣin.

चक्षिङः ख्याञ् प्रयोजनम् - चख्यौ, ख्यास्यति इति ; ङितः इत्यात्मने नित्यं न भवति

Benefit is seen with reference to the ādēśa khyāñ of cakṣin, the forms cakhyāu, and khyāsyati, which show thātmanēpada terminations by the sūtra Anudāttanita ūtmapudam (1, 3, 12) are not nitya there.

लटः शतशानचौ

Benefit is with reference to \hat{sa} nac, the \bar{a} $d\bar{e}\hat{sa}$ of lat mention in the $s\bar{u}$ lat la

लटः शतृशानचा प्रयोजनं, पचमानः यजमानः इति, टितः इत्येन्वं न भवति । Benefit is seen with reference to śānic, the ādēśa of lat read in the sūtra Laṭaḥ śatṛṣānacāu (3, 2 124) in the forms pacamānah and yajamānah where ētva by Ţita ātmanēpadānām tērē (3, 4, 79) is absent.

युवोरनाकौ

Benefit is with reference to the $\bar{a}d\bar{e}^{\dot{s}}as$ of ana and aka of yuand vu respectively.

युवोरनाको च प्रयोजनम् - नन्दनः, कारकः, नन्दना, कारिका इति उगिल्लक्षणी ङीव्नुमी न भवतः ।

Benefit is seen with reference to ana and aka, the $\bar{a}d\bar{e}sis$ of yuand vu read in $Yuv\bar{o}r$ $an\bar{a}k\bar{a}u$ (7, 1, 1) in the forms $nandan\bar{a}$ and $k\bar{a}rik\bar{a}$ derived from nandana and $k\bar{a}raka$, where $i\bar{i}p$ and num appearing after ugit are absent.

मेश्वाननुबन्धकस्याम्बचनम्

Need to read am as the ādēša of mi without the anubandha p in the sūtra Tas-thas-tha-mipām tāntantāmaḥ (3, 4, 101).

मेश्च अननुबन्धकस्याम् वक्तव्यः, अचिनवम्, अकरवम्, असुनवम् । It is necessary to state that mi and not mip takes $\bar{a}d\bar{e}\hat{s}a$ am to secure the forms acinavam, akaravam and asunavam.

Note:-Hence u of nu takes guna, the pitkārya, in acinavam etc.

अत्यरुपमिद्मुच्यते, मेरिति । तिप्सिम्मिपामिति वक्तव्यम्, इहापि यथ स्यात् वेद, वेत्थ

Reading of mēļi alone is very meagre; it should have been read tip-sim- $mip\bar{a}m$, to have guna in the forms $v\bar{e}da$ and vēttha also.

Note: - Kāiyaṭa feels that this amendment of mēḥ is unnecessary, while Nāgēšabhatta feels it necessary.

अस्य ज्ञापदास्य सन्ति दोषाः; सन्ति प्रयोजनानि; समा दोषा भूयांसो वा; तसान्तार्थोऽनेन ज्ञापकेन ।

There are defects in the $j\tilde{n}\bar{a}paka$ and there are merits; the defects are the same in number as the merits or greater and hence the $j\tilde{n}\bar{a}paka$ need not be resorted to.

. कथं यानि प्रयोजनानि ? What about the merits?

नैतानि सन्ति; इह तावत् चिक्षेडः ख्याञ् इति, ञित्करणसामर्थ्याद्विभाषा आत्मनेपदं भाविप्यति; लटः शतृशानची इति, वक्ष्यत्येतत् प्रकृतानामात्मनेपदानां देरेत्वं भवति इति; युवोरनाकौ इति, वक्ष्यत्येतत्, सिद्धं तु युवोरनुनासिकत्वाद् इति । The merits do not exist. Firstly with reference to Cakṣinaḥ khyāñ, ātmanēpada sets in optionally on the strength of ñitkaraṇa; with reference to Laṭaḥ śātrśānacāu, he (Mahā-bhāṣṇakāra) is going to state (under 3, 4, 79) that ētva replaces ți only before the ātmanēpada terminations read in the sūtra Tip-tas-jhi ...; and with reference to Yuvōr anākāu he (Vānttikakāra) is going to say (under 7, 1, 1) that yu and vu followed by anunāsika alone are taken into account.

Note:—The reading anunāsikaparatvāt is found under the sūtra Yuvōr anākāu (7, 1, 1).

चाक्षिडः ख्याञ् (2, 4, 54)

किमयं क्शादिः, 1 आहोस्वित् ख्यादिः?

Does this commence with ks or khy?

चाक्षिङः क्ञाञ्ख्याञी

The sūtra is to be read thus Caksinah ksānkhyānāu.

चक्षिङ: क्ञाञ्ख्याञिति ² क्यादिश्च ख्यादिश्च It commences with ks and khy, since the sūtra is to be read Cokṣiùaḥ kṣūñkhyañāu.

ख्शादिर्वा Or it commences with khs.

अथ वा ख्शादिभीविष्यति Or it may commence with khi.

- 1. Kasādiķ is another reading.
- 2. It seems the reading kšan khyanaviti is better.

केनेदानीं क्शादिभविष्यति ?

How will the initial element become ks?

चर्त्वेन By cartva.

अथ ख्यादिः कथम् ?

How will the initial element become khy?

असिद्धे शस्य यवचनं विभाषा

Need to read śasya yatvam vibhāṣā after the sūtra Pūrvattrāsiddham.

असिद्धे शस्य विभाषा यत्वं वक्तव्यम्

Śasya $vibhar{a}$ s $ar{a}$ yatvam must be read after $Par{u}$ rvattr $ar{a}$ siddham.

किं प्रयोजनम्? Why?

प्रयोजनं सौप्रख्येऽबुञ्बिधः

Vuñvidhi does not operate with reference to sāuprakhya.

सौपख्य इति योपधलक्षणो वुञ्चिधिन भवति । सौपख्यार्थ इति वृद्धाच्छ

इति छो भवति

The sū!ra Yōpadhād gurūpōt!amād vuñ (5, 1, 132) does not operate with reference to sauprakhya. Chah sets in there by the sūtra Vrddhāc chah (4, 2, 114).

निष्टानत्वमाख्याते Na does not replace kta in the word ākhyāta.

आख्यात इति निष्ठानत्वं न भवति

Na does not replace kta in the word ākhyāta.

रुविधि: पुंख्याने Rutva does not appear in punkhyāna.

पुंख्यानमिति रुविधिन भवति

The sūtra Pumaļi khayyamparē (8, 3, 6) does not operate in pumkhyānam.

णत्वं पर्याख्याने Absence of natva in the word paryākhyāna.

पर्याख्यानमिति णत्वं न भवति

Natva does not appear (by the sūtra Krtyacah 8, 4, 29) in paryākhyāna.

सस्थानत्वं नमः ख्यात्रे

Jihvāmūlīya does not replace visarga in namaḥ khyātrē.

नमः च्यात्र इति सस्थानत्वं न भवति -

Jihvāmūlīya does not replace visarga in namah khyātrē.

Note:—Sasthānatva is the pūrrācārya-samjñā for Jihvā-mūlīya.

वर्जने प्रतिषेध: Prohibition of the ādēśa in the meaning of varjana

वर्जने प्रतिषेधो वक्तव्यः, अवरं चक्ष्याः, परिसंचक्ष्याः

Need to prohibit the ādēśu in the sense of varjana to secure the forms avasamcakṣyāḥ and parisamcakṣyāḥ.

असनयोश Prohibition before the pratyayas a and sin too.

असनयोध्य प्रतिषेधो वक्तव्यः, नृचक्षा रक्षः, विचक्षण इति । There is to prohibit the ādēsa before the pratyayas a and san to secure the forms nreakṣā rakṣaḥ, vicakṣaṇaḥ.

वहुलं तिण Need to read Bahulam tani.

बहुलं तणीति वक्तज्यम् Bahulam tani is to be read.

किमिदं तणीति ? What is meant by tuni?

संज्ञाच्छन्दसोर्प्रहणम् Samijñā and chandas.

किं पयोजनम् ! What is the benefit ?

अन्नवधकगात्रविचक्षणाजिराद्यर्थम्

To secure the forms anna, vadhaka, gātra, vicakṣaṇa, ajira etc.

अन्न - अन्नम्, वधक - वधकम्, गात्र - गात्रं पङ्य, विचक्षण - विचक्षणः, আনিং - अनिং तिष्ठति

So that the forms annam, vadhakam, gatram in gatram pasya, vicakṣaṇaḥ and ajiram in ajirē tiṣṭhati may be secured.

अजेर्व्यवज्ञेष: (2, 4, 56)

भज्ञपोः प्रतिपेधे वयप उपसङ्ख्यानम् Need to add kyap to agañ apēļi.

घजपोः प्रतिपेधे क्यप उपसङ्ख्यानं कर्तत्र्यम् । इहापि यथा स्यात् - समजनं, समज्य इति ।

There is need to add hyap to $gha\tilde{n}$ and ap in the $pratis\bar{e}dha$, so that it may operate here too in samijanam and samajya.

तत्तर्हि वक्तव्यम् It must, then, be read.

न वक्तन्यम्, अपीत्येव भविष्यति

No, it need not be read. It is secured from api.

Note:—Ghañapāh means ghañi and api parē.

कथम् ? How?

अशिति नेदं प्रत्ययग्रहणम्

Ap in api does not refer to the pratyaya.

किं तर्हि ? To what then?

प्रत्याहार्य्रहणम् It refers to the pratyahāra.

क सन्त्रिविष्टानां प्रत्याहारः १

From which is the pratyāhāra formed?

अपोऽकारात्प्रभृति आ क्यपः पकारात्

From a of ap (in the $s\bar{u}tra$ $Rd\bar{o}r$ ap 3, 3, 57) to p in kyap (in the $s\bar{u}tra$ Vraja- $yaj\bar{o}r$ $bh\bar{a}v\bar{e}$ kyap 3, 3, 97).

यदि प्रत्याहारग्रह्णं संवीतिर्न सिध्यति

If it is taken as pratyāhāra, the form samvītiķ is not secured.

Note:— $Sa\dot{m}v\bar{\imath}ti\dot{h}$ is secured from $Striy\bar{a}m$ ktin (3, 3, 94) and ktin comes under the $praty\bar{a}h\bar{a}ra$ ap

एवं तर्हि नार्थ उपमङ्ख्यानेन, नापि घनपोः प्रतिषेधेन । इदमस्ति चक्षिङः ख्यान्, वा लिटि इति; ततो वक्ष्यामि' अनेवी – अनेवीभावो भवति वा, व्यवस्थितविभाषा च वा इति, तेनेह च भविष्यंति प्रवेता, प्रवेतुं, प्रवीतो रथः, संवीतिरिति; इह च न भविष्यंति – समाजः समजः, उदाजः उद्जः, समजनम् उद्जनं, समज्य इति ।

If so, no purpose is served by upasaikhyāna or by the pratisēdha of ghañ and ap. There are here the sūtras Cakṣinaḥ

khyāñ and $V\bar{a}$ liți (2, 4, 55). Then shall I reud $Aj\bar{e}r$ $v\bar{\imath}$, which may mean that $v\bar{\imath}$ optionally replaces aj (by taking here $v\bar{a}$ from the previous $s\bar{u}tra$) and take it to be $vyavasthitavibh\bar{a}s\bar{a}$, so that it operates with reference to $prav\bar{e}t\bar{a}$, $prav\bar{e}tum$, $prav\bar{e}t\bar{v}$ rathah, and $samv\bar{e}th$ and does not operate with reference to $sam\bar{a}jah$, samvjoh, $ud\bar{a}jah$, udajah, samajanam, udajanam, and samojya.

तत्रायमप्यर्थः, इदमपि सिद्धं भवति प्राजिता इति In that case this too—prājitā is secured.

किं च भो इप्यते एतदूनम्? Oh! Sir, is that form wished for? बादिमिप्यते Certainly, it is desired.

एवं हि कश्चिद् वैयाकरण आह, कोऽस्य स्थस्य प्रवेता इति

A grammarian says thus, "Who is the pravētā (charioteer) of this chariot?"

सूत आह, आयुष्मन्नहम् अस्य रथस्य प्राजिता इति
The charioteer replies, "Sir, I am the prājitā of this chariot."

वैयाकरण आह, अपशब्द इति The grammarian says, "It is incorrect form."

form - prājitā - is recognised by him."

सूत आह, प्राप्तिज्ञो देवानांपियः, न त्विष्टिज्ञः, इप्यत एतद्वपम् इति ।
The charioteer replies, "Sir, you, a learned fool, know only the forms learnt from sūtras and do not know the forms secured from işti (the opinion of the Mahābhāsyakāra) and this

वैयाकरण आह, अहो नु खल्बनेन दुरुनेन बाध्यामहे इति The grammarian says, "Oh, we are so slighted by this duruta."

स्त आह, न खलु वेञः स्तः, सुवतेरेव स्तः । यदि सुवतेः कुत्सा प्रयोक्तव्या, दुःस्तेनेति वक्तव्यम्

^{1.} It is worthy of consideration whether Mahlibh Tryal ira himself calls his views as isti-

The charioteer replies, "The word Sūtah is not derived from the root $v\bar{\imath}$, but from the root $s\bar{\imath}$." If you want to derive a term of contempt from $s\bar{u}$, it should be duḥsūtēna."

न तहींदानीमिदं वा या इति वक्तव्यम् In that case the $s\bar{u}tra\ V\bar{a}\ y\bar{a}u$ (2, 4, 57) need not be read.

वक्तव्यं च It has to be read.

किं प्रयोजमम् ? Whv?

नेयं विभाषा This (vā) does not denote vibhāṣā.

कि तर्हि ? What then?

आदेशोऽयं विधीयते । वेत्ययमारेशो भवत्यजेयौ परतः, वायुरिति This is enjoined as an $\bar{a}d\bar{e}\dot{s}a$. Hence the $s\bar{u}tra$ means that the root aj takes the $\bar{a}d\bar{e}\dot{s}_{\perp}v\bar{a}$ when it is followed by yu to secure the from vāyuh.

ण्यक्षत्रियापिनितो यूनि छगणिनोः (2, 4, 58)

अणिञ्रोर्छकि तद्राजाद्यवप्रत्ययस्योपसङ्ख्यानम्

Need to add yuvapratyaya after tadrāja with reference to the luk of an and iñ.

अणिञोर्छीके तद्राजाद्युवप्रत्ययस्योपसङ्ख्यानं कर्तव्यम् - बौधिः पितां, बौधिः पुत्रः ; औदुम्बरिः पिता, औदुम्बरिः पुत्रः ।

There is need to add yuvapratyaya after tadrāja with reference to the luk of an and in. Viz. Baudhih (father), Baudhih (son); Audumbarih (father). Audumbarih (son).

अपर आह Another says.

अणिञ्रेर्छिकि क्षत्रियगोतमात्राद्यवप्रस्यस्थोपसङ्ख्यानम्

Need to add yuvapralyaya after kşalriyagolra alone with reference to the luk of an and in.

अणिञोर्नुकि क्षत्रियगोत्रमात्राद्युवप्रत्ययस्योपसङ्ख्यानं कर्त्रव्यमिति । जावालिः पिता, जावालिः प्रतः

There is need to add yavapratyaya after $K \stackrel{\cdot}{satriyag\bar{o}tra}$ alone with reference to the luk of an and $i\tilde{n}$. Viz $J\bar{a}b\bar{a}lih$ (father), $J\bar{a}b\bar{a}lih$ (son).

अपर आह Another says

अत्राह्मणगोत्रमात्राद्यवप्रत्ययसोपसङ्ख्यानम्

Need to add yuvapratyaya after abrāhmaṇagōtra alone.

अत्राह्मणगोत्रमात्राद्युवप्रत्ययस्योपसङ्ख्यानं कर्तव्यमिति

There is need to add yuvapratyaya after abrāhmaṇagōtra alone.

कि प्रयोजनम् ? Why

इदमपि सिद्धं भवति, भाण्डिजङ्घिः पिता, भाण्डिजङ्घिः पुत्रः, कार्णसरिकः पिता, कार्णसरिकः पुत्रः

The following forms also can be secured. Viz. Bhāṇḍijaṅghiḥ (father), Bhāṇḍijaṅghiḥ (son); Kārṇakharakiḥ (father), Kārṇakharakiḥ (son),

Ahnika - Twentyseven ends.

(Second Adhyāya fourth pāda first āhnika) ends.

Ahnika - Twenty eight

(Second Adhyāya, fourth pāda, second āhnika)

तद्राजस्य बहुषु तेनैवास्त्रियाम् (२, ४, ६२)

Whether the stem of bahuşu denotes bahuvacanapratyaya or bahuvacana pratyayārtha is the only topic that is discussed here.

तद्राजादीनां छिकि समासबहुत्वे प्रतिषेधः

Need to prohibit the luk of tadrājādis with reference to samāsabahutra.

तद्राजादीनां लुकि समासबहुत्वे प्रतिषेधो वक्तव्यः - पिय आङ्ग एषां त इमे पियाङ्गाः, पियो वाङ्ग एषां ते इमे पियवाङ्गा इति

There is need to prohibit the luk of $tadr\bar{a}j\bar{a}dis$ when the plural number in compound is taken into account, as in priyāngāḥ (priyaḥ $ar{a}$ iŋaḥ $ar{e}$ ṣ $ar{a}$ m t $ar{e}$) and priyav $ar{a}$ iŋ $ar{a}$ ḥ (priyaḥ v $ar{a}$ iŋaḥ . ēsām tē).

किमुच्यते समासबहुत्वे प्रतिषेध इति, यदा तेनैव चेत्कृतं वहुत्वम् इत्युच्यते, न चात्र तेनैव कृतं बहुत्वम् ?

Why is it said that there is need for the pratisedha with reference to samāsabahutva, since the sūtra enjoins luk only when bahutva is concerned with tadrājānta and it is not found here?

भवति वै किञ्चित् - आचार्याः क्रियमाणमपि चोदयन्ति तद्वा कर्तव्यं, तेनैव चेद् बहुत्वमिति, समासबहुत्वे वा प्रतिषेधो वक्तव्य इति

It sometimes happens that Acaryas, doing one thing, suggest another. The vārttika suggests that either the word tēnāiva is to be read in the sūlra or it (the vārllika Tadrājādīnām luki samāsabahutvē pratiṣēdhaḥ) is to be read.

अबहुत्वे लुग्बचनम्

Need to enjoin luk when $sam \tilde{c}sa$ has no plural suffix.

अबहुत्वे च छुग् वक्तन्यः - अतिकान्तोऽक्वान् अत्यक्न इति

There is need to enjoin luk when $sam\bar{a}sa$ does not have plural suffix after it as in $atya\dot{n}ga$.

बहुवचने परतो यस्तद्राज इत्येवं च कृत्वा चोद्यते । अथ किमर्थं पुनिरदं ? न वहवचन इत्येव सिद्धम ?

The discussion rests on the assumption that the $tadr\bar{a}j\bar{a}nta$ is followed by plural suffix. In that ease, what is the need for this $v\bar{a}rttika$? Is not its purpose served by the bahuvacanapratyaya?

न सिध्यति; बहुवचन इत्युच्यते, न चात्र बहुवचनं पश्यामः
No, it is not served; bahuvacana is stated there and we do not find bahuvacana here.

प्रत्ययसक्षणेन भविष्यति

It is taken to exist by Pratyryalōpē pratyayalakṣaṇam (1, 1, 62)

न छुमता तस्मिन् इति प्रत्ययलक्षणस्य प्रतिपेधः

There is pratisēdha for pratyayalakṣaṇa from the principle Na lumatā tasmin.

Note:—Na lumatā tasmin is a vārttika found under the sūtra Na lumatā igasya (1, 1, 62).

न लुमताङ्गस्येति वक्ष्यामि

The sūtra 'Na lumatāngasya', shall I explain to give that meaning,

Note: $-K\bar{a}iyata$ takes the $k\bar{a}rya$, whether it is enjoined in $ang\bar{a}dhik\bar{a}ra$ or elsewhere, to the anga when the pratyaya after it is dropped by stating the expressions luk etc. Luk here is the $k\bar{a}rya$ of the pratyaya and not $samast\bar{a}nga$.

नेवं शक्यम् । इह हि दोषः स्यात् - पञ्चभिगांगीभिः क्रीतः पटः पञ्चगार्गः, दशगार्गे इति

Such an interpretation is not possible. For there will be difficulty here in the word pañcagārgyaḥ whose vigrahavākya is pañcabhir gūrgībhiḥ krīlaḥ and in the word daśagārgyaḥ.

द्वन्द्वेऽबहुपु लुग्वचनम्

Need to enjoin luk in dvandva whose component members are not followed by plural suffix.

द्धन्द्वेऽबहुपु लुग् वक्तव्यः, गर्भवत्सवाजा इति

There is need to enjoin luk in dvandva whose component members are not followed by plural suffix. Viz. Gargavatsavājāh.

इह च छुग् वक्तज्यः - गर्भेभ्य आगतं गर्भऋष्यं, गर्गमयम् इति There is need to enjoin luk here too, in the words $gargar\bar{u}pyam$ and gargamayam whose derivation is Gargēbhya āgatam.

Note: Gargarūpyam is secured from the sūtra Hētumanuşyēbhyōsnyatarasyām rūpyaḥ (4, 3, 81) and gargamayam from the $s\bar{u}tra$ Mayat ca (4, 3, 82).

इह च अत्रय इति उदात्तनिवृत्तिस्वरः प्रामोति

The anudātta (jas) following the udātta (dhak) which is dropped in atrayah will become udātta.

सिद्धं तु प्रत्ययार्थवहृत्वे लुग्वचनात्

The object is then achieved if it is conceded that there is lukfor tadrājānta when the meaning of the plural suffix is taken into consideration.

सिद्धमेतत् This (the object) is achieved.

कथम् ? How?

प्रत्ययार्थबहुत्वे लुग्वक्तव्यः

There is need to enjoin luk if plurality is taken into consideration.

यदि प्रत्ययार्थवहुत्वे छुगुच्यते तेनापि अस्तियामिति वक्तव्यम् । इह मा मृत् आङ्गः स्त्रियः, वाङ्ग्यः स्त्रिय इति । यस्य पुनर्वहुवचने परतो लुगुच्यते तस्य ईकारेण व्यवहितत्वान्त्रं भविष्यति ।

If it is conceded that there is luk if bahuvacana pratyayārtha follows, there is the necessity to read astriyam in the sutra to prevent luk in Angyah (striyah) and Vangyah (striyah.) But if it is taken that there is luk when bahuvacanapratyaya follows, $astriy\bar{a}m$ need not be read, since $\bar{\imath}k\bar{a}ra$ intercedes between $tadr\bar{o}j\bar{a}nta$ and plural suffix.

्यस्यापि तु बहुवचने परतो छगुच्यते, तेनापि अस्त्रियाम् इति वक्तव्यम् -आम्बप्ट्याः स्त्रियः सौबीर्याः स्त्रियः इत्येवमर्थम् ।

There is need to read $astriy\bar{a}m$ in the $s\bar{u}tra$ even by him who holds the view that there is luk when the plural suffix follows, to secure the forms $\bar{a}mbaslhy\bar{a}h$ (striyah), and $S\bar{a}uv\bar{v}ry\bar{a}h$ (striyah).

अत्रापि चापा व्यवधानम् Here too there is interception by $\bar{a}p$. एकादेशे कृते नास्ति व्यवधानम

There is no interception after ēkādēša is effected.

एकादेशः पूर्वविधौ स्थानिवद्भवतीति स्थानिवद्भावाद् व्यवधानमेव ।

There is interception through sthānivadbhāva from the dictum Ekādēšah pūrvavidhāu sthānivad bhavati.

द्वन्द्वेऽबहुषु लुग्वचनम्

Need to enjoin *luk* in *dvandva* whose component members are not concerned with the meaning of plural suffix.

द्वन्द्वेऽबहुषु लुम्बक्तव्यः, गर्भवत्सवाजा इति

Luk is to be enjoined in dvandva whose component members have no concern with the meaning of plural suffix.

गोत्रस्य बहुपु लोपिनो बहुबचनान्तस्य प्रवृत्ती द्येकयोरलुक्

Need to enjoin aluk to tadrāja followed by bahvarthatva when they are followed by gārapratyaya followed by the singular, or the dual, case-suffix.

गोत्रस्य बहुषु लोपिनो बहुबचनान्तस्य प्रष्टती खेकयोरलुम् वक्तत्र्यः । विदानामपत्यं माणवको वेदः, वेदी ।

There is need to enjoin aluk to tadrāja followed by bahvarthatva when they are followed by apatyapratyaya followed by the singular, or the dual, ease-suffix. Viz. Báidah (Bidānām apatyam māṇavakaḥ), Bāidāu.

किमर्थिमिदं? नाचि इत्येवालुक् सिद्धः? What is the need for this? Is not the purpose achieved by the sūtra Gōtrēslug aci (4, 1, 89)?

अचि इत्युच्यते, न चात्र अजादिं पश्यामः Aci is read and we do not see $aj\bar{a}di$ here.

प्रत्ययस्थाने By the dictum Pratyayalopē pratyayalakṣaṇam.

The dictum— $Pratyayalar{o}par{e}$ pratyayalakṣaṇam is not applicable with reference to the $kar{a}rya$ of a single letter.

एकवचनाद्विवचनान्तस्य प्रवृत्तौ बहुषु लोपो यूनि

Need to enjoin $l\bar{o}pa$ of $tadr\bar{a}ja$ when the word is singular or dual and it is followed by yuv pratyaya.

एकवचनद्विवचनान्तस्य प्रवृत्तौ बहुपु छोपो यूनि वक्तव्यः - बेदस्य अपत्यं बहवो माणवकाः - विदाः, बेदयोर्वा बिदाः; अञ्यो बहुपु यञ्यो बहुपु इत्युच्यनानो छुङ् न शामोति

It must be said that $tadr\bar{a}ja$ is dropped if the word ending in it is singular or dual and it is followed by yuvapratyaya followed by plural suffix. $Bid\bar{a}h$ ($B\bar{a}idasya$ apatyam $bahav\bar{o}$ $m\bar{a}navak\bar{a}h$), ($B\bar{a}iday\bar{o}r$ apatyam bahavah). There is no chance for the elision of $a\tilde{n}$ and $ya\tilde{n}$ which take place when it is followed by bahvarthatva.

Note:—Kāiyaṭa reads: Bidasya apatyāni bahūni ili añpratyayaḥ. Tadantād yūni Ata iñ ili iñ. Tasya Nyakṣatriyārṣa ñita iti luk.

मा मूदेवम्, अञन्तं यद् वहुपु यञन्तं यद् वहुपु इत्येवं भविष्यति
Let it not take place in the above interpretation. It does take place if it is interpreted thus:—añanta or yañanta when followed by bahvartha.

नैवं शक्यम् । इह हि दापः स्यात् - काञ्यपपतिकृतयः काञ्यपा इति
This is not possible. In that case there will be difficulty with reference to the form Kāsyapāḥ which means Kāsyapaprati-krtayah.

Note:—Kāiyaļa reads:—Kaŝyapasya apatyam gōtram iti bidāditvād añ. Tataḥ kāŝyapa iva tarpratikṛtaya ityarthē Ivē pratikṛtāu iti kanpratyayaḥ. Tasya Jīvikārthē cāpaṇyē iti vā Dēvapathādiṣvarcāsu pūjanārthāsu citrakarmadhvajēṣu iti pāṭhād vā lup. Ētad añantam bahuṣu vartatē iti luk-prasaṅgaḥ.

ततोऽयगाह - यस्य प्रत्ययार्थबहुत्वे छक् , द्वन्द्वेऽबहुपु छग्वचनमित्यस्य परिहारः ।

Hence he said Yasya pratyayārthabahutvē luk as parihāra to Drandvēsbahusu lugvacanam.

न वा सर्वेषां द्वन्द्वे बह्वर्थत्वात्

This need not be since all component parts in dvandva are associated with bahvarthatva.

न वैष दोषः This difficulty does not arise.

किं कारणम् ? Why?

सर्वेषां द्वन्द्वे वहर्थत्वात - सर्वाणि द्वन्द्वे बहर्थानि

On account of all component parts in drandva being associated with bahvarthatva. All component parts in dvandva are associated with bahvartha.

कथम् ! How ?

युगपदिधकरणविवक्षायां द्वन्द्रो भवति

Dvandva takes place only when there is vivakṣā for the simultaneous ēkādhikaranavrtlitva,

ततोऽयमाह - यस्य बहुवचने परतो छुक्, यदि सर्वाणि द्वन्द्वे बहुर्थानि अहमपीदमचोद्यं चोद्ये - द्वन्द्वेऽबहुपु छुम्बचनिमिति, ममापि छत्र सर्वत बहुवचने परंभवति

Then says he who holds the bahuvacanapratyayapakṣa. "If all the component parts of dvandra are bahvartha, I too was found fault with where I should not be found fault with, since bahuvacana follows here in my opinion too".

लुकि कृते न श्रामोति There is no chance when there is luk.

प्रत्ययलक्षणेन भविष्यति

It will, from the dictum Pratyayalopē pratyayalakṣaṇam.

न छुमता तासिन् इनि प्रत्ययसक्षणस्य प्रतिपेधः

There is pratiṣēdha to pratyayalakṣaṇa from the dictum 'Na lumatā tasmin'.

न छमताङ्गस्य इति वक्ष्यामि 1 shall read Na lumatānigasya

ननु चोक्तं नैवं शक्यम् इह हि दोष. स्य.त् - पञ्चिभः गार्गीभिः कीतः पटः पञ्चगार्ग्यो दशगार्ग्य इति ।

Oh, it was said that it is not possible to interpret it in that manner, since there will be difficulty here in securing the form $Pa\tilde{n}cag\tilde{a}rgya\dot{h}$ whose $vigrahav\tilde{a}kya$ is $pa\tilde{n}cabhi\dot{h}$ $g\bar{a}rg\bar{a}bhi\dot{h}$ $kr\bar{a}ta\dot{h}$ paṭah and $Da\dot{s}ag\bar{a}rgya\dot{h}$.

इष्टमेवैतत् सङ्गृहीतम् - पञ्चगर्गो दशर्गा इत्येव भवितन्यम् lt was conceded that the forms might be pañcagargaḥ and daśagargaḥ.

तथेदमंपरमचोद्यं चोद्ये - गर्गरूप्यं गर्गमयम् - अत्रापि बहुवचन इत्येव सिद्धम् Similarly I was questioned with reference to gargarūpyam and gargamayam, which I do not deserve, since it is secured from the mention of bahuvacanē.

कथम्? How?

समर्थात्तद्भित उत्पद्यते । सामर्थ्यं च सुवन्तेन । Taddhitapratyaya makes its appearance after samartha. There is sāmarthya with subanta.

ततोऽयमाह यस्य प्रत्ययार्थवहुत्वे छुक्, यदि समर्थाचिद्धित उत्पद्यतेऽह्मपीद-मचोद्यं चोद्ये 'गोत्रस्य वहुपु लोपिनो वहुवचनाःतस्य प्रवृत्तो द्येक्रयोरछक्' इति Then says he who holds bahuvacanapratyayārthapakṣa that he need not be questioned with reference to Gōtrasya bahuṣu lōpinō bahuvacanāntasya pravṛttāu dvyēkayōr aluk.

Note:—Kāiyaļa reads:- Yō hi ubhayōr dōṣō na tam ēkaś cōdyaḥ.

कथम १ How?

यस्यापि बहुवचने परतो लुक् तेनाप्यतालुग् वक्तव्यः । तस्यापि ह्यत्र बहुवचनं परं भवति

Aluk must be enjoined even by him who holds bahuvacanapratyayapaksa, since bahuvacana is here para even to him.

न वक्तव्यः, अचि इत्येवालुक् सिद्धः

No, it need not be enjoined. The object -aluk is achieved by the mention of aci (in the $s\bar{u}tra$ $G\bar{o}tr\bar{e}slug$ aci (4, 1, 89).

अचीत्युच्यते, न चात्राजादिं पश्यामः

There is mention of aci; but we do not see here ajādi.

प्रत्ययसक्ष<u>ण</u>ेन

It is secured by the dictum Pratyayalope pratyayalakṣaṇam,

नन चोक्तं वर्णाश्रये नास्ति प्रत्ययरुक्षणम् इति

Oh, it was said that Pratyayalopē pratyayalakṣaṇam does not operate when the vidhi relates to varṇa.

यदि वा कानि चिद्धणीश्रयाण्यपि प्रत्ययलक्षणेन भवन्ति तथेदमपि भविष्यति । If some vidhis relating to varņa operate on the operation of the dietum Pratyayalōpē pratyayalakṣaṇam, this too follows them.

अथ वाविशेषणालुकमुक्तवा हलि न इति वक्ष्यामि

Or I shall read the sūtra Hali na after enjoining aluk as a general rule.

यद्यविशेषेणालुकमुक्त्या हलि न इत्युच्यते, विदानामपत्यं बहवी माणवकाः विदाः, अत्राप्यलुक् प्रामोति

If aluk is enjoined as a general rule and then $Hali\ na$ is read, there is chance for aluk in the word $Bid\bar{a}h$ meaning $Bid\bar{a}n\bar{a}m$ apatyam $bahav\bar{o}$ $m\bar{a}navak\bar{a}h$.

अस्तु । पुनरस्य युवबहुत्वे वर्तमानस्य छुग्भविष्यति
Let it be. Luk, afterwards, sets in there by the sūlra Yañañōś ca (2, 4, 61) which relates to yuvabahutva.

पुनरलुक्कसान्न भवति ? Why cannot aluk set in afterwards ?

समर्थानां प्रथमस्य गोत्रप्रत्यययान्तस्यालुगुच्यते, न चैतत् समर्थानां प्रथमं गोत्रप्रत्ययान्तम् ।

Aluk is enjoined to the first gotrapratyaya which is samartha and this does not end in the gotrapratyaya which is first among samarthapratyayas.

Note:—Kāiyaṭa reads:—Prāthamakalpikē ca pratyayārthē vartamānasya prāthamyam. Yathā Gārgīyā iti. Atra yuva-pratyayasya luki kṛtē yuvalakṣaṇam dvitīyam artham upa-saṅkrāntōsñantaḥ śabda iti prāthamyābhāvaḥ.

किं तर्हि ! What then?

द्वितीयमर्थमुपसङ्कान्तम् It has reference to dvitīya-artha.

अवर्यं चतदेवं विज्ञेयम् - अत्रिभरद्वाजिका, वसिष्ठकर्यापिका, भृग्विङ्गरिसका, कुत्सकुशिकिका इत्येवमर्थम् ।

This interpretation is necessary, so that the forms $Atri-bharadv\bar{o}jik\bar{a}$, $Vasiṣṭha-Kaśyapik\bar{a}$, $Bhṛgvangirasik\bar{a}$ and $Kutsa-kuśikik\bar{a}$ may be secured.

गर्गभार्गविकाग्रहणं वा नियमार्थम्

Or the reading of Gargabhargavikā is for niyama.

गर्गभार्गविकाग्रहणं वा कियते, तिन्यमार्थं भविष्यति, एतस्यैव द्वितीयमर्थ-मुपसङ्कान्तस्यालगं भवति नान्यस्य इति

सुपसङ्कान्तस्यालुग् भवांते नान्यस्य इति
Or mention is made of Garga-bhārvikā and it will serve as
niyama, that the aluk of the pratyaya which is upasankrānta
to the second artha takes place only here and nowhere else.

यद्प्युच्यते - एकवचनद्विवचनान्तस्य प्रवृत्तो बहुपु लोपो यूनि वक्तन्य इति, मा भृदेवम् - अञ्यो बहुपु यञ्यो बहुपु इति यञन्तं यहहुपु अञन्तं यहहुपु - इत्येवं भविष्यति

With reference to the statement Ekavacana-dvivacanānlasya pravṛtlāu bahuṣu lōpō yūni vaktavyaḥ, it need not be taken

thus: - añ yō bahuṣu, yañ yō bahuṣu, but it may be taken thus: - añantam yad bahuṣu, yañantam yad bahuṣu.

ननु चोक्तम् नैवं शक्यम् ; इह हि दोषः स्थात् , काश्यपप्रतिकृतयः काश्यपा इशि Oh! it was said that this is not possible, since, in that case, there will be difficulty with reference to the form $K\bar{a}\dot{s}yap\bar{a}\dot{h}$ meaning $K\bar{a}\dot{s}yap$ pratikrtaya \dot{h} .

नैप दोपः । लोंकिकस्य तत्र गोत्रस्य अहणं, न चैतद् लेंकिकं गोत्रम्
This difficulty does not arise. That has reference to lāukika-gōtra and this is not lāukika-gōtra.

यस्य बहुवचने परतो छुक्, समासबहुत्वे तेन नेति प्रतिषेघो वक्तव्यः, तेनैव चेत् कृतं बहुत्वमिति वा वक्तव्यम् । यस्य प्रत्ययार्थबहुत्वे छुक् तेनास्त्रियामिति वक्तव्यम् । यस्य बहुवचने परतो छुक् तस्यायमधिको दोषः, अत्रय इति उदाच-निवृत्तिस्वरः प्रामोति । तस्मात् प्रत्ययार्थबहृत्वे छुग् इत्येष पक्षो ज्यायान् ।

By him who holds that luk takes place when plural suffix follows, either samāsabahutvē pratiṣēdhaḥ or Tēnāiva cēt kṛṭam bahutvam has to be read; and by him who holds that luk takes place when bahuvacana pratyayārtha follows, Astriyām has to be read. There is this additional defect that the udāttanivṛttisvara will appear in Atrayaḥ in the pratyaya-paratva-pakṣa. Hence the pakṣa pratyayārthabahutvē luk is better,

अथ इह कथं भवितव्यम् - गार्गी च वात्स्यश्च वाज्यश्च इति ? यदि तावदस्त्री विधिनार्श्रायते अस्त्यत्रास्त्रीति कृत्वा भवितव्यं छका । अथ स्त्री प्रतिषेधेनाश्चीयते अस्त्यत्र स्त्रीति कृत्वा भवितव्यं प्रतिषेधेन ।

What is to happen here in Gārgī ca Vālsyaś ca Vājyaś ca? If astriyām is taken to be paryudāsa, there is chance for luk, taking that there is astrī here and if it is taken as prasajya-pratiṣādha, there is chance for pratiṣādha taking that there is strī here.

कि पुनरत्रार्थसतत्त्वम् What is the truth here?

देवा एतद् ज्ञातुमहन्ति

It is only the learned men that have to decide,

अथ यो लोप्यलोपिनां समासस्तत्र कथं भवितव्यम्?

What should happen in the case of samāsa where some of whose component members allow lopa and some do not?

उभयं हि दृश्यते - शरद्वच्छुनकद्रभाद्भृगुवत्साश्रायणेषु, नोदात्तस्वरितोदय-मगार्भ्यकार्यपगालवानाम् इति

Both are seen, as in Śaradvac-chunakadarbhād bhṛguvatsāgrā yanēsu (4, 1, 102) and Nodattasvaritodayam agārgyakāsyapa-gālavānām (8, 4, 67).

Note: -Kāiyata says there is luk in bhrgu and vatsa of the former and it is absent in $g\bar{a}rgya$ and $k\bar{a}syapa$ of the latter.

यनगेश्च (12, 4, 64)

यञादीनामेकद्वयोवी तत्पुरुषे पष्ट्या उपसङ्ख्यानम्

There is need to read Yajñādīnām ēkadvayōr vā tatpuruṣē sasthyāh.

यञादीनामेकद्वयोवी तत्पुरुषे पष्ठ्या उपसङ्ख्यानं कर्तव्यम् - गार्थस्य कुलं गार्ग्यकुलं गरीकुलं वा, गार्ग्ययोः कुलं गार्ग्यकुलं गरीकुलं वा; वैदस्य कुलं वैदकुलं विद्कुलं वा; घेद्योः कुलं वेद्कुलं विद्कुलं वा

There is need to enjoin luk with reference to sasthitatpurusa also where the former member is yañanta or añanta and is singular or dual so that Gargyasya kulum may compound into Gārgyakulam or Gargakulam and Gārgyayōh kulam compound into Gārgyakulam or Gargakulam; Bāidasya kulam may compound into Bāidakulam or Bidakulam ann Bāidayōḥ kulam may compound into Bāidakulam or Bidakulam.

यञ दीनामिति किमर्थम ?

Why is Yañādīnām read in the vārttika?

आङ्गस्य कुरुम् आङ्गकुरुम्, आङ्गदोः कुरुम् आङ्गकुरुम्

Since Angasya and kulam compound into angakulam and Āngryāh and kulam into āngakulam.

एकद्वयोरिति किमर्थम्? Why is ēkadvayōḥ read?

गर्गाणां कुलं गर्भकुलम्

So that Garganam and kulam may compound into Gargakulam.

तत्पुरुप इति किमर्थम् ? Why is talpuruse read?

गार्ग्यस्य समीपम् उपगार्ग्यम्

So that $G\bar{a}rgyasya$ and $sam\bar{\imath}pam$ may compound into $upa-g\bar{a}rgyam$.

पप्ट्या इति किमर्थम्? Why is şaṣṭhyāḥ read?

शोभनगार्थः, पर्मगार्थः

There is no luk in the $pratham\bar{a}$ -tatpuruṣa like śōbhanagārgyaḥ and $paramag\bar{a}rgyaḥ$.

बह्नच इञः प्राच्यभरतेषु (2, 4, 66)

किमयं समुचयः प्राक्षु च भरतेषु च इति, आहोस्विद् भरतिवेशेपणं प्राम्प्रहणं प्राच्चो ये भरता इति?

Is prācyabharatēņu dvandvīsamāsa or prathamā-tatpuraņasamāsa?

कि चातः? What does it matter if it is either?

यदि समुचयो भरतग्रहणमनर्थकं, न ह्यन्यत्र भरताः सन्ति । अथ प्राग्यहणं भरतविशेषणं, प्राग्यहणमनर्थकं, न ह्यप्राञ्चो भरताः सन्ति ।

If it is dvandva, bharala need not be read; for Bharalas are not found except in the east. If it is prathamā-tatpuruṣa, prāk is unnecessary; for there are no bharalas who do not live in eastern countries.

एवं तर्हि समुचयः If so, it is dvandva.

ननु चोक्तं भरतग्रहणमनर्थदं न धन्यत्र भरताः सन्तीति

Oh, it was said that the word bharata then is unnecessary since bharatas are not found elsewhere.

नानर्थकम् ; ज्ञापकार्थम्

It is not unnecessary; it is used to suggest something else.

किं ज्ञाप्यते? What is suggested?

एतद् ज्ञापयत्याचार्थे अन्यत्र प्राग्यहणे भरतग्रहणं न भवति इति । $\bar{A}c\bar{a}rya$ suggests that $pr\bar{a}k$, elsewhere, does not refer to Bharatas ?

किमेतस्य ज्ञापने प्रयोजनम् ?

What is the benefit of this $j ilde{n}ar{a}pana$?

इञः प्राचाम्, भरतग्रहणं न भवति; औद्दालिकः पिता, औद्दालकायनः पुत्रः इति

Bharatas are not taken into account in the application of the sūlra Iñaḥ prācām (2, 4, 60) so that the father is Āuddālakiḥ and the son is Auddālakāyanah (and not Auddālakih).

न गोपवनादिभ्यः (2, 4, 67)

गोपवनादिप्रतिषेधः प्राग्घरितादिभ्यः

The pratisēdha Na gopavanādibhyah stops before Haritādibhyos- $\tilde{n}ah$ (4, 1, 100).

गोपवनादिभ्यः प्रतिषेधः प्राग्घरितादिभ्यो द्रष्टन्यः हारितः, हारितौ ; बहुषु हरिताः

The pratisēdha with reference to Gōpavanādi ceases to operate before the sūtra Haritādibhyōsñah to secure hāritah and hāritāu in the singular and the dual and haritah in the plural.

उपकादिभ्योऽन्यतरसामद्रन्दे (2, 4, 69)

किमधेमद्वन्द्व इत्युच्यते ? Why is advandve read?

द्वन्द्वे मा भूदिति To prevent the operation in dvandva.

नैतद्स्ति प्रयोजनम् , इप्यते एव द्वन्द्वे - अप्र्क्तकिषष्ठलाः, अप्राक्तिकापिष्ठलय इति This is not the benefit. It is desired to operate in dvandva, as in bhrāstrakakapisthalāh and bhrāstrakikāpisthalayah.

अत उत्तरं पटति He (Vārttikakāra, answers this:—

अद्दन्द्व इति द्वन्द्वाधिकारिनवृत्त्यर्थम्

Reading of advandvē is for the nivṛtti of dvandvādhikāra.

अद्व-द्व इत्युच्यते । द्व-द्वाधिकारिनवृत्त्यर्थम् - द्व-द्वाधिकारो निवर्त्यने, तस्मि-न्निवर्त्तेऽविशेषेण द्वन्द्वे च अद्वन्द्वे च भविष्यति ।

Advand $v\bar{e}$ is read. For the sake of the niviti of dvand $v\bar{a}dhik\bar{a}ra$. Dvand $v\bar{a}dhik\bar{a}ra$ is made to recede. When it recedes, it operates both with reference to dvandva and non-dvandva.

Note:— $K\bar{a}iyata$ notes that $adh^ik\bar{a}ra$ here does not refer to the technical one, but to that current in the world (i.e.) $ap\bar{e}ks\bar{a}-laksana$.

आगस्त्यकाण्डिन्ययोरगस्तिक्रण्डिनच् (2, 4, 70)

आगस्त्यकाण्डिन्ययोः प्रकृतिनिपातनम्

Need to read prakrtēh in the sūtra.

आगस्त्यकैण्डिन्ययोः प्रकृतिनिपातनं कर्तेन्यम् । अगस्ति कृण्डिन ज् इत्येतै। प्रकृत्यादेशो भवत इति वक्तन्यम्

There is need to read prakṛtēḥ in the sūtra. It must be read that Agastya and Kuṇḍinac are the ādēšas of the prakṛti alone.

किं प्रयोजनम्? Why?

लुक्प्रतिषेधे वृद्धचर्थम्

For the sake of vrddhi at the pratisedha of luk.

लुक्पतिषेघे वृद्धिर्यथा स्यात् To allow vṛddhi at luk-pratisedha.

Note:—Kāiyaļa reads:—Gōtrēslug aci iti luki pratiṣiddhē talsanniyōgašiṣṭasya ādēšasyāpi abhāva iti āgastyašabdūt chaḥ siddhyati.

प्रत्ययान्तनिपातने हि चृद्धचभावः

Absence of vṛddhi only if ādēša is for pratyayānta.

प्रत्ययान्तिनिपातने हि सित वृद्धचभावः स्यात्, आगरतीयाः कौण्डिना इति ; यदि प्रकृतिनिपातनं कियते केनेदानीं प्रत्ययस्य लोपो भविष्यति ?

There will no vṛddhi only when the ādēša replaces pratyayānta. Viz. Āgastīyāḥ, Kāuṇḍināḥ. If the ādēša replaces prakṛti alone, which will effect the pratyaya to elide?

अधिकारात्प्रत्ययलोपः Pratyayalõpa is from adhikāra.

अधिकारात् प्रत्ययलोपो भविष्यति Pratyaya elides from adhikāra.

NOTE:— $K\bar{a}iyata$ says that there is $adhik\bar{a}ra$ for luk and it elides.

तत्ति प्रकृतिनिपातनं कर्तव्यम्

If so, prakrtēh must be read in the sūtra.

न क्तेंच्यम्? No, it need not.

'योगविभागात्सिद्धम्

The object is achieved through sūtra-split.

योगविभागः करिष्यते आगस्त्यकौण्डिन्ययोः - आगस्त्यकौण्डिन्ययोर्वहुषु छुग् भवति । ततः अगस्तिकुण्डिनच् - अगस्तिकुण्डिनच् इत्येतोः च प्रकृत्यादेशो भवत आगस्त्यकैण्डिन्ययोरिति !

The sūtra is split into two:—First sūtra is Āgastya-Kāuṇḍinya-yōḥ, which means that there is luk when Āgastya and Kāuṇ-dinya are followed by plural suffix. Then is the sūtra Agastikuṇḍinac read, which means that Agasti and Kuṇḍinac are the ādēśas of the prakrti of Āgastya and Kāuṇḍinya.

एवमपि शत्ययान्तयोरेव प्राप्तोति । प्रत्ययान्ताद्धि भवान् षष्ठी ५ चार्यति आगस्त्यकाण्डिन्ययोरिति

Even then it may happen only to the pratyayānta in both. For you pronounce $sasth\bar{\imath}$ only after the pratyayānta in $\bar{A}gastya-k\bar{a}undinyay\bar{\imath}h$.

नेप दोप. । यथा परिभाषितं प्रत्ययस्य छुक्र्इछुषो भवन्तीति प्रत्ययस्यैव भविष्यति, अवशिष्टस्यादेशौ भविष्यतः

This difficulty does not arise. There is luk only to the pralyaya since it is so read in Pralyayasya lukślulupah and the ādēśas replace the parts which are left out.

यङोड च (2, 4, 74)

ऊतोडचि Need to read ūlalı qualifying yan.

ऊतोऽचीति वक्तव्यम् - इह मा भूत् सनीस्त्रसो, दनीध्नस इति Ttah must be read to qualify yan, to prevent the elision of yan in sanīsrasah and danīddhvasah.

अथ ऊत इत्युच्यमाने इह कस्मान्न भवति - योयूयः, रोह्नयः If $\bar{u}tal_{!}$ is read, which prevents the elision of yai in $y\bar{v}y\bar{u}yal_{!}$ and $r\bar{v}r\bar{u}yal_{!}$?

विहितविशेषणम्कारप्रहणम् - ऊकारान्ताची विहित इति $\overline{U}k\bar{a}ra$ is taken to be $vihitaviś \bar{e} sana$ in the sense, that which is enjoined after $\bar{u}k\bar{a}r\bar{a}nta$.

तत्ति वक्तव्यम् It must, then, be read.

न वक्तव्यम् । इष्टमेवैतत्संगृहीतं, सनीसंसो दनीध्वंस इत्येव भवितव्यम् । No, it need not. The forms sanīsramsah and danīdhvamsah are the desired ones.

गातिस्थाघुपाभूम्यः सिचः परसौपदेषु (2, 4, 77)

गापोर्महणे इण्पिबत्योर्महणम्

It must be read that $g\tilde{a}$ and $p\tilde{a}$ respectively refer to the roots in and $p\tilde{a}$ taking the $\tilde{a}d\tilde{e}\hat{s}a$ pib.

गापोर्भहणे इण्पिनत्योर्भहणं कर्तन्यम् । इणो यो गाशन्दः, पिनतेर्यः पाशन्द इति वक्तन्यम्; इह मा भूत् अगासीन्नटः, अपासीद्धनम् इति

It is necessary to read $in\text{-}pibaty\bar{o}h$ qualifying $g\bar{a}p\bar{o}h$ so that the elision of sic appears after $g\bar{a}$, the $\bar{a}d\bar{e}sa$ of in and $p\bar{a}$, which takes the $\bar{a}d\bar{e}sa$ pib and not in $ag\bar{a}s\bar{\imath}t$ and $ap\bar{a}s\bar{\imath}t$ in $ag\bar{a}s\bar{\imath}nnatah$ and $ap\bar{a}s\bar{\imath}ddhanam$.

तत्ति वक्तव्यम् It must then be read.

न बक्तन्यम् । इणो महणे ताबद्वाचिम्; निर्देशादेव न्यक्तं छः विकरणस्य महणमिति । पामहणे चापि वार्चम्; उक्तमेतत् सर्वत्रेय पामहणेऽछु विकरणमहणमिति । No, it need not be read. There is healthy sign that it refers to in alone, since $g\bar{a}ti$ clearly suggests that it belongs to the second conjugation. There is healthy sign that $p\bar{a}$ also refers

to that which takes the ādēśa pib, since it was noted that pā everywhere refers to that of the alugvikarana.

तनादिभ्यस्तथासोः (३, 4, 79)

तथासोरात्मनेपदवचनम्

Need to read ātmanēpada as the adjunct of ta and thās.

तथासोरात्मनेपदस्य प्रहणं कर्तब्यम् - आत्मनेपदं यौ तथासाविति वक्तब्यम्
There is need to qualify of tathāsāḥ by ātmanēpada. Ta and thās must be stated to belong to ātmanēpada.

एकवचनग्रहणं वा

Or is the need to qualify them by ēkavacana.

अथ वा एकवचने ये तथासी इति वक्तव्यम्

Or it must be read that ta and thas which are singular are referred to here.

तचावश्यमन्यतरत् कर्तव्यम्

Hence it is absolutely necessary to read either.

अव्चने ह्यानिष्टप्रसङ्गः

For it will land us in difficulties if it is not read.

अनुच्यमाने हि एतसिन्ननिष्टं प्रसज्येत - अतिष्ट यूयम् , असिन्ष्ट यूयम् इति । If either is not read, there will be difficulty in arriving at the forms atanista yūyam and asanista yūyam.

तचिह वक्तज्यम् ! Is it then to be read?

न वक्तव्यम् । यद्यपि तावद्यं तश्चदो हप्टापचारः अस्ति आत्मनेपदम्, अस्त्येव परसोपदम्, अरत्येकवचनम्, अस्ति बहुवचनम्, अयं तु खलु थास्श्रव्दोऽ- हप्टापचार आत्मनेपदमेकवचनमेव च । तस्यास्य कोऽन्यः सहायो भवितुमर्हत्यन्यदत आत्मनेपदादेकवचनाच । तद्यथा - अस्य गोर्द्रितीयेनार्थ इति गारेवानीयते नाश्चो न गर्दभ इति ।

No, it need not be read. Even though the range of la is wide since it stands as both $\tilde{a}tman\tilde{e}pada$ and $parasm\tilde{a}ipada$, termination and as singular and plural, the range of $th\tilde{a}s$ is restricted

to $\bar{a}tman\bar{e}pada$ and singular. Which deserves to be in association with it other than that which is $\bar{a}tman\bar{e}pada$ and singular? It is analogous to this:—If one says that he wants a second to a cow on hand, only a cow is fetched and not a horse nor an ass.

आम: (2, 4, 81)

आमा लेलोंपे लुङ्लोटोरुपसङ्ख्यानम्

If there is lopa for li after am, there is need to add lun and lot.

आमो हेरोंपे छुङ्छोटोरुपसङ्ख्यानं कर्तव्यम् - तां वैजवापयो विदामकन्, अत्र भवन्ता विदाङ्गर्वन्तु

If there is $l\bar{o}pa$ for li after $\bar{a}m$, there is need to add $lu\dot{n}$ and $l\bar{o}t$ (in the $s\bar{u}tra$ $Kr\tilde{n}c\bar{a}nuprayujyat\bar{e}$ liti 3, 1, 40), so that the forms $vid\bar{a}m$ -akran, $vid\bar{a}\dot{n}$ -kurvantu in the expressions $V\bar{a}ija$ - $v\bar{a}pay\bar{o}$ $vid\bar{a}makran$, Atra $bhavant\bar{o}$ $vid\bar{a}\dot{n}kurvantu$ may be secured.

Note:—This arises on the understanding that there is anuvrtti for $l\bar{\epsilon}h$ from the previous $s\bar{u}tra$ Mantr $\bar{\epsilon}$ ghasa janibhy \bar{o} $l\bar{\epsilon}h$ (2, 4, 80) & it refers to lit.

तत्ति वक्तन्यम् It must, then, be read.

न वक्तव्यम् ; लिश्रहणं निवर्तिष्यते

It need not be read; Leh is not taken here by anuvrtti.

यदि निवर्तते प्रत्ययमात्रस्य छुक् प्रामोति

If, it recedes, there is chance for luk of any pratyaya that follows it.

इप्यत एव प्रत्ययमात्रस्य । आतश्चेष्यते, एवं ह्याह क्रञ्चानुप्रयुज्यते लिटि इति The luk of any pratyaya is desired for. It is desired from this fact also that Ācārya has read the sūtra Krūcānuprayujyatē liţi.

यदि च प्रत्ययमात्रस्य छुग्भवति तत एतद्पपन्नं भवति

If the luk is allowed to any prutyaya, this may be considered to be free from defect.

आमन्तेभ्यो णलः प्रतिपेधः

There is need to prohibit the luk of nal after amanta.

आमन्तेभ्यो णलः प्रतिषेधो वक्तव्यः - शशान, तताम ; वृद्धौ कृतायामाम इति छुक् प्रामोति ।

There is need to prohibit the luk of nal after \bar{a} mantas. instance, after vrddhi takes place in śaśāma and tatāma, a after ām may be dropped by the sūtra Āmaḥ.

आमन्तेभ्योऽर्थवद्भहणाण्णलोऽप्रतिषेधः

There is no need to prohibit the luk of nal after $\bar{a}m$, since the $s\bar{u}ira$ Amah is concerned with $\bar{a}m$ which has a meaning for itself.

आमन्तेभ्योऽभैवद्भर्णाण्णलोऽपतिषेधः । अनर्थकः प्रतिषेधः अप्रतिषेधः

No purpose is served by enjoining the pratisedha of nal after \bar{a} manta, since only the \bar{a} m which has meaning is taken here into account.

लुक् कस्मान्न भवति शशाम, तताम इति ?

Why is there no room for luk in śaśāma and tatāma?

अर्थवद्गहणात् । अर्थवतः आम्शब्दस्य ग्रहणम्, न चैषोऽर्थवान् Since $\bar{a}m$ which has meaning is taken here. Am which has meaning is taken into account and $\bar{a}m$ in $\dot{s}a\dot{s}\bar{a}ma$, $tat\bar{a}ma$ has no meaning for itself.

Note: $-K\bar{a}iyata$ says that $\bar{A}m$ pratyaya is used in $sv\bar{a}rtha$.

आमन्तेभ्योऽर्थवद्घहणाण्णलोऽप्रतिषेध इति चेदमः प्रतिषेधः

If the pratisēdha of luk of nal after āmanta is unnecessary from arthavadgrahana, there is need for the pratisēdha of luk of nal after the root am.

आमन्तेभ्योऽर्थद्रहणाण्णलोऽप्रतिषेध इति चेदमः प्रतिषेधो वक्तव्यः - आम If the pratisedha of luk of nal after \bar{a} manta is unnecessary on account of arthavadgrahana. the pratisēdha of luk of nal after the root am is needed for.

टक्तं वा. It has been answered.

किमुक्तम् ? How has it been answered ?

सन्त्रिपातलक्षणो विधिरनिमित्तं तद्विघातस्य इति

The rule bringing out the combination of two things never destroys it.

Note:—Final a made the root am become $\bar{a}m$ and hence $\bar{a}m$ cannot destroy \bar{a} .

किं पुनर्हुग् आदेशानामपवादः, आहोस्वित् क्वतेष्वादेशेषु भवति ! Does luk operate before lukāras take their ādēsas or after it ?

छुगादेशापवादः Luk serves as the apavāda of ādēśas.

लुग् आदेशानामपवादः Luk serves as the apavāda of ādēšas.

तिङ्कृताभावस्तु If so, the kāryn of tin will be absent.

तिङ्कृतस्य तु अभावः Absence of the kārya of tiin.

कस्य ? Of which ?

पदत्वस्य Of padatva.

सुनन्त्रपद्त्वात्सिद्धम् Pudatva is secured through subantatva.

सुबन्तं पद्मिति पद्मंज्ञा भविष्यति

Padasanijñā is seeured by Subantam padam.

कथं खाद्यलितः ! How will sup appear there ?

लकारस कृत्यात् प्रातिपदिकत्यं तदाश्रयं प्रत्ययिधानम्

It is prātipadika, lakāra being krt. It gets sup on that basis.

लकारः कृत्; कृत्पातिपदिकामिति प्रातिपदिकसंज्ञा, तदाश्रयं प्रत्ययविधानं प्रातिपदिकाश्रयत्वात् स्वाद्युरात्तिभविष्यति ।

Lakāra is krt; lakārānta gets prātipadikasainjāā by the sūtra Krt-taddhita-samāsās ca (1, 2, 46). Appearance of sup depends upon prātipadikatva. Sup, having for its āsraya the prātipadika, appears.

यदेवं, सुपः श्रवणं प्राप्तोति If so, sup may present itself-

अज्ययादिति समिविष्यति

It disappears by Avyayūdāp supah (2, 4, 82.)

कथमन्ययस्वम् ? How does it get avyaya-samjñā?

अव्ययत्वं मकारान्तत्वात

It gets avyayatva on account of its ending in m.

कृदन्तं मान्तमव्ययसंज्ञं भवतीति अव्ययसंज्ञा भविष्यति

It gets avyayasamj $\tilde{n}\tilde{a}$ since it is krdanta and mānta (by the sūtra Krnmējantah 1, 1, 39)

स्वरः कथम् यत्प्रकारयाञ्चकार ?

On what basis does pra in yatprakārayāñ cakāra get its svara (anudāttatva)?

Note: -Kāiyaṭa says that pra is anudātta by Tini Cōdāttavati (8, 1, 71) when tip etc. is elided.

खरः कदन्तंप्रकृतिखरत्वात

It gets its svara since krdanta, the following member of compound, takes its prakrtisvara.

कुदन्तमुत्तरपदं प्रकृतिस्वरं भवतीत्येष स्वरो भविष्यति

The svara is secured on the strength of the statement Krdantam uttarapadam prakrtisvaram bhavati.

तथा च निघातानिघातसिद्धिः

Hence are nighātatva and anighātatva secured.

तथा च निघातानिघातसिद्धिर्भवति - चक्षुष्कामं याजयांचकार - तिङ्ङतिङ इति तस्य चानिवातः, तसाच निवातः सिद्धो भवति

Hence both anighātatva and nighātatva are yājayāncakāra of the sentence cakṣuṣkāmam yājayāncakāra, ām, being followed by tin does not get nighātatva and cakāra gets it, since it is not followed by tin.

नञा तु समासप्रसङ्गः

There is chance for it to compound with nañ.

नञा तु समासः प्राप्तोति - न कारयाम्, न हारयाम्; नञ् धुवन्तेन सह समस्यत इति समासः प्रामोति

There is chance for $\bar{a}manta$ to compound itself with $na\tilde{n}$, so that na $k\bar{a}ray\bar{a}m$ and na $h\bar{a}ray\bar{a}m$ may compound into $ak\bar{a}ray\bar{a}m$ and $ah\bar{a}ray\bar{a}m$ on the strength of $Na\tilde{n}$ subantēna saha samasyatē,

उक्तं वा It has been answered.

किमुक्तम् ? How has it been answered?

असामध्योदिति - नात्र नञ आमन्तेन सामध्यम्

On account of $as\bar{a}marthya$. There is no $s\bar{a}marthya$ for $na\tilde{n}$ to compound itself with $\bar{a}manta$.

केन तर्हि ? With what then ?

लिडन्तेन - न चकार कारयाम्, न चकार हारयाम् इति

With lidanta thus:-Na cakāra kārayām, na cakāra hārayām.

अन्ययादाप्सुपः (2, 4, 82)

अन्ययादापा छुग्वचनानर्थक्यं लिङ्गाभावात

Injunction of luk of $\bar{a}p$ after avyaya is of no use on account of the absence of linga.

अन्ययादापो लुग्वचनमनर्थकम्

Injunction of luk of ap after avyaya is of no use.

किं कारणम् ? Why?

लिङ्गाभावात् - अलिङ्गमञ्ययम्

On account of the absence of linga. Avyrya denotes no gender.

िक्तिमदं भवान् सुपो छकं मृष्यत्यापो न मृष्यति, यथैव सिलिङ्गमन्ययम् । प्रवमसङ्ग्रचमपि १

How is it you tolerate the luk of sup and not that of $\bar{a}p$? As avayaya does not denote gender, it does not denote number too.

सत्यमेवमेतत् । प्रत्ययन्धाणमाचार्यः प्रार्थयमानः सुपो छकं मृष्यति, आपः पुनरस्य हिक सिन न किञ्चिः (पि प्रयोजनमन्ति ।

It is quite true. $\bar{A}c\bar{a}rya$ tolerates the luk of sup since he wants to apply the principle $Pratyayal\bar{o}p\bar{e}$ pratyayalakṣaṇam. No purpose is served by the luk of $\bar{a}p$.

उच्यमानेऽप्येतस्मिन् खाद्यत्विन प्राप्नोति

Even though it is enjoined here, sup will not appear here,

किं कारणम् Why?

एकत्वादीनामभावात् । एकत्वादिष्वेषेषु स्वादयो विधीयन्ते, न वैषामेकत्वादयः सन्ति ।

On account of the the absence of $\bar{e}katva$ etc. $Sv\bar{a}dis$ are enjoined when $\bar{e}katva$ etc. have to be denoted and $\bar{e}katva$ etc. have no chance to be associated with avyaya.

अविशेषणोत्पद्यन्ते, उत्पन्नानां नियमः क्रियते

All the sups are enjoined together and then one of them is restricted.

अथ वा प्रकृतानर्थानपेक्ष्य नियमः क्रियते

Or niyama is enjoined with reference to the objects on hand.

के च प्रकृताः ? What are the objects on hand?

एकत्वादयः । एकिस्मन्नवैकवचनं न द्वयोर्ने बहुषु । द्वयोरेव द्विवचनं नैकासिन्न बहुषु । बहुप्वेव बहुवचनं नैकस्मिन् न द्वयोरिति ।

Ekatva etc. Ekaracana is used only to denote one and not two nor many; dviracana is used only to denote two and not one nor many; and bahuvacana is used to denote many and not one nor two.

अथ वा आचायपवृत्तिर्ज्ञापयित उत्पद्यन्तेऽज्ययेभ्यः स्वादय इति, यदयम् अन्ययादाप्सुप इति छुकं शास्ति ।

Or the procedure of $\bar{A}c\bar{a}rya$ ($S\bar{u}trak\bar{a}ra$) suggests that su etc. have a chance to appear ater avyaya since he enjoins lik of sup in the $s\bar{u}tra$ $Avyay\bar{a}d\bar{a}p$ supah.

नाव्ययीभावादतोऽस्त्वपञ्चम्याः (२, ४, ८३)

नाच्ययभावाद्त इति योगव्वसानम्

Nāvyayībhāvād ataḥ should be taken as a separate sūtra.

नाव्ययीभावादतः इति योगः व्यवसेयः; नाव्ययीभाषाद् अकारान्तात् सुपे। छुग् भवति ।

The $s\bar{u}tra$ should terminate in atah, so that the first $s\bar{u}tra$ is $N\bar{a}vyay\bar{\imath}bh\bar{a}v\bar{a}d$ atah, and it means that there is no luk to the sup which follows an $avyay\bar{\imath}bh\bar{a}va$ ending in $ak\bar{a}ra$.

ततः अस्याञ्चम्याः इति

Amtvapañcamyāh should then be taken separately.

किमर्थो योगविभागः! What for is the sūtra-split?

पश्चम्या अम्प्रतिपेधार्थम् 1 To prohibit am replacing pañcamī.

पञ्चम्या अमः प्रतिषेधो यथा स्यात

To prevent am from replacing pañcamī.

एकयोगे ह्यभयोः प्रतिपेधः

For there will be pratisēdha to both if it is taken as one sūtra.

एकयोगे हामयोः प्रतिपेधः स्यात् , अमोऽअलुकश्च

For, if it is one sūtra, both am and aluk will be prohibited.

स तर्हि योगविभागः कर्तव्यः

The sūtra has then to be split into two.

न क्रीव्यः No, it need not be split.

तुर्नियामकः The particle tu serves as niyāmakā.

तुः क्रियते, स नियामको भविष्यति, अमेवऽपञ्चम्याः

The particle tu is read and it serves as $niy\bar{a}maka$ that am alone refers to $apa\bar{n}cam\bar{i}$.

अमि पञ्जमीप्रतिषेधेऽपादानग्रहणम्

If am is prohibited to pañcamī, there is need to read apādāna as the višēṣaṇa of pañcamī.

1. Pratistdhatah is another reading.

ĀHNĪKA TWENTYEIGHT—TŖTĪYASAPTAMYŌR BAHULAM 209

अमि पञ्चमीप्रतिषेधेऽपादानग्रहणं कर्तव्यम् - अपादानपञ्चम्या इति वक्तव्यम् If am is prohibited to pañcamī, apādāna should be read as the viśēṣaṇa thus - apādānapañcamyāḥ.

किं प्रयोजनम ? Why?

कर्मप्रवचनीययुक्तेऽप्रतिषेधार्थम्

To avoid the pratisedha to the pañcamī associated with karmapravacanīya-pralyaya.

कर्मप्रवचनीययुक्ते मा भूत् - आणाटिलपुत्रं वृष्टो देवः

To avoid the pratisēdha to that which is associated with karmapravacanīya. Viz. Ā-pāṭaliputram vṛṣṭō dēvaḥ.

न वोत्तरपदस्य कर्मप्रवचनीययोगात्समासात्पश्चम्यभावः

No, it need not be read. Only the second member of the compound is associated with karmapravacaniya and not the compound and hence there is no chance for pañcamī.

न वा वक्तव्यम् It need not be read.

किं कारणम्? Why?

उत्तरपद्मत्र कर्मप्रवचनीययुक्तम् । उत्तरपदस्य कर्मप्रवचनीययोगात् समासात् पञ्चनी न भविष्यति । यदा च समासः कर्म वचनीययुक्तो, भवति तदा पञ्चमीप्रतिषेधः तद्यथा आ उपकुम्भात् , आ उपमणिकाद् इति

The second member of the compound is here associated with karmapravacanīya. Since the uttarapada has yoga with karmapravacanīya, there is no chance for pañcamī after the samāsa. If the samāsa is, on the other hand, associated with karmapravacanīya, there will be $pratisar{e}dha$ for $paar{n}camar{\imath}$. Viz. $ar{A}$ upakumbhāt and ā upamanikāt.

तृतीयासप्तम्योर्वहुलम् (२, ४, ८४)

सप्तम्या ऋद्धिनदीसमाससङ्ख्यावयवेभ्यो नित्यम्

Replacing of saptamī by am is nitya with reference to rddhi, nadīsamāsa and sankhyāvayava.

सप्तम्या ऋद्धिनदीसमाससङ्ख्यावयवेभ्यो नित्यमिति वक्तव्यम् - ऋद्धि - सुमद्रं, सुमगधम्; नदीसमास - उन्मचगङ्गं, लोहितगङ्गम्; सङ्ख्यावयव - एकविंशतिभारद्वाजं, त्रिपञ्चाशद्गौतमम् ।

It must be stated that the replacing of saptamī by am is nitya with reference to rddhi. nadīsamāsa and sankhyāvayava. Viz. Rddhi — Sumadram, sumagadham; nadī-samasa - unmattagangam, lōhitagangam; sankhyāvayava - Ēkavini satibhāradvājam tripancāsadgāutamam.

लुटः प्रथमस्य डारौरसः (2, 4, 85)

There are two topics dealt with here:— (1) Is it necessary to state that $d\bar{a}$, $r\bar{a}u$, and ras replace ta, $\bar{a}t\bar{a}m$, jha in lut by $p\bar{u}rvavipratis\bar{e}dha$ or by reading $\bar{a}tman\bar{e}pad\bar{a}n\bar{a}\tilde{n}$ ca? (2) Is it necessary for sitkarana in $d\bar{a}vik\bar{a}ra$?

Ι

टितां टेरोनिधेर्छटो डारौरसः पूर्वविप्रतिपिद्धम्

Need to state that $d\bar{a}$, $r\bar{a}u$ and ras replace $t\bar{e}$, $it\bar{e}$, $ant\bar{e}$ secured by the $s\bar{u}tra$ Tita $\bar{a}tman\bar{e}pad\bar{a}n\bar{a}m$ $t\bar{e}r\bar{e}$ (3, 4, 79) by $p\bar{u}rvavipratis\bar{e}dha$.

टितां टेरोविधेर्छुटो डारीरसो भवन्ति पूर्वविश्वतिषेधेन । टेरेत्वस्यावकाशः -पचते पचेते पचन्ते । डारीरसामवकाशः, श्वः कर्ता, श्वः कर्तारा, श्वः कर्तारः । इहोभयं प्रामोति - श्वोऽध्येता, श्वोऽध्येतारा, श्वोऽध्येतारः इति - डारीरसो भवन्ति पूर्वविष्ठतिषेधेने ।

Dārāurasāh operates in preference to Tita ātmanēpadānām ļērē (3, 4, 79) by pūrvavipratiṣēdha. The sūtra Tita ... ļērē operates with reference to pacatē, pacētē and pacantē, Dārāurasah operates with reference to kartū (śvaḥ), kartūrāu (śvaḥ) and kartūrah (śva). Here in adhyētū (śvaḥ), adhyētūrāu (śvaḥ) and udhyētūrah (śvaḥ), both have room to operate and arūurasaḥ operates by pūrvavipratiṣēdha.

स तर्हि पूर्वविष्ठानिषेषा वक्तव्यः

Pūrvavipratisidha is, then, to be enjoined.

न वक्तव्यः No, it need not be enjoined.

आत्मनेपदानां चिति वचनात्सिद्धम्

It is accomplished by reading Atmanepadanañ ca.

आत्मनेपदानां च डारौरसो भवन्तीति. वक्तव्यम्

It must be read that Pā, rāu and ras replace ātmanēpada terminations also.

तच समसङ्ख्यार्थम्

It is for the sake of the same number in sthānin and in ādēśa,

तचावरयमात्मनेपद्रमहणं कर्तव्यं समसङ्ख्यार्थम्, सङ्ख्यातानुदेशो यथा स्यात् । अक्रियमाणे ह्यात्मनेपद्रग्रहणे षट् स्थानिनः त्रय आदेशाः । वैषम्यात् सङ्ख्यातानुदेशो न प्राप्नोति ।

Ātmanēpadānāñ ca must necessarily be read for the sake of having the same number both in sthanin and in adēśa, so that one may replace another respectively. $pad\bar{a}n\bar{a}\tilde{n}$ ca is not read, there will be six $sth\bar{a}nins$ and there Since they are not of the same number, it is not possible for $\bar{a}d\bar{e}\dot{s}as$ to replace $sth\bar{a}nins$ in the order in which they are read.

पूर्वविप्रतिषेधार्थेन तावन्नार्थ आत्मनेपद्रमहणेन

It is not necessary that $\bar{a}tman\bar{e}pad\bar{a}n\bar{a}\tilde{n}$ ca should be read to serve the purpose of pūrvavipratiṣēdha.

इद्मिह सम्प्रधायम् - डारोरसः कियन्तां टेरेरेवमिति

This is here to be determined whether $d\bar{a}$, $r\bar{a}u$ and ras appear first or tē. itē and antē.

किमल कर्तव्यम् ? Which should be given precedence? परत्वादेत्वम् Etv m, being p ara, is to be given precedence.

नित्या डारोरसः । कृतेप्येत्वे प्राप्तुवन्त्यकृतेऽपि प्राप्तुवन्ति $D\bar{a}$, $r\bar{a}u$ and ras are nitya and they can appear both before ētva appears and after it.

देरेत्वमिष नित्यं, कृनेष्विष डारौरम्सु प्राम्नोति अकृतेष्विष प्राम्नोति । Etva to ti also is nitya; for it can appear both before dā, rāu and ras appear and after them.

अनित्यमेत्वम् । अन्यस्य कृतेषु डारारस्यु प्राप्ताति, अन्यस्य अकृतेषु प्राप्ताति । शब्दान्तरस्य प्राप्त्रवन्तिधरनित्यो भवति ।

Etva is anitya since it has a chance to appear in one place where $d\bar{a}$, $r\bar{a}u$ and ras have appeared and in another place where they have not. The vidhi which operates in one place and which does not operate in another place is anitya.

डरौरसोऽप्यनित्याः, अन्यस्य कृते एत्वे प्राप्नुवन्ति अन्यस्य अकृते । शब्दान्तरस्य च प्राप्नुवन्तोऽनित्या भवन्ति ।

 $P\bar{a}$, $r\bar{a}u$ and ras too are anitya, since they appear both where $\bar{\epsilon}tva$ has already set in and where $\bar{\epsilon}tva$ has not set in. The vidhis which operate in one place and which do not operate in another are anitya.

उभयोरनित्ययोः परत्वादेत्वम् । एत्वे कृते पुनःशसङ्गविज्ञानाद् डाराैरसो मविष्यन्ति ।

Since both are anitya, ētva, being para, operates. After ētva has appeared, ḍā, rāu and ras appear through punaḥprasaṅgaijñāna.

समसङ्ख्यार्थेन चापि नार्थ आहमनेपद्महणेन । स्थानेऽन्तरतमेन व्यवस्था भविष्यति । There is no need to read Atmanēpadānāñ ca for the sake of samasankhyā. The correct ādēša is decided on the dictum Sthānēsntaratamah.

कुतः आन्तर्यम् 🖁

From which aspect is similarity to be reckoned?

अर्थतः । एकार्थस्येकार्थः, व्यर्थस्य व्यर्थः, बहुर्थस्य बहुर्थः

Through meaning. Singular replaces the singular, dual, the dual and plural, the plural.

अथ वा आदेशा अपि पटेव निर्दिश्यने Or the ādēsas too read here are six.

कथम् ? How?

एकशेषनिर्देशात् । एकशेषनिर्देशोऽयम्

Since it is taken to be $\bar{e}kaś\bar{e}$ sa. This is read in $\bar{e}kaś\bar{e}$ sa form.

अथैतासिन्नेकशेषानिदेशे सित किमयं कृतैकशेषाणां द्वन्द्वो डा च डा च डा, रों चरों चरों, रश्च रश्च रः, डा च रों च रश्च डारौरस इति, आहोस्वित् कृतद्वन्द्वानामेकशेषः, डा च री च रश्च डारीरसः, डारीरसश्च डारीरसश्च डारीरस इति ? Is $d\bar{a}r\bar{a}urasah$ the dvandva of $\bar{e}ka\dot{s}\bar{e}sa$ formed thus:- $d\bar{a}$ ca $d\bar{a}$ ca đã, rāu ca rāu ca rāu, raś ca raś ca raḥ, đā ca rāu ca raś ca $dar{a}rar{a}urasah$ or the $ar{e}kasar{e}sa$ of the dvandva formed thus- $dar{a}$ ca rāu ca ras ca ḍārāurasaḥ, ḍārāurasas ca ḍārāurasas ca ḍāraurasah?

किं चात: ? What is the difference if it is either?

यदि कृतैकशेषाणां द्वन्द्वः, अनिष्टः समसङ्ख्यः प्राप्नोति । एकवचनद्विवचनयोर्डा प्राप्तोति, बहुवचनैकवचनयो रै। प्राप्तोति, द्विवचनबहुव्चनयोश्च रस् प्राप्तोति । कृतद्वन्द्वानामेकशेषः, न दोषो भवति ।

If dvandva follows ēkaśēṣa, there is chance for undesirable $samasankhy\bar{a}$ thus: $-d\bar{a}$ will replace singular and dual termination, rāu plural and singular termination and ras, dual and plural termination. If ēkaśēṣa follows dvandva, there will be no defect.

यथा न दोषस्तथास्त

Let it be taken in the way which is unquestionable.

किं पुनरत्र ज्याय:? Which is better here?

उभयमित्याह । उभयं हि दृश्यते, वहु शक्तिकिटकं, वहूनि शक्तिकिटकानि; वहु स्थार्लीपठरं, वहूनि स्थार्लीपठराणि !

Both, says he. For both are current :- Baku śaktikitakam and bahūni šaktikitakāni; bahu sthālīpitharam and bahūni sthālīpitharāni.

अथवा आन्तर्यतो व्यवस्था भविष्यति । आन्तर्याद् एकार्थस्येकार्थः, द्यर्थस्य द्यर्थः, वहर्थस्य वहर्थ इति ।

Or the decision can be made through their similarity — singular in place of singular, dual in place of dual and plural in place of plural.

डारीरसः कृते टेरे यथा द्वित्वं प्रसारणे । समसङ्ख्येन नार्थोऽस्ति सिद्धं स्थानेऽर्थतोऽन्तरः ॥ आन्तर्यतो व्यवस्था त्रय एवेमे भवन्तु सर्वेपाम् । टेरेत्वं च परत्वास्कृतेऽपि तस्मिन्निमे सन्तु ॥

The above two $\$l\bar{o}kav\bar{a}rttikas$ contain the ideas already dealtwith and perhaps belong to another $V\bar{a}rttikak\bar{a}ra$.

Π

डाविकारस्य शित्करणं सर्वादेशार्थम्

Need to read the ādēśa dā as dāś for sarvādēśa.

डाविकारः शित् कर्तव्यः

The ādēśa đā should be read with s as it.

किं पयोजनम्? Why?

सर्वादेशार्थम् - शित्सर्वस्य इति सर्वादेशो यथा स्यात् । अकियमाणे हि शकारे अलोन्यस्य विधयो भवन्तीति अन्त्यस्य प्रसज्येत ।

For the sake of sarvādēša. So that it may replace the whole by "... šit sarvasya" (1, 1, 55). Otherwise, it will replace only the final letter by Alontyasya.

निघातप्रसङ्गस्तु There is chance for nighāta too.

निघातस्तु प्रामोति । श्वः कर्ता, तासेः परं लसार्वधातुकम् अनुदात्तं भवती-त्येप स्वरः प्रामोति ।

It may take anudātta-svara. Ā in kartā of svah kartā will become anudātta by Tasyānudāttēt ... lasārvadhātukam anudāttam ... (6, 1, 186).

यचावदुच्यते टाविकारस्य शिःकरणं सर्वादेशार्थमिति Firstly with reference to the statement Pāvikārasya sitkaraņam sarvādītārtham.

सिद्धमलोडन्त्यविकारात

The object is achieved even if the $\bar{a}d\bar{e}^{\dot{s}a}$ replaces the antya.

सिद्धमेतृत् This is accomplished.

कथम? How?

अलोऽन्त्यविकारात् । अस्त्वयमलोऽन्त्यस्य

By the $\bar{a}d\bar{e}\dot{s}a$ replacing the final letter. Let the $\bar{a}d\bar{e}\dot{s}a$ replace the final letter.

का रूपसिद्धिः ? What is the form secured?

दर्ता Kartā.

िंदित टेलोंपाह्लोपः Ta may be elided since ti elides before dit.

डिति टेर्लेपेन लोपो भविष्यति

 $Lar{o}pa$ of ta may take place on account of the elision of tibefore dit.

अमत्वान प्राप्नोति

The sūtra Țēḥ (6, 4, 143) does not operate since the stem is not bha.

डित्करणसामध्यीद् भविष्यति

It (the $l\bar{o}pa$ of $\dot{t}i$) takes place on account of the $s\bar{a}marthya$ of ditkarana.

अनिन्वाद्वा Or on account of its not getting the designation it.

अथ वा अनित्राद् एतत् सिद्धम्

Or this is accomplished on account of its not getting the designation it.

किमिद्मनित्त्वादिति ? What is conveyed by anitvat?

अन्त्यस्य अयं स्थाने भवन्न प्रत्ययः स्यात्; असत्यां प्रत्ययसंज्ञायामिरसंज्ञा न; असत्यामित्संज्ञायां लोपो न, असति लोपे, अनेकाल्; यदा अनेकाल् तदा सर्वादेशः; यदा सर्वादेशः, तदा प्रत्ययः; यदा प्रत्ययः, तदा इत्संज्ञा यदा इत्संज्ञा; तदा लोपः ।

That which replaces the final of a pratyaya cannot itself be a pratyaya; if it is not a pratyaya, there is no chance for it-sanij $n\bar{a}$; in the absence of it-sanij $n\bar{a}$, there is no elision; it is $an\bar{e}k\bar{a}l$, if there is no elision; there is $sarv\bar{a}d\bar{e}s$ on its being $an\bar{e}k\bar{a}l$; it gets the designation pratyaya, when there is $sarv\bar{a}d\bar{e}s$; it gets $itsanij\bar{n}\bar{a}$, as soon as it gets the designation pratyaya; there is $l\bar{o}pa$ on its getting $itsanij\bar{n}\bar{a}$.

प्रशिष्टिनिर्देशाद्वा Or by taking it to be praślista-nirdéśa.

अथ वा प्रिष्ठिष्टिनिर्देशोऽयम्, डा आ डा । सः अनकोल् शिस्सर्वस्य इति सर्वादेशो भविष्यति । यदा तर्हि अयमन्त्यस्य स्थाने भवति तदा तिङ्गरुणेन प्रहणं न प्रामोति ।

Or this is praśliṣṭanirdēśa (i.e.) $d\bar{a}$ stands for $d\bar{a}$ \bar{a} . It serves as $sarv\bar{a}d\bar{e}śa$ on the strength of the $s\bar{u}tra$ $An\bar{e}k\bar{a}l$ $\acute{s}it$ sarvasya. If it appears, on the other hand, in place of antya, it cannot be called $ti\bar{u}$.

तिङ्ग्रहणमेकदेशविक्रतस्थानन्यत्वात्

It gets the designation tin on the dietum Ekadēsavikrtam ananyavad bhavati.

एकदेशविकृतमनन्यवद्भवतीति तिङ्गहणेन ग्रहणं भविष्यति । lt gets the designation tin on the dictum Ekadēšavikṛtam ananyavad bhavati.

सरः कथम् ? How is the proper svara secured ?

खर विश्रतिषेधात सिद्धम्

The proper svara is secured through vipratisidha.

इदिमिह् सम्प्रधार्यम् - टारीर्सः क्रियन्ताम्, अनुदात्त्वम् इति
This has to be decided whether the addisas da, rau and ras
precede the anudattatra of tip or succeed.

दिगत्र पर्नेत्यम् ? What is to be done here?

प्राचारचुप्राधान्य, Anudottatea, being para, should precede it.

ĀHNIKA TWENTYEIGHT—LUŢAḤ PRATHAMASYA ÞĀRĀU ... 217

नित्या डारौरसः, कृतेऽप्यनुदात्तत्वे प्राप्नुवन्त्यकृतेऽपि प्राप्नुवन्ति $Dar{a}$, $rar{a}u$ and ras are nitya, since they appear whether

anudāttatva has set in or no. अनुदात्तत्वमपि नित्यं, कृतेष्वपि डारौरस्सु प्राप्तोति, अकृतेष्वपि प्राप्तोति । Anudāttatva, too, is nitya, since it chances to appear both before $d\bar{a}$, $r\bar{a}u$ and ras set in and after they have set in.

अनित्यमनुदात्तत्वमः ; अन्यस्य कृतेषु डारौरस्सु प्राप्नोति, अन्यस्याकृतेषु ; शब्दान्तरस्य च प्रामुत्रन्विधरनित्यो भवति ।

Anudattatva is anitya. It has a chance to operate both when $d\bar{a}$, $r\bar{a}u$ and ras make their appearance in others or not. dietum is Śabdāntarasya ca prāpnuvan vidhir anityō bhavati.

डारीरसोऽप्यनित्याः; अन्यथास्वरस्य कृतेऽनुदात्तत्वे प्राप्नुवन्ति, अन्यथा स्वरस्य अकृते । स्वरभिन्नस्य च प्राप्नुवन्तोऽनित्या भवन्ति ।

 $D\bar{a}$, $r\bar{a}u$ and ras too are anityas. They operate both when anudattatva replaces one svara and it does not do so. Those that operate with reference to different svaras are anityas.

उभयोरप्यनित्ययोः परत्वादनुदात्तत्वम् । अनुदात्तत्वे कृते पुनःप्रसङ्गविज्ञाना-

Both being anitya, anudāttatva sets in, being para. ङ्घारैरासः । anudātta appears, dā, rāu and ras make their appearance by punaḥ-prasa hga-vijñā na.

टिलोपे उदाचिनवृत्तिस्वरेण सिद्धम्

At the elision of the final syllable, it is achieved by udattanivrttisvara.

न सिध्यति It is not achieved.

, किं कारणम् ! Why?

अन्तरङ्गत्वाङ्चारौरसः

Pā, rāu and ras operate first, they being antaranga. तत्रान्तरङ्गत्वाड्डारोरस्तु कृनेप्वनुदात्तत्वं कियतां टिलोप इति ।

After $D\bar{a}$, $r\bar{a}u$ and ras operate being antaranga, which appears earlier, anudattatva or tilopa?

किमत्र कर्तव्यम् ? What is to be done here?

परस्वाद्धिलोपेन भवितव्यम् $Til\bar{o}pa$ is to precede, since it is para.

एवं तर्हि स्वरविपतिषेधात्सिद्धम् । न्याय्य एवायं स्वरे विप्रतिषेधः

If so, the object is achieved by srara-vipratisēdha. It is but legitimate to have vipratisēdha with reference to svara.

इदिमह सम्प्रधार्यम् - अनुदात्तत्वं कियताम्, उदात्तिनृत्तित्वर इति
This has to be decided whether anudāltatva is to precede
udāļtanivṛttisvara.

किमन्न कर्तव्यम्? What is to be done here?

परत्वादनुदात्तत्वम्

Anudattatva should precede, it being para.

अनुदात्तत्वे कृते पुनःप्रसङ्गविज्ञानाद् उदात्तनिवृत्तिस्वरो भविष्यति । After Anudāttatva operates, udāttanivṛttisvara may set in by punaḥprasaṅgavɨjñāna.

तदेतत् क सिद्धं भवति ! Where will this be achieved ? यत् पिद्वचनम् Where it is read pit.

यदिपद्वचनं तत्र न सिध्यति ?

Is it not achieved where it is not read pit?

तत्रापि सिद्धम् It is achieved there too.

कथम्! How?

इदमच लसार्वधातुकानुदात्तत्वं प्रत्ययस्वरस्यापवादः । न चापवादिविपये उत्सर्गोऽभिनिविशते । पूर्वं द्यपवादा अभिनिविशन्ते पश्चादुत्सर्गाः, प्रकल्प्य वापवाद-विषयं तत उत्सर्गोऽभिनिविशते ।

The sūtra Tāsyanudāttēn ... lasārvadhātukam anudāttam anhvināḥ (6, 1, 186) enjoining anudāttatva to dā etc. is the apavāda to the sūtra Ādyudāttas ca (3, 1, 3) enjoining anudāttatva to the pratyaya. Utsarga does not operate where the apavāda is to operate. First do apavādas operate and then only do utsargas. Or utsarga operates after reserving room for apavāda.

तन्न तावदत्र कदाचित् प्रत्ययस्वरो भवति अपवादं स्रसार्वधातुकानुदात्तत्वं प्रतीक्षते । तत्रानुदात्तत्वं कियतां लोप इति, यद्यपि परत्वाल्लोपः, सोऽसावविद्यमानो-दात्तत्वे अनुदात्ते उदात्तो छुप्यते ।

Protyayasvara does never set in and expects the apavāda lasārvadhātukānudāttatva to operate. The question arises whether anudattatva is to operate or lopa. Even though there is chance for lopa, it being para, the udatta elides giving room to anudattatva secured by the absence of udattatva.

प्रत्ययस्वरापवादो लसार्वधातुकानुदात्तत्वम् । तेन तत्र न प्रसक्तः प्रत्ययस्वरः कदाचित् ॥ प्रत्ययस्वरश्च तासेर्वृत्तिसंनियोगशिष्टः । तेन चाप्यसावुदाचो लोप्स्यते तथा न दोषः ॥

The above are the two ślokavārttikas containing the ideas mentioned above.

Ahnika Twentyeight ends.

(Second $adhyar{a}ya$, fourth $par{a}da$, second Ahnika ends) Volume VI ends.
